

# LEGENDS

OF THE FUTURE

SPECKLE PARK BULL, FEMALE & GENETICS SALE

FRIDAY 11 NOVEMBER 2022 - HILLVILLE NSW

# A WARM WELCOME

On behalf of all the hosts I would like to welcome you to the 2022 Legends of the Future sale.

Legends, as it has become known, hopes to contribute to the Speckle Park story by bringing together a group of likeminded breeders aiming to bring their diverse skills and ideas about Speckle Park breeding together. Our focus is a community of breeders striving for excellence. In establishing this group, we have found friendships, goodwill and good cheer. The Speckle Park story has shown that good relationships lead to good breeding, exchange of ideas and facilitation of a diverse approach to genetics.

With relationships such as for instance Wattle Grove and Codiak Acres, Six Star and Cattle Inc., Notta Ranch and HVB, more recently Ivory Downs and Greenwood, the breed has been catapulted forward.

BigWig has connected with McMurry cattle in the USA and has had a long-standing association with D.A.M. Dots Ranch in Canada. Working in collaboration with one another, as the Canadians have shown, is a critical element of success in the DNA of this particular breed.

The initial idea of the Legends of the Future Sale was formed by Martin Luitingh and BigWig was soon joined by Roz and Peter Alexander of Hidden Valley Beef, who put their shoulder to the wheel. Tony and Liz Sutcliffe of Toebelle Speckle Park and Peter Colley at Greenhaven Speckle Park came on board as did Paul and Kate from Bellara, and Wayne and Cindy Tucknott from KJ Hill.

Following the lead of Ivory Downs, we have invited our international hosts D.A.M. DOTS and McMURRY to participate directly in our sale and not just borrow their genetics for resale.

With this offering of animals and genetics we wish to break down the walls of exclusivity and present to all and sundry: long standing experienced breeders,

commercial breeders and new start-ups, the opportunity of investing in a wide variety of Speckle Park breeding as they see fit.

For those of us who reside on the Mid-Coast, we have had very tough weather conditions and here you will not see overfed animals, but animals in their working clothes, in sound condition, ready to do what they have been bred to do.

We encourage a great floor attendance to enjoy one of the first coastal sales ever to take place and which is supported by the New South Wales government through Destination New South Wales, and a good weekend to enjoy our beautiful region.

To our attendees and their families, we promise an interesting and pleasant day and evening amongst good friends and good fare. To the online bidders we hope to provide a free and easy and most importantly an accessible facility in the hope that next year we will see you in person.

Finally, in this catalogue we introduce to you a factual real-data index, not based on extrapolated values, but on actual data. A new approach, that is region orientated, designed by world renowned agronomist Jack Milbank of Agpro Technology, who incidentally, is putting one Tuli Bull and some semen in the sale in support of a Northern Territory cross-breeding program. This cross-breeding approach is about breeding animals that have the carcass traits of (black skinned) Speckle Park cattle infused with heat, light and tick resistant traits of the African Sanga breeds. The Sanga breeds have a conversion rate like no other bovine and some of the best fertility rates on the planet - Northern Territory – here we come.

Whilst the sale is primarily focused on our Speckle Park breed, it also recognises the importance of this breed in the commercial sector and as part of the catalogue you will find outstanding animals in the crossbreed section.

We sincerely thank you for joining us and taking the time to read our catalogue.

*Your partners in Legends*

### **THE OFFERING:**

16 Pure bred Bulls;  
20 Pure bred Females (10 PTIC);  
6 PTIC Recips;  
33 Embryo offerings;  
77 Semen offerings;  
3 Flushes;  
4 Commercial and Cross Breeds  
4 Commercial Semen offerings

---

### **THE LOCATION:**

183 - 185 Sunshine Road, Hillville NSW

---

### **THE SALE:**

2:30 pm AEST Friday 11 November 2022

---

### **THE DAY BEFORE:**

Thursday 10 November 2022 from 2 pm to sunset you will be able to view sale cattle. Vendors will be there. Sundowners and nibbles will be served.

---

### **SALE DAY:**

Friday 11 November 2022

7:30 am - Gates open for cattle viewing

9:00 am - Drone demonstration by XAG

11:00 am - One minutes silence

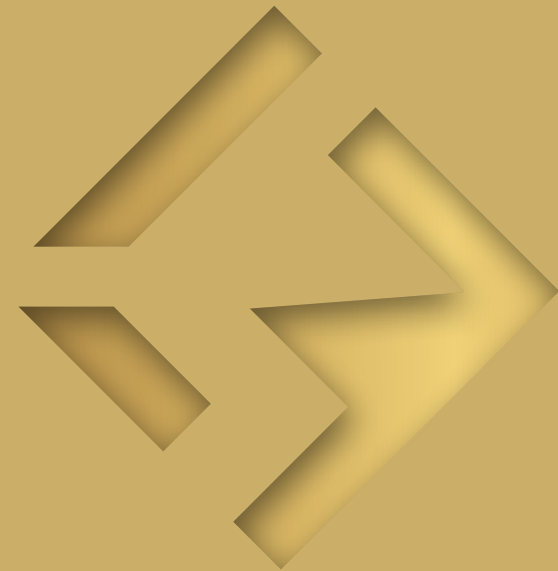

11:01 am - Speakers presentation - "A Good Breeder is a Good Feeder"

1:00 pm - Light lunch

2:30 pm - Auction

6:00 pm - Speckle Park BBQ and get together

---

# YOUR HOSTS

Martin & Marilu Luitingh are based in the beautiful Manning Valley on the Barrington Coast in NSW. Martin had the vision to create the Legends of the Future Sale and to continue to have it as an annual event for the producers of the Mid-North Coast and to eventually collaborate to create a larger sale event in future and make facilities available for like-minded breeders.

He sees the area as one of elite genetics and an area for breeding excellence. It is his vision to encourage breeders to work together in service of improving the quality of the breed and assist commercial breeders to breed less cattle with more meat and higher returns. Martin believes that galvanising co-operation between breeders rather than the pursuit of exclusivity for profit will catapult Speckle Park into the big league and that unexplored value lies in the crossbreeding potential of this breed.

Email: [martinl@ebc44.com](mailto:martinl@ebc44.com)

HIDDEN VALLEY BEEF

Hidden Valley Beef is helmed by Peter and Roz Alexander. From inception, the goal has been to source the best performing Speckle Park genetics available and to invest in breeding a base line of animals from those. A strategic working relationship with the Goodfellow family of Notta Ranch has enabled us to source and breed beyond current popular sires and dams and produce an excellent line.

We are passionate about the attributes of Speckle Park and have travelled globally to promote the breed into new markets and exhibit our own combinations including Cattlemens Congress in Oklahoma, USA this year and as the first foreign owned stud to exhibit at Agribition 2021, with a Notta 1B Hawkeye 444E son, Hidden Valley Raptor 575H. Focussing on commercial viability, in 2019 we began a research and development program around the development of a tropically adapted commercial breed using Speckle Park. Backed by Aus Industry, we base all our breeding selections and cull decisions on a set of criteria based on phenotype and breeding values in addition to composition data from scan values. Consequently, we have amassed a large bank of genetics in anticipation of the launch of a large set breeding program in 2023.

In conjunction with Angus and Brangus herds, Hidden Valley Speckle Park cattle are located in Montana USA, Saskatchewan Canada and Australia. Our Canadian sires and dams provide for a number of our embryo programs in Australia and are strategic to our desire to buy well and breed even better. In line with the R & D program we raise the bar high and cannot compromise on our selection criteria.

With more calves now in Australia and steps ahead in our breeding program we are fortunate to be in a position to offer other breeders the opportunity to buy into proven genetics that perform and will do their own brand proud. Cattle on offer provide exceptional structural integrity in addition to the best maternal attributes in our females. Temperament for safe handling and also to maximise the relationship between yield and composition is key in these animals. We are grateful for the opportunity of this sale to continue to strengthen our existing client relationships and support other commercial and stud breeders with solid, proven genetics that have been scrutinised and specifically selected for the benefit of all.

Email: [roz.alexander@hvsp.net](mailto:roz.alexander@hvsp.net)

Peter Colley, owner of Greenhaven Speckle Park, commenced breeding in The Manning Valley in 2016. Peter Germon has been the Farm Manager from the commencement and together the two Pete's and team GSP have continually progressed the Stud with quality acquisitions in animals and genetics. Originally purchasing son of Rare Commodity and half brother to Premier L14 "Show Champion Six Star L5 Wombat" at the Melbourne Show as our Stud Sire who has done a wonderful job for us to date. With Greg Ebbeck's assistance we have now purchased some amazing sires from Canada including Hawkeye's great son, Chasin Fame, Spots & Sprouts Drone, Notta Night Ryder and are part owners of Notta Cause A Scene and Castaway. We have been using these genetics extensively and the amazing results will be shown in 2023. Most of these genetics will be available to bid on in The Legends sale.

Thank you to our terrific partners and clients in Australia and Canada who have assisted Greenhaven on its journey - in particular Wattle Grove, Codiak Acres, Six Star, Notta Ranch and Embryo Life.

Email: pcolley@qccomms.com.au

Hartwood Cattle Co. is a commercial stud in Bundaberg QLD with a focus on tropically adapted genetics and composite breeding between complimentary pedigreed animals to optimise desirable commercial traits that enable animals to thrive in Hot, Dry climates. Hartwood has a particular focus on Tuli, Mashona, Boran, Drakensberger and Solera breeds for their early maturity, moderate frame, flat back, slick coat, docility, fertility and premium meat quality. Hartwood promote the adoption of a "balance" between all cattle traits. Optimum Size/performance in our Cattle Genetics is much more profitable to our customers than maximum Size/performance. Performance extremes promoted by some Seed Stock producers is avoided. Hartwood cows are run in a real-world environment as tough as – or tougher than – the environment most commercial cows are run in. Bull calves, should be born unassisted from a fault-free cow that has never missed a breeding opportunity, to make it into a Hartwood bull sale. The Solera Selection Sale is in Bundaberg on the 2nd September 2023. beef@hartwoodcattle.com.au or 0434678228

Paul and Kate Hosey are at Wootton, and are consummate researchers of Speckle Park cattle, combing the Internet and constantly coming up with new ideas and new cattle to look at anywhere and everywhere. Similarly, they are newcomers and not volume merchants, they have had significant success with Kidmans Cove and 54P combination. In 2023 we will see some really good animals coming from this stud.

Paul is a veritable gold nugget finder and his expansive adventurous approach and meticulous recordkeeping will undoubtedly result in some magnificent results going forward. They have a beautiful property at Wootton which is typically ideal of a boutique style ranch that holds much promise. We welcome their enthusiasm and always ready to help attitude.

Email: bellarastud@gmail.com

Wayne and Cindy are enthusiastic and energetic people that are not content to spend their retirement on good times overlooking the beach. They have good country out at Coopernook and decided to turn their 100+ herd into a Speckle Park herd. New on the block, they started with a spectacular win at the Royal Sydney Easter Show, and when I went to visit them on their farm, the quality of calves convinced me that there were many more champions to come. Industrious, creating great facilities and adventurous in their breeding, they are learning lessons as they go and be successful at it at the same time with careful consideration of the genetics that they have acquired and this year making a small but significant contribution towards Legends. I have great expectations of this couple in the future who are fun to be with and affable people making a significant contribution to our sale.

# YOUR HOSTS

TOEBELLE SPECKLE PARK is based in the beautiful NSW Hunter Valley near MAITLAND. Tony & Liz Sutcliffe, who also run a Limousin stud, chose to invest in the SPECKLE PARK breed with the vision and faith in the breed's strong attributes such as hardiness and meat quality in a diversity of challenging environments and climates, which a diverse market demands. The breed has many attributes that astute cattle producers seek and equally importantly need. Toebelle Speckle Park recognize that the future development and success of the

breed requires a strong commercial focus; they recognize there are many lucrative markets in this sector.

Tony & Liz are strongly focused and committed to developing long term mutually beneficial relationships with other producers and clients, as well as those who support the cattle industry. They wholeheartedly believe that essentially it is also people business, and work to support others, including those who are beginning their Speckle Park journey. Tony and Liz are unique cattle people : hardworking, committed and focused like many, and their extra care and commitment to their cattle is evident, going the extra mile in ways that are noticeable and remarkable - just ask them about their Limousin bull, Raven Man O Man!

Toebelle Speckle Park own the exclusive Australian semen rights to the exciting young sire COLGAN'S GENERAL 20G. There are semen lots available today and he has so far been very enthusiastically embraced by the Speckle Park community here in AUSTRALIA. Colgans Cattle Co are reporting his first calf drop to be easy calving with noted early vigour. We welcomed our first General Calves here in AUSTRALIA a few months ago, and they are impressive!

Tony & Liz secured the world record Speckle Park sire in May this year - SIX STAR SOUTHERN AURORA 'JUSTICE' R10 - a magnificent young sire who truly has the potential to be a breed 'game changer'. Justice is one rare individual, he has it all! Today, you have the very first opportunity to secure domestic semen from this legend in the making! Astute producers will recognize his enormous potential to breed the house down and create exciting new bloodlines. This is where the magic really begins! Time to get super excited, don't miss out, Justice is absolutely a true "once in a life time bull" He will accelerate and positively enhance your program.

Together with our fellow hosts, friends and colleagues, Welcome to "THE LEGENDS OF THE FUTURE SALE" and best wishes with your purchases and programs going forward.

Warmly

TONY & LIZ SUTCLIFFE.

Everest Speckle Park was established by third generation dairy farmers who experienced the challenges (heat, buffalo fly and ticks) of cattle management in Central Queensland at Marmor. Moved to Oakey on the Darling Downs in 1990, we currently have a herd of 260 commercial cows made up of Black Baldy's, Angus, and Speckle Park cross. Our first Speckle Park bull was Waratah E33 whose progeny outperformed Bulliac and Boshammer Angus cross calves, prompting the transition to becoming seed

stock suppliers primarily for our own use.

We were fortunate to purchase WGS G59, WGS F11, WGS F71 and ANP J3 in 2015. Miss Wattle who would need no introduction to most, has been and continues to be the brood cow from heaven. Her genetics feature in the leading herds in Australia.

We are also looking at a cross breeding program with Sennepol genetics. Our aim is to reduce the coat, increase heat and parasite tolerance which will be essential if we want to encroach into the Northern Cattle market.

Our focus is to provide productive, functional cattle to other commercial and stud breeders. We thrive on the positive and passionate feedback from our clients.

Email: [colin@thebarn.net.au](mailto:colin@thebarn.net.au)

# YOUR INTERNATIONAL HOSTS

McMurry Cattle is the best kept secret in the USA. Situated not far from Transova in Billings Montana, Fred McMurry is an expert in the IVF trade hence the fact that embryos from the USA will be made available in the Legends Sale. Fred has been a Hereford

breeder for the last 30 years and still is, but in the interim became impressed by the performance of Speckle Park cattle and has developed a significant herd of Speckle Parks in Montana. Previously unknown to me, when I started to speak to Fred approximately a year ago and he showed me some of the animals that he owns, I was blown away by the quality of the condition of the animals and thought that the Australian breeding public would be happy to gain access to some of these genetics including 524C, a Stands Alone bull calf. In my discussions with Fred I was encouraged by his sense of enthusiasm and we found common ground in our approach to cattle and what we should be looking for. Freddie is a breath of fresh air and we were delighted when he said that he would like to participate in our sale - Fred is a breeder of stature and brings both knowledge and quality to Legends.

Email: [mcmurrywattle@gmail.com](mailto:mcmurrywattle@gmail.com)

## *D.A.M. Dots Ranch*

I have known Dustin for many years. During 2018 I purchased from him DAM DOTS ENTICING 41E. On her first flushing she provided 24 A grade embryos, and has produced two outstanding calves including our heifer, which is now in Montana with McMurry cattle and has demonstrated the same kind of fertility that her mother exhibited. Over the years I have purchased many embryos from D.A.M DOTS all of which have resulted in outstanding progeny. I have great confidence in Dustin and his ability to read really good animals. Legends was delighted when Dustin showed interest in putting some of his embryos in the Sale. This is a blue-chip breeder from Canada and is the second International breeder that is participating directly in the Sale. It is our philosophy not to engage necessarily with international breeders and to make profit from the genetics, but to be invited to participate in the Legends sale directly and so to expose them to the breeding public in Australia. We are delighted to have a breeder with the reputation of D.A.M DOTS in our sale.

# SALE DAY:

## ONLINE BIDDING

### DON'T MISS OUT ON THE OPPORTUNITY TO OWN A LEGEND!

If you are not fortunate enough to be at the auction in person, you will still be able to participate from wherever you may be:

You can:

- Speak to the breeder directly to talk about the cattle that interest you and get the breeder's opinion and then do one of the following:
- Contact the Auctioneers' Agent and they can bid on your behalf; OR
- Bid from your computer or phone

It is easy to register with Elite Livestock Auctions Simply follow the prompts.

## SALE INFORMATION

### VIEWING:

Thursday afternoon after 2 pm at the sale venue. On sale day, gates will open at 7:30 am for cattle viewing. You will also be able to view all sale lots with additional information on our website [www.splegendssale.com](http://www.splegendssale.com)

### BUYERS REGISTRATION:

All bidders have to be registered with the Auctioneers, either online or on our website or in person at the sale.

### AGENTS & AUCTIONEERS

### SPI:

All participating vendors are full members of SPI. The Speckle Park sale animals offered are registered, parent verified and DNA tested according to SPI regulations.

## VISITOR SAFETY:

We will be taking care of your comfort and safety on both our viewing day and sale day, but be cautious when moving amongst the sale animals. Remember, cattle can be unpredictable! No children will be allowed in the sale pens and loading area when animals are present.

## TRANSPORT:

All cattle purchased must be picked up no earlier than Sat 12th November (unless by special arrangement) or from 8am and no later than 4pm on Monday 14 November 2022. No trucks will be allowed onto the property on Sale Day. We will continue feeding and caring for your animals until they are picked up, but all responsibility for the purchased animal lies with the buyer after the fall of the hammer. Please ensure that you leave exact pick-up and delivery instructions with the Agents after the sale.

## VACCINATIONS:

All the animal have been vaccinated with 7-in-1 and Pestigard. Please note the animals have not been vaccinated against tick fever. If required, please discuss with Agents in which case we will vaccinate and inform you when the animal will be ready for transportation. The vaccination of the animal will be free of charge. If the animal will be required to remain on site, agistment arrangements will need to be made with the seller.

## HOW TO REGISTER with

# ELITE LIVESTOCK AUCTIONS

Simply go to [www.elitelivestockauctions.com.au](http://www.elitelivestockauctions.com.au) using your desktop, laptop, iPad, iPhone or android device.

Click on the "Sign Up" page / link

Create a bidding profile using the bidder registration page.  
*(You can either register as a livestock agent, company or private buyer)*

Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue

Click "Register"

You will then be notified by email that an account has been created.

Once an account has been created you are all "Set to Bid"

Each Auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website.

Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"

The sale will then approve your application to bid and on the sale catalogue you will see "✓Bid Request Approved"

On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.  
*(There is no need for software download)*

At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

## How to register and bid on Auctions Plus

# AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

7

Fill in buyer details and once completed go back to Dashboard.

2

Select "Sign Up" in the top right hand corner.

8

Complete buyer induction module (approx. 30 minutes).

3

Fill out your name, mobile number, email address and create a password.

9

AuctionsPlus will email you to let you know that your account has been approved.

4

Go to your emails and confirm the account.

10

Log in on sale day and connect to auction.

5

Return to AuctionsPlus and log in.

11

Bid using the two-step process – unlock the bid button and bid at that price.

6

Select "Dashboard" and then select "Request Approval to Buy".

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:  
Phone: (02) 9262 4222

# SALE DAY:

---

## **HERD HEALTH:**

All sale animals have met all necessary health requirements. Bulls have been semen tested and Vet checked. Females have been Vet checked and palpated. Health Certificates will be available and provided to the purchaser.

## **INSURANCE:**

We highly recommend insuring your purchase. Information will be available from the Auctioneer on Sale Day.

## **MOBILE SERVICE, WIFI & COMPUTER ACCESS:**

Mobile Service and WiFi is available and computer access if needed.

## **TRANSFERS:**

All buyers of cattle will be provided with an Information Data Wafer for the purchased animal, which will include the Transfer Form. The purchaser will be required to report the movement of the animal to NLIS.

## **GENETIC LOTS:**

The purchaser is responsible for shipping and handling.

## **AUCTION TERMS AND CONDITIONS:**

No person may bid unless they have registered with the Auctioneer and provided the payment details as required by the Auctioneer. Bidders will be required to provide the contact details of their Stock and Land Agent which they use in their area or provide a reference from the Stock and Land Agent if payment is not going to be made on the

day. All lots are sold exclusive of GST. EFTPOS facilities will be available on the day.

## **TERMS FOR ONLINE BIDDING :**

Lots for auction can only be purchased by registered bidders. We recommend registering early via the Elite Livestock Auctions website or the AuctionsPlus website.

GST : All lots are sold exclusive of GST, The purchase price will be the total of the successful bid price plus GST.

## **PAYMENT TERMS :**

- a) All lots are sold 'per each' i.e. the price is on a per embryo, per straw basis.
- b) All lots are at the risk and expense of the purchaser immediately on the fall of the hammer. Legends of the Future will not be responsible for any loss or damage to the lots after the fall of the hammer. It is recommended that each purchaser consider the need to take out appropriate insurance cover in respect of their purchased lot/s.
- c) Invoices will be issued by Kempsey Stock & Land Pty Ltd to each purchaser as registered with Elite Livestock Auctions or AuctionsPlus. Invoices must be paid by way of cleared funds transfer within 7 days of the date of invoice. Title to each lot will pass to the purchaser upon receipt of payment of the relevant invoice

## **ADVICE DISCLAIMER:**

All vendors are willing to provide assistance for those seeking guidance on their sale animals. Any commentary or assistance provided by the vendors is to be considered as a guide only. It is each purchaser's responsibility to satisfy themselves as to the suitability of the relevant lot for their intended use.

## **SALE CATALOGUE DISCLAIMER:**

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue and give no guarantee whatsoever as to its accuracy. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

# ANIMAL ASSESSMENT

There is undoubtedly a hot debate about the value of animal assessments. There is no substitute for viewing an animal preferably personally eye to eye or by video and photographs. As the world becomes more technically advanced, science has started to play a more demanding role in the assessment arena. There are those that are vehemently opposed to EBV's. This is unfortunate because, as Steve Skinner explained, what you put in is what you get out. Poor data produces poor results. As a statistical extrapolation which is science based, it will have flaws, but again it would be short sighted not to make use of this well researched system and use it in a manner that is intended to be a guide. For instance, the Canadians do not have the same reporting system as the Australians and often statistical data of Canadian animals is under-reported with poor profiles that are not accurate.

For years assessments have been improved for the measurement of bovines, structural assessments, behavioural assessments, carcass assessments, some factual, some observational, and the science has become quite complex. The value of the experienced eye remains critical.

AgPro's system of measurement was conceived and designed by Jack Milbank. It is a concept - its purpose is to bring as much objective data to the table, drawing on a myriad of technical data to establish the quality not of the breeding line alone, but the breeding of the specific animal through testing, measurement, and observation according to specific criteria.

The AgPro Index aims to go one step further - it aims to assess suitability for region.

Finally, any system in which an owner or breeder evaluates his own animals will be skewed by virtue of that reason. That is inescapable. Even entering data such as birthweights or growth weights relies on

human integrity, error and accuracy and we know how frail that can be.

We need to make clear that to introduce AgPro to you this year, we have done that : assessed our own animals and have had to rely for now on guesstimates and some extrapolated values. However, it was remarkable that the AgPro Index using different data had a significant correlation to the EBV's, which is not surprising because it also uses Breedplan standards. So much more the reason to consider it only as a guide and an introduction to the system, that includes our views, that you may not agree with, and which may be over or understated.

The benefit of the AgPro System is that it is focussed on a much broader range of testing available for Breeders that can choose from a range of tests done by 180 connected Laboratories worldwide such as flush yields, heat tolerance, feed efficiency, rumen profile score, tropical adaptability, milk production etc. At this stage it is an introduction to a different way of assessing animals and not intended in this catalogue with absolute certainty to profile animals, but rather as a broad-brush assessment.

Under this Index a solid purebred animal will score between 70-75, animals with improved and sought-after traits will score between 76- 85. All-rounders with several high-end traits will score 86-89 and exceptional animals with several traits in the top 10% of the breed will score 90 plus.

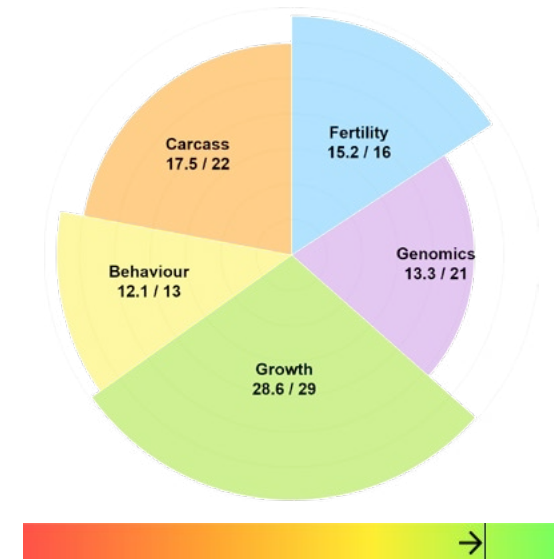

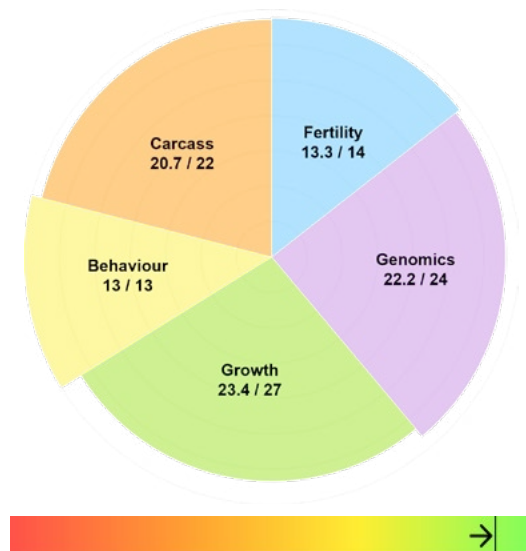

We have included videos of most animals and taken photographs which we hope will allow you to engage in assessing the animals together with all the data we have provided. We have added some tools which may or may not assist you, however we are driving towards a science-based evaluation, testing as we go, hoping that someday we will find common ground. Bear in mind that in assessing younger animals, which are not fully mature, allowance must be made for growth, carcass and fertility, which will undoubtedly improve with maturity.

Jack Milbank is a world-renowned agronomist turned breeder that lives in Bundaberg, Queensland and is the owner of Hartwood Stud where the focus is on breeding animals that flourish in Dry Areas. He has taken his vast knowledge of agronomy science and combined and converted it to developing a real-time-factual data index to evaluate animals largely based on scientific testing and to evaluate them in the context of the regions in which they are likely to flourish, having regard to their genetic traits. In simple terms, it is comparing apples with apples. We have adopted the Agro index because it is based on actual data. In conjunction with the estimated breeding values and Breedplan, data is extracted and supplemented by genomic testing, measurement (scans) and observational data. The purpose of the index is for breeders to set a target for animals in their region and then to try and achieve that target given their geographic location and conditions. So, for instance, whilst the 750 kg cow may flourish in South Australia, Victoria, and the southern regions of New South Wales, that cow will not flourish in the north-western regions of New South Wales, northern regions of Queensland and/or the Northern Territory. Those breeders are far more likely to set their targets at 600 - 650 kg. Pigmentation, which is both observational and genomic, will enable the breeders to select dark skins under the coat. The pigmentation targets may differ from those that may be breeding in the southern regions. The index is represented by a donut with five segments. These are (a)

Fertility – observational- actual data and genomic testing (b) Growth- observational- actual data (c) Genomic testing (d) Behavioural-observational (e) Carcass-observational and actual data. Each section has its own Bar Chart of Raw Data. This is information which most commercial breeders will want to see.

Other traits, such as Flushing record etc, can be added. If you consider the two donuts below, you will note that the first animal has scored 22.2 out of 24 in the Genomic Assessment (see lilac segment of the pie). Her score in the Carcass Assessment (orange segment) is 20.7 out of 22 (almost a full score for the criteria selected). The

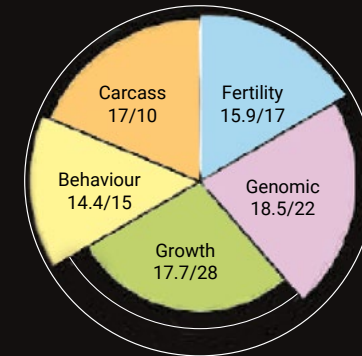

second animal has scored 17.5 out of 22 for the Carcass Assessment (orange) and 13.3 out of 21 for the Genomics Assessment. The result is that animal 1 scores 91.7 and animal 2 scores 87.1. There is a raw data score and a target score for each segment. In this example, Genomics is seen as sub-standard in animal 2, while his growth and fertility scores are optimum. Collating data will tell you, over a period of time, which breeding lines are profitable and why. AgPro is connected to 180 laboratories worldwide. The system allows you to customise the data you require for your animals in your region. Take a trip to <https://au.agpro.technology>.

The AgPro Stock Productivity Index is a breed agnostic analysis tool for livestock producers. Individual traits for each animal are recorded and compared against the Target Breeding Range. Traits are grouped & weighted according to their relevance for a given environment, purpose and market. A single aggregate value based on actual data for each animal is generated for the selected index.

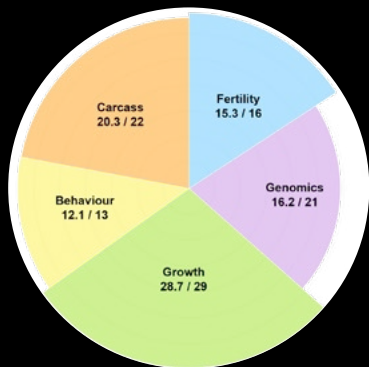

# OUR BULL OFFERING

# GREENHAVEN CAUSE A STORM

ID: GPC R30  
BORN: 27/10/2020

1

92.9 / 100

NOTTA 101Y BLACK CAP 151A

VALLELONGA FREEGLY

SIRE: NOTTA 151A CAUSE A SCENE 307E

DAM: DOUBLE L F15 MINDBENDER

NOTTA 300X THETA 11A

DOUBLE L 2H MINDBENDER E11

This young bull has an excellent performance on the AgPro Index, one of the highest scoring animals in the catalogue. He is by Cause a Scene 307E bringing those incredible carcass traits to the joining and in the dam line has Codiak Mindbender 59M that brings frame score. The predicted mature weight in the top 10% of the breed (and carcass weight in top 15%) can be seen on this well coupled, free moving bull.

## NOTTA 305E PRIME TIME 312H - PATERNAL BROTHER

Our decision to sell this outstanding bull has been a tough one. With an aim to sell only our best we felt that this stand out, champion blood line bull is deserving of a large commercial producer or a stud looking to take their breeding to the next level. A Canadian embryo calf from our Canadian herd sire, Notta Hot Topic 305E he is a low birth weight sire, myostatin carrier and he will deliver on milk and udder conformation in his females. Jackpots' half brothers are testament to his sire and dam line. Half brother Notta 305E Prime Time 312H was awarded Agribition Champion Junior Bull 2021, Prince Albert Grand Champion bull 2022 and Agribition 2022 Supreme qualifier and qualifies for Champion of the World Speckle Park bull. In addition Notta 307E Crossfire 303H, out of Jackpots dam, Notta Janette 203D, was awarded Reserve Champion Junior Bull at Agribition 2021. Jackpot Q5 is a very easy moving, working bull of excellent temperament; deep ribbed with a substantial scrotal circumference and excellent structure. Backed by a proven pedigree including Notta Hot Topic 305E, Notta Janette 203D, John Wayne, Notta Pretender 64P all the way back to Lacerta 68L. He offers an exclusive introduction into the power of our elite Canadian bloodlines.

WARATAH E23

**91.2 / 100**

An average animal score is 75

The youngest bull at almost 15 months by the legend sire Maungahina Kidmans Cove out of Pho Finish M133 who goes back to the great Pho Finish 54P. He has an excellent structure being very deep and thick whilst being a very well balanced animal with a great track. He has a great temperament and should prove to be an outstanding bull in the future. We have had a delay in registration but hope to have it completed by time of sale and he will be sold with a full vendor guarantee on genetics.

SIX STAR TAMMY H32

An impressively structured, ready to work bull, by our proven sire, Battalion Stockade M3 and out of Six Star Tammy M9, a Rare Commodity daughter. A myostatin carrier bull, Predator is a Stands Alone grandson and comes from a long line of excellent breeding including River Hill Traffic Jam, A & W 15R and Reba 154F displaying incredible temperament, excellent structure, low birth weight, moderate framed calves with the capacity for high milk and excellent udder conformation. A T allele leptin bull, he also offers higher fat accumulation, weaning weights and marbling. Predator is half brother to Battalion Kara S29 who sold at Scone sale 2022 to Ivery Downs for \$37,000 and won 16-18 month class at The Ekka 2022.

# PTIC RECIPES

**37** BGW - RCP K6

Anticipated Due Date: 11/11/2022

SIRE: INC BREAKING NEWS 63F

DAM: D.A.M. DOTS ENTICING 41E

D.A.M. DOTS ENTICING 41E was bred out of a line of animal heritage with an exceptionally high milk potential. On her sire side, great grand sire was Traffic Jam 26T that had a Milk Potential (MP) of +9. Her grand sire was Walker 60W 26T who had an MP of +12 who was joined with 54P (MP +10) and her sire was Line Drive 54Z (MP +12). Enticing 41E has a MP +8, twice the breed average and in the top 5% of the breed. Her EMA is in the top 10% of the breed, carcass potentials in the top 20%. She has low birth weights. She was a sound and solid cow. Her daughter BigWig Enticing 10J is a magnificent example of her progeny and can be seen under the Embryo section of this catalogue.

Breaking News is a Caja Zeppelin 1B (Sire of Notta Hawkeye) son, that has mature weights in the top 5% of the breed. We anticipate with this carcass and milk potential, the progeny would be outstanding.

**SIRE: RIVER HILL 26T WALKER 60W**

**DAM: BIGWIG NAKITA N11**

Old Style breeding out of solid genetics. This King George 82U cow is in the top 12% in Milk in the top 20% for retail yield. She is a big cow with solid tracking and a sound structure and temperament. This is one of the best kept secrets of the breed. Walker is in the top 10% of the breed for weight, top 1% for milk potential, top 1% for carcass Yield, top 5% EMA and top 1% for retail yield- this bull has over 250 progeny and was used extensively by Six Star, Wattle Grove, Minnumurra, Riverhill, Waratah and Three Ways.

**BGW**

**SIRE: PRAIRIE HILL JOHN WAYNE 50S**

**DAM: BIGWIG ALPHINA J1**

J1 (Alpha) is one of BGW's special editions. Her Dam, Wildwood Kara 4K, passed her milk onto her progeny. Consequently the breeding potential is in the top 10% of the breed with a retail yield in the top 20% - she is evenly balanced; thick from rump to chest. With her high milk potential and carcass potential of John Wayne - we believe this will be an excellent joining. John Wayne 50S has traditionally been used to put size into calves and was used extensively by Six Star and Maungahina who produced Extreme E27 who needs no introduction.

### SPECIAL ADDITION MEROM MAXIMUM R27

**MEROM MAXIMUM R27**

**BIGWIG PENNY BLACK**

Merom Pastoral Company is owned and operated by John and Nicki Weekley and family who have been operating beef cattle farms through South Eastern Victoria for over 30 years, primarily breeding commercial Angus. Merom Speckle Park was established in 2015 with a focus on seed-stock securing and producing leading genetics for commercial beef operators. Merom Speckle Park consider the development of its maternal stud herd paramount and fundamental to our success as an industry contributor. See our website at [MeromSpecklePark.com.au](http://MeromSpecklePark.com.au)

Merom Maximum, a November 2020 bull is currently 862kg and boasts a 123-square-centimetre eye muscle area, a 12-millimetre rump fat and 10mm rib fat measurement. Maximum was awarded Grand Champion Bull and Senior Champion Bull titles at the 2022 Adelaide Royal Show and Speckle Park Supreme Exhibit at the 2022 Melbourne Royal, and Senior Champion Bull at the 2022 Melbourne Royal Interbreeds.

Maximum is a product of Extreme E27, a well-known big carcass animal and Six Star G250 that has a milk potential of 10. In this catalogue a full sister to Max is offered as a flush in our Flush Offering, Lot No. 110.

BGW purchased the Australian rights to this bull in 2018 from Notta. He has an A grade EBV. His milk potential comes from Walker 26T (+9) and 54P (+10) both in top 1% ; his carcass traits come from Royal Flesh 101Y top 1%. It does not come as a surprise that this animal has carcass traits in the top 5% of the breed, a retail value in the top 5% of the breed and a milk potential in the top 25% of the breed - it does not get much better than that. His AgPro index ie real data for the individual as opposed to Extrapolated Data also scores high at 89.6%. This young legend is up there with Hawkeye, Chasin Fame, Justice R10. Don't take my word for it, check out the EBV's and make up your own mind.

**85 A** | 5 X STRAWS | **BGW**

SIX STAR 82U ROYAL FLESH 101Y

Royal Flesh 101Y was one of the bulls that was kept out of the commercial circuit for profit arising out of exclusivity - as a result his value (as always the case) has been lost to the breed - BGW does not subscribe to that philosophy. The fact is his carcass traits were in a word - phenomenal - it has been our philosophy to try and match him up with good milk producers like Wildwood Kara 4K, 54P, Mainstream E12 - and have done so with commendable results.

CODIAK END TO END 802E

This is a bull owned by KFC in Canada massively thick through his whole body - he is compact and well coupled. His legs and feet are in the AAA category and in proportion to his powerful body with an unsurpassable topline. He brings carcass to the table as can be seen by one of his progeny owned by Bigwig in Montana KFC Uma 61J – the proof was certainly in the pudding.

**MCMURRY SPECKLE 13U 01J 1086X**

Early on, McMurry Cattle acquired embryos sired by Codiak Crikey GNK 13U and out of EL Rancho No Gotto Bambi 01J.. An outstanding ET bull calf, 1086X, resulted in 2010. He matured into a sound, even-dispositioned herd bull that was initially used for cleanup on our Polled Hereford females. His daughters matured into big- volume, fertile brood cows with nice udders and good milk. Beef from his grass- fed progeny was exceptional. We offered semen via ORlgen and it was popular with commercial cattle producers. The 1086X semen bank is about depleted but this bull convinced us that the Speckle Parks are a hardy breed with added maternal and quality- beef product value. Calving ease is exceptional for this bull that does so many things right!

### RAW DATA

WGHT <b>696</b> kg	RIB FAT <b>5</b> mm	RUMP FAT <b>7</b> mm	EMA <b>114</b> cm
IMF <b>5.1</b> %	SCROTAL SIZE <b>42</b> cm	MOTILITY <b>&gt;70</b> /100	

This impressively structured, ready to work young bull is a product of the Hidden Valley research and development program; crossing selective pure bred Brangus with pure bred Speckle Park to create a commercial animal that offers early sexual maturity, higher carcass yield, tropical adaptability and excellent temperament. He is out of Telpara Hills Miss Hollywood 801M11 by Battalion Stockade M3. Take a look at sire and dam EBV's and you'll see this bull will create low birth weight, high yielding calves, impressive scrotal circumference, with excellent milk and udder structure in his females. Perfect for the commercial market.

# Thank You

---

When we first decided to create a regional mid North Coast sale for Speckle Park, we had no idea that it would receive so much support from so many. From fellow breeders with sage sale advice to local and regional breeders seeking to be involved. Firstly, the encouraging enthusiasm of all our hosts and their desire to present their best offerings has been incredible. Thanks must go to all our hosts - Greenhaven Speckle Park, Hidden Valley Beef, Toebelle Speckle Park, Bellara Stud, KJ Speckle Park Hill, Everest Speckle Park and our USA and Canadian friends, McMurry Cattle and D.A.M. Dots Ranch. Without these studs, we would not have the calibre of sale lots that make us proud to call our sale 'Legends of the Future'.

Special mention to Martin Luitingh for the vision to create a coastal cattle sale, to Nic Luitingh for budget and project management, Kate Hosey for assisting with sale lot co-ordination and Roz Alexander for creation and management of the marketing and advertising. To Angelo, Hamish & Eithan who fed, fenced, erected yards and worked overtime to create the Legends sale centre. To Marilu Luitingh and Annie - we are so very grateful. They worked tirelessly for months on constant revisions of the catalogue, planning catering, audio visual, budgeting, animal photography, content coordination, the many logistical details and even landscape gardening ... you name it, they had a hand in it!

To Claudia Renner and the rest of the team at Destination NSW, thank you for your support of the vision to create a sale and conference centre for the mid North Coast and your support in all our promotions. We are very proud and grateful to be a part of this key regional tourism initiative.

Huge thank you to Brandon of BJS Livestock Photography who did an excellent job and to the many fitting staff who presented the animals at their best, including Mitch Meredith of Topline Show Stock. A very special thank

you to Rhonda Kheogh of Central Commercial Printing in Bathurst - the Sale Catalogue wouldn't be what it is without the keen creative eye and experience that she brought to the project. She has done an amazing job in creating a stunning catalogue.

A special mention to Jack Milbank - he has been a mentor to us in the lead-up to the sale in terms of providing invaluable advice and guidance with regard to breeding, feeding and data correlation. He has taken the time to do the presentation on Sale Day and we are very grateful to him for his support.

Finally, thank you to Kempsey Stock and Land - Ian and Laurie Argue for believing in our sale opportunity and supporting us in conjunction with Libby Hufton of Elite Livestock Auctions and Hugh Courts of Auctions Plus, who have made the whole process seamless and offered so much support for the entire Speckle Park breed.

There are so many others who have contributed emotional and physical support along our journey to sale day and for each and every one of you we are extremely grateful. With many new Speckle Park sales popping up, the time is ripe for new directions and now with the support of both stud and commercial breeders, we look forward to the Legends of the Future sale becoming one of the pinnacle sales for the mid North Coast region for years to come.

To all of those that have taken the time to read our catalogue, attend the sale in person and the online attendees, we sincerely thank you for your support. The progress of the breed is measured by the pulse of the sales which in 2022 have been outstanding - that could not have happened without you. From the Legends' perspective we thank you and look forward to catching up with you in 2023.

*May the Speckle Park Legends continue to inspire*
