Volume 4

Sale

SUMMIT
LIVESTOCK

Online Sale Closes 7pm
Tuesday 4th October 2022

AuctionsPlus

Welcome to the *Spring Selection Sale* Volume IV

What a year to be in the cattle business!

As the herd continues to rebuild, we are seeing strong demand for bulls and females across the country and strong commercial prices. Not only is it a terrific time to be in the beef industry but what a golden era we are entering for our Limousin breed. It has been evident across the country that our breed has much to offer the industry and we are seeing increased uptake in Limousin genetics across the commercial sector.

We would like to welcome you to the 4th edition of the Spring Selection Sale. We really appreciate the ongoing support of our friends and clients and thank you for your continued interest in our breeding program.

As part of our families' succession planning, the Summit herd will be moving to the Southern Tablelands in 2023. We've been given the opportunity to merge the Summit Limousin herd with our families Angus operation which will enable both registered cow herds to grow and ultimately allow us to expand our genetic offering in the future.

We are always looking for new ways to innovate and share our genetics with you so we are excited to include the FLUSH or the FACTORY concept as part of this year's unique sale offering. These fabulous five donor cows present an opportunity to access the very pinnacle of our breeding program. We are also offering a great set of replacement heifers and a quality selection of sound, productive mature cows.

We are always keen to provide other breeders with the opportunity to access sires of influence or new sires being utilized in our breeding program and are excited to offer these unique genetics on this year's sale.

We hope you appreciate the draft we have put forward for your selection and we look forward to earning your business.

Kind regards,

Hayden, Jasmine & Arthur Green

Limousin Australia website under Sale Catalogues.

Sale Details

The Spring Selection Sale IV will be held online via Auctionsplus (www.auctionsplus.com.au). Videos and photos of all lots will be available on the sale listing on Auctionsplus. Prior inspections are welcome by appointment with the vendors or their agents.

Lots will be sold via Helmsman Auction. The sale will open at **5pm AEDT on Tuesday 4th October and will run until 7pm AEDT that evening**, where the timer will then take control of the auction. When the auction opens, all lots are on the market simultaneously. You can bid on any lot, regardless of lot number.

Buyers Registration & Sale Conditions

Buyers will be required to register as a bidder on Auctionsplus. Please note, any first time users will need to complete the buyer induction which takes approximately 30 minutes to complete online. Please ensure you give yourself enough time to complete this prior to the sale.

Live lots will be sold on a per head basis. Genetic lots will be sold on per embryo/straw basis and will be multiplied by the number of embryos/straws offered in the lot. All sale lots are sold exclusive of GST. Please refer to page 5 regarding sale conditions for the Flush or the Factory lot(s).

If you require any assistance with using the online bidding system, please contact the selling agents, vendors or Auctionsplus team prior to the sale.

Insurance

Purchases become the responsibility of the successful buyer at the close of the auction. While all care will be taken by the vendors, we recommend buyers insure their purchases. Please contact the selling agents to arrange insurance.

Herd Health

Summit Livestock is JBAS score 6. All lots have been drenched & vaccinated with Ausmectin & 7in1.

Sale Catalogue Disclaimer - All reasonable care has been taken by the Vendor to ensure the information provided in this catalogue is correct at the time of publications. However, neither the vendor or agent make no representations about the accuracy, reliability or the completeness of any information provided in the catalogue, and do not assume any responsibility for the use, or interpretation of the information in this catalogue.

Supplementary Information

Supplementary sheets will be available via Auctionsplus with any updated information on the sale offering. All BREEDPLAN data published in this catalogue is from the August 2022 Limousin GROUP BREEDPLAN run. Where unavailable, EPDs from the North American Limousin Foundation or Canadian Limousin Association have been referenced.

Stud transfers

All animals are registered with the Australian Limousin Breeders Society. They are all eligible for transfer into the buyer's ownership. All purchasers of animals who require transfers will need to indicate this on their "Purchase Instructions".

Warranties

All live lots are offered under the terms & conditions of the Limousin Assurance Program.

Delivery

All live lots are located at Uranquinty, NSW. Delivery can be arranged from 5th October 2022. Please speak with either vendors or selling agents to arrange pick-up or transport. Delivery to Wagga Saleyards can be arranged if required. Live lots must be transported by the end of October, unless alternative arrangements have been made with the vendor. Please speak with Hayden or Jasmine.

All genetic lots are stored at Holbrook Breeders Australia, NSW. Shipping can be arranged by contacting Holbrook Breeders directly or by arrangement with Hayden.

We will endeavour to assist with organising transport to ensure you receive your purchases in the most cost-effective manner for you. Please speak with Hayden or Jasmine to arrange.

Explanation of Estimated Breeding Values

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

Calving Ease Direct: indicates the influence of the sire on calving ease. Sires with positive EBVs for calving ease will increase calving ease and sires with negative EBVs will decrease calving ease.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Eye Muscle Area: ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat: ranks animals for rib fat depth at the 12th rib on a 300kg carcass

Comparing EBVs

The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

LIMOUSIN GROUP BREEDPLAN	Breed Average EBVs for 2020 Born Calves																				
	CED	CEM	GL	BW	200	400	600	MC	MILK	SS	CWT	EMA	RIB	RMP	RBY	IMF	DOC	YPI\$	DMI\$	EMI\$	NEI\$
	+0.4	+0.7	-2.1	+1.7	+21	+35	+48	+49	+7	+1.1	+30	+1.7	+0.0	-0.2	+0.8	+0.0	+41	+\$45	+\$39	+\$64	+\$80

Accuracies

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

Rump Fat: ranks animals for fat depth at the P8 site on the rump on a 300kg carcass.

Intra Muscular Fat: ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Index values estimate the genetic difference (in relative earning capacity) between animals in net profitability per cow joined for a given market.

Yearling Prime Index: for a typical commercial herd targeting the domestic carcass trade targeting 200kg HSCW with 5mm P8 fat, with positive emphasis on ability to meet MSA specifications.

Domestic Maternal Index: for a typical self-replacing commercial herd targeting the domestic supermarket trade. Heifers are retained for breeding with steers finished on grass or short grain-fed program targeting 250kg HSCW with 8mm P8 fat at 15 months.

Export Maternal Index: for a typical self-replacing commercial herd targeting the heavy export trade. Heifer are retained for breeding with steers finished on grass or short grain-fed program targeting 330kg HSCW and 12mm P8 fat at 22 months.

Northern Export Index: for a typical commercial Bos indicus herd in Northern Australia targeting the export trade using Limousin bulls. All progeny finished on grass targeting 330kg HSCW and 12mm P8 fat at 27 months.

Flush or the Factory

We are excited to offer a unique genetic opportunity with the *“Flush or the Factory”* lots offered this year on the Spring Selection Sale.

The **winning bid is entitled to 1 flush** with a guarantee of 4 embryos with no upper limit. All flush costs are the responsibility of the purchaser and can be organised as soon as possible, taking into account the cows calving date and at the vendors convenience, with a mutually agreed technician.

The purchaser also has the right to buy the factory!
By multiplying the winning bid by 5, the purchaser will secure full possession and ownership of the respective lot(s) offered as the Flush or the Factory (lots 1-5).

Please note, the successful purchaser will be contacted at the close of the sale by the selling agents to confirm their selection as the flush or the factory (winning bid x 5).

This is a unique opportunity to access some of the breeds leading donors or even own them outright!

SON SUMMIT
BLUEPRINT M20

POLLED APRICOT DOB: 2/11/2012 HLGPH39 **Summit Meadowgrass 2149 H39**

FLUSH or the FACTORY - Meadowgrass H39 needs no introduction; Supreme Exhibit at the 2017 Sydney Royal Feature Show & Limousin Champion of the World winner. This cow is the most potent breeding cow we have had the opportunity to work with; She has bred several National Champions and multiple sons working as stud sires at the Raven, Goldstein Park, Riviere Vue, Limoges and LAS herds. H39 is the result of our search to source genetics from some of the top cow families in the world. H39 is a full sister to leading North American AI sire Wulfs Titus. We got the opportunity to flush the original Meadowgrass 2149M who phenotypically was one of Hayden's favorite cows in the Wulf herd. This is a cow family that has performed for generations but in our opinion, H39 may be the greatest of them all. Offered PTIC to calve late spring to HLGPR32.

Please note, this lot is offered as a FLUSH or the FACTORY lot. Please refer to page 5 for details.

WULFS FAITH 6501F

FLUSH or the FACTORY - MISSIVE J24 is one of Jasmine's favorites – she was Junior Champion at Sydney Royal 2015 and has been a very consistent breeder that really stamps her progeny with beautiful balance and correctness. She has bred several sons that have gone onto stud duties at Mandayen, Macorna, Rosewood and Manoora Park herds and her daughters are always standouts with exceptional udders. J24 is another of one that resulted from our search to secure some of the best cow families in the breed. In our opinion, her dam Missive 2258M was the number one breeding cow in the Wulf herd, raising several sale-topping sons including Xcellsior & Xclusive. Offered PTIC to calve Autumn to HLGPN49.

Please note, this lot is offered as a FLUSH or the FACTORY lot. Please refer to page 5 for details.

FLUSH or the FACTORY - KRYSTAL L35 combines an impressive phenotype with a great data-set with breed-leading indexes. L35 is the dam of the 2021 Sydney Royal Interbreed Champion Heifer Keajura Park Krystal Rose. She is also the full sister to Summit Masterplan L27, who was the walking herd sire at OSullivans Black Limousins and whose sons dominated the Spring 2022 selling season. L35 sons have sold for stud duties to Amber Park Limousins, Raven & Goldstein Park. If you are looking for a homo-black, homo-polled donor with breed-leading EBVs and impeccable breeding history, we believe L35 is unmatched. Offered PTIC to calve Autumn. AI bred to Goldrush; backed up to N49. **Please note, this lot is offered as a FLUSH or the FACTORY lot. Please refer to page 5 for details.**

FLUSH or the FACTORY - REAL MAGIC J51 is a beautifully natured cow with impeccable udder quality. This cow really defines the meaning of capacity. Her dam was a National Grand Champion Female in 2014. Her full brother was National Junior Champion Bull in 2015 and sold for stud duties to the Benika herd. J51 is always a crowd favorite and many believe she may be the pick of the cows in the Summit program.

Offered with a late-May red polled bull calf by Anchor B Gold Rush at foot. Cow is open and ready to flush. Please note, this lot is offered as a FLUSH or the FACTORY lot. Please refer to page 5 for details.

Summit Cauliflower J38

FLUSH or the FACTORY - J38 is continuing the legacy of the Cauliflower family at Summit Livestock. A daughter of F16 who topped the 2021 Spring Selection Sale, she displays many of the same attributes as her dam. She is an extremely sound footed and free-moving cow with huge capacity and tremendous udder quality. The Cauliflower cow line is renowned for their longevity and soundness. She has sold several high-selling daughters and is also a paternal sister to the National Champion and high-selling sire Summit Payday H28. Offered PTIC to HLGPN49 for an Autumn calf.
Please note, this lot is offered as a FLUSH or the FACTORY lot. Please refer to page 5 for details.

RUNL *Justified* 364 J

We are always on the search for new genetics to bring to our program. On our recent USA trip in June 2022, we found RUNL Justified 364 J who has been retained as a herd-sire at the Running Creek Ranch in Colorado and will be one of the highest used AI sires in the Running Creek operation next year.

Justified was selected from over 250 bull calves to represent the Running Creek Ranch as part of the Pen Show team at the National Western in Denver this year. He ranked 6th in his contemporary group for weaning (ratio 104) and 1st in his contemporary group for yearling weight (ratio 105) – an impressive achievement for a calf raised in North America’s largest purebred Limousin cow herd.

We believe Justified is a phenotypic standout, that will bring calving ease and short gestation with an impressive birth to growth spread; he is very reproductively sound with tremendous set of testicles and exceptional tight sheath. His EPD profile has 8 traits in the top 20% or better of the breed. This homozygous black, homozygous polled outcross sire brings a fresh pedigree, exceptional EPD profile and truly impressive phenotype so is certainly worth a look for your next breeding program. Don't miss this opportunity to advance your breeding program with this exclusive new sire.

We hope to have semen available in early November.

Easy Going is the new sleep-easy heifer bull! One of the top-selling bulls out of the Symens Brothers Limousin 2018 Sale, he provides a balanced homo-polled calving-ease option in an outcross pedigree.

His sire COLE Businessman was a stand-out on our USA herd tour in 2018 walking pastures at Symens Brothers in South Dakota. Based on progeny reports out of the US, he is a real consistent calving ease sire who is breeding moderate frame, deep-bodied, soft cattle with plenty of growth and rib-eye. His dam is a sound big-bodied cow who always raises one of the heaviest calves at weaning.

Easy Going offers a real calving-ease package with EPD's in the top 1% for GL, CED, CEM and low birth-weight.

He ranks in the top 10% of the breed for docility and top 15% for scrotal.

Our first set of Easy Going calves hit the ground this spring and his calving ease and docility figures are the real deal.

Gold-Rush was the \$60,000 high-selling Limousin Bull in North America of the 2020 spring bull sale season.

Quoting the breeder who raised him, "he is the type of bull that I think the Limousin breed has been striving to produce in Canada for 50 years. You won't find a more powerful, mellow, soft made, heavy muscled bull in the Limousin breed. He has tremendous shape, style and presence. His pedigree is stacked with maternal strength as well."

He has breed-leading EPD's with weaning and yearling growth in the top 1% of the breed, ranks in the top 1% for docility, rib-eye area and carcass weight, top 4% for scrotal and top 10% for milk. This bull is a real powerhouse.

We weaned our first set of Goldrush calves this year and we are super impressed by their power, performance, softness and docility.

Summit Patriot R53

Patriot R53 has been retained in herd as a stud sire at Summit Livestock. A phenotypic standout since birth, Patriot exhibits as much body dimension, capacity and volume of any bull we have raised.

He represents to us one of the greatest combinations we have created in terms of stacking pedigrees with maternal excellence. This pedigree is SO predictable in terms of udder quality, milking ability, docility, and structural soundness.

If you have been searching for a Dictator son with a more moderate birthweight and superior calving ease, combined with impeccable docility and big nutts – R53 ticks all the boxes.

We can't wait to see the legacy this Meadowgrass son leaves in our herd and we are excited to share this opportunity with you.
