24th ANNUAL RAM SALE

DERRYNOCK POLL DORSET STUD

Flock No. 1143 Founded 1965

Thursday, 13th October, 2022 at 1.00 pm
Inspection welcome from 10.00am, (BBQ luncheon provided)

Sale offering... *40 ewes*

13 - pens of three, 2021 drop, to be sold individually.

...130 Poll Dorset rams

30 select single pens

50 pens of two

...76 Maternal rams

38 - pens of two

Vendor...

Agent...

Elders – Kyneton VIC

- 5% rebate to outside agents in attendance, settling on behalf of clients.

NOTE: - **auction plus** will be available for **all** sale lots (including video)

- phone bidding available (please inquire).

DERRYNOCK IS:

MONITORED NEGATIVE Three Vacc FOR OVINE JOHNES

BRUCELLOSIS ACCREDITED FREE

LAMBPLAN PERFORMANCE RECORDED

FOOTROT FREE

(Covid-19 restrictions & guidelines at the time of sale will be followed)

PLEASE BRING CATALOGUE TO SALE

** Commercial Focus – Commercial Results **

FLOCK HISTORY

Derrynock is located at East Trentham, 20 kms South of Kyneton. The stud was founded in 1965 on Yenong and Yaralla bloodlines with the aim of breeding sound rams exhibiting the attributes of loin-length and muscling, so important for the commercial industry.

In later years selection has incorporated the use of LAMBPLAN figures. For this reason, Thurlstone 295-94 and the 'Doctor', Greyhome 42-95 (AI) were used. Both rams were structurally correct with clean faces and excellent figures. Sons of these rams, including D22, and D42 formed an integral part of the breeding program. The addition of Kurralea 5 Star gave a new element to our breeding with the ultimate combination of elite performance figures and impeccable type and structural soundness.

For the benefit of our stud and our clients we have retained our MN3 (Monitored Negative Three) Johnes status, and have vaccinated again. Therefore, to ensure we remain Johnes Free and retain our status (MN3v), we will not be selling rams at any other sales in 2022.

Derrynock continues to focus its breeding decisions on the economically important traits of prime lamb production. We are striving to breed length in the loin and maximise muscling in the hindquarter, while increasing growth rates, and maintaining leanness. We hope these will be the successful ingredients for high yielding lambs, hence, maximising productivity and profits in the modern prime lamb industry.

LAMBPLAN

- understanding genetic improvement

Top 1%	Animals ranks in the top 1% for that trait.
Top 5%	Animals ranks in the top 5% for that trait.
Top 10%	Animals ranks in the top 10% for that trait.
Top 20%	Animals ranks in the top 20% for that trait.

Birth Weight (bwt) – describes the genetic merit for weight at birth a + ASBV means the progeny will be genetically heavier at birth.

Growth (wwt) – weaning weight 100 days (pwwt) – post weaning 200 days
– describes the genetic merit for growth rate. a + ASBV means the animal is genetically faster growing

Fat (pfat) – describes the value of genes for fat depth, at constant weight a – ASBV means a genetically leaner animal

Muscle (pemd) – describes the value of genes for eye muscle depth a + ASBV means genetically more meat i.e. (potentially better yield)

Faecal Egg Count (fec) – describes the value of genes for worm egg count, a – ASBV means an animal has a higher genetic resistance to worms. **Terminal av -25 eggs**

Gestation Length (GL) – describes the value of genes for gestation length a – ASBV means the gestation of a ram's progeny will be shorter. **Terminal av -0.15 days**

Also provided are LAMBPLAN Index values: this combines the ASBV's for growth, fat and eye muscle into a single measure of genetic merit. The Index's used in this catalogue are **TCP**:

- this index describes the value of the ram's genetics at 6 months of age (p=post weaning), and aims to improve Lean Meat Yield (LMY), while maintaining eating quality. **Terminal av – 138.0**

- TCP now included lambing ease. Please refer to Terminal Index updates in the back of the catalogue.

DESCRIPTION OF (AI) SIRES USED

Rangeview 65/19

bwt	wwt	pwwt	pfat	pemd	TCP
0.55	10.4	15.7	-0.5	2.6	148.7

An outcross sire, who has performed extremely well. His progeny have elite growth, great bone and good EQ data.

Old Woombi 425/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.20	10.7	17.5	-0.3	3.4	162.3

A unique sire combining low birth weight, and extreme early growth. His progeny are moderately framed with elite early maturity.

Old Woombi 135/12

bwt	wwt	pwwt	pfat	pemd	TCP
0.26	10.5	16.4	+0.8	2.4	148.5

This ram has low birth weight and Elite figures for IMF. He is the sire of Derrynock 156/19 who has been a great Trial performer!

Linton 625/16

bwt	wwt	pwwt	pfat	pemd	TCP
0.44	12.3	18.7	-0.2	2.6	162.3

This ram was selected for his super clean points, smooth shoulders, correctness and Eating Quality. He has bred very well, with excellent muscling and length. He is a trait leader for Shear Force, and in particular IMF.

Derrynock 28/17

bwt	wwt	pwwt	pfat	pemd	TCP
0.45	10.9	16.0	-0.9	1.8	156.7

An older ram that continually does the job. Breeding very correct progeny with good growth. Excellent outcross genetics for Eating Quality.

Jewsharp 14/15

bwt	wwt	pwwt	pfat	pemd	TCP
0.08	10.1	15.4	-0.2	4.7	160.1

A unique sire combining low birth weight, good early growth and extreme muscling.

Note: The birth type of the rams is represented in the ID as:

(t) – twin (tr) – triplet (q) – quad

DESCRIPTION OF SIRES USED

Derrynock 12/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.35	9.7	13.7	0.2	4.8	158.3

A great all-round performer. With a moderate birth weight, and a trait leader for GL, his sons are ideally suited to all ewe classes. One of the highest muscle rams ever produced at Derrynock.

Derrynock 33/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.91	10.9	15.3	-1.0	3.3	156.7

Top priced ram in his drop, with a freak carcass, combining length and depth. His sons are powerful and correct, with trait leading Eating quality.

Derrynock 171/19

bwt	wwt	pwwt	pfat	pemd	TCP
0.30	11.9	17.7	-0.7	2.0	154.3

A very correct son of D 28, with extreme growth and excellent structural soundness. He has very dense wool. Has elite genes for gL.

Derrynock 400/19

bwt	wwt	pwwt	pfat	pemd	TCP
0.13	10.2	14.9	0.0	5.0	162.6

Our top selling son of D 12. His sons are super clean, with lower birth weight and shorter GL and are ideally suited to the trade market.

Derrynock 57/20

bwt	wwt	pwwt	pfat	pemd	TCP
0.42	11.2	17.4	0.1	3.2	157.5

A standout son of L 625. His sons are very correct with great carcass shape. Trait leading genes for IMF.

Derrynock 405/20

bwt	wwt	pwwt	pfat	pemd	C+
0.28	10.2	15.7	0.0	3.8	154.6

A very correct and stylish son of D 400. His progeny exhibit his all-round balance and correctness, with great length and ease at lambing.

Special Note:

** Semen Share Retained**

Derrynock retains the right to collect semen, in any of the rams offered at auction. The semen is to be collected at Derrynock's expense, and at the convenience of the purchaser.

National Terminal Sire Average **9.5 14.5 -0.4 +1.8 138 111.0**

DESCRIPTION OF Maternal SIREs USED

Cloven Hills 188/17

- One of the most widely used maternal rams in Australia. Elite fertility and muscle, with a very low adult weight.

Cloven Hills 529/17

- A proven sire used for his lower birth weight and good all-round performance.

Cloven Hills 689/18

- Another proven performer with elite muscling, positive fat and good fertility.

Cloven Hills 709/19

- This ram has excellent early growth and weaning rate. Has been a successful sire for helping us breed a bare breech.

Cashmore 2440/19

- This ram has elite early growth, muscling and worm resistance. He has bred excellent type, with strength of bone and great length.

Cashmore 2507/19

- This sire has been a great outcross. He has elite growth, muscling, fertility and worm resistance. He is one of the highest ranked sires for MCP+.

(wr) – This is the last sale we will be able to report ynlw. It has been replaced with Weaning Rate (wr). Please refer to the explanation page at the end of the catalogue.

∞ = Symbol identifies rams that have been genomics tested

Charity Auction

100 % of the proceeds of [Lot 222](#), will be donated to:

The Power In You Project is a not for profit organisation supporting participants who voluntarily choose to engage. The project is based in Geelong, and is having great success in helping people affected by alcohol and other drugs to achieve lasting changes in their lives!!

Three entry points of support are offered: Disability and NDIS support, Justice clients and addiction support.

The Power In You Project uses a holistic approach to focus on the addictive patterns and behaviours that impede positive actions, relationships and lifestyles.

Updates to the Terminal Indexes

All the Terminal Indexes (TCP, EQ and LEQ) have been updated to include Lambing Ease

Sheep Genetics has updated all Terminal indexes to include the Lambing Ease (LE_DIR) ASBV. Lambing ease was included in the indexes as a way to address industry concerns around lambing difficulties and dystocia while having minimal impact on the rate of progress for growth and other important production traits.

LE_DIR is a trait that defines the genes a ram's progeny will have for easy birthing. A higher LE_DIR value is more desirable.

The overall objective of the indexes remains the same, with only the addition of LE_DIR. The objectives of each of the indexes are:

- TCP balances increased lean meat yield with modest improvements in eating quality
- EQ balances large improvements in eating quality with modest increases in lean meat yield
- LEQ balances large improvements in eating quality with modest increases in lean meat yield, and includes emphasis on worm egg

The addition of LE_DIR in the Terminal indexes and other analysis enhancements implemented by Sheep Genetics in 2022 have resulted in changes to ASBVs. This ram sale season it is important to re-benchmark using the latest percentile band table which can be accessed using the QR code below.

**Access Terminal Percentile
Band Table**

**For more information on
LE_DIR in indexes (pg 10)**

Updates to the Maternal Indexes

Number of Lambs Weaned (NLW) has been replaced by an improved ASBV called Weaning Rate (WR). This new ASBV has been included in the indexes for Maternal breeds.

Sheep Genetics has released a new trait that measures reproductive performance called Weaning Rate (WR). WR combines the traits of Conception (CON), Litter Size (LS) and Ewe Rearing Ability (ERA) into a single ASBV for selection. WR has been introduced to replace Number of Lambs Weaned (NLW) and has been included in the Maternal Carcase Production (MCP), Maternal Carcase Production Plus (MCP+), Maternal Wool Production Plus (MWP+) and Border Leicester Cross (BLX) Indexes.

As a result of the introduction and inclusion of WR in these indexes there have been changes in the percentiles. Other enhancements to the Sheep Genetics evaluations, have also resulted in changes to ASBVs, Indexes, and the percentiles. *Therefore, this ram sale season it is important to use the percentile band table to re-benchmark to inform your ram purchasing decisions.*

To access the current percentile bands table please use the QR code below of the left. For further information on Weaning Rate please use the QR code on the right and refer to page 4 of the Sheep Genetics 2022 Analysis Enhancement Documentation.

**Access the Maternal
Percentile Band Table**

**For more information on
Weaning Rate (WR)**
