## Ram & Ewe Sale

**Thursday 17 February 2022, 1:30pm**  
**1171 Nundle Rd, Piallamore**

### Sale Information

Any ram selected to be registered and transferred for stud use have \$4000 reserve. Please inform agents if you would like your rams registered. Rams weighed 17/01/2022. Sheep have been multiple vaccinated, 6 in 1+B12 17/1/2022. Abelene Park is an Accredited brucellosis free flock - No 81/1 & Property Biosecurity Plan. All sheep vaccinated with Gudair and Scabiguard. 2% rebate offered to outside agents accompanying purchaser to the sale. LambPlan Data Analysis 15/1/2021.

Abbreviations used:

- T - Twin
- TR - Triplet
- H - Hildden
- Y - Yentrac
- Tat - Tattykeel
- S - Sunnybanks

### Brief Stud History

Abelene Park Poll Dorset Stud was founded in 1977 with the purchase of 75 ewes from Boree Cabonne Stud, 9 Karawina Ewes and 5 Ewes from Tattykeel Stud, along with the Ram Marylebone 921-68.

Twelve sires from the famous Karawina Stud were used during the 80's and 90's. These rams embedded a consistent quality and type in our stud and contributed greatly to improving our flock.

Since 1998, we have conducted a number of AI programs that have proved very successful. We have been able to use some outstanding sires that have helped take our flock in the direction we have been aiming for and produced some excellent commercially relevant sheep that also compete strongly in the show ring.

## **Abelene Park News**

We are holding the sale at 'Belaylee', 1171 Nundle Rd, Piallamore, 18km from Tamworth.

This year we have interfaced the sale with AuctionsPlus, due to the uncertainty of Covid. Fortunately, prospective buyers and agents can still attend and participate in the sale as visual appraisal is an important part of selection.

We have LambPlan data for most of the sheep as another tool to help select the best stock for your operation. Please see information on the following page to understand how best to use the figures. We are always available to help with ram selection and understanding of information.

With Covid limiting opportunities to exhibit at major events over the last couple of years. NSW Dorset Championships in Cowra was the only time we got the rams out in 2021. We were successful in winning 3 ram classes, with our keeper ram AP39 "Brickman" Winning the junior performance class and junior champion ram.

Our last trip to Bendigo for the Australian Dorset Championships in 2019 was a highlight for the stud, winning the Junior and Intermediate Champion Rams and Lindsbury Trophy Best group of 3 Rams. Our Junior Champion Ram continued on to win Grand Champion Ram and Supreme Exhibit. We also had the top selling ram and top average for the 3 sale rams for the 4th year in a row.

The White Suffolk and Charollais infused rams offer more selection type and are a really interesting group. The White Suffolk rams have strong links in the LambPlan database, which reflects in the ASBV numbers.

We are offering an excellent group of Charollais and Charollais cross ewes that have great structure and conformation and have been running with the Charollais ram - C82 since 17/1/2022

The lamb market continues to be very strong, particularly for quality well grown young lambs. With an improved season and lambs getting to marketable weights quickly, returns from your prime lamb sires have great potential.

## **Sire Information**

### **"Aldi" AP228-18**

### **Sire AP251-08**

This amazing young sire was our keeper ram from our hugely successful 2019 show team. He is the sire of 'Brickman', our keeper ram this year that is a really powerful young ram that was Junior Champion at the NSW Championships and performance class winner. He also sired our top selling ram at our spring 2021 sale at \$7400.

### **AP185-18**

### **Sire AP107-17**

A large frame ram with smooth shoulders and wide loin. He is sired by AP107, who also sired our Supreme Exhibit at the Australasian Dorset Championships in Bendigo in 2019. A son of AP185 was our top selling ram at \$10,000 in the ADC online ram sale 2021.

### **"Silk" AP228-19**

### **Sire Yentrac 169-11**

A top son of Y169 that we retained. He is a ram with excellent neck and shoulder setting, long body and very good hindquarter. His first son sold at our 2021 Spring sale for the 2nd top price of \$6600. He will have more progeny later in 2022.

### **Rene 175-19**

### **Sire Springwaters 104-17**

Purchased in 2020 for his excellent conformation, bone and good wool. His sire was Senior Champion Ram at Bendigo in 2018. He has produced a very good line of lambs in his first drop.

### **Yentrac 169-11 x Penrise 140-08**

### **"Digger" AP287-17 x Yentrac 710-15**

### **AP25-19 x Tattykeel 666-07**

### **AP237-17 x AP28-16**

## White Suffolk

### AP2-19

### Sire Farrer 258-17

A top son of F258 that was a standout from a young age. He is a ram with a great carcass and good structure.

### Farrer 258-17

### Sire Farrer 64-16

Our pick of the 2017 Drop Farrer sale rams and foundation sire for our white suffolks. He is a long bodied ram with sound leg setting that has a very good set of balanced lamb plan data.

### Farrer 54-19 x Ella Matta 300-17

## Charollais

### Camlea 82

### Sire Camlea

A moderate frame ram that carries the sound leg structure and carcass that we strive for in all our stock. He has crossed well over the C65 daughters.

### Camlea 65

### Sire Camlea

The first Charollais ram we used, that also had the leg setting, body depth and shape that we were looking for.

## Understanding LAMBPLAN ASBVs

Rams with lower ASBVs for birth weight (BWT) produce lambs with lower birth weight. Both low (lamb survival) and high (lambing difficulties) birth weights should be avoided.

Rams with more positive ASBVs for post weaning weight (PWT) produce lambs that grow quicker and reach target weights in a shorter time. This ram will produce lambs that are, on average, 3kg heavier at post weaning age (7.5 months) than a ram with an ASBV of 0.

Worm egg count (WEC) ASBVs estimate an animal's genetic potential for worm burdens. Lower WEC ASBVs are desirable. This ram will, on average, sire progeny that will have 5% fewer eggs/gram than a ram with an ASBV of 0.

Trait	BWT (kg)	WWT (kg)	PWT (kg)	PFAT (mm)	PEMD (mm)	WEC (%)	INDEX
ASBV	0.3	4	6.0	-1.5	1.0	-10	150
Acc	43	63	71	59	69	37	

Rams with a more positive ASBV for weaning weight (WWT) will, on average, produce lambs that grow quicker to weaning. This ram will produce lambs that are 2kg heavier than a ram with a 0 ASBV for WWT.

Rams with a more negative ASBV for post weaning fat (PFAT) will produce lambs that are leaner, at the same weight. This ram will produce lambs that are, on average, 0.75mm leaner at the GR site when compared to a ram with a FAT ASBV of 0.

Rams with more positive ASBVs for post weaning eye muscle depth (PEMD) produce lambs that have more muscle, independent of weight, and a higher lean meat yield. This ram will produce lambs that have, on average, a 0.5mm deeper eye muscle than a ram with a 0 EMD ASBV.

An index is a guide to the value of a ram for a particular market. Rams with higher indexes will produce lambs that are more suited to that particular market target. It is important to understand what market the index applies to before using an index.

- An ASBV of 0 is the average of the 1990 drop. It is important to compare ASBVs against current industry average.
- Note: A useful rule of thumb for converting ram ASBVs into lamb production differences is to simply halve the ASBV (as rams contribute half the genetics of the lamb).
- Accuracy - published as a percentage, is a reflection of the amount of effective information that is available to calculate the ASBV. All ASBVs are now published with accuracies. The higher the percentage, the closer the ASBV is to the true breeding value of the animal. Breeding values without accuracies are Flock Breeding Values (FBVs) and can only be compared within the flock.
- MLA acknowledges the contributions of the Australian Government and AWI in the development of this publication.
