WELCOME

The Gippsland Limousin Breeders Promotion Group have arranged this Inaugural Heifer Sale for all Victorian Limousin Breeders. There are 10 studs from all around Victoria participating, showcasing what they have to offer with 32 Heifers entered in the sale which will be run by Auctions Plus on October 7 from 11.00am.

I'm excited at the prospect of having a sale for Victorian Vendors and giving them an opportunity to promote their stud and the breed in general.

Rylie Cherrey, an agronomist with Elders in central NSW and Limousin breeder has been appointed to judge the entries that are separated into 5 categories based on age. Rylie is an experienced cattle judge with over 10 years experience working with cattle and a Bachelor of Agriculture. The judging has now been completed and the results are listed in this catalogue as well as being published on the Australian Limousin Breeders Society website, the Gippsland Limousin Breeders website and on our facebook page.

There is an excellent range of heifers entered in the sale, including young unjoined to PTIC heifers, black, French pure, as well as traditional apricots.

Limousin Females are excellent mothers and rear a well grown calf. Calf Pictured at 2 days old.

This sale is designed to give Victorian Limousin breeders an opportunity that they have lacked especially since the Limousin National Show and Sale recently moved from Wodonga to Holbrook.

We love the limousin breed, especially their temperament and ability to turn grass into red meat. In the UK, the limousin cattle held the number 1 position as most popular beef breed where the focus is more on red meat production and carcass weight rather than fat production. Limousins yield over 60% liveweight to carcass, as opposed to other popular breeds with only 50-55% liveweight to carcass, with less fat to cut off and therefore less wastage. Limousin is a leaner meat and therefore a healthier option also. Many commercial breeders are using Limousin bulls over their females for the hybrid vigour and gain the extra kilos at the vealer market which means extra dollars in your pocket. Breeding with Limousin females will give you the extra every time. The limousin cattle are excellent mothers and have fantastic temperaments which makes them easier to manage around calving time. The temperaments are also reflected in the stock at the markets, with their easy going nature you are less likely to have dark kills. After having experience around bulls of different breeds, I am most comfortable working with Limousins.

Limousins are docile and easy to work with.

If you are looking at starting out, upgrading your female line to improve your vealers for the market or even finding new genetics for your herd this sale would provide a perfect opportunity. The animals can be inspected by contacting the individual studs prior to Auction.

Thank you for supporting our sale and let's hope it's a successful day for everyone.

SALE INFORMATION

Fertility: The vendors have agreed to guarantee both the fertility and docility of the heifers in this sale. All in calf heifers will be pregnancy tested prior to the sale and a veterinary certificate will be supplied with the animal.

Registrations/Transfers: All animals are purebred and registered with The Australian Limousin Breeders Society. Registration transfer to the new owners will be completed, upon request by the buyer, at the vendor's expense.

Selling System: The sale will be run by AuctionsPlus with the Managing Agent being Nutrien.

Rebate: The sale is open to outside Agents and we offer a 2% commission to those Agents if the buyer is introduced in writing prior to sale day.

GST: All lots will be sold GST exclusive. GST will be added to the purchase price. Therefore, you will be invoiced purchase price plus GST.

Disclaimer: All reasonable care has been taken by the vendors to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendors nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in the catalogue and do not assume any responsibility for the use or interpretation of the information included in the catalogue.

Thank you for supporting our Group & Vendors

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

OUR JUDGE - RYLIE CHERREY

Growing up in Sydney's western suburbs, Rylie's exposure to farming and agriculture started whilst visiting and volunteering on family friend's farms whilst she was cared for by her grandparents over school holidays. Rylie's experience grew into a passion for beef cattle with a particular enthusiasm for the Limousin breed after moving to The Rock in 2009 and joining Billabong High School Show Team. The team celebrated success in junior and carcass competitions and encouraged opportunities for Rylie and her peers to network, learning from some of the beef industries best cattle people.

Rylie Studied Agricultural Science and competed in Intercollege meat judging while at University, where she gained insight into MSA grading, supply chains and the science behind carcass quality. She travelled to the US in 2014 where she spent a week in Morris Minnesota with Wulf Cattle, learning about Riverview LLP, their programs and getting to see some of our imported genetics in the flesh.

Rylie is an Agronomist with Elders as well as the proud owner of Regal Class Limousins and a mixed commercial herd. She also offers livestock services including consulting and cattle assessment since 2019.

Rylie was the Victorian State representative at the 2019 National Judging final in Perth, she has judged a number of local shows and been an associate at Melbourne Royal. Rylie has been a chairperson for the Western Victorian Limousin promotional group, sharing discussion and support with breeders who are passionate about quality cattle.

A foggy early morning start for our Judge, Rylie Cherrey.

Rylie did an excellent and thorough job of judging.

Champion ~ Lot 1 ~ Western Gold Snuggle Pot

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

Horn Status: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (2P) Homozygous Polled by Pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not Apricot)

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for Protoporphyrin, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for Protoporphyrin or have parents which have been tested normal or are free by pedigree.

Homozygous: Is the term where an animal has two copies of the particular gene (tested or pedigree) for a trait (colour, polled). AN example is Homozygous Polled where all progeny will be polled from that particular animal or Homozygous Black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

EXPLANATION OF ESTIMATED BREEDING VALUES

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured.

EBVs are provided for the following traits:

Calving Ease Direct: estimates the differences in the ability of a sire's calves to be born unassisted from a 2-year-old heifer.

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Mature Cow Weight: estimates differences between animals in live weights of cows at 5 years of age.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Carcase Weight: ranks animals for carcass weight.

Eye Muscle Area: ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat: ranks animals for rib fat depth at the 12th rib on a 300kg carcass.

Rump Fat: ranks animals for fat depth at the p8 site on the rump on a 300kg carcass.

Intra Muscular Fat: ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs: The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

Breed Average EBVs for 2020 Born Calves														
CED	GL	BWt	200	400	600	MCW	MLK	SS	CWT	EMA	RIB	RMP	IMF	DOC
+0.4	-2.1	+1.7	+21	+35	+48	+49	+7	+1.1	+30	+1.7	+0.0	-0.2	+0.0	+42

Accuracies: Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer: The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

59%	61%	60%	60%	61%	57%	52%	61%

Notes: A long-bodied ET heifer from the proven Strawberry female line. Homo polled, 2 copies of the F94L muscling gene, sweet feminine head, good on her feet, beautiful hip to pin, lovely temperament. A full brother to this heifer sold to the Ulster Stud at the 2016 National Sale. Briefly paddocked with Garren Park Royalist recently - probably not long enough - and so has not been on feed. See supp sheet. DNA profiled, fully vaccinated, PI negative and from a Johnnes free herd.

MUSCLE UP WITH LIMOUSIN

For Heavy Weight Profits

Limousin sired heifers often make the same price per kg as steers due to their SUPERIOR CARCASS attributes!

By investing in Limousin genetics you can take advantage of the unique Limousin Muscling Gene.

It means your beef herd producing up to:

19% more high value cuts

8% more in yield of retail cuts

6-11% more tenderness

...with no extra feed!
