Auction:

On-Property and interfaced with AuctionsPlus

(4% to outside agents)

Written introduction prior to sale applies.

COVID-19:

Please be aware that we are obliged to abide by the current COVID-19 rules, regulations and restrictions on sale day. Please take care.

Disclaimer:

The information in this catalogue has been prepared and completed to the best of our ability. Coolawang will apologise for any errors but will not be held accountable for any errors or omissions contained in this catalogue.

Welcome

Dear fellow sheep breeders

We are proud of the quality of the 200 rams we will present for sale. They are backed by 42 years of stud breeding experience, plus rigid testing within our own commercial breeding program.

This year we will continue to offer all of our stud rams at our annual sale. This year, we have included 15 Selected Stud Ewes to broaden the sale offering and to compliment the Selected Stud Rams. These will be auctioned off prior to the rams (despite being lotted last in the catalogue). The quality of the rams on offer continues through right to the last lot.

We invite your inspection and encourage your feedback and honest assessment of our Coolawang Border Leicesters. We look forward to catching up with you and answering any queries you may have on our stock.

The James Family

MANAGEMENT OF YOUR NEW RAM

We have done our best to present the best of our annual draft of naturally reared, structurally sound rams for your selection. We undertake a program to provide sheep sold from this property free from Brucellosis and Ovine Johne's Disease. Rams are treated with Extinosad at shearing. Rams were vaccinated with Virbac Multimin to aid in the rams development as a productive sire.

From now on his management is very much your concern and will influence what his productive life will be in your breeding program. We wish you every success with your purchase, and being personally interested in his future we suggest;

That you insure your ram(s) for the next six months. He will be more susceptible to injury, death and loss of use in this time, than in any other period in his lifetime.

Place him in a secure paddock away from other rams and unjoined females until mating. Be aware that Brucellosis can be transmitted to rams from recently joined females, as well as sexually active males.

Border Leicester Rams are sold with at least three months wool to show fleece quality to a purchaser. Depending on your mating time shearing should be considered as rams work better with shorter wool. Flystrike and grass seed problems would be minimised.

Do not overwork him in his first season. Preferably put him with older ewes.

After use, treat him well. He is your investment for future years.

Maintain a drench and vaccination (Glanery 7 in 1) program. Provide good nutrition and regular physical examinations to help ensure a long productive life.

Coolawang's first cross ewes at the Naracoorte Feature First Cross ewe sale in 2021 were awarded the best presented pen for the twelfth time. The pen selling for a new Aust record of \$538 to Guthrie farms of Dean Victoria.

SA border Leicester President Mark Grossman, Lachie James with daughter Florence and judge Michael Allen of Warrawee Park Keith.

COOLAWANG DRENCH RESISTANCE STATUS

Last year we were able to undergo another drench resistance trial. Over the last few year there has been attempts made however low counts have not made it possible to complete trials.

This years trial showed some reduction in efficacy for Whites, Abamectin and Moxidectin for *Ostertagia*. Numbers of *Trichostrongylus* and *Haemonchus* have been to low to retest in recent years. Previous results indicate very high efficacy of all drench classes against these worm species. A drench is still regarded as effective if it achieves a 95% reduction in faecal egg counts.

Each young ram had a faecal sample taken in July to provide an ASBV for WEC that is in this catalogue.

I wish to acknowledge the efforts and assistance that Colin Andrews of Elanco has given us over the years in understanding and maintaining our drench program. For assistance Colin can be contacted on 0429 000 786.

Understanding Lambplan FEC (or WEC) ASBVs.

The breeding value for worm egg counts used in the Lambplan Data is read the following way.

A value of -26% is average and the higher the negative the better. To be in the top 15% for maternal breed flocks using Lambplan -53% is needed.

HEALTH STATUS

Brucellosis Accredited No: 589 - Expiry: 31st December 2024

Ovine Johnes Disease MAP MN3V No: S263 - Expiry: 27th July 2023

Our current status is MAP MN3V. Our intention is to provide the highest possible standards for the purchasers of Coolawang rams. We remain committed to the MAP with Gudair vaccination also part of our program.

The rams were shorn on the 8th July and were vaccinated with Glanery 7 in 1 B12 and were also treated with Extinosad. All sale rams will be given another 6 in 1 B12 and a Multimin prior to sale. The drench program will also include a Zolvic Plus drench prior to sale.

NUTRITIONAL MANAGEMENT OF YOUR NEW RAM

We encourage purchasers of stud and flock rams to discuss the post sale management of your new ram's nutrition with us.

Should their diet include hay or grain we believe that a protein level should not exceed 12% and a level closer to 10% would be better.

Good quality cereal have will provide enough roughage especially when a 100 grams of lupins every other day is included in the ration.

Over feeding with a high protein diet can lead to lower semen quality and can result in infertility which can take at least six weeks and quite often longer to reverse.

Adequate shade prior to and including mating also assists in maintaining semen quality. An extended period of heat (ie a week in the high 30s) can also reduce semen quality.

As well as diet the shedding of stud rams can also provide a risk to semen quality if ventilation is poor and especially if there is a build up of manure below grating. Excessive ammonia buildup has the same effect on semen quality as high protein diets.

Royal Adelaide Show 2019

Coolawang 177/18

Trevor and Lachie with judge, Ian Gilmore, NSW.

Longwool Champion Ram
Champion Border Leicester Ram
Junior Champion Border Leicester Ram
1st - Objective Measurement Class
Best Border Leicester Head
2nd Interbreed Pen of Three Rams

Retained in stud and has impressive lambs
on the ground.

ASBV INFORMATION

This year Sheep Genetics are solely using BLX index instead of offering the Maternal Index as in the past.

The NLW ASBV has been changed to WR (weaning ratio) as the reproductive measure.

With the low accuracy of WR AT 25% TO 30% we feel that the ASBV has a disproportionate effect on the BLX when compared to the other breeding values of much higher accuracy. We will therefore not include WR and BLX at this point.

Because of the changes the many of the breeding values are very different to the levels we are familiar with so comparing previous years data may be confusing.

The intention is to provide ASBV's that you will find useful and hopefully read in isolation more easily understood. We have also added AWT (Adult weight) as the weight of mature age sheep is now of more interest.

As usual we are providing raw data with wool microns. This year the rams will be reweighed and scanned within two weeks prior to sale so that raw data for weight, fat and eye muscle depth is available.

ZOLVIX™ PLUS

SHEEP

THE FIRST CHOICE WEANING AND SUMMER DRENCH

Your sheep need the best protection against worms for optimal health and performance. Zolvix Plus is the only combination drench that delivers the power of monepantel. Its unique mode of action provides >99.9% efficacy against a broad spectrum of internal parasites, including single, double and triple resistant strains.^{1,2} Its **new 21-day Export Slaughter Interval** is the lowest of any combination drench containing abamectin, making Zolvix Plus the first choice weaning and summer drench. Always read and follow the label directions.
