Welcome to our 2nd On Property Bull Sale

Leading edge genetics in a powerful, soft package is how we would describe our 2022 draft of bulls and we are excited to bring them to the marketplace this February. The 2022 sale bulls have been blessed with what has been described by the older generation of Boyup Brook locals as “one of three in a lifetime seasons”.

The start of 2021 was the worst we have seen on our property since we bought it in 2008. We had 18 dams dry up and majority of the cattle in large mobs to be able to access what was left of water. The sale bulls bounced back after an amazing growing season and now present in what we believe as the best they have looked.

This year the bulls were raised in large contemporary groups on big open paddocks of pasture. We feel this keeps the sale bulls athletic and demonstrates that our bulls are raised in line with real world operations. Through this we have also been able to locate the bulls which stand out from their peers and outperform all on the same playing field, which helps our clients find and have access to bulls that bend the curve on growth and performance.

This year’s sale team offer the best genetics we have been able to find throughout the world and we couldn’t be happier with how it has all come together. The crop of bulls are by sires that are owned in partnership or exclusive to Venturon and other sires that we feel meet all of our clients’ demands, whether it be stud or commercial based.

The bulls that are catalogued are put through stringent criteria to make the sale team and represent the very best of their respective calf crops. We are pleased to be able to bring to our clients a bigger offering of both Angus and Charolais bulls to ensure our clients find a bull that will help improve the quality and profitability of their cattle enterprises.

This past year has resulted in us adding some very exciting new genetics with the purchase of the high selling bull out of the Roseleigh Angus Bull Sale in South Australia, Roseleigh Quarterback Q19. An outcross sire who has joined our autumn and spring calving Angus herds.

We also added the \$28,000 Ascot Ramrod R104E from the Ascot stud in Qld as a new low birthweight, outcross calving ease sire who is a true curvebender on his data. Additionally we secured the Western Australian semen rights in the \$123,000 Canadian Charolais sire, SVY Trust 6H in partnership with the team at Myona Charolais, NSW and also secured the Western Australian rights in the \$52,500 Moongool Pilgrim from our friends at Ascot Cattle and Bauhinia Park of Queensland. We have added some very exciting embryos to the program out of Canada, the USA, and Australia in both Angus and Charolais, and we are excited for these calves to be born and to share these elite genetics with our clients.

As you will see a large portion of the sale bulls are ET bred. We continue to use embryo transfer to bring our clients the best genetics we can produce and more of them. We are able to do this through the great man behind it all, Richard Hall, of Golden Arm Genetics. We are thankful for the friendship and quality work that Richard has brought to our program, and as you can see through the depth of our ET bred cattle, it is helping us achieve our goal of offering industry leading genetics.

Richard's extensive knowledge and experience of the Angus breed has been greatly appreciated and we thank him for all the work he does for our growing program.

In 2021 we saw amazing cattle prices and we have thoroughly enjoyed seeing our clients achieve great results through both saleyards and direct. It has been evident to us that clients who have invested in quality genetics have been rewarded and this year presents a market to capitalise on high cattle prices. Our aim at Venturon is very simple, design a product that improves the bottom line for our clients.

We have had a very successful year in the show ring with our cattle and would like to thank our team who have made this all happen. In March we won the inaugural supreme livestock exhibit of the Wagin Woolorama with our cow/calf unit Venturon Let's Elope L20 and her calf Let's Elope R66. The same pair were also awarded the supreme beef cattle exhibit at Warren Districts Agricultural show. We made the trip to Beverley Ag Show this year and took out both female championship's and won grand champion all breeds female with Venturon Clementine Q11.

Perth Royal Show was one of the best showings we have had winning supreme Exhibits in both the Charolais and Angus breed, grand champion Angus, Charolais and Murray Grey female, junior and grand champion Charolais bull, reserve junior champion Angus bull who sells as Lot 12. We were also honoured to win the prestigious interbreed breeders group of three with our Charolais team. Our lot 19 bull, Venturon Raise The Bar R1 had an exceptional spring show circuit after being pulled from cows winning interbreed champion bull of the Show at both Brunswick and Busselton Agricultural Shows. We look forward to campaigning our 2021 calf crop this year around the country, with some of the most exciting cattle we have bred.

We stand behind our brand, we use our bulls in our commercial herd. This ensures that we are always in touch with the commercial industry, making sure our bulls are going to perform for whoever purchases the bulls. You can put trust in a program that has to meet the same markets you are.

We welcome you at any time, by appointment to view the sale bulls. Please call either Harris on 0488 493 713 or Andrew on 0429 379 135 to arrange an inspection time. Our herd is open and we would love to tour you through the female herd. This year we will be hosting an open day on Monday the 7th of February 2022, where the entire sale team will be on display for your perusal. This is a great opportunity to inspect the bulls and ask any questions without the pressure of sale day.

We look forward to seeing you on our sale day, Friday February 25th, 2022. Please join us for a complimentary lunch prior to the commencement of the sale. If you have any questions regarding the sale team, please don't hesitate to get in touch.

Harris, Anne & Andrew

Venue

The sale will be held on property, Venturon, Sambell Road, Boyup Brook and online with Auctionsplus.

The Sale

The Selling System we will be utilising will be a video sale. The sale shed is located right next to the bull pens. Bulls will be penned with the ability to view and walk through them. The Auctioneer will sell the bulls by auction with a video of each bull projected onto the screens located in the sale shed, rather than running the bulls through a ring. This system we feel is buyer and animal friendly and works well with modern occupational health and safety requirements.

Sale Day Information

The sale will be conducted under ALPA terms and conditions as displayed in the sale office on sale day. Potential Buyers are to ensure they have registered with the selling agent and received a bid card prior to the commencement of the auction. This sale will also be interfaced with Auctionsplus so if you wish to utilise this platform, please make your self familiar with the terms and conditions or talk to one of the selling agents if you require assistance. Please ensure if you wish to use this platform you understand the system, appropriate connectivity and pre register 24 hours prior to the commencement of the auction. This will allow parties unable to attend the sale to bid remotely on lots they may be interested in.

Inspection & Sale Time

The bulls will be yarded and available for inspection from 11am on Sale Day Friday February 25th. Selling to commence at 1pm sharp. Supplementary sheets will be available on sale day or at prior request. Private inspection of the sale team can be arranged prior to sale day by contacting Harris Thompson on 0488 493 713 or Andrew Thompson on 0429 379 135. All times in the catalogue are displayed on AWST.

Supplementary Sheet

Supplementary sheets will be available on sale day or by prior request.

GST

All lots are sold exclusive of GST. GST will be added to the auction sale price of each lot prior to invoicing.

Outside Agent Rebate

Venturon offer a 3% outside agent buyers rebate to those who nominate their client in writing to the selling agent 24 hours prior to sale and settling within 7 days. Agents must attend the sale with or on behalf of their client on sale day to assist with their purchase.

Phone Bidding

If you require phone bidding please get in touch with one of our team prior to sale day or talk to one of the selling agents.

Insurance

At the fall of the hammer, Venturon recommend insuring all purchases. There will be an insurance representative onsite sale day to assist you with this.

Registration Status / Transfers

If the animal is listed as registered, it is available for society transfer at the vendor's expense. If you require society transfers, please indicate on the buyers instruction sheet.

Animal Identification

All bulls are branded and/or tattooed as per breed society regulations. All lots are permanently identified in accordance with the National Livestock Identification Scheme (NLIS). Sale lots will have a sale tag on sale day.

Refreshments

Refreshments will be available on sale day.

Catalogue Photographs

All Sale photographs were taken on farm mid January 2022 by Harris Thompson.

Health

Venturon Livestock is a JBAS 8 accredited herd, with a recent confirmed negative test undertaken in May 2021. All the bulls in the sale are eligible for entry to all states and territories in Australia. The Bulls in the sale are sold under the Zoetis Star Breeder program and have been vaccinated with 7 in 1, Pestigard and Vibrovax and have been drenched with Dectomax. All sale bulls have been tested negative for pestivirus. All bulls have been semen tested and scrotal's have been measured by Nutrien Breeding Services, Bunbury, WA.

Sale Bull Notes

Please note the sale bulls have been run in three different management groups. All bulls will be listed on the supplementary sheet what group they come out of. The bulls have been worked by dogs, vehicles and motorbikes their entire life so when introducing them to new management practises please acclimatise them to it gently. The bulls have not been worked by horses.

Health and Safety of Visitors

All of the bulls within the sale have undertaken a strict temperament selection process. The bulls are quiet to handle under conditions they are used to in their groups. Sale day poses a range of new things to the bulls that they may not be accustomed with so please take all respect when viewing the bulls. Please be alert for the potential of bulls fighting within the pens. We do not by any means expect the bulls to be aggressive, but the new environment and large number of people can upset even the quietest of bulls. Please do not crowd the bulls or loiter inside the pens, and please use common sense within the pens when viewing them. Please do not hesitate to talk to any of our team or the sale staff if you require assistance in the bull pens, we will be more than happy to help. Visitors enter the sale pens at their own risk. No children to enter sale pens, no dogs allowed on sale day.

Delivery

Venturon offers free personal delivery within 500km of Venturon. All other transport within WA will be coordinated by Venturon to major centres. We will ensure the bulls are delivered as soon as we can after the sale, there will be no delivery on sale day.

Eastern States:

Venturon will coordinate and cover half of the transports costs on route to Falls Livestock Depot, Finley NSW through Falls Livestock Transport. Please get in touch with us for any more information on our transport offers. Upon taking delivery of your new bull, we recommend you have a companion animal or a group of animals for him to go into. It is a big thing for the bulls going in to a new environment out of their groups, so we recommend you help make this transition as stress free as possible for them.

The Venturon Guarantee

All the bulls sold at Venturon come with "The Venturon Guarantee". They come with a two year Guarantee in the rare event a bull is found to be infertile or unable to breed cows, provided the problem is not caused by injury or disease after taking delivery from Venturon. Upon request, a veterinarian Certificate must be provided by an accredited Veterinarian. Venturon will replace with another sire or refund the purchase price of the bull less the salvage value of the bull.

Sale Catalogue Disclaimer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Data submitted to the Breed Societies may have errors in it which cannot be detected without further DNA testing. For this reason, users ought to consider if they need to obtain independent testing of the relevant animal (if possible) to ensure the data is accurate. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Murray Grey Beef Cattle Society, Charolais Society of Australia, or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Angus Genetic Conditions

Angus bulls have their Genetic Condition status shown on their lot. Further information on Angus genetic conditions can be found on the Angus Australia website www.angusaustralia.com.au

Guide to Angus Suffix System

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

: DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

BREEDPLAN EBV Explanations

EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

TRAITS

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

CE % Dir = Direct Calving Ease - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination & hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length & therefore easier calving & increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Selection indices are calculated for market specifications. Index values are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system. More information is available on selecting animals using a selection index. The Index values are derived using BreedObject technology. More information is available from the BreedObject web site.

IMPORTANT: EBV's are breed specific and cannot be compared across breeds. Only compare Charolais to Charolais, Angus to Angus, Murray Grey to Murray Grey.

Charolais BREEDPLAN

Selection Indices

Charolais selection indices are calculated for two market specifications, namely, Domestic Terminal and Northern Maternal.

Northern Maternal Index (\$) (NMI) – Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial self-replacing herd where Charolais bulls are joined with Bos indicus cows in Northern Australia targeting the grass fed Jap Ox market. Selected heifers are retained for breeding and so maternal traits are of importance. Steers target 650 kg live weight (360 kg HSCW and 12 mm P8 fat depth) and heifers 630 kg (340 kg HSCW and 14 mm P8 fat depth), at 26 months of age. In response to industry feedback; positive emphasis has been placed on finishing ability.

Domestic Terminal Index (\$) (DTI) - Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial herd where Charolais bulls are joined with a British breed cow base (e.g. Angus) targeting the domestic trade. This index assumes all progeny will be marketed with steers finished in the feedlot for 90 days, and weighing 450 kg (250 kg HSCW and 7 mm P8 fat depth) when marketed at 12 months. Heifers will be in the feedlot for 75 days, and weigh 430 kg (230 kg HSCW and 9 mm P8 fat depth) at 12 months. In response to industry feedback, positive emphasis has been placed on finishing ability.

Angus TACE

Selection Indices

Angus selection indices are calculated for four market specifications, namely, Domestic, Export and Northern Terminal.

Angus Breeding Index (\$) - \$A - estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.

Domestic Index - \$D estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 – 70 days) with steers slaughtered at 490 kg live weight (270 kg carcass weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

Heavy Grain Index - \$GN - estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers are assumed to be slaughtered at 760 kg live weight (420 kg carcass weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

Heavy Grass Index - \$GS - estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 620 kg live weight (340 kg carcass weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

Murray Grey BREEDPLAN

Selection Indices

There are three different selection indexes calculated for Australian Murray Grey animals. These are: Vealer Terminal Index, Supermarket Index, Heavy Grass Fed Steer Index

Vealer Terminal Index - VTI - Estimates the genetic differences between animals in net profitability per cow joined for an example crossbred commercial herd (i.e. using Murray Grey bulls over British bred females) targeting vealer production. Vealers are finished on grass and marketed at 365 kg live weight (average 200 kg HSCW and 9 mm P8 fat depth) at 10 months of age. Daughters are NOT retained for breeding and so no consideration is given to maternal traits (i.e. calving ease daughters, female fertility, mature cow weight).

Supermarket Index - Sup - Estimates the genetic differences between animals in net profitability per cow joined for an example Murray Grey commercial herd targeting production of steers for the domestic supermarket trade. Steers are either finished on grass, or grain fed for 70 days, and marketed at 470 kg live weight (average 260kg HSCW and 12mm fat) at 15 months of age. Daughters are retained for breeding.

Heavy Grass Fed Steer Index - Grass - Estimates the genetic differences between animals in net profitability per cow joined for an example Murray Grey commercial herd targeting pasture finished steers for heavier grass fed markets. Steers are assumed marketed at 620 kg live weight (340 kg HSCW and 14 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding.

Breed Avg. EBVs for 2020 Born Calves. Percentile Range available at Murray Grey BREEDPLAN <http://breedplan.une.edu.au>

Sparrows

Kingston 139Y (P)

Comments: Australian rights exclusively owned by Venturon and LVH- Fairfield. Sired by the breed legend, Winn Mans Lanza. The high selling Canadian Charolais sire at \$CAN155,000. Progeny are Low birthweight and short gestation with quick growth and plenty of softness. Daughters are coming into production and breeding the house down.

Venturon

Next Generation (P)

Comments: New Generation has turned into a carbon copy of his father. We retained Next Generation as our walking son of Sparrows Kingston 139Y, and we are so glad we did. His progeny have added growth and muscle shape while maintaining a moderate frame and exceptional carcass quality. Last year his first son to sell in the sale sold for \$10,500 to the Norman Family of Unicum, WA. This year's sons are some of his best yet.

Winn Mans

Skaggs 663X (P)

Comments: The Canadian superstar. Semen rights exclusively owned by Palgrove Charolais stud QLD and WA semen rights owned by Venturon. We selected Skaggs in Canada in 2015 after viewing him in the pasture at CK SPARROW FARMS. His daughters blew us away with their functionality and easy doing ability with exceptional udder quality. His sons have so much power and shape and we are very pleased with his sons in the sale.

WC

Milestone 5223 (P)

Comments: Milestone was the high selling bull in the 2016 Wright Charolais Sale in America, at \$125,000 USD for one-half interest. We added Milestone to our AI sire line up for his overall sire appeal, depth of pedigree and dam. We strongly believe that a bull must be backed by a superior female line and Milestone has just that. We were extremely impressed with his progeny in the States and Canada, and he has bred extremely well for us. Unfortunately, he has only bred sons for us, but reports on his daughters are that they are functional females with beautiful udders. A homozygous polled sire with an outcross pedigree that adds so much appeal to his progeny and makes them so flash in their design.

Turnbulls

Duty Free 858D (P)

Comments: We cannot speak highly enough about what Duty Free has done for our program on his first calf crop. Harris drove 3 hours with John Wright from By Livestock in Canada in 2018 to see him, and was impressed with the standout group of sons in the sale pen which went on to be the top averaging group in Palmers Bull Sale. His daughters showed everything we select for in our females; square made, great udders and good footed. Duty Free himself is a low birthweight bull who is a curve bender on his birth to weaning weight figures. We look forward to his following calf crops. Note this is your first opportunity to get access to a Duty Free son in Australia at auction. Venturon had a year exclusivity to Duty Free from Agri-Gene Australia along with a group of elite Charolais breeders across Australia.

Cooara

Mission Man (P)

Comments: We purchased Mission Man privately from the Campbell family, selecting him as the pick of their bull drop. He is a bull we added to our program for his excellent carcass traits and his strong maternal backing. Sired by Mac 2244 we knew he was going to breed on well. His sons have added shape whilst maintaining softness in a polished package.

Angus Reference Sires

Baldrige

Beast Mode B074

Comments: Beast Mode is a sire whose progeny have taken Australia by storm. He has sired high sellers across the country in a range of different environments. Beast Mode's impressive dam, Baldrige Isabel Y69, is one of our favourite cows in the Angus breed and really sparked our interest in using the bull. Last year two sons sold as our second and third top-priced Angus sires.

Baldrige

Command C036

Comments: Command is our go-to heifer AI mating sire. His progeny aren't those of a typical heifer mating sire, having added growth and muscle shape. We have found Command to add a good foot to his progeny and a docile temperament. We have another drop of Command calves which are looking promising.

Bushs

Easy Decision 98

Comments: We used Easy Decision in a flush with our Diamond Tree Weigh Up M5 donor which resulted in 18 A grade embryos. We decided to use him following great reports about calves coming through in Canada, and we love what he has done for us. Sons have added muscle shape and scale with smooth sirey front ends and great heads. The sons in this year's sale will definitely be a highlight.

Granite Ridge

Maximus M34

Comments: We purchased M34 as our foundation Angus herd sire at the 2018 Granite Ridge Sale, SA. We wanted a sire that was going to give us a strong base to start with and produce an even made line of cattle. After viewing at their on property field day we were happy with his docile temperament, muscle shape and great foot structure. This is the second crop of sons we have offered by him. We are loving their added muscle dimension and power whilst being made in such a refined package. His daughters are developing into great cows with nice udders.

Murray Grey Reference Sires

Mighty

Next Best Thing

Comments: Next Best Thing by far one of the best Murray Grey animal we have raised in our 21 years of breeding, if not one of the best animals we have bred. Unfortunately, we lost NBT to a freak accident late 2019, so this is the last chance to obtain a naturally sired son from Venturon. NBT was supreme Murray Grey exhibit at Perth Royal Show, supreme bull in show at Wagin Woolorama and the Upper Blackwood Agricultural Show, interbreed beef bull at Brunswick Ag Show and senior champion Murray Grey bull at Adelaide Royal Show all in 2018. His first two sons to sell in our 2021 sale both went to stud herds.

Mighty

Magnum

Comments: Magnum is a surefire heifer mating option by Karakara Balfour. We retained Magnum due to his excellent length of body and low birthweight easy calving attributes. His dam is one of our highest milking cows who has such a great track record of excellent progeny. Magnum's progeny can only be registered as commercial due to a mix up with hair samples, only realised once the bull was deceased.

S: BALDRIDGE COMMAND C036 ^{PV}

BALDRIDGE BLACKBIRD A030 #

MILWILLAH KRAKATOA K92 ^{PV}

D: ISLAY ADAGIO P6 #

ISLAY ADAGIO K26 #

Comments: When we purchased the pick of the Young families 'Islay' herd (formerly Strathtay) we were given the opportunity to take the bull calf drop as well. Rowland was the pick of the drop and we are so happy with how he has developed. His dam is a very functional made Millwillah Krakatoa K92 daughter. Rowland is by Baldrige Command C036 who we have had great success with and who is breeding so well around the country. We find Command to add extra muscle shape and power, improve feet whilst still moderating birthweight and oozing calving ease. Rowland is going to breed so well for a range of markets and here is your opportunity to secure the last of the Islay prefixed bulls to sell at auction.

Comments: ET brother to lot 2 and check out this guys data. Stud Sire potential. He has a modest birthweight, ranks top 1% for 200-day weight, top 2% for 400-day weight, and top 3% for 600 day weight, all with accuracies over 70%. He also sits within the top 5% or higher for 8 of his selection indexes. He is incredibly sound and stands on a great set of feet and legs with such a docile temperament. His dam M5 is leaving some great females in the herd for us and we cant wait to see how they all go on and breed. Please note R16 has a grass seed scar from when he was a calf in his right eye

D: DIAMOND TREE SOUTHSIDE M132 ^{SV}
 Diamond Tree Lord Jordan G88 #

Comments: Check out this big powerful outcross sire. Reputation has been one of the stand out Angus bulls since he was born. He has been one of the highest weight gain sires on pasture out of his 43 bull contemporary group across all breeds. When Harris saw his sire DMM International 54D in his paddock in Canada he knew he was going to make some seriously powerful bulls that offer a different pedigree to the normal high profile bulls. Harris saw him be crowned the Supreme Champion beef bull at both Farmfair International and Canadian Western Agribition which is an amazing feat for any beef bull. Internationals dam, DMM Blackbird 105A, is a tremendous female and we hope he throws daughters just like his mother. Heres your chance to get into an outcross power bull.

D: VENTURON PANDORA P3 #
 DIAMOND TREE FRONT RUNNER M224 #

Comments: Redemption is the go-to heifer mating specialist in the catalogue who still maintains adequate power and thickness. We couldn't recommend this bull more for calving ease and his genomic backed EBVs indicate the same. He ranks in the top 4% of the breed for his birthweight figure with an actual birthweight of 28kg. He also sits in the top 7% for calving ease direct, top 12% for calving ease daughters all while maintaining a +13.2 EMA figure which puts him in the top 1% of the breed. R2 is a heifer's first calf and sired by Baldridge Command C036 out of an Ayrvale Hercules daughter that weaned R2 at over 75% of her body weight which just shows she works.

Comments: One of the youngest bulls in the draft but one that is a worth a serious inspection. R23 is one of Harris pick Angus bulls in the sale. Check out the sire appeal in this young bull who stands on a correct set of feet and legs with a great disposition and weight for age. He is the first son of the outcross Canadian Sire- Bushs Easy Decision 98, we have offered and out of our great M5 donor cow. His ET sister, Velvet R4, was a class winner at the 2021 Perth Royal show and is one of our pick females of the R female drop. True herd sire potential in this young bull.

Comments: ET brother to lot 14. These Easy Decision sons have all the muscle and carcass shape we expected after selecting him for our donor joining. We couldn't be happier that M5 flushed 18 eggs to him, and you will see why when you inspect these sons. All reports in Canada from Semex have been exactly what we are experiencing. R26 is an impressive upstanding bull. EBV's will be available by sale day.

Comments: The last of the M5 ET bred sons in the sale and we saved the power brother for last. We just love the power and hindquarter expression in R29 and we can see he is going to breed some exceptional heavy vealers mated to cows that need that bit of extra shape. You can see the EMA in this sire.

D: VENTURON HILLARY P27 (VE7 P27E) (P)
 VENTURON HILLARY (VE7 H43E) (P)

Comments: Here is one of the best Charolais bulls to sell in the West this year! R1 really does Raise The Bar for Venturon standards. We believe this is the most exciting herd sire prospect we have ever sold at auction. Not often do you get a homozygous polled bull with as much power and body mass as this guy has that moves so well and appeals to the eye. He is one of the first WC Milestone 5223 P sons to sell in Australia and you can see how well he is working for us. For anyone that follows our program, you'll know how good his female line is. This is the first calf out of our favourite Sparrows Kingston daughter- Hillary P27. His dam was junior champion female at the 2019 Adelaide Royal Show and a class winner at the 2019 Sydney Royal Show. This bull offers such a unique package of outcross genetics backed by an exceptional female line. True stud sire prospect. Raise The Bar R1 will be entered for Sydney Royal 2022 pending buyers approval, Free delivery to NSW if shown at Sydney Royal show.

 VENTURON GAYLE (VE7 G35E) (P)

Sire: Turnbulls Duty Free 858D (P)

Dam: Venturon Naughty But Nice (P)

Comments: **HOMOZYGOUS POLL YEARLING BULL.** In our 26 years of breeding Charolais, this could well be the most exciting pedigree we've ever stacked into a bull. We thought why wait another 12 months to give you access to our elite up and coming genetics. Please note Super Duty will only be 11 months on sale day. When Harris inspected Turnbulls Duty Free 858D in Canada, he knew he was going to make a big impact on our herd, and hasn't he done just that. Combine him with our top shelf donor cow, Venturon Naughty But Nice N31, and we have our most exciting crop of ET calves. Super Duty already has herd sire written all over him with such an impressive outlook, impeccable hoof and leg structure, and is as quiet as a lamb. Make sure you jump on the opportunity to own the first Duty Free son to sell in Australia at auction. Super Duty will be halter broken and pending buyer's approval entered for Sydney Royal Show. Free delivery to NSW if shown at Sydney

VENTURON ARCHIE (VE7 A18E) (P)
D: VENTURON FREYA (VE7 F13E) (P)
 VENTURON CHERRY BLOSSOM (VE7 C10E)

Comments: Now here is an exciting sire prospect. Another WC Milestone son which brings an outcross American pedigree and out of New Generation's and Motivate's dam. New Generation is one of our leading walking herd sires who breeds well which is seen in his depth of sons here. Venturon Motivate sold to the Bardoo Charolais stud back in 2016 for \$16,000 and is doing an exceptional job down there with sons selling as the 2nd and 3rd top-priced bulls in their recent on-property sale. If we weren't walking a brother to this guy he wouldn't be going anywhere. The breeding potential of this bull gives us a lot of confidence in what he is going to do for whoever buys him.

D: CHARNELLE PANACHE 8 (GKA H67E) (P/S)
 PALGROVE PANACHE 139 (PK A396E) (P)

Comments: We just love this Elders Black Jack son. If you want refined horsepower Roulette is for your program. In the worst year we have seen at Dinninup Farms with majority of our dams going dry, Roulettes dam ended up in an unfortunate situation which led him to being bottle raised by Andrew. We just can't get over how well he performed this year in the main contemporary group with all the bulls. R27 is the result of an embryo purchased out of the Charnelle Charolais sale in QLD. His sire, Blackjack was the 2020 Charolais Champion of the World.

VENTURON
ROPER R33 (AI)

Born: 25/03/2020
Tattoo: VE7 R33E

SIRE VERIFIED

WINN MANS LANZA 610S (OAC B7395E) (P)
S: SPARROWS KINGSTON 139Y (OAC G139E) (P)
SPARROWS DELIGHT 374P (PED Z374E)

VENTURON FRANKIE (VE7 F10E) (P)
D: VENTURON KATE (VE7 K22E) (P)
VENTURON EVITA (VE7 E6E)

Comments: A really well made horned son of Sparrows Kingston 139Y. This guy mated over a purebred British female will produce a majority of poll calves with extra growth and shape. This bulls design is so appealing with a great wide top, a heap of middle and plenty of shape. His dam, Kate K22 has a perfect calving record with 7 calves in 6 years of production. She's a nice made daughter of Venturon Frankie who has stood the test of time.

D: VALLEY VIEW ESTELLA 214 (VLW H21E) (P)
PALGROVE ESTELLA 214 (PK A416E) (P)

Comments: If you've been looking for some serious growth in an outcross package then this is the bull for you. This bulls growth on grass in a 43-bull contemporary group blew us away. One of the first Silverstream Landis sons to sell in WA and one of the first in the country. He is the result of an embryo purchased from Challambi Charolais out of their leading donor cow, Valley View Estella. Out of an Impair cow featuring some of New Zealand's finest genetics, you've got yourself a homozygous polled, appealing outcross sire.

VENTURON RECTIFY R1 (PB)

Born: 16/02/2020

Tattoo: VE7 R1

Colour: Silver

SIRE VERIFIED

ONWARD EDDISON H46 (PB)
S: MIGHTY NEXT BEST THING (PB) (AI)
 BUNDALEER TARELLA K7 (PB)

BUNDALEER BIG BANG B5 (PB) (AI)
D: BUNDALEER KURI H65 (PB)
 BUNDALEER KURI Z39 (PB)

Comments: Maternal cow power crossed with the best sire we have ever raised, is how Rectify R1 was created. We strongly believe our maternal herd is the backbone of our operation and when you look at H65, she has built a lot of it herself. We can't speak high enough of what Kuri H65 has done for us since we purchased the Bundaleer herd from the Owen family but this is her best calf yet. R1 is everything we have been trying to put into a Murray Grey sire. He has got muscle expression whilst retaining softness, he is smooth made while still having grunt and he has the EBV's to back what we already know he can do. We can say if H65 didn't have so many daughters in the herd, he would not be going anywhere.

 BUNDALEER TARELLA K7 (PB)

WOODBOURN WARRIOR A69 (PB)
D: BUNDALEER BELLA J8 (PB)
 BUNDALEER BELLA B62 (PB)

Comments: We weren't lying when we said R1 and R3 were the two greatest grey bulls we have sold and simply to choose who sold first, we flipped a coin. Rockstar R3 is another standout Next Best Thing son. One person that Harris became great friends with, while he was in New Zealand on the 2016 Murray Grey youth exchange, was the late Neill Burke of Chequers Murray Grey stud. Neill always believed that if there was one bull in the Grey breed you would line breed with, it would be Warrior A69, and he was so right. Warrior is a bull that features in so many of the greats of the Grey breed and two copies in this bull has worked great. R3's dam, Bella J8 is a female who has already raised a sale topper and another two standout sons in her 4 years of breeding.

Comments: Here is an interesting cross of genetics. A Next Best Thing son out of our favourite Karakara Balfour daughter. Boadicea G407 is a female who hasn't missed, raising daughters who have come to the top of their drops and sons who have topped sales. R6 is the bull with the most muscle shape in the Grey line up. This bull appeals for his EMA and thickness down the spine and his butt shape.

D: WAROONA PEARL J39 (PB)

WAROONA PEARL C27 (PB)

Purchaser:

\$:

Comments: Rover is a powerful Grey bull who offers an outcross pedigree to WA Murray Grey breeders. Harris purchased his dam, Waroona Pearl J39 at the 2017 Murray Grey National Show and Sale after he was awarded the Lindsay Murray Grey Most Potential Breeder Scholarship. Pearl has bred well since being here in the West and R9 is her best son yet. He is sired by Glenliam Farm Drover D107 who has bred exceptionally well for the Glenliam Farm herd.

Purchaser:

\$:

Comments: A high growth bigger framed son of our great Bundaleer Tarella G23 female. G23 has bred so well for us, being the mother of Tarella K7 and Leroy who was sold to the Mungatta Murray Grey stud in 2017. R13 is a bull who is going to breed some top shelf replacement daughters with the longevity and quality of his dam and grand dam on his sire's side. The Tarella line is one of our most successful lines and here is your opportunity to access a son. Please note R13's EBV's will be available sale day.

MIGHTY KANDICE (PB) (AI)

Purchaser:

\$:

Comments: Reputable Source is a smooth made son of Next Best Thing N2. We really like the smooth, slick skin and hair on this bull. His dam is a daughter of our Mighty Kandice K3 cow who has been successfully shown, named Grand Champion Murray Grey female at the 2016 Perth Royal Show. Big Bang daughters have bred so well for us and we will continue to introduce his genetics through our herd.

**Spring
Born**

Purchaser:

\$:

Comments: This bull should feature on a lot of people's short lists. Please note R19 is only a 17 month old bull and is the youngest MG bull to sell. R19 is an ET brother to Venturon Capri Lass R18 who was the grand Champion Murray Grey female at Perth Royal show 2021 at just 12 months of age. After seeing so many great progeny of KEC A29 we purchased embryos out of the Glenliam Farm Dispersal which resulted in these calves. R19 is a paternal brother to Carlinga Linebacker, both sired by Ondiong F78.

BUNDALEER KOOJAN HILL K13 (PB)

D: VENTURON DANA P1 (PB)

MIGHTY FERGALICIOUS (PB) (AI)

Purchaser:

\$:

Comments: We round out the sale with a moderate framed heifer bull option that is correct in his design. Roderick is a two-year-old's first calf and was born at 26kg. He stands on a good set of feet and legs, expresses natural muscle shape and is one of the quietest Murray Grey bulls in the pen. This bull is going to breed a functional type of calf, with daughters that will make great cows, based on the female line that backs R2. He stems back to one of our original cows, Mighty Dana. Please note Roderick's EBV's will be available sale day.

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.
