VENDOR INFORMATION

ALPHA CENTAURI ALPACAS

Alpha Centauri Alpacas is a multi-award winning stud established in 2002

After almost 30 years combined service in the Australian Army, Andrew and Bronwyn established Alpha Centauri Alpacas in 2002. Andrew has held the position of AAA National President, President of the AAA Southern NSW Region and other committee positions and was a member and Chair of the AAA Fibre Market Development Reference Panel.

Andrew is one of only a handful of qualified Professional Alpaca Wool Classers and has been very actively involved in the collection and classing of alpaca fibre for both Australian and international clients. Andrew is lucky enough to have his hands on over 100,000kg of both Huacaya and Suri fibre annually.

Andrew and Bronwyn have managed their alpacas on properties in NSW and whilst currently residing overseas in France due to Andrew's work commitments they still own their 175 acre farm at Warrenbayne in Victoria. With a current breeding herd of over 100 alpacas consisting of both Huacaya and Suri. Our stud is consistently rewarded for our efforts at both regional, Royal and National Shows for animals and fleeces

Andrew and Bronwyn are both AAA accredited judges and between them have been fortunate to have judged many of our top shows in every state in Australia. We feel extremely privileged every time we have the opportunity to judge both animals and fleeces and we are excited by the continued advancements in the quality of both.

Many of our alpacas in this catalogue are show quality stock from our best bloodlines. We hope you find something within the following pages of interest to add to your own herd and breeding programme.

Alpha Centauri Alpacas is currently managed by Whispering Gums Alpacas at Inverleigh in Victoria.

We thank Darren and Emma for the great job that they are doing moving our breeding forward whilst we are overseas.

Our Breeding Philosophy

By careful selection of alpacas with exceptional genetic backgrounds we produce quality alpacas with breeding predictability and sound conformation, growing a distinctive fleece which is highly sought after in both the breed and commercial fleece industries.

VENDOR INFORMATION

WHISPERING GUMS ALPACAS

Whispering Gums Alpacas like many studs/breeders before us started with pet alpacas. These marvellous animals captivated us from the moment they arrived on the property. From here, being totally intrigued by these majestic animals our herd slowly grew and before we knew it we had 30 alpacas in our small herd.

Our passion for these animals set us on a journey to learn more. We were introduced to breeding by fellow alpaca lovers and have been guided and mentored along the way by some very knowledgeable and passionate breeders. To them we are forever grateful.

Realizing we were outgrowing our 6 acre property we moved the family and the herd to " Bundara View " a truly beautiful property of 140 acres on the Leigh River Valley in Inverleigh.

A successful breeding program and the extra space has allowed us to realise our dreams of establishing a quality alpaca herd. With our numbers on farm now over 200 we are now in a position to offer for sale selected foundation and on farm bred animals from the Whispering Gums Herd.

Lot 1

WYTERRICA WACHUA

Solid Dark Fawn Huacaya Female

IAR 173121 • DOB 14/05/11

Blue Grass Waterloo Sunset

Millduck Horatio

Sire: Wyterrica Propaganda
