CLASSIMATE ASSESSMENTS

19th ANNUAL PRODUCTION SALE

Friday 4th February 2022 1pm (EST)

Glenavon Gravesend NSW

Justin & Lorroi 0439 367 737

Nutrien
Ag Solutions

John Settree 0408 297 368 Matt Collett 0427 311 415 (NSW) Gus Foott 0400 901 387 (QLD)

2022 PRODUCTION SALE TEAM

163 Dorper and White Dorper Rams (9-14 months old).

6 Amarula Dorper Stud Sires

41 Stud Dorper ewes

Amarula Dorper Rams are robust, hardy rams, bred under commercial conditions and raised on perennial pastures for growth, moderate adult weight and good conformation. Our rams aren't the biggest, fattest or fanciest rams, but they will perform and their progeny will make you money.

Our focus is producing rams for commercial enterprises, with production traits of fertility, quick growth and carcase. Our ewes produce over 200% lambs per year, with lambing intervals of 6.5 to 8 months.

Information is vital for making decisions on ram selection.

- Visually assessed – Dorper Typing System and Classmate Assessment (used together offer a huge amount of visual data)
- Performance recorded using Lambplan (genetic information)
- DNA genotyping and parentage testing (more accurate genetic information and eating quality trait information)

Classing of the Sale Team with Christo Harmse

"I would like to thank Justin and Lorroi from Amarula Dorpers and White Dorpers, for the opportunity to Type their sheep for their upcoming sale, on the 4th February 2022.

Congratulations on presenting an outstanding line of rams and ewes for your sale. I don't have to wish you luck. Your hard work and dedication to the Dorper and White Dorper breed, over many years, has paid off and I am confident that you will have an successful sale.

To you the Buyers. This is a sale you can buy from with confidence, either being present at the sale or from home. These rams are not pampered or manicured. You have not one or two **but three** assessment tools, to help you to select the perfect ram for you. If you are looking for an Elite Stud Ram there are plenty to choose from, or if you are just looking for a good sound commercial ram you will find them there too."

Christo Harmse
DSSA Independent Accredited Inspector

2021 DROP SALE RAMS LAMBS

Amarula is retaining the semen rights of **all sale rams**. This includes the rights to collect semen, in the future, from any sale ram, at the purchaser's convenience and our expense.

Amarula Dorpers has been established for 20 years now and this is our 19th Annual Production Sale. Our first sale was way back in 2003 when we offered 20 rams and 10 ewes. This year we are offering 112 Dorper Rams and 50 White Dorper Rams and 41 Dorper and White Dorper Ewes.

Amarula Dorper Rams are robust, hardy rams, bred under commercial conditions for commercial enterprises. They are raised on perennial pastures and selected for growth, carcase, moderate adult weight and very importantly good conformation. Our rams aren't the biggest, fattest or fanciest rams, but they will perform and their progeny will make you money.

Information is vital for making decisions on ram selection. Our rams are:

- Visually assessed using 2 methods, the Dorper Typing System and Classimate Assessment (used together offer a huge amount of visual data). You have a complete breakdown of every animal, showing its strengths and weaknesses.
- Performance recorded using Lambplan (genetic information)
- DNA genotyping and parentage testing (more accurate genetic information and eating quality trait information)

We continue to select heavily using the Dorper breed standard, to throw out any animal with conformation issues (especially hoof growth, shoulder conformation and toplines). There is a no second chance policy for reproduction and fertility problems, poor mothering ability or bad temperament. These are particularly important selection criteria.

Our main selection criteria revolve around good fat coverage, good muscling and true to the Dorper type of feminine ewes and masculine rams. Fat cover is so important for the survivability of the Dorper ewe and ram. A ewe needs to rear a lamb and get back in lamb if it is tough. Without a good fat layer this cannot happen. They must be able to perform in challenging conditions and when the seasons are fantastic.

Our breeding philosophy has changed over the years, as we have become more experienced breeders. It is about breeding the right article the first time and reducing the number of progeny wastage. It is about running less ewes to produce more high-quality lambs. For milking mothers to go back in lamb while the lambs are still on them. A dorper needs to adapt to all situations. Through accelerated joining, we have increased our numbers remarkably since the drought ended. Our ewes produce over 200% lambs per year, with lambing intervals of 6.5 to 8 months.

So, what does that mean? It means there is no better time to get yourself the some of the best genetics in Australia. What you see is what you get. Bred for production and commercial reality. All rams are visually assessed for conformation and selected on carcase quality traits as well as performance recorded in Lambplan.

The drought has proven Amarula Dorpers are robust and bred to survive and reproduce under challenging seasonal conditions. They also thrive in the good times and perform extremely well in feedlots with outstanding growth rates and muscling.

The sale is interfaced with AuctionsPlus with live audio and video on the day. All videos are on AuctionsPlus. **For more info or you would like a chat give Justo - 0439 367737 or Lorroi a ring - 0428829489.**

If you are in the market or just having a stickybeak, join us for Dorper lamb and gravy rolls, with the help from the Westpac Helicopter rescue service from Inverell. Our Charity Ram proceeds this year will go to this wonderful organisation.

Thankyou for coming and have an awesome day.

AMARULA DORPER SALE INFORMATION

VISUAL EVALUATION

Amarula Dorper and White Dorpers chosen in the sale team have been selected by Justin and Lorroi. They have been visually assessed under the Dorper Breed Standards for correct conformation, excellent carcase traits and high reproduction ability.

Christo Harmse, an independent DSSA dorper inspector, classed the rams using the Dorper Typing System on the 24/1/22.

Classimate, was also utilized to give you specific information on the rams' conformation, and where the positive & negative attributes are. Both systems used together give the purchaser confidence they are making the right choice.

We are breeding rams that are productive and commercial. Amarula Rams will breed you a fast growing, early maturing prime lamb that is off to market, so you can now concentrate on the next round of lambs being born.

SEmen RIGHTS

Amarula Dorpers retains the semen rights of all rams. This includes the rights to collect semen from any sale ram, at the purchaser's convenience and our expense.

HEALTH

Amarula is an Ovine Brucellosis accredited flock. We have undertaken 2 negative Faecal 350 tests for Ovine Johnes in the last 5 years and have our own On Farm Biosecurity Plan. All rams and ewes have received the required Glanvac 6 in 1 plus Scabymouth vaccination protocol.

DELIVERY

We take care in the efficient delivery of all stock after the sale. Nutrien agents will be handling the delivery of rams & ewes after the sale.

NO STOCK WILL BE LOADED UNTIL AFTER THE SALE IS COMPLETED!

FREIGHT AND TRAVEL

We are willing to hold animals for a reasonable period to allow for coordination of transport to their new home. We can provide recommendations of suitable stud stock carriers and will assist wherever we can for a safe and efficient transport of animals to your home property. All due care will be taken for the safety and health of your purchased rams prior to pick up or delivery, however, to protect your purchase, you may wish to consider insuring your rams from the conclusion of the sale.

TALK TO US ABOUT OUR FREE DELIVERY RUNS TO MAIN AREAS

INSURANCE

Animals will become the responsibility of the purchasers at the conclusion of the sale.

We strongly recommend insuring your animals for a period at the conclusion of the sale. Insurance can be arranged with Nutrien as required.

FERTILITY GUARANTEE

All Rams & Ewes are guaranteed to breed. Any claim against the breeding ability of an animal purchased should be made within six months of the date of sale.

The guarantee covers the purchase value of the ram or ewe. **This does not cover infertility due to injury, misadventure or disease contracted since the sale of the ram or ewe. Insurance covers this.** A veterinary certificate may also be requested at the vendor's discretion.

The ewe or ram shall be returned in the event of an animal failing to breed and either be replaced with an animal of comparable value or credit to the full purchase price will be given at the following sale or on a private sale animal (if available).

REGISTRATIONS

If you would like your purchase to be transferred to your name, fill out the buyer's instruction slip and tick Transfer.

AUCTIONSPLUS

The Sale is interfaced with AuctionsPlus. This allows buyers to place bids online over the AuctionsPlus system. There is live streamed video and audio. It is nearly as good as being ringside on the day.

Please register online at <http://auctionsplus.com.au/Registration/PreRego> at least 48 hours prior to the sale.

TELEPHONE BIDDING

If you don't think your service is good enough, phone bidding is always an option. Please ring our Nutrien (Landmark) sale team or Nick Pagett (0439 367737). Nick has been present when we assessed all the rams and ewes.

OUTSIDE AGENT REBATE

A 3% rebate is offered to outside agents introducing a client in writing to Nutrien Narrabri, 24 hours before the sale (0427 311415) or in person on sale day.

LUNCH & REFRESHMENTS

All refreshments and drinks are provided by Amarula Dorper Stud. We have Amarula Dorper Lamb Gravy rolls handed out by Westpac Helicopter rescue service volunteers. Stay and join us after the sale for refreshments sponsored by Suncorp Bank.

DIRECTIONS

Glenavon is 45km east of Moree on the Inverell Rd (Gwydir Hwy). You can't miss the Amarula Dorper sign at the turnoff. We are 3km west of Gravesend.

SHEEP GENETIC ASBVS

Australian Sheep Breeding Values are an **estimate** of an animal's genetic potential to pass on traits to its progeny. It is based on pedigree (genes), performance recorded information (e.g. weights at certain ages, scanning for fat depth and muscle) and the environment in which it is raised (e.g. birth type, old or maiden mother, amount of feed). They are essentially a projection of how that animal's progeny will perform for a range of traits.

It is important to know that ASBVs are a tool for breeding sheep, they do not provide all the answers. Visual selection is very important to cull sheep that will not be functional in a commercial production system, regardless of how good the ASBVs are.

ASBVs provide a measure of the animal's genetic potential independent of environmental influences that can affect the physical appearance.

WEIGHT ASBVs describe the animals' genetic merit for growth rate.

WWT - Rams with a more positive weaning weight (WWT) will on average, produce lambs that grow quicker to weaning – 100 days.

Average for Dorpers is 5.6 and the top 10% is > 7.6

PWT - Rams with more positive ASBVs for post weaning weight (PWT) produce lambs that grow quicker and reach target weights in a shorter time. Post weaning weight estimates the genetic difference between animals at 225 days of age.

Average for Dorpers is 8.9 and the top 10% is > 11.9

CARCASE FATNESS

ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal.

PFAT - Rams with a more negative ASBV for post weaning fat (PFAT), will produce lambs that are leaner, at the same weight. Post weaning fat estimates the genetic difference between animals at 225 days of age.

Dorpers with positive fat will survive better in tough conditions and dry times. Fat increases the ability of breeding ewes to maintain weight and condition, conceive twins, better milking and mothering ability and survivability. Also, increases the eating quality due to intramuscular fat.

CARCASE MUSCLING

ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.

PEMD - Rams with more positive ASBVs for eye muscle depth (EMD) produce lambs that have a higher lean meat yield. Post weaning muscle depth estimates the genetic difference between animals at 225 days of age.

Average for Dorpers is 1.5 and the top 10% > 2.5

A positive PEMD is best as it increases the value of the carcass, by increasing the amount of lean meat it contains and increases dressing percentage.

Increases the amount of meat on higher priced cuts. Higher muscling is favourably related to reproductive rate.

WORM EGG COUNT (WEC)

ASBVs describe the value of animals' genes for carrying worm burdens – a combination of being genetically less likely to pick up worms and being better at getting rid of them. Resistance can result in fewer drenches being required each year. The best way to increase the genetic resistance of your flock to worms is to use rams with better than average worm resistance.

Worm Egg Count (%) - Rams with more negative WEC ASBVs produce progeny who have a higher genetic potential to resist worm burdens. Lower WEC ASBVs are desirable.

Average for Dorpers is -24 and the top 10% is > -49

MCP INDEX (MATERNAL CARCASE PRODUCTION) AND SRC INDEX

A combination of ASBVs into a single value. Each ASBV is weighted to reflect the traits emphasis in the breeding objective. The Maternal Carcase Production (MCP) index ranks animals on their suitability for a self-replacing system with a carcase production focus. This index balances the main economic traits relevant to Maternal breeders. This allows higher gains to be made for growth and carcase traits. The index aims to maintain adult weight at current levels.

Average for Dorpers is 132.5 and the top 10% is > 142.2

ClassiMate
Made Accurate for You

ClassiMate is a Livestock Visual Assessment tool designed to assist in providing accurate and unbiased assessment of livestock. This process generates valid assessment data for the purposes of breed development, benchmarking and sale and marketing information.

If you aren't
Assessing
You're only
Guessing!

Measure. Manage. Market

- ClassiMate is a brilliant new App for the visual assessment of any livestock, (utilising their own breed standards), in the yards and recording the information on your mobile device. ClassiMate allows you to visually evaluate the quality of your livestock, by taking you through a series of prompts related to the animal's structure and overall correctness. The platform then generates an overall quality score that is measured against industry-accepted ideals.
- Quick and easy to use - a complex assessment can be done in as little as 60 seconds per animal.
- The animals body is broken into individual parts such as head, neck barrel, hindquarter legs and feet and given a score. This enables the purchaser to see where the positive attributes and negative points of the individual animal are.
- It enables farmers to keep a record of their breeding animals' characteristics, as well as handy statistics about their overall flock, plus profile pages of each stud animal to send to other breeders at the touch of a button.
- A range of tools are then instantly available to engage with your client base.
- The data provides relevant feedback to assist buyers with their purchase decisions
- It is another valuable tool we are utilising to assess the individual Dorper ram or ewe by the Dorper Breed Standard, along with Lambplan and our specific Dorper inspection system. It can score and place your animals in your own flock. It can be used alongside the Dorper Typing System to explain in an easy visual graph, why an animal is a Type 3, 4 or 5.
- ClassiMate provides instant, detailed comprehensive reports on the strengths and weaknesses of your herd.
- Slick-looking share graphics are generated at the push of a button. They include photographs and livestock information, perfect for branding and promotion purposes. As above.

Christo Harmse, an independent, accredited DSSA Inspector and Judge, Typed our Dorper Rams, using the International Dorper Breed Standard of Excellence, on 24/01/2022.
