SALE INFORMATION

STARTING TIME: 2.30 pm

NEW VENUE:

This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to Sale Day. It allows us to assist you select the sire best suited to your needs. Phone us on 0419 884 839 to make an appointment.

Lots catalogued are available for prior Sale Day inspection at our Bull Walk Day from 1.00pm on Thursday 17th February.

Sale day inspection from 11.00am.

CATERING:

Light lunch will be available and BBQ tea after the Sale.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

SEMEN RETAINED:

Banquet will retain semen from some of the bulls in this Sale for within herd use only. These bulls will be nominated on the supplementary sheet.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

SALE INFORMATION

FEMALES VET CHECKED:

Unjoined heifers have passed a breeding soundness examination.

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We are a J-BAS 8 herd.

See page 132 for our National Cattle Health Declaration.

STOCK HEALTH:

All animals have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any animals purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS (see page 110)

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after Sales service. If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen or Noeleen Branson by phoning 0419 884 839 or 0437 029 992
or Email banquetangus@westvic.com.au

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

WELCOME

Whether you are a farmer or supplier of products or services to agriculture, 2020 and 2021 have been amazing times. I didn't experience the "pound for a pound" wool boom but this must be approaching those heady days. Vehicles, machinery and infrastructure is being updated or replaced across the country.

Agriculture will be safer, more productive and strongly positioned to still prosper when the cycle turns in favour of the consumer. Some believe that the current may be the new norm. With my experience I am too conservative to dream that big. Often I have stated that I have no problem with being "wrong and happy". This is certainly one of those occasions!

Sadly, through this period some have suffered adversity. Lockdowns have damaged workers and businesses alike. Some small businesses have closed permanently.

Natural disasters, accidents or health events have been catastrophic for many families. We hope the survivors find the strength to overcome these tragedies. We extend our best wishes.

It is exciting to see so many young people choosing Agriculture as the Industry they wish to join. These improved conditions have made it possible for another generation to be sustained by the farming operation. It has also encouraged the next generation to seek that opportunity. Young people are also being attracted to the rural services sector. Stock Agents, agronomists and farm contractors are seeing an influx of Youth. I know they all look young to me, but this is real.

From our family's perspective this is a very exciting time. We are very fortunate to have our three children and two in laws living close by and all involved in Banquet. We are blessed to have a growing band of Grand Children. Being Nana and Papa is so much fun!

Some 18 months ago the Family made the decision to develop cattle yards and a Sale Venue at "Sunnyside" The spiritual home of Banquet on the side of Mount Shadwell. This facility will make dealing with hundreds of bulls each year safer and more enjoyable. Especially for Nana and Papa. Most importantly this investment, driven by the next generation of Banquet, is a monument to their commitment to the long-term future of Banquet. I hope they repeat this process, but not for another fifty years.

WELCOME

For this Years Sale we will not have the pleasure of admiring the vocal gymnastics of Kevin Norris. Kevin is well but a few little warnings have prompted him to hang up the gavel. We hope Kevin and Anna can be with us on Sale Day. I met Kevin at Sydney Royal in 1985 when he sold two Poll Hereford bulls for my Family. When we started Banquet Kevin was always very supportive of our business and Family. He referred to Gordon and then Hamish as "my little mate". Not quite so apt now! He also has vivid memories of one after Sale when a young Dianna turned on a tap. The high-pressure jet shocked him when it struck very high on his inner thigh.

Mr. Norris we all wish you and Anna a long and enjoyable retirement at Batemans Bay. Walking the beach and watching your Grand Children flourish. You may never fully appreciate the influence your advice and support has had on our personal and professional growth. Incidentally you have been a hell of an Auctioneer at every one of our 22 Autumn Sales.

We would also like to acknowledge the long-time support of Andrew Sloan. I met Andrew in my previous life. He was a Stud Stock Agent in Naracoorte when I was part of my Family's Poll Hereford Stud. Andrew has been our Wesfarmers, Landmark and Nutrien representative since Banquet began. Thank you, Andrew, for all your support and best wishes for your next adventure.

This Year we begin a new era with Mr Paul Dooley joining our selling team. Again, we have known Paul for many years and have great respect for his knowledge, advice and ability. We are sure you will enjoy his work and please take the opportunity to introduce yourself to Paul.

Late in 2021 we completed Thirty Years of Banquet Angus. Noeleen and I are proud of this achievement, but it is you, our friends and clients, who deserve the accolades. Without your love and friendship, guidance and support and above all loyalty, we would have faltered years ago. So, from Noeleen, the Family and I, we thank you for all you have brought to Banquet and look forward to continuing to work together for many more years.

Please join us after the Sale for a BBQ and to enjoy each other's company. No social distancing required.

Thank You
Stephen and Noeleen

120 COMMERCIAL ANGUS HEIFERS RISING TWO YEARS - PTIC

To be offered at 2:30pm at the Banquet On Property Sale and interfaced with Auctions Plus

Sourced from leading Banquet Clients
Ryan Pastoral, Winninburn, Camp Creek, Bengarna, and Cadell

Wattletop Sitz 458N
Dam: WATTLETOP DANDLOO K48
 Wattletop Dandloo H297

Noleen selected Moonshine M42 from the very last Wattletop Bull Sale. Purchased in partnership with Quarterway Stud, M42 was only a yearling at the time. Moonshine is a unique sire. He has proven to have exceptional calving ease. His calves are consistently light born with a refined shoulder but still vigorous at birth. His sons, although low birth weight, show particularly good growth, significant muscularity and extra cover. His daughters are now in production and we are very excited. They are long and refined through the neck and shoulder. Strong spined and have deep ribs and flank. Their udder shape and teat size are excellent. Most importantly their calves are sappy. The first sons of M42 sold in Autumn 2020 to top at \$21,000 and \$23,000 in Autumn 2021. In Spring 2021 his sons topped at \$28,000. We have retained two sons and kept semen from another three.

Nunn N089 featured as Lot 3 in our Autumn 2019 Sale. He was purchased by John Matthies as a foundation sire for his Moorunga Stud. Prior to Sale we used N089 over our maidens. The sons in this Sale resulted from those joining's. N089 appealed to us with his length and soundness. His calves show these strengths. We inspected N089, May 2021 and we were so impressed with his depth, capacity and he just moved so freely for a large volume Sire. Since our visit we have used him heavily in our ET and AI programs in 2021. Many more sons will be offered in 2024.

BANQUET FEATURE SIRES

BANQUET NATIONAL N278

Sire: ASCOT HALLMARK H147

Dam: BANQUET JULIE W164

National N278 is a stunning individual. From the tip of his nose to his tail N278 is one of the longest bulls I have witnessed. He has a long, powerful head and huge depth of rib and flank. His weight at every stage has been exceptional. On Sale Day he posted a weight of 975kg at 19 months. A battle between two of our greatest supporters saw N278 head to Toora West for \$48,000. His dam, Julie W164, was one of our favourite and successful donors. She produced 56 calves and her top 11 sons had averaged \$17,500. We are excited with the progeny of N278, with their stretch, volume, fine shoulders and exceptional skins.

BANQUET NARROGIN N367

Sire: ASCOT HALLMARK H147

Dam: BANQUET IRENE A266

Narrogin N367 is the third son of Ascot Hallmark H147 that has sons in this Sale. Hallmark left us a group of sons with extra length and weight to select from. N367 is the Irene A266 son we chose to use. A266 produced 22 progeny at Banquet. The quality of her daughters kept her in the donor group. But when I researched her, 10 out of 10 of her sons were sold for breeding. N367 was retained but later sold to solve a problem for Daryl Brown. Daryl's steers by N367 that were sold at the Mortlake Weaner Sale and weighed 424kg. they returned \$2700.

Lot 117 R442, is a son of N367

TRIO PURE HEART P56

Sire: ASCOT LION HEART L305

Dam: TRIO BURNETTE D42

Pure Heart P56, and his flush brother P9, were purchased in the height of the NSW drought. Their muscularity, soundness and fine skins appealed to us. As does the integrity of their breeders, Matt Cherry and Shelley Piper. Pure Heart P56 has produced a line of earlier maturing sons and daughters. They show extra muscularity and butt shape. Ascot Lion Heart, sire of P56, was selected by Trio and Ben Nevis herds for \$70,000 in 2016. Dam of P56, Trio Burnette D42, carries the great Burnette family made famous at Forres and Ruffs Angus.

MILWILLAH KRAKATOA K92

Sire: MATAURI REALITY 839 (NZ)

Dam: MILWILLAH BARUNAH H224

We selected Krakatoa as a highly proven calving ease specialist. Krakatoa has 577 progeny in 39 herds. This gave us an opportunity to sample genetics from the Milwillah program that we respect highly and to benchmark our homebred calving ease bulls. This has been a success on all fronts to date. His sons offer a variation for producers to consider. His full brother, Napa N498, was repurchased by Milwillah at the Premier Dispersal Sale for \$50,000.

JOINING SIRES

BANQUET NUTTELLA N462

Sire: BANQUET JAMBEROO J507

Dam: BANQUET YENDI K224

It is the consistency of the progeny of Nuttella N462 that has us so excited. Bulls that produce consistent lines of progeny are so much more valuable. And N462 consistently improves so many traits. He adds thickness, depth and do ability to his progeny. He improves structure and temperament. His progeny in this Sale excel in these traits. N462 has been depastured with the cows that are offered in this Sale.

TRIO QANTAS Q78

Sire: BALDRIDGE BEAST MODE B074 (USA)

Dam: TRIO BURNETTE L78

Qantas Q78 was purchased at the 2020 Trio Sale for the Sale topping \$17,000. Although only a yearling, Q78 showed the neck extension, shoulder refinement and mobility we appreciate. His sire, Beast Mode, has added the extra width of loin, width and depth of hindquarter. His skin and hair type are attributes we seek. At this early stage, his first calves were only born last Spring, we are excited with their performance and consistency. They show the attributes we chose Qantas for. We used Qantas very heavily in that first season and he has shown the ability to recover strongly. Another great positive!

BANQUET QUARTER POUNDER Q252

Sire: MERRIDALE GAFFA G4

Dam: BANQUET KITE L131

Quarter Pounder Q252 attracted a lot of attention at our Autumn Sale last year with his impressive combination of phenotype and data. Q252 is very thick with excellent muscle expression and depth of body. His skin is fine with soft hair. He proudly carries a true sires head. Millah Murrah, Alpine, Keringa Studs with ABS secured Q252 for \$60,000. We are all excited with his potential.

JOINING SIRES

BANQUET NOTTER N297

Sire: ABERDEEN ESTATE HOMER H70

Dam: BANQUET IRENE K358

Notter N297 is proving to be an outstanding sire. He had five sons born in 2020. R018 used at Banquet and topped our '21 Spring Sale at \$48,000. R021 sold '21 Spring Sale for \$22,000. R028 lost through injury. R178 retained for Stud duties. R023 Lot 47 in this Sale. His daughters are just as impressive and we are keen to see them in production. N297 is from an outstanding cow, K358. Her other sons have sold at \$41,000 and \$20,000. R500 another son sells in this Sale at Lot 64. He is an exciting prospect, and we are retaining his semen. N297 was purchased by Geoff Groves in our 2019 Sale for \$12,000, what great value!

BANQUET RABBLE R178

Sire: BANQUET NOTTER N297

Dam: BANQUET IRENE P293

Rabble R178, is our choice of the Notter N297 sons to retain for heifer joinings. His phenotype is beautifully balanced for calving ease whilst maintaining the strength of head and bone and thickness of hindquarter. Find the story of his sire Notter N297 above. P293, dam of R178, is another exciting heifer by Moonshine M42. Behind every good bull is a great cow, this time it is Irene F669, Maternal Great Grand Dam of R178, who is a lovely sound cow by Zappa Z236. F669 has made it into the donor pen several times at Banquet.

BEN NEVIS RAMBO R230

Sire: BEN NEVIS NEWSFLASH N239

Dam: BEN NEVIS CELESTE J121

We partnered with Glenmorgan, Fernleigh and Koojan Hills Studs to purchase this outstanding yearling for \$70,000. His breeders, Stu and Erica Halliday, are also using him so he will get an outstanding test over five herds in three States. His sire, Ben Nevis Newsflash N239, topped their 2018 Sale at \$28,000. We partnered with Bannaby Angus to purchase Newsflash's dam, Jean H215, for \$82,000 at the Ben Nevis Mature Cow Dispersal. Erica Halliday described Rambo, "in the flesh he is lovely with a solid sires head, thick, soft top and expressive hindquarter. He is one of the most docile bulls in the Sale and an absolute pleasure to work with". No semen is being released for sale, so these pregnancies are your first opportunity to access his genetics.

Lot 3

ELITE DONOR COW Pedigree, Phenotype and Progeny Kite J463 is bred in the purple and producing the gold!!

- The maternal pedigree of J463 is a story of greatness
- Dam, Kite G300 was massive in thickness, depth, capacity and frame and was a donor cow at Banquet
- Kite J463 made it into the donor pen after her third calf
- J463's first half sister, unfortunately died
- J463's second half sister, Kite N459, joined the donor group after her first calf and rated the top of her drop
- J463's third half sister, Kite P011, made it into the donor program as a maiden heifer for her superior quality and the performance of her sisters. The first son of Kite P011 sold in our Spring 2021 sale for \$28,000 to Steve McLeod
- J463 is the eighth consecutive generation of females that have been in our ET programs including some of Banquet's favourites, Kite T59, Kite P43, Kite L88 and Kite E14
- J463's first calf, Mirrool M078, topped our 2018 Autumn sale at \$35,000 to Jumbuck Park. Her second calf, Nixon N099, topped our Spring 2018 Spring Bull Sale at \$32,000 to Pheasant Creek (sons have sold to \$30,000). Her third calf, Preston P099, sold for \$18,000 in Autumn 2020 sale to Webb Pastoral. Her fourth son, Quickfix Q341, sold for \$20,000 in Autumn 2021 sale to the Pitt Family. Her 2020 born bull calf will feature in our Spring 2022 Sale
- Both daughters have been retained
- J463 is averaging 8 A grade embryos
- J463 calved 05-09-2021 but unfortunately the calf died at a few days of age
- J463 will be flushed late January and will be left open ready to flush again or join to your choice

**If you want to reach high in the Angus Breed Banquet Kite J463 is the cow for you!!
DO NOT MISS THIS OPPORTUNITY!!!**

Banquet Mirrool M078, first son of J463

Banquet Nixon N099, second son of J463

Banquet Preston P099, third son of J463

Banquet Quickfix Q341, fourth son of J463

PICK OF THE PAIR

Lot 13

Future Donors

Offering the pick of two outstanding twin sisters

- Females that you could look at all day, bred in the purple and will breed progeny that you can sell any day
- At weaning time these two heifers were in the top four heifers in a contemporary of hundred plus and then we realised they are twin sisters.
- These two females give me goosebumps of excitement when I look at them, then look at their pedigree and think these could have a big impact at Banquet or wherever they go
- When you inspect these heifers you will appreciate the powerful head, soft skin, length of hip to pin, superb docility, depth of flank, capacity, magnificent structure of Lot 12, R222. And the style, presence, fine shoulder, muscle expression, length of body, superb docility and magnificent structure of Lot 13, R223
- Sire, Moonshine M42, was purchased with Quarterway Angus, Tas. He is breeding exceptional daughters for their superb udders, sound structure and are fantastic workers. A son sold in Autumn 2020 for \$21,000, Autumn 2021 for \$23,000 and Spring 2021 for \$28,000.
- Dam N238, is a sound maternal and hardworking cow. She joined the donor group in Spring 2021, her dam F338 is still producing at 12 years old
- Great grand dam C154, topped the Belles of Banquet Female Sale at \$30,000 to Bannaby Angus and is still producing for them at 15 years of age. Her dam Black Gold Champagne J031 was a legend breeder for so many herds and lived until she was 22 years old. Longevity is another big strength of these two heifers
- Full brother Qanga Q238, was selected in our top three bulls of his drop and was retained for Stud use, his first calves were born Spring in 2021 and are very stylish

This is a very special opportunity! You pick your favourite, and the other heifer remains at Banquet.

- Notes:**
- A very nice thick and solid young female.
 - The first progeny from Nuttella N462 to be offered for sale.
 - Nuttella N462, was retained at Banquet for Stud duties, his progeny offer extreme thickness and exceptional temperament. N462's full brother Privilege P357 topped Autumn 2020 Sale at \$27,000 to Toora West.
 - Dam, Wivem M330, sired by Jidabyne J296 sold to Toora West in 2015.
 - Maternal side traces back to the great old Wivem J69, who's top son Arrogance V100 sold for \$20,000 to Toora West, being their second purchase at Banquet.
- Joining Details:**
- Depastured with VONR178 from 30-10-2021 to 10-01-2021.
 - PTIC - expected calving 25-08-2022.

 BANQUET ESTER K434[#]

- Notes:**
- The first of the Powerhouse P288 progeny to be offered for Sale.
 - Sire, Powerhouse P288, was our favourite son of the Banquet Lukas L200 (sold for \$52,000 in 2017 to Fernleigh Angus) and Banquet Dream G489 flush so we retained him. We admire the thickness, muscularity, early maturity and moderate birth weight he offers. All these traits are evident in Lots 27 and 28.
 - Grand dam, Ester N049, is a moderate, thick, correct female, sired by Katoomba K312 who topped our Autumn 2016 Sale at \$21,000.
 - Pending DD genetic condition result. Will only be offered after receiving a clear result.**

When we selected R115 to be the fourth bull offered in this Sale we described him as a "silky soft calf". We commented that he was very maternal and should breed outstanding females. His pedigree dominates in these traits. His sire, K233, was a massive individual but his daughters are moderate, deep bodied and have excellent udders and teats. His dam is sired by F238 which carries the strong maternal traits of 24J and old donor Yendi U82. The Great Grand Dam of R115, P05, was one of our foundation donors whose maternal and longevity traits were outstanding.

R133 is not a bull for the faint hearted. The question is who are the cattlemen that can manage the power and performance of Relief R133 and capture the gains?! The gains that a bull with this strength of bone, huge capacity and great hindquarter brings. The gains that a bull who has an average daily gain of 2.37 kg/day over 90 days. He is a Big Bold Banquet Bull!

Following on from Lot 41, if the conversation is about strength of head and about length of body? About increased capacity, big hindquarter or depth of flank or fine soft skins? Allow us to introduce Rocket R160. His dam, P177, purchased as an outstanding calf at foot at the Anvil Dispersal may prove to be one of the those outstanding introductions. Already a donor at Banquet. Sire of R160, Moonshine M42, is a favourite at Banquet and Quarterway. His calving ease sons in this Sale are exceptional. They start at Lot 70. I hate reading "Stud Sire Potential" but I have to use that phrase this time. We will certainly be using Rocket R160. Semen Retained.

A power bull with a power pedigree and power EBVs. Sired by a big, strong and sound bull with excellent daughters. And from a big, sound producing cow whose dam and granddam and great grandam were all superior breeders. That gives more reward than any number set. R481 only has two half brothers both making our Sales and selling to \$16,000. His only half sister is retained.

VONM186 BANQUET YENDI M186^{SV}
 BANQUET YENDI G288^{SV}

We love the capacity and strength of top on these K233 sons. G288, granddam of R373, was a special cow. Sound, easy doing with exceptional fertility. As was her dam P05. Before P05, you find J69, 3 sons used at Banquet and Tulagi Kite E14-85, the foundation cow to our Kite family. Breeding cattle is easy, just keep using the best cow families. M186, dam of R373, is a much valued cow at Banquet. Her flush brother sold to the James Family for \$16,000.

R380 is a long bodied, fine shouldered bull with extra length from hip to pin. His structure and shape is excellent, particularly accurate structured pelvis. He is showing so much of the traits that drew us to his sire, Nunn N089. John Matthies selected N089 from our Autumn 19' Sale for \$19,000. We had already used him naturally over a group of maidens. His first heifers are exceptional and his 8 sons sod to \$20,000 and averaged \$13,500. When we inspected N089 we were struck by his volume, weight and athleticism. He is now an AI and ET sire at Banquet. F386, dam of R380, produced H467 who we used for several years over maidens. He was purchased by the Geddes for \$13,000.

Fine shoulder, long neck and long body with good structure. I could have copied and pasted that description from the previous lot and to the next lot. Four sons of Nunn N089. That's why we admire him so much. He is so easy to use, you know what he will bring to the joining. That type reinforced in R260 by his dam. F376 has produced 11 calves at Banquet and fronting up again at 12 years. In autumn 20' Sale she had two sons sell for \$11,000 and \$10,000. Granddam of R260, D351, produced 13 progeny at Banquet and 29 at Fernleigh. D354 is also the granddam of our herd sire Nutella N462.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 70 to Lot 91 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

Age – At 16 to 18 months of age these bulls are naturally lighter and therefore gentler on heifers.

EBV – EBV's of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

Lot 70 BANQUET RISE 'N' SHINE R214^{PV} HBR

 GV QUIET Q15+95[#]

Rockstar by name, Rockstar by nature and Rockstar by pedigree. R225 is a flush brother to the previous lot. They are very similar in their appearance, very similar in their raw data but significantly different in their birth weight EBVs. This difference has been generated by genomics and is quite dramatic. In fact the birth weight for R225 places him beyond our usual cut off for this calving ease group of bulls. I understand anyone who is concerned and in fact I urge caution if selecting R225 for heifer joining. We will use him and am confident that with his shape, in our heifers and our environment we will have a positive outcome. Of course with all the length of body and muscularity in R225 he would be excellent for mature cows. I hope the EBV's are at least close to reality and then I thank genomics for identifying the differences. However if this is not the case then our quest for information has just cost our industry again. Half brother to Lot 70. Semen Retained.

These Moonshine sons are outstanding. They have length of body, fine shoulders with volume and muscularity. The calving ease with Moonshine is amazing and then they grow. But anyone who sees his young daughters in production will understand why we rate him so highly. They are long and fine fronted, deep and wide in the hindquarter and have stunning udders and sappy calves. They remind an old man of Elle McPherson. **Should be suitable for joining maiden heifers.**

Age: **18 months** Scrotal: **41cm** Purchaser:..... \$.....

R510 is the youngest bull in this Sale, but he still made the first group of "Heifer Bulls". He is October born. His dam, K066, is a serious cow. Larger framed, long fronted, huge volume and really feeds her calves. We retained semen from her first son and used him over maidens. Ken & Mary Frost purchased him for \$13,000 in Autumn 19' Sale. Top price in our calving ease specialists. Her next was selected by Ryan Pastoral in Autumn 20' Sale for \$17,000. K066 is sired by F710 he was the most powerful son of the old legend Ballis B017. We sold in excess of \$1m worth of B017 sons. K066 has just joined our donor team and yielded 11 transferable eggs in her first flush. **Should be suitable for joining maiden heifers.**

 BANQUET FORTUNE F710^{SV}
VONK390 BANQUET ESTER K390^{SV}
 BANQUET ESTER E315^{PV}

R239 has great capacity in an earlier maturing package. R239 is the first son that K390 has produced. Her sire, F710, was the most powerful son of B017 that we used. Sales of B017 grossed over \$1m. They were predominately from maidens. The dam line of K390 leads back to the great old Yendi Y097. Y097 left 22 progeny at Banquet before departing at 16 years. Doug Robertson purchased her top son for \$13,000. **Should be suitable for joining maiden heifers.**

Huge maternal power in this combination. E111 bred herd leading daughters at Wattletop, Knowla and Booragul Studs. In fact some of the maternal magic of Moonshine M42 would come from his E111 sired dam. We were fortunate enough to secure a few straws from Witherswood Dispersal and flushed the awesome Dream G489. For several years we considered G489 our most valuable. As we would hope she is being challenged for that title. Last Autumn we sold 7 sons to average \$21,600. Her daughters are more valuable. That is maternal power. Flush brother to Lots 126 and 127.

Another N367. See notes on N367 at Lot 64. Dam of R435 was particularly sound and fertile. She produced 8 consecutive calves born in Spring. Her dam D351 was one of the great old Banquet cows. She produced 13 calves at Banquet before being sold to Fernleigh. Her most valuable progeny was K224. She is the dam of stud sire Nutella N462 and sale topper P357 who sold to Toora West. D351 produced 29 calves for Fernleigh.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 126 to Lot 148 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

Age – At 16 to 18 months of age these bulls are naturally lighter and therefore gentler on heifers.

EBV – EBV's of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

Lot 126 **BANQUET RELAXABULL R330^{PV}** **HBR**

 VERMONT DREAM Y301^{PV}

There are two flush brothers of R330 in this Sale. Genomics identified R334, Lot 96, as having the potential for higher birth weight so we catalogued him earlier. R330 has more frame than his brothers. His magnificent shoulder structure will complement his low birth weight EBV to improve his calving ease. For notes on his pedigree see Lot 96. Another flush brother is the next lot. **Should be suitable for joining maiden heifers.**

Age: **18 months** Scrotal: **42cm** Purchaser:..... \$.....

BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF.
LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY
AND SUCCESS WITHIN YOUR BREEDING HERD.

PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

MATING NEW YOUNG BULLS

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

DURING MATING

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

NORTHERN AUSTRALIA

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

ADAPTATION

They key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

PURCHASE IN COOLER MONTHS

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

CHANGE OF FEED SOURCE

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

MANAGING CATTLE TICKS

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.

Information is provided by the Department of Primary Industries NSW. For further information visit the DPI web site: www.dpi.nsw.gov.au. or www.angusaustralia.com.au. Further reading - Buying Angus Bulls

RECESSIVE GENETIC CONDITIONS

This is information for bull buyers about the recessive genetic conditions, Arthrogyrosis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or "broken" genes. In single copy form, these undesirable alleles usually cause no harm to the individual.

But when animals carry 2 copies of certain undesirable or "broken" alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or "broken" genes.

Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by "broken" alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition.

For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as "carriers".

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50%) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele), and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on Pedigree AM free - Animal has not been tested
AM_%	_% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an "Database Search" from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.
 SV : the sire has been verified by DNA.
 DV : the dam has been verified by DNA.
 # : DNA verification has not been conducted.
 E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

BANQUET- THE FIRST 30 YEARS!

BANQUET- THE FIRST 24 YEARS!

Reprinted from the Belles of Banquet Female Sale

Compiled Oct 2015 by Ian Turner

In the beginning - 1991

Stephen and Noeleen Branson founded Banquet in December 1991 with 50 females from Noeleen's family's Kingfield Stud. These sound, functional and productive cows combined well with the large framed power bulls the Bransons introduced from New Zealand.

In the autumn of 1992 Atahua Alice 115 (left) was imported from NZ. Alice was the first animal to be exhibited under the Banquet banner and was awarded Grand Champion Female at 1992 Royal Melbourne Show. They selected the NZ National Sale Champion, Waitapu Mastercharge, for their first flush from Alice 115.

What a start! A daughter was Reserve Junior Champion Heifer at 1994 Melbourne Royal. A son, Banquet Master Blaster N55 was used at Banquet, had semen exported to NZ and he was sold to Stoneyfold stud.

1992 saw the arrival of semen from the NZ National Champion of Champions and Australasian Record priced bull, Atahua Legacy (right). Legacy joined their foundation Kingfield cows that built the platform from which the current Banquet herd was launched.

A Dream in the making - 1993

Another momentous development was the arrival of Banquet Kiwi Dream M41 from NZ. With the help of the late Stuart Cochrane, Delmont stud and the Dalziel family of Atahua stud, the Bransons

bred her in NZ and imported her in 1993. All the Dream cows in Australia are descendants from this most exceptional matron (left).

The 'Dream' story is remarkable, Banquet have 262 active females in their herd over one year of age carrying her name. Countless others also carry her in their pedigree. Banquet Jupiter J263 that topped the 2015 Banquet sale at \$40,000 has four crosses of Kiwi Dream M41 in his pedigree.

Incredibly there have been five individuals bred from the Dreams that have held record prices.

The two highest priced Angus cows sold in Australia are both Dreams.

1995 saw the first progeny of Kiwi Dream exhibited at Melbourne Royal. Dream P49 was Reserve Junior Champion. She was purchased by P.J Angus. Their ten Royal Show Champion awards since have been won with descendants including PJ Dream S2 (right).

A Legacy builds - 1996

Banquet Beefmaker Q76 was the first Atahua Legacy progeny to be exhibited at Melbourne Royal. He was awarded Reserve Junior Champion in 1996.

1997 was the year that Legacy progeny from Banquet blitzed the Angus National Show and Sale. Banquet exhibited the Senior Champion Bull (Legacy Q61) which also topped the sale at \$15,000 to Mt Fyans Angus; the Senior & Grand Champion and top priced female at \$11,000 (Banquet Kite P43) was purchased by Bindarra Angus; the Reserve Champion Pen of 3 Bulls and the three top prices in this section.

National becomes important

The Angus National Show & Sale in 1998 was another great success for Banquet. The bull calf from the 1997 National Champion Female, and owned in shares with Bindarra Angus was Junior Champion, also topping the sale at \$20,000 to Kingfield Partnership. Banquet also paraded the Reserve Senior Champion Female which was second top price at \$7000.

The new millennium – new challenge

The year 2000 saw Stephen & Noeleen Branson advance their marketing strategy and hold their inaugural on-property auction. It proved to be a great decision. On Thursday March 16th, 'The Warrnambool Standard' newspaper reported;

"While many beef stud sales have suffered a quick drop in price for bulls outside their top catalogue group and incomplete clearances, Banquet managed to sell all their 38 bulls to average \$4283."

The sale topped at a very modest \$7,000.

Banquet genetics breeding on for clients

Banquet continued to offer elite cattle at the National Show and Sale. Nuttella T08 (left) was Senior and Grand Champion Bull and sold for \$14,000 to the late Stuart Gordon, Glengowan Angus. T08 was a very successful infusion at Glengowan.

Another high selling bull was Rough 'N Tough T113 (below left), a son of the Reserve Senior Champion Female at the 1998 National Show & Sale, being purchased by Vermont Angus for \$12,000. Semen was exported to Merchiston stud, NZ. In all, three Banquet bulls sold at the National to average \$10,667.

A Banquet cow again topped the sale. Dream Q117 (below centre), a proven donor cow, sold for \$10,000 to Dylemma stud. In 2002 her eight sons at Banquet grossed \$63,000 and averaged \$7875. She was sold to Vermont, where she bred the legendary Dream Y301 (below right) who produced three record priced females. From Vermont, Q117 was sold to Irelands Angus.

Unprecedented show success

2000 was a year of unprecedented show success for Banquet. Angus was the feature breed at the Adelaide Royal Show and it was the first time the Bransons had exhibited Angus cattle at Adelaide. Stephen grew up on Titchmarch Poll Hereford stud and showed there from 1973 until the stud was dispersed in 1991. Only

one Grand Champion was achieved from all those trips. Banquet did much better, winning Junior Champion Bull with Upward U49, Reserve Junior Champion Heifer with Eclupta U36, Senior and Grand Champion Female with Kite T59 (with Buzz V11 as calf at foot), which was also a member of the winning interbreed pair.

Banquet was also Most Successful Exhibitor.

Buzz V11, Kite T59 and Upward U49

A few weeks later this 'Big Bold' Banquet team rolled into the Melbourne Royal Show. This time Upward U49 had to be content with Reserve Junior Champion Bull, but Eclipta U36 was elevated to the Junior Champion Bull award and our Senior cows reversed places. This time Dream S138 (pictured left with calf) was Grand Champion and Banquet was again Most Successful Exhibitor. It was a great way to finish 2000.

2001 - Annual Sale growth

On March 14th 2001, 'The Weekly Times' used the headline "A Buying Feast" to describe that Banquet sale. An extra 12 bulls sold and there was a \$1000 increase in the average price to \$5306. The top price of the sale was Upright U53, a son of the legendary Dream M41 for \$21,000, the first of many purchases for Charles and Cass Kimpton, Toora West stud.

Two weeks later, at the Angus National Sale a flush brother to U53, Upward U49 (right) topped that sale at \$22,000. He was the first of many top Banquet sires to go to Jumbuck Park. The second top price of the sale was achieved with Banquet West U88, the Senior Champion Bull, purchased for \$12,500 by Wal and Anne Kenny, Kyooh stud. To round off the sales John and Joan Woodruff, Witherswood stud, purchased a half share and possession of Buzz V11 for \$15,000. Buzz V11 was the first calf from the 2000 Adelaide Royal Champion female, Kite T59.

Onward and Upward - 2002

The Banquet Bull Sale went to yet another level in 2002. More bulls (61) were sold for a higher average (up by \$1400). Again Charles and Cass Kimpton, Toora West stud purchased the top lot, Arrogance V100 for \$20,000, a bull used heavily at Banquet. Two sons of Scotch Cap OB45 and from grand matron Kiwi Dream M41 sold for \$17,000 each.

Out of the National Ashes

The Angus National Show and Sale ended in 2001 and in 2002 The Angus National Expo rose from the ashes. Banquet continued to support what they considered to be an important Angus event; this time with Dream T34 (left) with her heifer calf at foot. The result was stunning; in fact it was record breaking. This cow and calf dominated the judging, with a Grand Championship award and then blitzed the sale. Her \$27,000 price tag was an Australian Auction Record for an Angus Female. T34 was the first of many Dream cows to hold the record. She was purchased by Michael and Annette Tynan, Birubi stud.

2003 – Emergence of Anvil and Radar

The 2003 Banquet sale saw the first Banquet purchase by Stephen Handbury, Anvil Angus. He selected Waltanna W125, ultimately the top priced bull at \$19,000. The success of W125 at Anvil prompted Stephen Handbury to feature in many more purchases of elite animals from Banquet.

This year also saw the last Banquet bred bull offered at The National Expo. Dylemma Radar W42 was the result of an embryo purchased by Graham Nowell from Kite T59, the Grand Champion Female at the 2000 Adelaide Show. Banquet purchased a half share and possession in W42 at 12 months of age.

Semen was collected and he was used lightly before being offered at the Expo. Many semen orders were already in place and a fierce phone bidding battle resulted with Future Angus winning by paying the equal Australian record price of \$40,000; this being the highest price for twenty years.

Radar W42 (right) proved a very successful sire in SA, Vic, NSW and QLD, being used over Angus, Hereford, Simmental, Brahman and Brangus cows. He is still in select use at Banquet, combining exceptional calving ease, growth, muscularity and soundness.

2004 – X for Xceptional Year

2004 was again filled with highlights at Banquet; another outstanding bull sale saw James Darling select Xplanation X060 (below left) for the top price of \$30,000 for his composite bull breeding program at

Duck Island, Keith, SA. This price proved cheap when James recouped this investment within six months with semen sales to NZ, Canada and throughout Australia. X060 has been a major sire at Banquet and is sired by the old master, Hingiai 469 (NZ). Hingiai 469 also sired the new \$150,000 Australian record priced bull, Millah Murrah Kingdom K35, also now in use at Banquet.

X060 sired the top price bulls at Banquet in 2009 and 2014. Another high seller in 2004 was Xceptional X187, purchased by Trevor and Teresa Hall, Quarterway stud, Tasmania for \$18,000. To 2015, Trevor has purchased eight stud sires from Banquet. X187 has also been used at Banquet.

Again Banquet was a keen supporter of the 2004 National Angus Expo. This time with Irene W50 with a bull calf at foot (right) and topped the sale at \$16,000 to Richard Morgan, Barragunda Pastoral.

The Dream gets Bigger

On Friday March 11th 2005, 'On the Land' ran the headline "A Dream Sale" followed by "Stephen and Noeleen Branson labelled their 2005 Angus sale a "Dream Day". This was based on the number of bulls in the catalogue from their great donor cow, Banquet Kiwi Dream M41. It was a motto that held true for the Bransons; their 86 bulls offered at their Mortlake On-Property Sale meeting with spirited demand from a crowd of 250 spectators containing nearly 120 registered buyers. A new National breed auction bull record of \$50,000 was set, along with a fantastic \$6,059 average for the 85 bulls sold.

A Dream day it was, with 12 sons of Kiwi Dream M41 averaging \$11,458. Stephen Handbury, Anvil Angus was successful in securing the record setter, Time Frame Y135 (left). Time Frame semen has been used widely and exported to the U.S.A. His daughters at Banquet are highly valued, while his top son, Ballis B017, is the first Banquet sire to top the million dollar mark for progeny sales.

Passionate about Supporting Youth

Stephen and Noeleen Branson are passionate supporters of the Youth Development programs within the beef industry. They have both served on management committees for many youth events. They have also trained and transported heifers for juniors to work with to events from Hamilton in Victoria to Armidale in NSW.

When they were approached in 2004 to help fund programs conducted by the Australian Beef Industry Foundation (ABIF), Stephen and Noeleen Branson willingly donated the heifer, Banquet Irene Y018 (left). Through the support of like minded breeders,

Irene Y018 attracted the bid of \$11,000, with Stephen Handbury, Anvil Angus again being the successful bidder. Irene Y018 has repaid Stephen's generosity by founding an outstanding family line at Anvil.

2005 saw Banquet return to Melbourne Royal Show with 4 head; and what a result! They captured the Junior and Grand Champion Bull award with Zenith Z137; Junior and Grand Champion Female and then Interbreed Champion heifer with Dream Z008; Reserve Junior Champion Female with Dream Z020; and were also Most Successful Exhibitor.

2008, Z020 and Z137

2006 – First century offering & last National

The first Banquet offering of 100 bulls was at their 2006 sale. 101 were offered, resulting in a 100% clearance and averaged \$5,728, despite a top of only \$14,000. Long term supporters, Charles and Cass Kimpton of Toora West again took the top priced bull honours. The strength of that sale result lay with the strong support from commercial cattleman, many being repeat buyers.

2006 also saw the last Angus National Expo at Wodonga. True to their long term commitment to support this event, Banquet offered Banquet Eclipta W85 (right) with a heifer calf at foot. Another Grand Championship and sale topping price resulted. Banquet cattle were having a major impact at Anvil Angus and Stephen Handbury added W85 to his donor team for \$16,000.

2007 – A Time to Feast

The headlines in 2007 read “Buyers have a feast at Banquet”. How apt that was with a 100% clearance of 104 bulls, selling to top at \$20,000 and averaging \$6706. The Erby family, Forres stud purchased Abode A005 (right) for \$20,000. He proved so successful that at their dispersal in 2012, Abode sold for \$22,000 as a six year old.

2008 – Breeding success & Giveaways

The 2008 Banquet sale saw the identical top price as the previous year. This time the honours went to Allan A190, a bull that had already seen service in two joining seasons at Banquet. A190 was purchased for \$20,000 by Karen Arnott for her Skagway stud.

Another bull also used in the Banquet herd was sold this year.

Aberdeen A349 (left) had been used from the age of 13 months to complete three mating programs before being selected by Trevor Hall, Quarterway Angus. The daughters of A349 have been so impressive that he was re introduced into the AI team at Banquet in 2014. Some daughters catalogued in the 2015 ‘Belles of Banquet’ sale have been flushed.

This was also the year that the Stock & Land newspaper ran their inaugural bull giveaway promotional program.

Banquet willingly supported the initiative. Entries flooded into the Stock & Land office from NSW, SA, Vic and Tas and there was great anticipation when the draw was conducted pre-sale in the Banquet sale barn. Amazingly the winners were clients, Ken (and Mary) Frost (right). They were in the sale gallery and a little lost for words.

Sydney record

Easter 2008 saw Banquet at Sydney Royal Easter Show competing in the Angus feature breed showing. They also offered the outstanding Banquet Kite A197 (left) with a heifer calf at foot. A197 set a new Sydney Show auction record for a female when she sold for \$38,000, with Anvil Angus again winning the bidding battle. Kite A197 is a half sister to Banquet sires Buzz V11 (\$15,000), Radar W42 (\$40,000) and Abraham A204 (\$16,000).

2009 - A Decade of Sales

Banquet's 10th Annual Sale was held in 2009. The top price at this sale again demonstrated how well line breeding to exceptional females works. The \$18,000 Cosper C268 (right) was a son of Xplanation X060. The dam of C268 is a daughter of Kiwi Dream M41, while X060 is from a Kiwi Dream M41 granddaughter. Congratulations to Tom and Helen Love for recognising his genetic strengths. A son of the \$40,000 Radar W42 sold for \$16,000 to Brad Saunders, Queensland.

2010 - Highest Victorian sale average

In 2010, \$20,000 was again the top price at the annual Banquet bull Sale. Duncan and Oopy MacGillivray of Wittalocka stud paid this for their selection, Designer D292 (right), one of the first sons of the NZ sire Matauri Stockman 526. The dam of D292 had bred a \$16,000 bull in the 2009 sale.

This sale was an outstanding result with 114 bulls averaging \$5,864, the highest sale average in Victoria.

An Angus Feature Show was held at the 2010 Adelaide Royal. On the back of Banquet's achievements at the last Angus feature breed showing in Adelaide, the Bransons again made the trip across, and what a trip it was! Banquet Champagne E288 was Junior Champion Female, also being part of the winning Interbreed Junior Pair. E288 was sired by the old Power Pack P54 bull and was from a daughter of the old breed legend, Black Gold Champagne J031.

Banquet Julie E239 was bridesmaid to E288 when she was awarded Reserve Junior Champion Female. However, the highlight for Banquet was when their proven stud sire Banquet Ballis B017 was crowned Senior and Grand Champion Bull. At 4.5 years of age, this 1300kg mountain of beef was so impressive with his scale and mobility that some doubted that he had been in service. In fact he was paddock joined to almost 200 females during 2009. His 53 sons in the 2011 Banquet sale averaged almost \$9,500 each. Ballis B017 was much more than a pretty face! B Champagne E288 and B Ballis B017 (right)

2011 - Million Dollar Dreams

As mentioned, the strength of Ballis B017 progeny saw the first million dollar sale at Banquet in 2011. This was something the Bransons never dared to dream of back in 2000 when they held their first auction. A son of Ballis B017, Banquet Easton Boy E231 (left) topped the sale at \$32,000, going to the Kimptons of Toora West who again fought off all comers to secure their choice bull. This exciting day saw 142 bulls average \$7,700 and gross \$1,089,000.

2012 – Heavyweight Competition sees Million Dollar repeat

That outstanding result was replicated in 2012 when Banquet offered and sold 145 bulls to gross \$1,020,945 and average \$7,041 in another total clearance. Banquet selected seven young bulls from this catalogue as potential sires and retained semen for in herd use. The highlight was Banquet Forbidabull F485 (*left*), topping the sale at \$26,000 to Doug and Barb Tozer, Onslow Angus. The merit of the Tozers investment is assessed by the quality of Forbidabull's progeny. His first son at Banquet

topped their sale at \$16,000. What a wonderful start to Forbidabull's breeding career!

At this sale, Peter Delaney, Murroa East selected Banquet Fancier F046 for \$20,000. Ross Davis, Wolbunya purchased a son of Ballis B017 for \$18,500 and David and Gail Geddes, Warranboo selected two sons of B017 for \$18,000 and \$14,000.

2013 - Banquet bulls breed on and on

Charles and Cass Kimpton, who have built their Toora West seedstock business on Banquet bulls since 2001, returned to again purchase the top price bull in 2013 (*right*). This time their selection was Banquet Garton G275 at \$20,000. G275 is sired by Banquet Duncan D412, a bull retained by the Bransons.

As a mature sire he was purchased by David Hurley at Dargo. Four sons of Duncan have been used in the Banquet breeding program.

The Shoebridge family, Cleveland Pastoral Estates of Ouse, Tasmania purchased Banquet Granada G077 for \$15,000. The Shoebridges sell 1200 Banquet blood calves at their annual on property weaner sale. Showing the versatility and adaptability of Banquet genetics, the third top price bull, Banquet Gurry G228 was purchased by Peter Attard, Shingle Hut, Moura, Queensland.

Semen from Garton G275, Granada G077 and Gurry G228 is in use at Banquet.

2014 – A timely arrival

In 2014 the Bransons offered a unique young sire, Banquet Harman H261, a son of Banquet Xplanation X060, the highest priced Angus bull sold in Australia in 2004 (*below*). With X060 subsequently testing as a carrier for the DD defect, H261 arrived just in time. H261 created so much interest at Banquet it was decided to offer him with the option to repurchase a half share.

The Branson's were excited when John, Robyn and Peter Blyth, Fernleigh stud, accepted this offer after successfully bidding \$32,000 to purchase him. H261 is used for natural service at Fernleigh in the Spring and Banquet in Autumn. His potential contribution is huge.

The Geddes family, Warranboo, Holbrook, NSW continued their push for excellence when they selected Banquet Hazelnut H265 (*left*) for \$22,000. Their investment in top sires is really paying dividends in their commercial herd with the standard and performance of their breeding females lifting significantly. This year the purchaser of their first run of steers in 2014 called back with the request, "What do we have to do to get the next run?" That is the best possible feedback.

2015 – The 'here and now'

Banquet has already achieved outstanding sale results in 2015. In their February sale, 99 bulls were offered for a total clearance, a top price of \$40,000 and an average of \$8,374. This was the highest average for any breed in Victoria. Repeat buyers purchased 86% of the bulls, giving a strong indication of client satisfaction! Richard and Sandra Rettallack, Glengowan stud purchased their third stud sire from Banquet. They selected Banquet Jupiter J263 for the \$40,000 top price (*below*). His sire, Forbidabull F485 topped the 2012 sale at \$26,000 when sold to to Doug and Barb Tozer, Onslow stud.

David, Gail and Colin Geddes, Warranboo Partnership, Holbrook, NSW again went home with the second top priced bull, Banquet Jeofail J205 (*below*), outlaying \$20,000.

Repeat buyers, Tom Shoebridge, Robert Love, Barry Pitt, Ross Davis, David Hurley and Charles and Cass Kimpton all purchased bulls between \$15,000 and \$18,000. Alan McDonald was the only first time buyer to break into this price range when he purchased Banquet Jerez J262 to join to the record priced Banquet sired heifers he purchased at Hamilton in the January weaner sales.

Spring is in the air – New ventures

Banquet conducted their inaugural Spring Bull Sale in September 2015. The average price of \$6,500 was the highest achieved for any spring bull sale in Victoria in 2015. Likewise, the sale was again dominated by repeat clients, purchasing 84% of the offering. Keith Diprose, who has been purchasing Banquet Bulls for 19 years, selected Banquet Judd J517 for the \$13,000 top price. Two bulls sold for \$10,000 each, again to repeat clients, Graeme Norman and Ned Kelly.

Now, for the first time in its history, on the 26th November Banquet will be offering a significant number of females in its inaugural 'Belles of Banquet' female sale, opening up a unique opportunity for beef cattle breeders to tap into the best and proven female genetics from the Banquet herd.

November 2015 – Blockbusting “Belles of Banquet” Female Sale

26th November 2015 Stephen and Noeleen Branson and family held their inaugural “Belles of Banquet” female sale at Mortlake. After the drama the day prior. During their inspection afternoon a mini cyclone wreaked havoc on their facility which was looking spectacular, ready for the event. Marquee was blown over along with the table and chairs that were in it being blown a distance. They also lost the roof off the shearing shed which is also used for their entertaining area. Iron and timber were hurtled through the air like darts, piercing through the roof of the sale shed. Thankfully no one was injured, just left with a major clean up task.

It was a stunning sale with 110 head selling to a top of \$30,000 and averaging \$6681. This was the first time Banquet had ever offered a significant number of females for sale in their 24-year history. 63 buyers from all states except Western Australia registered at the sale venue, plus there was strong participation levels through the Auctions Plus network.

Having the strongest influence on the overall result was Keith Kerridge, Bannaby Angus, Taralga, NSW. They were the equal highest volume buyer with nine head.

Purchasing the top price cow, Banquet Champagne C154 (below), sired by proven sire B. Xceptional X060 for \$30,000 and top price heifer, B. Dream K243 at \$9,000.

Second top price female was Banquet Dream D310 (right) who was purchased by Chris Paterson (below), to introduce the Dream family to his Stud, Heart Angus, Tamworth. These wonderful females included many donor cows and dams of top bulls from past Banquet bull sales.

The Banquet herd is based very strongly on New Zealand bloodlines and the breeding program is shaped around proven successful female families.

The most influential of these is the “Dream” family built from their grand old foundation female Banquet Kiwi Dream M41. There were 28 Dream family females on offer in this sale.

Queenlanders have strongly supported Banquet Angus for many years, finding the bigger and more powerful Banquet strain crosses so well with the Bos Indicus cattle in that state. None have supported Banquet better than Brad Saunders, Pheasant Creek Thendara, Woven.

Brad had great success with the first Angus bull he purchased from Banquet. Dylemma Radar W42 was sold prior to him grazing the pastures at Pheasant Creek for \$40,000. After the success with Radar, he was very keen to source pedigrees that carried his bloodline. Brad purchased females to \$14,000 twice and averaged \$8400 for five cow units.

The Banquet herd is based very strongly on New Zealand bloodlines and the breeding program is shaped around proven successful female families. The most influential of these is the “Dream” family built from their grand old foundation female Banquet Kiwi Dream M41. There were 28 Dream family females on offer in this sale.

Ascot Angus, Warwick also purchased five top females, paying to \$11,000 twice and averaging \$7,800. They purchased a cross section of Banquet families. A very relieved and elated Branson family thanked everyone for their support and for giving such a strong vote of confidence in Banquet Genetics.

2016 – Highest Victorian Sale Average

A record was set when 91 bulls averaged \$8868 for Banquet. This was the highest average for a sale in Victoria.

This was a very strong result given that the top price was only \$21,000.

The \$21,000 bull, Banquet Katoomba K312 (left), was purchased by Paul Hawkins, Elm Grove Cattle Co, NSW, in conjunction with Richard Rowe, Merchiston Stud, New Zealand. The second top price of \$20,000 was purchased by Richard Wadeson, Shepparton for Banquet Keast K214.

Richard explained they had purchased the bull's sire recently, Banquet Graduate G464, but he had unfortunately died. "We were devastated to lose him, but then noticed there was a son in this sale. When we saw him we thought he was an absolute ripper and were determined we were not going home without him" Richard said

2017 – Banquet soars to record highs in 2017

The Branson family's annual Banquet Angus bull sale has regularly delivered top end results, but even those high standards were exceeded last Thursday at Mortlake. There was another total clearance of the 89 very impressive 'Big Bold Banquet Bulls' to go through the auction sale ring, these selling for a Banquet record average of \$9169 and topping at \$52,000, another Banquet record. In introducing the first lot to the big crowd of close to 300 people and containing over 90 registered bidders from five states, Landmark auctioneer Kevin Norris said, "Banquet is one of the most prepotent female herds in the country and it shows in the quality of these bulls."

The \$52,000 record and sale topping bull was the 19 month old Banquet Lukas L200 (above). Sired by the USA bull Sydgen Black Pearl 2006, this 740kg bull took the eye of many in the pre-sale inspection pens and this flowed through to the sale ring with a flurry of bidding until it settled down to the final two bidders for the last quarter of bidding action.

Winning the battle was John, Robin and Peter Blyth, Fernleigh Angus, Elmbank, Vic. Blyth Bros are regular Banquet purchasers, including paying the sale top in 2014 at \$30,000. This record exceeded Banquet's previous high of \$50,000 which was achieved in 2005, which was also an Angus breed record at the time, when Banquet Time Frame Y135 sold to Stephen Handbury.

The sale's second top price was set earlier in proceedings when regular Banquet supporters Charles and Cass Kimpton, Toora West, Glenthompson outlaid \$30,000 to purchase the exceptionally powerful bull, Banquet Leigh L010 (below). This 23 month old was the heaviest bull in the catalogue at 945kg.

Banquet Liverpool L186 by Silveiras Conversion 8064 was another to exceed last year's \$21,000 top price when purchased by Gilmandyke Angus, Orange, NSW for \$22,000.

Regular repeat clients dominated the buying list, with senior principal Stephen Branson paying tribute to their loyal support post sale and three who first purchased from Banquet 22 years ago; the James family being one, Keith and Merryl Diprose, Chartwell Farms, Romsey another, with the third being Mick and David Page, Peshurst. The sale average of \$9169 for 89 bulls was again the highest achieved in Victoria for 2017.

The 2017 Angus Youth Roundup was held at the Mount Gambier Showgrounds. Banquet supplied 28 heifers for the participants to use. This included two Canadians and 1 from New Zealand.

2018 – Seven figure Day at Banquet

Despite the softening of the cattle market in recent weeks, the Branson family, Banquet Angus, Mortlake had every reason to smile at the completion of their 19th annual bull sale on Thursday 22nd February. They sold 82 of 90 bulls offered, and against the recent bull sale trends, they actually increased their average by \$51 on last year's record-breaking result, averaging \$9220 and topping at \$35,000.

The outstanding quality of the draft, from the sale topper as the first bull offered, right through to the last bull catalogued, which was one of 30 bulls to reach \$10,000 or better. The bidding action was very strong at the beginning of the catalogue, with the first 14 bulls, and 20 of the first 30 all exceeding \$10,000.

With this bull sale result, combined with the pre-sale offering of 150 Banquet blood PTIC commercial heifers on behalf of Robbie and Marg Patterson, Drysdale Partnership, Mortlake, the day's gross again ticked over the \$1 million mark.

The star of the sale was undoubtedly the first bull offered and ultimately the \$35,000 top priced bull, the 22 month old and 845kg Banquet Mirrool M078 (right). Sired by Banquet Holden H591, the full brother to the legendary B. Ballis B017, (continued next page)

Mirrool visually demonstrated great muscularity, excellent length and width across his top line, plus had a great sire's head and outlook. This bull attracted several strong bidders, but it was Robert Love, Jumbuck Pastoral, Violet Town, Vic who won the day with his \$35,000 bid.

Robert inspected the bulls the week before the sale, and then bid via phone connection with Elders Mortlake's Matt Jones. This is the third top bull Robert has purchased from Banquet for his highly respected commercial herd, having topped the heifer section of the recent January Euroa weaner sale.

It was another top commercial Angus herd in Webb Pastoral, Glenburn that was the underbidder, seeking top genetics for their commercial Angus program. Manager Duncan Newcomen was buoyed by the success of their recent Yea weaner sale result where they topped both the heifer and steer sections.

They purchased a bull last year at \$13,000, plus the top Banquet blood heifers offered by the Patterson's, so are familiar with the Banquet quality and performance.

While missing this top lot they then went on to purchase two top bulls at \$16,000 and \$13,000.

Landmark auctioneer Kevin Norris, in his introductory comments described the bulls as, "An outstanding draft with exceptional phenotype, bone, length, fleshing, silky smooth skins and great temperament; everything we have come to expect from this program."

In summing up the sale, senior principal Stephen Branson said, "The top end was exceptionally strong and there was a very good return of repeat buyers plus some exciting new ones.

"Return clients are the centrepiece of our business and the buying strength of the clients who bred the heifers offered pre-sale in particular was exceptionally strong. As a vendor, it was very encouraging that such discerning buyers were prepared to buy the best genetics they could to continue to improve their herds." Those 150 heifers sold pre-sale by Jack Hickey and offered by Robbie and Marg Patterson, Drysdale Partnership met very solid demand, but not to the same premium levels of last year. They all sold to a \$2275 top and averaged \$2120.

Again, this result at Banquet was the highest average achieved in Victoria.

The Angus Youth Roundup was held in Wodonga in January 2018. Six cattle enthusiasts competed using Banquet Heifers. The heifer judging was a triumph for Banquet.

Under the astute eye of Guy Lord they claimed Junior and Reserve Junior Champion Heifers as well as Senior and Reserve Senior Champion Heifers.

2019 – Repeat clients dominate

The 2019 Banquet Sale saw Charles and Cass Kimpton of Toora West triumphant in purchasing Banquet National N278 (below) for \$48,000. Another long term buyer of top bulls at Banquet, Cleveland Pastoral, Ouse, Tasmania was runner-up. It is not uncommon for commercial clients at Banquet to compete strongly on the better bulls.

Richard Rowe of Merchiston Stud, N.Z. purchased semen rights from N278. This is the fourth Banquet bull that Richard has used in his Stud.

Equal second top price of the Sale at \$22,000 Noonan N033 was selected by Webb Pastoral, the other \$22,000 bull was Nagambie N038 who went to Ron Phillips. All these buyers have been operating at Banquet for many years.

Equal second top price of the Sale at \$22,000 Noonan N033 was selected by Webb Pastoral, the other \$22,000 bull was Nagambie N038 who went to Ron Phillips. All these buyers have been operating at Banquet for many years.

The total clearance achieved a new Banquet record average of \$9625 which was the highest achieved in Victoria.

2020 – It is still raining in the North

2020 saw a rapid improvement in seasonal conditions in NSW and QLD.

The herd rebuild begun and this strengthened the demand for the middle range of the offering. The consistent quality of the top bulls resulted in a modest top price of \$27,000 to Toora West for Privilege P357 (right). P357 is a full brother to top sire at Banquet, Nuttella N462.

Second top, Placid P009 (below), was selected by the Blyth family for their Fernleigh Stud at \$22,000. This sale average was the first time Banquet eclipsed the \$10,000 barrier. Again, the best result in the State.

By the Spring of 2020 the herd rebuild was gaining momentum. Fat cow and feeder rates had lifted strongly. The offering of 31 bulls in the Banquet Spring Sale saw a huge increase in average price to \$15,354. Paddock P330 topped the sale at \$41,000 to Adrian Abrahams. Cleveland Pastoral secured Plozza P358 for \$32,000. Again, both buyers are long term clients.

2021 - Autumn Sale topper

Total clearance of 117 Bulls to \$60,000, av \$14,434

BANQUET's annual on-property Autumn Bull Sale proved that Big Bold Banquet Bulls are still as industry relevant as ever.

Bidding was solid in the lead up to the feature lot of the day. Banquet Quarter Pounder Q252 (below) was the sale topper selling to \$60,000. The superstar sire was picked up by a syndicate of Millah Murrah, Keringa and Alpine Studs and ABS Australia. The 18-month-old bull weighed 880 kilograms at the sale.

Trent Walker, Keringa Angus, was in attendance at the sale, purchasing on behalf of the syndicate. "Both the other stud partners had inspected the bull, and I drove over on the morning of the sale to do the final inspection," Mr Walker said. "He's a very usable bull that aligns with all our herds and he's got a balanced set of data. He's thick, he has shape and still a moderate bull." Fletch Kelly,

ABS Australia, said they first saw this bull at the Stock & Land Beef Week field day "And we really liked him so we came back and had another look at him," Mr Kelly said. "It's not often you find a bull with such powerful phenotypes and so much bone and good looks, but also a nice balanced EBV (estimated breeding values) set. "He comes from a really strong maternal line in the Banquet herd, and we believe he's got great commercial and seedstock application right across Australia

Return client, Mal Scott from Gunns Plains, Tasmania, selected Banquet Qcomplete Q399 (right) for a valuation of \$48,000. Banquet rated, Qcomplete Q399, as the pick son of the great Dream G489 and retained a half share of possession and semen rights.

Another repeat client, Brett Wilder of Coralyn Pastoral, Greenthorpe, NSW, purchased Qinetic Q375 (left), for \$33,000. Q375 is a son of Jhett J426 who is a son of Dream G489, same as the previously mentioned Q399. Mr Wilder was attracted by the strength of head, thickness and depth of body that Q375 has.

Daniel and Anne Marie Barrow, Merlewood Angus, Mirboo North, selected Quirky Q209 (right), for \$30,000. Q209 is sired by the \$32,000 Nixon N099. This meat machine weighing 850kgs at 19 months.

A feature of recent Banquet February Sales has been the offering of PTIC Commercial Heifers. The heifers are sourced as top of the drop weaners from Banquet clients.

They are grown out, joined to Banquet calving ease bulls and rigorously classed. These 190 elite future breeders topped at \$3,900 and averaged \$3,490. This was a sale of many sale toppers and highlights.

Spring - A great time of year.

The wattles are flowering. The birds are singing. The grass is growing.

Banquets annual spring sale set a new record average of \$16,717. This result was for 39 bulls that reached to a high of \$48,000.

The top priced bull Redden R018 (right) was sold to return client Cleveland Past. Tas through Auctions Plus.

This 19 month old youngster had been used by Banquet during the year. They said, "they had liked him and thought he had a lot to offer".

One client who purchased at the sale averaged \$1800 a head for his 12 month old steers last year, this year he averaged \$2200

This is now the first 30 years of Banquet.

It is hard to believe that what started as a dream while touring New Zealand Angus herds in 1991 has given Noeleen and I and now our family such an incredible ride.

NATIONAL CATTLE HEALTH DECLARATION
