29th and 30th MARCH 2022
Naracoorte Sales Complex

394 *SUPER* Elite Females

- **Donors**
- **Q&R PTIC Females**
- **Selected S Heifer Calves**
- **PTIC Registered Recips**

 **AuctionsPlus**

SOME FURTHER INFORMATION ON THE STONEY POINT HERD DISPERSAL

BREEDING PHILOSOPHY

We have always sought to ensure our herd comprises real Angus cattle that DO and STAY.

With respect to our females, they must get in calf then calve down unassisted and raise a calf that grows and grows yet retaining their complete structural soundness (udders, feet etc.)

STAGE 2

This sale is the final of 2 sales that will see the complete dispersal of the Stoney Point herd breeding after 24 years of breeding based on superior genetic selection.

VIDEOS OF SALE LOTS

Photos and videos of featured sale lots will be available on the Stoney Point and AuctionPlus websites leading up to Sale Day.

SIRE VERIFIED

Most cows presented for sale have been sire verified or some R's pending. All S calves are verified to sire.

STRUCTURAL ASSESSMENT

Our herd has been structurally assessed by Dick Whale (IBMS) over a number of years. With the combination of herds when the Coorong Designer herd was merged into the Stoney Point herd, very stringent structural parameters have been set and cows have had to be very good to stay in the herd.

ET

We have conducted an expansive ET and IVF program over a number of years including fully imported embryos and those purchased from Millah Murrah. A number of our donors are selling as well as registered Recips to those embryos.

FERTILITY

At our recent Pregnancy Testing conception rates achieved were
95% - cows
90%+ - maiden heifers (93% in 2021)

CALVING EASE

In 2019 no calves were pulled, in 2020 one calf was pulled, in 2021 one calf from a heifer was pulled.

PREGNANCY TESTING

This year's Pregnancy Tested in Calf (PTIC) females have been pregnancy tested to the AI, ET or Backup Bull, this will be indicated in the animals comments.

They were pregnancy tested 6 weeks after being AI'd or had an embryo implanted to ensure accurate diagnostics, this was performed by Dr Mike Boerema (B.V.Sc)

They have all been subsequently been retested 5 weeks after the backup bulls were removed to confirm their pregnancies to the AI, ET or backup bull.

This was performed by Chris Saunders of Precision Breeding Services Pty Ltd.

Chris will also be retesting the entire group of cows within a week of the sale to confirm the PTIC status at the point of sale.

All endeavours have been taken to ensure pregnancies at the point of sale, however this is not a guarantee that some of these animals will not slip their calves prior to calving.

All S heifers to be sold will have had a manual palpation (examined by touch) by a veterinarian prior to the sale to ensure a normal reproductive tract.

MATURE COWS

Included in the sale are mature cows that were not previously offered. The majority of these have come from our autumn herd which we ran up until 2021 and were held over to be mated for this sale. They include some our better cows and are herd improvers as well as proven breeders.

S HEIFERS

We have selected from our S heifers those earlier calves that are well grown and up to the rigours of a 2 day sale process. This year as indicated we have manually palpated each heifer.

STONEY POINT 6 POINT HEALTH ASSURANCE

Stoney Point Stage 2 Dispersal Sale

WELCOME

Over the last 24 years Stoney Point, has developed a highly respected elite Angus herd with the focus being on do-ability and stay-ability. These focuses ensure certainty of success.

Accordingly the STAGE 2 of our female dispersal represents an unprecedented opportunity to access the best of the best genetics – the younger and better bred females. Coupled with the use of the current top Angus sires, a unique combination of elite genetics comes to the market.

Whilst sadness is often associated with final dispersals of a great herd that has been developed with a lot of passion and effort, the joyous part is that these females will go on to further enhance the great reputation of the Angus Breed.

Stoney Point Stage 2 Dispersal Sale

SALE INFORMATION

SELLING SYSTEM

Sale will be conducted under auction conditions as posted by the Agents on the day. Selling price will not include GST.

ACCOMMODATION

NARACOORTE:

Naracoorte Hotel/Motel (08) 8762 2400

Country Roads Motor Inn (08) 8762 3900

Naracoorte Cottages 0408 810 645

William Macintosh Motor Lodge (08) 8762 1644

PENOLA:

Coonawarra Motor Lodge - (08) 8737 2364

AM – NH – CA – DD

All sales stock selling are either free of these defects by parentage, or have been tested free. No carrier bulls will be offered for sale.

JOHNES STATUS – the Stoney Point herd is JBAS6.

DELIVERY

Delivery will commence on 4th April and will be coordinated by Dick Smith transport, contact Steve Smith on 0428 636 236 who will be in attendance at the sale

REGISTRATION

All sales stock selling are either Herd Book Registered (HBR) or Angus Performance Registered (APR) and can be transferred at no cost. Buyers should indicate their requirement in writing.

INSPECTIONS

Sales stock can be inspected from 2pm on 28th March and from 2 hours prior to commencement of sale on each day. We encourage buyers to inspect the sales stock prior to sale.

REBATES

A rebate of 3% is allowed to agents nominating and accompanying buyers to the sale. Agents not meeting the above terms will receive 1% if settling for a client.

PHONE BIDDING

Phone bidding can be arranged prior to the sale by speaking to the selling agents.

BUYERS INSTRUCTIONS

No buyers instruction form is included in the catalogue. Sale Agents prefer their own "Buyers Instructions" cards. All purchasers must complete one of these cards prior to leaving the sale. No verbal instructions will be accepted.

CATERING

Refreshments will be available throughout the 3 days, and we would also like to invite all cattle producers for lunch and get together.

AFTER SALES SERVICE

We offer ongoing support to our clients. All at Stoney Point Performance Angus are available to discuss any aspect of your herd and can be contacted on the numbers listed in this catalogue.

INSURANCE

If required buyers should make their own arrangements.

We will be selling on Auctions Plus

Stoney Point Stage 2 Dispersal Sale

The Coorong

THE CLL FACTOR

The **CLL FACTOR** as we call it, refers to the Coorong and Lower Lakes. Our property is jammed between the Coorong and Lake Albert, only a few hundred metres from the Great Southern Ocean.

This environment provides us with a cool maritime climate with the Coorong doctor arriving early afternoon that dramatically reduces temperatures in summer and we never exceed heat load levels even during the hottest of summer months.

In winter the sea mass keeps frosts at bay and pastures growing.

Our soils are calcareous deep sands with plenty of limestone which are wonderful for bone development. Lucerne and veldt grass grow prolifically with annual grasses bulking up the feed base in winter.

Our cows and their calves lead a stress free life with little in the way of health issues – *ideal growing out conditions*.

Having sandy soils means a real focus on feet, we can't hide any issues and must apply constant and earnest diligence to feet and in fact all structural parameters.

It was a no brainer to use Moe for the third year in succession, as we have been super impressed with his first crops of calves, they come consistently and early with plenty of vigour, are highly docile with good growth and carcass traits. He is a top all-rounder with a stellar phenotype. He consistently produces sound footed progeny which is a real plus when producing seedstock in the unforgiving sand of the lower lakes and Coorong.

Iceman needs no introduction, he was the record breaking \$225,000 bull of the 2021 Spring Texas bull sale. He was selected for use as the ultimate curve-bender with sensational growth and carcass yield traits. His out-cross paternal pedigree is combined with one of the most impressive maternal matrons within the breed in Texas Undine H647. The pregnancies offered in this sale will be amongst the first available world wide, as we secured some of his first collection available.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA
 SV : the sire has been verified by DNA
 DV : the dam has been verified by DNA
 # : DNA verification has not been conducted
 E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

A Donor flushing an average of 7 embryos. She is a maternal sister to K197 and the aunt of last year's sale topper and in my opinion one of the pick females in the sale for her overall uniformity, phenotype and structure. She sells AI'd on the 2/09/21 and PTIC to CLUNIE RANGE PLANTATION P392 and was depastured with STONEY POINT PREVALENT P048 from the 16/09/21 to the 18/11/21. Her daughter's sell as lot 103 & 267 and embryos sell in recip lots 5 & 6. Maternal sisters sell as lots 15, 164, 165, 168, 172, 393 and 394.

When we set out on our journey 25 years ago, we stated we did not intend to fail.

Success is a very attitudinal thing and some of the philosophies we applied were

- ***We had to make commitments not promises***
- ***We needed to see answers to every problem , not problems in every answer***
- ***We believed there must always be a better way, not just the same way***
- ***We looked for opportunities not problems***
- ***We wanted to translate our dreams into reality , not reality into dreams***

These philosophies are not something we invented but tried and true in achieving success.

AGRI-VET

FERTILITY PLUS[®]

A specially designed, cost effective, specialized, unique, waterproof mineral and vitamin including a higher content of essential elements, Selenium and Magnesium to supplement as a loose mix or through mineral dispensers to enhance the performance of all classes of cattle.

COMPARE THE ANALYSIS - FERTILITY PLUS

- > Increases Fertility in both Dairy & Beef Breeds
- > Improves Weight Gain & Maturity in Dairy & Beef Young Stock
- > Assists Grass Tetany and Metabolic Conditions
- > Self Limiting - Balancing Mineral Requirements
- > Unique Waterproofing Process
- > Improves your profits - More Cows in Calf
- > Cost Effective 12-19 Cents Per Cow Per Day
- > Increases Milk Yields - Lowers Somatic Cell Counts
- > Can be fed through Feed Systems at 30 Grams Per Cow Per Milking

Fertility Plus is readily available through:

All A.I. Resellers, Murray Goulburn Trading stores, Landmark Stores and all leading Rural Stores throughout Australia.

Success is the Answer – Increase Your Fertility
THE PROOF IS IN THE RESULTS IN DAIRY & BEEF
HERDS THROUGHOUT AUSTRALIA

Agri-Gene Pty Ltd

p: 03 5722 2666 f: 03 5722 2777 e: info@agrigen.com.au www.agrigen.com.au

All of the Cow herd recieves **Agri-Vet Fertility Plus** supplement all year round for complete mineral and trace element health.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcass	CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	<p>Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.</p> <p>The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.</p> <p>While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.</p>	Higher selection indexes indicate greater profitability.

Important Notice for Purchasers

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Embryo Expected Average Progeny Values

Expected average progeny values are provided to assist breeders estimate the outcome of particular mating combinations. The actual EBVs for any individual progeny resulting from a particular mating are likely to vary from the expected average values.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.
