# MELVILLE PARK HEREFORDS MELVILLE POLL HEREFORDS

## THIRTY NINTH ANNUAL HEREFORD SALE

A/c: D. J. LYONS PARTNERSHIP, Telephone: (03) 5574 3236, Fax: (03) 5574 3208  
Email: melvillepark@activ8.net.au

**MONDAY, 28th FEBRUARY, 2022**  
**9 DEHORNED AND 35 POLL HEREFORD BULLS**

Sale commences at **1.30 p.m.**

Light luncheon available. Inspection after **11.00 a.m.**

Rebate: 4% to outside agents.

PIC 3GMHF011

Transport: Free delivery of sale bulls to within 150 km radius of Melville Park, which includes Mt. Gambier, Millicent, Lucindale, Bordertown, Warracknabeal, St. Arnaud, Ararat, Skipton, Camperdown, Warrnambool and Portland.

**NOTE:** Also free transport to the nearest town en-route to Deniliquin - Hay - Narrandera, Wagga - Albury, Sale - Bairnsdale.

AuctionsPlus

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

2

Select "**Sign Up**" in the top right corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select "**Dashboard**" and then select "**Request Approval to Buy**"

7

Fill in buyer details and once completed go back to Dashboard

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process - unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

**Phone:** (02) 9262 4222

**Email:** [info@auctionsplus.com.au](mailto:info@auctionsplus.com.au)

## HERD HISTORY

The "Melville Park" commercial herd was established in 1960 with the purchase of Chatsworth House cows which originated from Colly Creek cows by South Boorook bulls.

In 1988-89 the Horn Hereford stud herd was established by purchasing stud females from various studs in the following years.

In 2005 we started breeding Poll Herefords and in the following years we have purchased stud females from various studs.

In April due to the untimely loss of Days Calibre G74 we purchased a son of his in Bowen Kyooma K27. He is thick, long, soft, well muscled and has good EBVs.

In September 2016 a new poll Hereford bull, Kidman Competition K223 was purchased from Kidman stud at Dubbo for \$35,000. His sire is Kidman Legacy D155 whose pedigree includes Debarry Eden and Valma Southern Star. He is a long bull, has a soft skin, deep and well muscled. He has moderate birth weight EBV, good EMA and positive Fat and IMF.

In July 2017 we purchased a new horn hereford bull, Courallie J F181 Lantana. He has a low birth weight EBV with good growth EBV, a milk EBV figure of 22, EMA +6.6, Rib and Rump EBV of +1.7 and IMF of +1.1. He has a soft skin, thick and well muscled and his sire is Yarram Unique F181 who is breeding very well.

In July 2018, we purchased Bowen Magistrate M241 AI (P) for \$64,000. He is a well muscled thick bull with a soft skin. He has birth weight EBV +4.6, Milk +21, 600 Day Growth +87, EMA +4.2, and Rib and Rump of +0.3, IMF +0.5.

A horned bull was purchased for the 2019 joining from Warwick Court being Nicholls N142. He is a complete outcross being by Mawarra Diamantina, sired by a New Zealand bull. His Milk EBV is +19, 600 Day +112, Rib Fat +1.4, Rump Fat +2.1 and IMF +0.9 and high indexes. He is long, soft and well muscled.

A poll bull was purchased from Guilford Poll Herefords in Tasmania, being Nirvana N79 (PP). He is a Homozygous Poll bull, is long, deep, thick and has a soft skin. Birth Weight EBV +3.6, Milk +22, 600 Day +93, Rib Fat +1.6, Rump Fat +2.0, IMF +0.7 and high indexes.

Two Homozygous Poll bulls have been purchased, Kidman Formula One N140 is a deep, thick, long and has a soft skin. He has a birth weight EBV +3.3, Milk +11, 600 Day Growth +79, Rib Fat +1.9, Rump Fat +2.6, IMF +1.2 and high indexes.

Bowen Notorious N245 is a complete outcross bull, low birth weight EBV -0.3, Milk +16, Rib Fat +1.9, Rump Fat +2.6, IMF +2.0 with high Indexes and medium growth. He is a thick, deep bull by Glentrevor Wallace H4237.

## **NEW SIRE FOR 2021 JOINING**

At the Wodonga National in May, Mawarra If Only Q264 (H) was purchased for \$103,000, he is long, thick, well muscled with a soft skin. Has a birth wt of +4.4, Milk +22, 600 Day +102, EMA +6.0, Rib +1.6, Rump +2.3 and IMF +2.8.

## **2021 AI PROGRAM**

In the Horn AI program we used a New Zealand Bull, named Pute Nascar N13, he is long, deep, thick, well muscled bull with good growth EBV's, good milk and excellent carcass data.

Glendan Park Quarterback Q027 (AI) (H) who was the top price bull at their 2021 bull sale at \$76,000 was used. He has birth wt of +4.1, 600 Day Growth +79, Milk +28, EMA +4.9, Rib +1.0, Rump +1.4 and IMF +2.3.

In the Poll AI program we used NJW 79Z Z311 Endure 173D (IMP USA) (PP), he has moderate birth wt EBV, excellent growth,, milk, scrotal and carcass data.

The Ranch Payroll P031 (AI) (PP) was used, he is a son of Koanui Techno 3062 (IMP NZL) (PP) with excellent growth, milk, scrotal and carcass data. He is thick, soft and a deep bull.

Bowen Patriarch P017 (AI) (ET) (PP) was used, he is a son of Hunter Lakes Lancelot L103 (PP), he is soft, thick, long and deep. He has low birth wt EBV, good growth and milk with good carcass data.

A new Poll sire in Yarawa South Paradise P112 (AI)(PP) was used, he is a thick, well grown, with a soft skin, low birth wt +4.3, milk +20, 600 Day Growth +87, EMA +5.7, Rib +1.5, Rump +1.7 and IMF +1.5. He was the top price Poll Hereford Bull at the 2020 Wodonga Bull Sale.

## **GENETIC GUARANTEE**

Our Sires and all sale bulls have been gene tested for any genetic defects and have all come up free. (HYF, DLF, IEF, MSUDF) All sale bulls have been DNA verified to sire and dam.

## **HERD HEALTH**

### **PESTIVIRUS - ALL BULLS HAVE TESTED PI NEGATIVE**

**Bulls have been vaccinated 2 x Vibrio Vax, yearly 7 in 1, drenched with Dectomax. Melville Park is Brucellosis Free.**

## **2021 - 2022 CATTLE SALES**

Melville Park would like to congratulate all our bull clients on their good cattle prices during the last twelve months whether they were sold at weaner sales, vealer market or as grown cattle.

## **CARCASS EVALUATION**

We had our 2022 sale bulls scanned for fat depth and eye muscle area on 17th November 2021 by Ben Glatz of Lucindale, South Australia. This gives a comparison on sale bulls for rib fat depth, rump fat depth and eye muscle area.

## **2022 SALE BULLS**

Scrotum circumference measurement in centimetres was done by Ian McLeod on 9th December 2021.

## **PHYSICAL AND BREEDING SOUNDNESS OF SALE BULLS**

### **Veterinary Certificate**

This is to certify that on 9th December, 2021. I examined all bulls in this catalogue. I manually examined the external genitalia, including a testicular measurement, and observed all bulls complete at least one normal service. Findings from all the above tests were within normal limits and consistent with bulls of good fertility.

I. K. McLEOD, B.V.Sc. Mac VSC

## GROUP BREEDPLAN EXPLANATORY NOTES

Only Hereford GROUP BREEDPLAN EBVs with Accuracies (Acc.) can be validly compared between herds. Within-herd EBVs from Hereford BREEDPLAN cannot be used to compare between herds.

**Estimated Breeding Values (EBVs):** EBVs for the growth traits are calculated in kilograms. The EBV is the best estimate of an animal's genetic merit for that trait.

**Accuracy:** An accuracy is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change on the animal's EBV as more information is analysed for that animal or its relatives.

**Birth Weight EBV:** Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age.

**200 - Day Milk EBV:** (kg) is an estimate of an animals milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 day weight of their calves.

**200 - Day Growth EBV:** (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400 - Day Weight EBV:** (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600 - Day Weight EBV:** (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**EMA:** Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

**Rib:** Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**Rump:** Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Two fat EBVs are listed as there is variation between animals regarding fat depth at the two sites.

**IMF:** Intramuscular Fat Percent: The IMF% EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

## SELECTION INDEXES:

Four new Herefords Australia version 6 Breed Object selection indexes are to be released in mid-October with the publication of the October 2019 Hereford BREEDPLAN analysis. Herefords Australia, along with staff from the Animal Genetics and Breeding Unit (AGBU) and Southern Beef Technology Services (SBTS), have finalised development of these selection indexes following approval from the Herefords Australia board. Earlier breeder feedback gathered via the recent Herefords Australia member survey has also been incorporated into the development of these new selection indexes. This feedback ensures that the new selection indexes are representative of the varied production systems that Australian Herefords are run in, including both straight-bred and cross-bred production systems.

Each of the new selection indexes describes a different production/market scenario and relates to a typical commercial herd using Hereford bulls. Producers are advised to use the selection index that most closely aligns to their production system. All four selection indexes are focussed on maintaining and improving eating quality. Significant premiums are applied for increasing marble score up to a marble score of 3. Pressure is also applied to early life growth to maintain low ossification scores and good MSA compliance. In addition, each selection index targets the following specifications.

**Southern Self-Replacing Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing purebred Hereford herd targeting the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 18 months of age to produce 300 kg carcasses with 10 mm P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period which results in small increases in cow weight.

**Northern Self-Replacing Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic market. This index is suitable for use by both straight bred Hereford herds and in crossbreeding programs where Hereford bulls are being used over a *Bos indicus* based cow herd. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 18 months of age to produce 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period which produces little change in mature cow weight.

**Southern Baldy Maternal Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over *Bos taurus* females (e.g. Angus). A portion of the heifers are retained for breeding and so maternal traits are of importance. The steers and surplus heifers are destined for slaughter at 18 to 19 months of age. Steers produce 300 kg carcasses with 10 mm of P8 fat depth, while heifers produce 270 kg carcasses with 12 mm of P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period which results in small increases in cow weight.

**Northern Baldy Terminal Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over *Bos indicus* females (e.g. Santa Gertrudis) where all progeny (male and female) are destined for slaughter. Steers and heifers are slaughtered at 18 to 19 months of age. Steers produce 340 kg carcasses with 14 mm of P8 fat depth while heifers produce 300 kg carcasses with 17 mm of P8 fat depth.
