8th February 2022

Certificate No. 001 -2022

Re : Ennerdale Proprietors Pty Ltd - 2022 Sale Bulls

On Wednesday, 8th December, 2021, I visually examined the conformation, mouths, eyes and gait of 38 Poll Hereford bulls being offered for sale on Wednesday 16th February 2022 by **Ennerdale Proprietors** at the Dundonnell property, "Ennerdale".

At the same time, I examined the external genitalia of these 38 bulls, both visually and/or by manual palpation. The scrotal circumference of each bull was also measured and recorded. All bulls measured in excess of the minimum scrotal circumference as recommended for the breed. Testicular consistency was considered to be normal in all 38 bulls.

Lot No	Tattoo No	SC (cms)	Lot No	Tattoo No	SC (cms)
1	R253	40.5	21	R262	39.5
2	R213	39	22	R218	36
3	R272	39	23	R300	38
4	R211	36	24	R287	36.5
5	R264	38	25	R236	35.5
6	R309	37	26	R233	35
7	R313	37	27	R265	38
8	R221	40	28	R268	37.5
9	R254	38.5	29	Withdrawn	
10	R243	38	30	R294	38
11	R205	38	31	R267	37
12	R242	39	32	R288	36
13	R274	38	33	R234	36
14	R275	40	34	R280	38
15	R244	39	35	R312	34
16	R224	36	36	R317	37.5
17	R216	37	37	R295	38
18	R217	36	38	R325	37
19	R256	36	39	R344	37
20	R214	37.5			

From the examination performed, I consider each bull to be free from any significant physical defect at the time of examination, with the results being consistent with good fertility. As a result, I consider each bull to be a good candidate for insurance.

A sample of tissue has also been collected from each bull offered for sale in the form of an ear notch. These samples were submitted for BVDV antigen capture ELISA testing. All 38 bulls were found to be negative for this test. This means that **NO bulls in this sale are persistently infected with BVDV ie All bulls in this report are non PI animals.**
