LITTLE MEADOWS FEMALE

# SALE 2022

9<sup>TH</sup> DEC TO 10<sup>TH</sup> DEC 2022

# FOREWARD

## Welcome to Little Meadows 2022 Female Sale.

The Golding family invite you to join us online with Auctions Plus on Friday 9th December 2022, commencing at 9 am AEDT and Finishing Saturday 10th December 2022 at 4pm AEDT.

We will be transporting the females to, 248 Sargents Road Table Top, via Albury in early January, they will be rested for a couple of weeks and then be available for inspection by arrangement with GTSM, Michael Glasser and on the open day to be held on December 3rd 2022 from 9am AEDT to 4pm AEDT.

With 28 years of breeding Angus Seed Stock at Little Meadows, we have now reached numbers where we have the ability to offer our Magnificent Mature Breeding Cows, including Donors.

On offer will be our entire drop of N breeders, with the exception of those cows that were PTIC to an Embryo. These matrons represent years of getting the phenotype in our female herd correct. Feet, legs, thickness, length, milk, temperament, femininity and a wedge shape, all traits that make a true breeding cow that will stay in your herd for years to come.

We have then taken these females and been able to mate them to higher indexing sires that also have the phenotype that we are after in, Little Meadows Quindanning Q72 a top class Beastmode son and the new outcross sire in Ellingson Three Rivers 8062.

The S drop rising 2 year old heifers that we will be offering are the representation of the 100 Stud Heifers that were mated as our keeper females for this year. They have been mated to breed leading sires in Texas Quantum Leap Q029, Moogenilla Quinella Q33, Mandayen Reebok R442 and Murderduke Quarterback Q011 and Prime Nirvana N33. The resultant progeny of these mating's will produce high Indexing calves.

The Elite Embryo Packages that are on offer are at the cutting edge of our programme and are the most up to date genetics available from Little Meadows.

Over time we have carefully chosen our genetics and each individual female is mated to a specially selected sire, which best suits its phenotype and EBV figures.

The primary focus of our program is the maternal function of our females. Mating decisions are always made with a vision of the female progeny utmost in mind, rather than specifically setting out to breed bulls. We believe that if we have our female herd right, the good bulls will naturally happen.

Pre-bidding on all female's and embryo packages will be available online at Auctions Plus.

For further information visit our website:  
[www.littlemeadowsangus.com.au](http://www.littlemeadowsangus.com.au)

Please feel free to call with any questions.

Best Wishes  
Tony, Karen & Mostyn

# SALE INFORMATION

## LITTLE MEADOWS ANGUS ONLINE FEMALE SALE

Commencing at Friday 9 am AEDT and Finishing  
Saturday 10th December 2022 at 4pm AEDT.

50 PTIC Angus Females

Elite Embryo Packages

19 N drop Cows & 31 S drop 2 year old Heifers

Female Inspection Day December 3rd 2022 from 9am AEDT to 4pm. AEDT  
on property 248 Sargent Rd, Table Top via Albury, NSW

## Can't make the sale?

*Purchase online in eight simple steps!*

*Log on to AuctionsPlus and bid on your phone, tablet or computer.*

Contact AuctionsPlus on (02) 9262 4222  
or email [studsales@auctionsplus.com.au](mailto:studsales@auctionsplus.com.au)  
or [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

Check us out on: [f](#) [@](#) [t](#) [in](#)

- 1 REGISTER ONLINE**  
Free once off registration for all auctions.
- 2 COMPLETE BUYER INDUCTION**  
The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.
- 3 VIEW CATALOGUE**  
View photos, videos, pedigrees and more.
- 4 ENTER AUCTION**  
Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.
- 5 AUTO BID**  
Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.
- 6 CONTACT SELLING AGENT**  
If successful, contact selling agent to arrange payment and delivery. The agent contact details will be available in the catalogue header.
- 7 PAYMENT**  
Via the selling agent's terms and conditions.
- 8 DELIVERY**  
Arrange transport of livestock at your expense.

## Sale Settlement Terms

### Settlement Services

1. Credit Card ( 1% Surcharge paid by the purchaser on any credit card transaction)
2. Eftpos
3. Electronic Funds Transfer
4. Traditional Agent Settlement

Any potential buyers booking back to an agent require a written letter of introduction 24 hours prior to the auction to [gtsmoffice@gmail.com](mailto:gtsmoffice@gmail.com) . Including any persons bidding via the online bidding provider: Auctions-Plus  
NO LOTS (Live or Genetic) will be released without confirmation of payment or Letter of Introduction from settling agent.

Pre-Buyer registration can be completed via the Glasser Total Sales Management Website.

## Outside Agents Rebate

Agents that introduce clients in writing 24 hours before the sale and settle within 7 days receive 1% rebate.

## Auctions-Plus

Bid online via AuctionsPlus.

The sale will be interfaced as a simultaneous auction. There will be videos and photos available of each female available on AuctionsPlus.

If you have not used AuctionsPlus before, head online and visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au). Go to the 'Help' pages under the 'Tools' tab for a demonstration auction. Please also register as an AuctionsPlus user at least 24 hours prior to the sale in order to bid. Note that transport arrangements must be organised on the day.

- [www.auctionsplus.com.au](http://www.auctionsplus.com.au)
- P: (02) 9262 4222
- [info@auctionsplus.com.au](mailto:info@auctionsplus.com.au)

## Buyers registration

Animals at the sale can only be purchased by registered bidders. We recommend registering early via the GTSM or AuctionsPlus websites as listed above.

## Inspection

A Female Inspection Day will be held on December 3rd 2022 from 9am to 4pm AEDT at 248 Sargent Rd, Table Top via Albury, NSW.

Inspections can be arranged by contacting Michael Glasser at GTSM on PH: 0403 526 702 or James Brown at Ray White Albury on PH: 0419 333 295.

## **Ray White - GTSM**

## **Outside Agents Rebate**

Agents that introduce clients in writing 24 hours before the sale and settle within 7 days receive 1% rebate.

## **Auctions-Plus**

Bid online via AuctionsPlus.

The sale will be interfaced as a simultaneous auction. There will be videos and photos available of each heifer available on AuctionsPlus.

If you have not used AuctionsPlus before, head online and visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au). Go to the ‘Help’ pages under the ‘Tools’ tab for a demonstration auction. Please also register as an AuctionsPlus user at least 24 hours prior to the sale in order to bid. Note that transport arrangements must be organised on the day.

– [www.auctionsplus.com.au](http://www.auctionsplus.com.au)  
– P: (02) 9262 4222  
– [info@auctionsplus.com.au](mailto:info@auctionsplus.com.au)

## **Inspection**

Open day to be held on December 3rd 2022 from 9am AEDT to 4pm AEDT.

For inspections with Little Meadows call Michael Glasser: 0403 526 702.

## **Transport**

Purchasers to make own arrangement in consultation with the vendors.

## **GST**

All animals are sold exclusive of Goods and Services Tax (GST).

## **Insurance**

Purchasers are strongly encouraged to immediately insure their new acquisition.

## **Sale photographs/Videos**

All photographs and videos can be viewed via AuctionsPlus.

[www.littlemeadowsangus.com.au](http://www.littlemeadowsangus.com.au)

## **Parent Verification Suffixes**

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal’s name are as follows:

- PV: both parents have been verified by DNA
- SV: the sire has been verified by DNA
- DV: the dam has been verified by DNA
- #: DNA verification has not yet been conducted
- E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

## **Embryo Expected Av. Progeny Values**

Expected average progeny values are provided to assist breeders estimate the outcome of particular mating combinations. The actual TransTasman Angus Cattle Evaluation EBVs for any progeny resulting from a particular mating are likely to vary from the expected average values.

## **Attention Buyer**

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## **Sale catalogue disclaimer**

We have tried to provide information in this catalogue that is correct to the best of our knowledge at the time of publication. However, neither the vendors nor the selling agent assumes any responsibility for the accuracy, reliability or completeness of any information provided in this catalogue nor the use or interpretation thereof. It is advised to seek independent verification of any information contained in this catalogue before relying on such information.

# UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

## What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with an IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following pages.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

BIRTH			
Calving Ease Direct	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

GROWTH			
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

FERTILITY			
Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

CARCASE			
Carcase Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

## FEED EFFICIENCY

Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
---------------------------	--------	--	---

## TEMPERAMENT

Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
----------	---	---	--

## STRUCTURE

Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.

## SELECTION INDEXES

Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.
