Welcome to the 2022 Maryvale "Power in the Pedigree" Sale offering.

We sincerely hope you have had some success in the past 12 months. Agriculture seems to always provide challenges and opportunities. If we are able to work hard and endure the challenges, the opportunities seem to open up. The beef industry is a great example of this at the moment. After some seriously dry times and battles keeping stock fed and watered, many parts of the country have had good rains producing stock feed and phenomenal demand and prices for young weaner cattle. It is definitely the time to be in the cow/calf game. We are pleased to have played a part, placing many high performing bulls into the industry in these exciting times, including our entire 2020 drop black Limousin draft.

Our breeding philosophy at Maryvale is simple; to multiply strong, sound, fertile, trouble-free calm cattle, producing high yielding, top eating quality carcasses with predictable performance and consistency. This ultimately increases production, profit and consumer satisfaction for all involved. It continues to amaze me that such a simple ideal can in fact be quite difficult to achieve. We believe it is possible by taking extra time in the selection processes to research deeply into pedigrees finding strengths and weaknesses and selecting the elite few sires that produce the results. We are dedicated to selecting only the 'Best of the Best' sires which we carefully single match to the females. As a result we can offer bulls with great DNA at exceptional value for money.

I am a great believer in youth and thank Alastair, Hamish and Mostyn for all their hours and efforts working with machines and the cattle to get the jobs done. It is amazing what young people can do and also amazing what young bulls can do. We have witnessed great success with getting bulls out working as soon as practically possible with ultimate athletic body condition scores and great DNA. This year's draft of bulls will offer great genetics for your selection.

We love to support people and youth interested in the beef industry to fulfil dreams of owning their very own animal. For this reason we have on offer three black and four apricot S drop heifers from the top of the tree. These will be followed by five peak production cow and calf units. We are more than happy for all of the female lots to remain in the Maryvale herd if demand is limited.

All bulls have been given selenium, fertility tested and vaccinated with 7 in 1 and against Vibriosis and Pesti-Virus. No animals have been hoof trimmed.

We look forward to welcoming you to our on property Sale by Auction 10am on 18th February 2022.

If unable to attend there are photos and videos of all lots, and AuctionsPlus limit bids can be placed in advance of the sale so you don't miss out. All sale links are at www.maryvalestock.com.au or scan the QR code on this page to go straight there.

Sale Day Information

Sale Date: Friday 18th February 2022

Sale at 10.00am – Inspection from 8.00am

**JBAS
8
& EU**

24 Angus Bulls ~ 6 Limousin Bulls ~ 12 Elite Female Lots

Sale Information – Nutrien Stud Stock & Nutrien Beaton Agencies will be facilitating the sale for us by Auction with all cattle present onsite in holding pens for easy viewing. Visitors can enter pens at their own risk. Please register with Nutrien prior to the start of the sale, or with AuctionsPlus. Animals are sold exclusive of GST. Whilst every care has been taken to ensure all details presented in this catalogue are accurate and correct, we cannot guarantee that the content is free of any errors or omissions.

Phone Bidding – Key contacts (Interstate bidders please note we are on SA Central Standard Time)
Phone Bidding can be arranged in advance direct with the **Auctioneer Leo Redden 0408 806 021** or by contacting one of the following key contacts within Nutrien:

Greg Beaton – Landmark Beaton Agencies Kapunda SA – 0428 847 510 or 08-85662004

Leo Redden – Auctioneer 0408 806 021

Gordon Wood – Nutrien Stud Stock SA - 0408 813 215

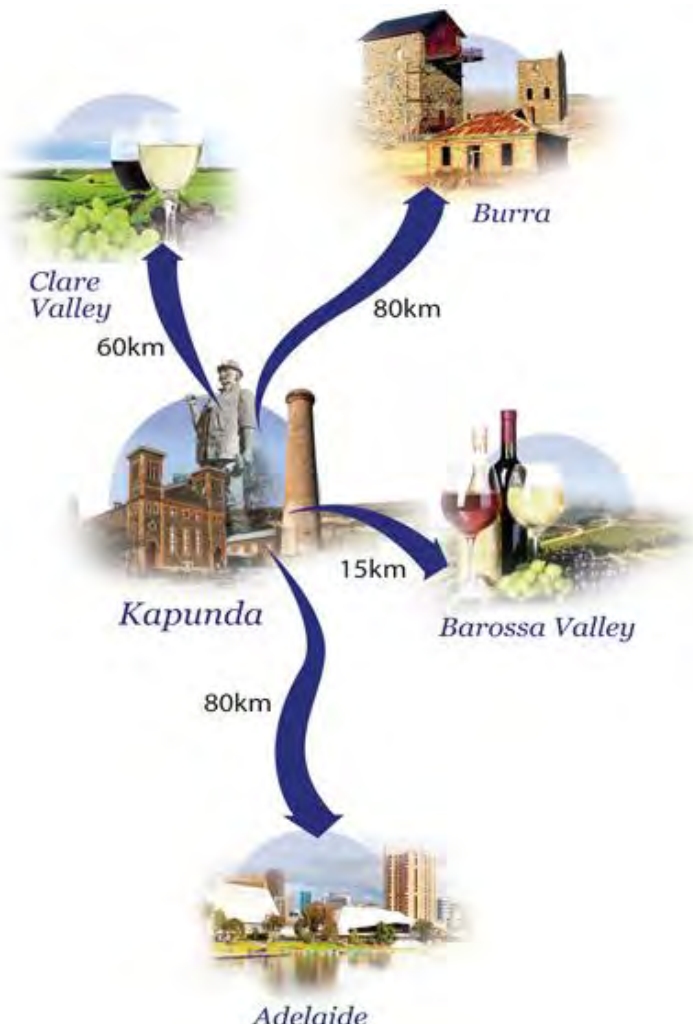

Trevor Driver – Nutrien – 0428 241 049

Richard Miller – Nutrien SA – 0428 849 327

Ray Atwell – Nutrien Stud Stock – Melbourne – 0428 836 136

Peter Godbolt – Nutrien Stud Stock – Albury – 0457 591 929

John Settree – Nutrien Livestock Sales - NSW - 0408297368

Rebates to outside agents

We appreciate the strong support that has been shown to us by Nutrien and many other agents over the history of our stud. **A 6% rebate available to all outside agents** purchasing stock at the sale of behalf of clients. Outside agents must introduce the clients to us in writing 24 hours before the start of the sale to be eligible for the 6% rebate.

Insurance

Animals will become the responsibility of the purchasers at the conclusion of the sale. We strongly recommend insuring your animals for a 3, 6, or 12 month period at the conclusion of the sale. Insurance can be arranged with Nutrien as required.

Freight & Travel

We are willing to hold animals for a reasonable period after the sale to enable purchasers to coordinate the successful and efficient transport of animals home to their properties. We can provide recommendations of suitable stud stock carriers and will assist wherever we can to ensure the safe and efficient transport of animals to your property. Please contact Matt Vogt on 0407 959 837 in regard to the freight and transport post sale.

Accommodation

Our property is located 10 kilometres North of Kapunda on the road to Marrabel on the Eastern side of the road. We are located approximately 1.5 hours North of the Adelaide Airport. The Kapunda airstrip adjoins our property and light planes are most welcome to use it. We will happily pick you up. We are located between the two small townships of Allendale North and Hamilton. Our property has a “Maryvale” sign on the main road. Accommodation is readily available in Kapunda (Kapunda Tourist Park www.kapundatouristpark.com 0885662094 is one of many options) and both the nearby Barossa (25kms from us) and Clare Valleys which are both very renowned areas of attraction.

Can't make the sale?

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select "Sign Up" in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select "Dashboard" and then select "Request Approval to Buy".
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

Place a limit bid now! so you don't miss out!

- 1 Login to AuctionsPlus and go into the catalogue of the sale you are interested in.
- 2 Click on limit bid button next to the lot you are interested in and enter the price you're willing to go to. This will automatically put the first bid on for you at the start price entered by the agent on that lot. If someone bids against you it will automatically place the next bid for you at the bid increment chosen by the agent.
- 3 Please note limit bids will only go up to your price if someone has bid against you.
- 4 Also note there is a possibility you will be on the wrong leg at your limit bid. For example in a bull sale if the start price is \$4,000 and they're taking \$1,000 bids and your limit bid is \$5,000 then you will automatically have the first bid at \$4,000 but as the next bid is \$5,000 you won't get that as you're on the wrong leg.

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

Horn Status: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (2P) Homozygous Polled by Pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not Apricot)

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for Protoporphyrin, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for Protoporphyrin or have parents which have been tested normal or are free by pedigree.

Homozygous: Is the term where an animal has two copies of the particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous Polled where all progeny will be polled from that particular animal or Homozygous Black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

EXPLANATION OF ESTIMATED BREEDING VALUES

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured.

EBVs are provided for the following traits:

Calving Ease Direct: estimates the differences in the ability of a sire's calves to be born unassisted from a 2-year-old heifer.

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Mature Cow Weight: estimates differences between animals in live weights of cows at 5 years of age.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Carcase Weight: ranks animals for carcass weight.

Eye Muscle Area: ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat: ranks animals for rib fat depth at the 12th rib on a 300kg carcass.

Rump Fat: ranks animals for fat depth at the p8 site on the rump on a 300kg carcass.

Intra Muscular Fat: ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs: The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

Breed Average EBVs for 2020 Born Calves														
CED	GL	BWt	200	400	600	MCW	MLK	SS	CWT	EMA	RIB	RMP	IMF	DOC
+0.5	-2.1	+1.7	+21	+35	+48	+49	+7	+1.1	+30	+1.7	+0.0	-0.2	+0.0	+41

Accuracies: Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer: The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.
 SV : the sire has been verified by DNA.
 DV : the dam has been verified by DNA.
 # : DNA verification has not been conducted.
 E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

2021

*"2021 was my 11th year of purchasing at Maryvale, that tells you something! I just weaned a steer calf straight off mum into the market the next day and received \$2200-"
Stud Buyer*

Bull Management & Taking Delivery of your New Bull

Taking Delivery of your New Bull

To help your new bull or bulls settle into their new home as quickly as possible, the following points may be of some help.

- All Maryvale bulls have been run in large mobs most of their lives, so they've always had plenty of mates around, and have "never" been alone.
- It's a good idea to **have some of your own cattle in the yards** when your new bull/s arrive, a handful of steers, or PTIC cows or even an old bull; just something to keep them company, whilst they survey their new surroundings.
- At Maryvale, we handle our cattle quietly and confidently, we always show our cattle respect, and our cattle respect us. We generally use a motorbikes to yard and handle the bulls. The bulls have not been handled with horses or dogs.
- Handle your new bull/s quietly and with respect and he'll settle into his new home well, and will be easy to handle whenever the need arises.

Bull Management

Maryvale would like to make some suggestions to assist your newly purchased bull to settle into his new environment and also provide some general bull management tips.

SETTLING IN:

- The majority of bulls have been running in a large mob.
- Once unloaded, ensure he has company (eg cow or steer) and plenty of food in front of him, until he is able to be placed into his mob.
- Don't box bulls up too much – the majority of breakdowns are caused in the bull paddock when new bulls are directly added to an existing group of bulls.
- Be aware that it is a new environment to them and some time in the yards may be required.
- Remember the pecking order scenario with other bulls – the newest addition may receive a hard time for a little while. Perhaps run bulls alongside each other for a while before running them together.
- They are used to being treated in a gentle manner and will respond accordingly and should be treated with respect and kindness.

JOINING TIME

- All bulls should be serving ability tested each year to ensure they are sound, prior to going out for mating.
- Once they are out working, please check them regularly to make sure they have not had a breakdown or moved paddocks etc. This practice is essential!
- Always put a back up bull in for a couple of weeks in single mating situations to cover yourself against bull failure.
- Don't mate bulls with horns and polled/dehorned bulls together. Single mating is preferred. If multiple joining, put in bulls that have been together prior to joining and ensure they are roughly the same age, weight, and size.

AFTER JOINING

- Try and split bulls up, particularly if you have a large number of bulls. If finding suitable paddocks is a problem, consider running mature bulls with sheep to allow this split up.
- After taking them out of their joining mobs, provide plenty of feed in front of them. This will ensure minimum fighting.

DELIVERY

Matt Vogt 0407 959 837 will work with you on your purchases to arrange suitable and safe delivery wherever in Australia or the world you may be.
