# Blyth

## MERINOS

*tomorrow's sheep today*

**Blyth Merino stud is dedicated to breeding profitable, dual-purpose sheep that produce more wool, more lambs and more meat. Our wrinkle-free, easy-care and high fertility sheep are bred to perform in a range of environments and seasonal conditions.**

### **HIGH WOOL YIELD**

Blyth Merinos produce high yields of fine wool. Our mature ewes produce 6.5 to 7kg fleeces of exceptionally white and soft wool with a fibre diameter of 18.5 to 19 microns. We select for wool that has a deep, bold crimp to cope with high rainfall and has a high comfort factor.

### **HIGH FERTILITY**

Blyth Merino stud has been selecting for a balanced ration of eye muscle and fat depth for more than 30 years. This focus has significantly improved survival and weaning rates. We routinely achieve weaning rates of 120-140%, while our hogget ewes routinely achieve weaning rates of 100-115%.

### **HIGH MEAT YIELD**

Blyth Merino sheep produce heavy, high yielding carcasses that readily achieve prime lamb market specifications. Many of our young rams are in the top 10% of MERINOSELECT breeding values for yearling weight, fat depth and eye muscle depth.

## WRINKLE-FREE SHEEP

After many years of careful selection for plain-bodied sheep with a wide, flat back, bare breech and an open face, we have successfully bred a flock of wrinkle-free sheep that are easy to shear and less susceptible to fleece rot and blowfly strike. We stopped mulesing our lambs in 2008. The incidence of blowfly strike in our flock is extremely low.

## EASY-CARE & ROBUST

Blyth Merinos are easy-care sheep that are capable of thriving in a range of environments and seasonal conditions. Our properties range from alluvial flats right through to steep hills, while the climate varies from very cold winters to hot, humid summers. Sheep that don't have to be mulesed, are easy to shear and can cope with seasonal challenges making wool and lamb production more rewarding - and more profitable.

## ABOUT BLYTH MERINOS

Ron and Cheryl Blyth run about 1800 stud and 3000 commercial ewes on 'Bobacumbola' and 'Parkley' near Adelong in southern NSW. The long-term average rainfall is about 760mm (30"). The Blyth flock is classed by Ron Blyth with the assistance of Elders' District Wool Manager, Tim McMeekin and Jim Gordon from 'Glensloy', Young NSW.

# Understanding MERINOSELECT Australian Sheep Breeding Values

Blyth Merinos has participated in the MERINOSELECT genetic evaluation system since its inception. Our breeding values for fleece weight, fibre diameter, fibre density, fibre length, yearling body weight, and eye muscle depth are all well above the national averages.

MERINOSELECT was developed by Meat & Livestock Australia and Australian Wool Innovation Limited.

YCFW	Yearling Clean Fleece Weight	Rams with <b>higher</b> ASBV's will produce progeny with heavier fleeces.
YFD	Yearling Fibre Diameter	Rams with <b>lower</b> ASBV's will produce progeny with finer wool.
YFDCV	Yearling Fibre Diameter Coefficient of Variation	Rams with <b>lower</b> ASBV's will produce progeny with less variation in fibre diameter.
YSL	Yearling Staple Length	Rams with <b>higher</b> ASBV's will produce progeny with longer fibre length.
YSS	Yearling Staple Strength	Rams with <b>higher</b> ASBV's will produce progeny with stronger wool.
CURV	Curvature	Rams with <b>higher</b> ASBV's will produce progeny that have more crimp.
YWT	Yearling Weight	Rams with <b>higher</b> ASBV's will produce progeny that grow quicker and are heavier at a certain age.
YFAT	Yearling Fat Depth	Rams with <b>lower</b> ASBV's will produce progeny with leaner carcasses.
YEMD	Yearling Eye Muscle Depth	Rams with <b>higher</b> ASBV's will produce progeny that have more muscle (independent of weight) and a higher lean meat yield.
NLB	Number of Lambs Born (%)	Rams with <b>higher</b> ASBV's will produce daughters that give birth to more lambs.
NLW	Number of Lambs Weaned (%)	Rams with <b>higher</b> ASBV's will produce daughters that wean more lambs.
SC	Scrotal Circumference (cm)	Rams with <b>higher</b> ASBV's will produce daughters that are more fertile.
YBWS	Yearling Breech Wrinkle Score	Rams with <b>lower</b> ASBV's have less wrinkles (1 = completely free of breech wrinkle, 5 = extreme wrinkle)
FP+	Fibre Production Plus	This index ranks rams on their ability to produce Merinos for a wool production operation. It is calculated using fleece weight, fibre diameter, fibre diameter variation, staple strength, body weight and number of lambs weaned.
MP+	Meat Production Plus	This index ranks rams on their ability to produce Merinos for a fine wool operation that has significant surplus sheep sales. It is calculated using fleece weight, fibre diameter, fibre diameter variation, staple strength, curvature, body weight and worm egg count.
DP+	Dual Purpose Plus	This index ranks rams on their ability to produce Merinos for a dual-purpose operation. It is calculated using fleece weight, fibre diameter, fibre diameter variation, staple strength, body weight, eye muscle depth and number of lambs weaned.

# HEALTH STATUS OF YOUR NEW RAM

Your Blyth Merino ram has been well fed and cared for at 'Bobacumbola' and 'Parkley', Adelong, NSW. He is accredited brucellosis-free, footrot-free and has received the following animal health and nutritional inputs:

- 1 A 6-in-1 vaccine and booster shot to protect against Cheesy Gland and five common clostridial diseases.
- 2 Gudair® vaccine to protect against Ovine Johne's Disease.
- 3 Avomec® Duel (ivermectin + closantel) drench three months before sale.
- 4 A grain supplement throughout winter so that he is ready for work in spring.

# CARING FOR YOUR NEW RAM

To keep your Blyth Merino ram in top condition, we recommend:

- 1 Shear every six months.
- 2 Drench regularly.
- 3 Administer a 6-in-1 booster vaccine every year.
- 4 Treat head with CLiK® or CLiK EXTRA to protect against poll strike.
- 5 Supply ad-lib access to cracked lupins and green lucerne six weeks before joining.
- 6 Keep paddocks clean of grass seeds.
