# ***GLENARA STUD HISTORY***

The Glenara Superfine Wool Merino Stud was established in 1953 on pure Saxon bloodlines from the well known Tasmanian studs of Winton and Valleyfield. In 1953 Glenara secured a Winton stud ram at the Melbourne ram sale, and subsequently further stud rams from Sierra Park.

In 1964 the top priced Winton ram at Melbourne was purchased for 770 guineas; also in 1970 a Kenilworth ram was successfully used in the stud.

In 1978 the top priced ram at the Melbourne ram sale was purchased from the Sierra Park stud for \$3250 from the noted Urquhart family, which has had a big impact on the stud, and also produced lambs wool that twice achieved world record prices.

In the 1980s rams from Hillcreston Stud - Lord Andrew and 425 families were successfully introduced, and provided the stud with an increased number of finer microning sheep, which therefore has created a reduction in our flock average, which is currently 16.9 micron. From the 425 line we produced Glenara 10, which we entered in the Mackinnon Project World's Finest Ram competition, where he sired the second finest progeny group with an average of 15.7 micron. This ram has continued to have a very large impact in our stud, with many rams from this line in use today.

In 1997 we introduced Rockbank Silky through an A.I. program. This cross had an immediate impact on size and wool quality, which we continue to see the results of today. This is particularly apparent in the stud ewes, as they are producing progeny of a very high standard. More recently we have used Rockbank Softy and Y41 from the Ringmaster family, also through A.I.

In 2009 we purchased a Merryville ram from the Ringmaster 35th family, 'Bendigo Ultra 003' in partnership with the 'Beverly' Merino stud. The results so far are very pleasing, breeding larger framed sheep that are very productive.

Over the past 60 years the aims at Glenara have not changed. We endeavour to source the best superfine bloodlines in Australia to breed superior quality superfine sheep, which have a good constitution on a robust, correct frame. We aim to produce wool that is long stapled, very stylish, soft and rich. This has consistently placed Glenara and its clients at the top of the wool market for the past 60 years.

- Won the Zegna National Fleece Competition for best superfine fleece in 1982. Also gaining a place in the Top Ten in 1994, 1995, 1997, 1998, 2000, 2001, 2002, 2003, 2004, 2005, 2006 & 2007, & 2nd place in the Protected section in 2007.
- Glenara was awarded the Grand Champion Ultrafine Ram at the ASBA in Bendigo in 2003
- Glenara won the New England Wool Ultimate Clip Award for Victoria in 2007.
- Glenara won the inaugural A.S.W.G.A. Fleece competition in the 80' class 2014 and the 90/100s in 2016.
- Glenara won Grand Champion Ultra Fine ram at Bendigo, Ballarat and Hamilton Sheep Shows in 2015.
- Glenara won 2017 Grand Champion Ultrafine Ewe at Bendigo. She was also 2nd overall in the Supreme Ewe of the Show & 2nd in Victorian Ewe of the Year.
- Supreme Merino Ram Sheepvention 2019 (Bundy) & 2022 (Max).

- Hillcreston Snowy – H 1,
- Hillcreston President -- 2428
- Sierra Park Woolly Hocks – 1650

## **MEASUREMENT DATA**

All rams have been mid-side sampled and tested for micron from samples taken on September 10th, 2022. This test covers their current fleece from their shearing in March to September 10th. The Rams have run on improved pasture for the entire period.

For any further information please ask one of the Glenara team.

While every effort is made to ensure the accuracy of information provided and the quality of the stock offered, all sheep are sold on an 'as is' basis. While any misfortune will receive favourable consideration the principals shall have no liability to any person or entity with respect to any loss, fault, damage or injury arising out of the purchase.

Measured data is collected in good faith but should be used in conjunction with a visual hands on assessment.

# ***GLENARA POLL MERINO RAMS***

Due to increasing demand for Poll Merinos, both throughout the Merino industry in general and requests from some clients and their agents we have begun a Poll Merino breeding program in 2012.

Our aim is to breed a Poll sheep that matches in with our superfine flock, but one that is larger framed, longer bodied, good doing sheep that has increased fertility and produces a heavy cutting, well nourished fleece with long staple and a well defined crimp.

The first sire used is a ram from the New England region of N.S.W. from the "Yalgoo" Merino stud, 070441. After attending their field days in 2012, this was the most suitable ram that we found that would achieve our aims. His progeny have displayed a real even type, both in wool and body characteristics.

Since then we have purchased a "Greenland" ram (Quamby Park) and an "Alfoxtan" ram (Lorelmo) and more recently we have used through A.I. 3 Nerstane rams, 191, 53 and 515. Also we have used two Rockbank Poll Sires, Steve and Rafa, both by Yarrowonga 961. We believe all these sires will increase the size and production of our Poll Merinos. Especially focusing on the 16.5 to 18 micron area. We are already seeing rapid improvement in both fleece weights and size and we are receiving favourable comments from clients as well, which is even better.
