Oakhurst Border Leicester Stud

Oakhurst Border Leicester Stud began in 2007. Our agents contacted Mr Ian Michael of Campaspe River (Flock Number 1753) River Gum, Glen Innes and as it happened, Ian was relocating to Victoria and the opportunity arose for the dispersal of some ewes. With 40 ewes and the purchase of a studram Campaspe River L-807 (son of River Gum Ranger D2835) our stud was conceived. Official notification was received on 8th August 2007 with the acknowledgement of our prefix "Oakhurst" and Flock Number 4769.

We aim to produce a Border Leicester flock ram that is ready to work and perform as a lamb. To achieve this objective, we select stud rams that are structurally sound with correct pigmentation and have frame and length of body. The Retallack stud where we have purchased our selected stud rams has helped us achieve the genetic gains we have been seeking. Retallack boasts producing stud rams that have proven good constitution and conformation.

The young rams that we produce are resilient with a good carcass and are deep bodied that stand up to natural paddock rearing. There is no lambing in sheds at Oakhurst.

In addition, we have an eye on the wool type of our rams. We select for traditional lustrous Border Leicester wool which is high crimping and provides a good coverage and pushes out length of staple.

We target our Border Leicester ram operation squarely at sheep producers who want and recognise the benefits of the traditional Merino/Border Leicester F1 cross sheep. These producers are seeking a cross that produces robust sheep, carrying a bulky good quality fleece and have ability to finish prime lambs off well.

Our current drop of 2021 rams, are ready to work, strong and healthy and are presented crutched. To view our show success at the local Glen Innes Show 2022 held in February, view our website:
