## *2022 Annual Bull Sale*

**THURSDAY 10<sup>TH</sup> MARCH, 2022**  
ON PROPERTY, 246 COOK ROAD, MYRUP, WA

*32 Sire Assured Bulls on Offer*

CHATLEY &  
HUTCHESON  
LIVESTOCK

**Nutrien**  
Ag Solutions™

Nutrien Ag Solutions is one of the leading livestock agents in Australia.

When it comes to livestock we are the experts, staying across market trends & developments in livestock supply chain & production that will deliver more value to your business.

The Chatley & Hutcheson Team specialise in:

Auction Sales

Private Treaty Sales

Online Sales

Stud Stock Sales

Clearing Sales

For the best possible livestock marketing, service & advice please contact your local livestock representative today.

## Welcome to Allegría Park Angus Bull Sale

We would like to welcome you to Allegría Park Angus 2022 Annual Bull Sale. What a year 2021 was for the beef production in Southern WA. Records were broken continually during 2021 and has not stopped in recent weaner sales in early 2022.

This year Andrew & Fiona Kuss, stud principals of Allegría Park Angus, are offering 32 of their finest bulls for this year's sale.

We have worked hard on erecting new bull selling pens allowing better access for the potential buyers to view their structural and feet merits along with the bull's temperament.

Our stud cow herd is run under commercial conditions. The cows are raised on autumn winter and spring pastures and supplemented with hay over summer. Our heifers calve at 22-24 months of age and must get back in calf with no supplement feeding to remain in the herd. Maintaining a highly fertile cow herd is the only way to produce highly fertile bulls for our customers.

The sale bulls have been semen tested both crush side and for morphology, sire verified and (some parent verified) and genomic analysed using the Zoetis HD50K test panel. A vaccination program has also been undertaken using Vibrovax, Ultravac. 7in1, Pestigard, Bovilis MH& IBR.

Inspections prior to the sale are warmly welcome.

In a first; this year's Bull Sale will be on Auction Plus, with all lots having video footage available.

# Sale Information

## HERD HEALTH

Allegría Park is a JBAS 6 Herd.

Bulls have been tested negative for Pestivirus, Vaccinated with Pestiguard, Vibrovax, Ultravac 7in1 and Bovilis MH+IBR.

Bulls have been semen tested by Nutrien Breeding Services and morphology evaluated by ChenoVet Pty Ltd Walla Walla NSW

## SAFETY

The bulls have been screened for temperament and are considered docile, however there are always risks associated with handling cattle.

Visitors enter the Bull pens at their own risk.

Children must not enter the Bull Pens.

The vendor or agents will be pleased to escort visitors through the Bulls if required.

## REBATES

Rebates available to outside agents, conditions apply.

## DELIVERY

Vendor will arrange delivery of bulls free within the Esperance area.

## INSURANCE

We recommend that buyers insure their bull for full cover, including transport, on the fall of the hammer. Allegría Park takes no responsibility for death or injury to a bull after it leaves our front gate.

## TRANSFERS

The vendor will transfer ownership of the bull to the purchaser on the Angus Australia database.

## ANGUS AUSTRALIA DISCLAIMER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## PARENT VERIFICATION SUFFIXES

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

**PV:** both parents have been verified by DNA.

**SV:** the sire has been verified by DNA.

**DV:** the dam has been verified by DNA.

**#:** DNA verification has not been conducted.

**E:** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

## PRIVACY INFORMATION

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances.

If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must notify in writing to Angus Australia. If Angus Australia is not notified, then the buyer will be taken to have consented to the disclosure of such information.

**Can't make the sale?**  
**Log onto AuctionsPlus to bid from  
anywhere on your phone, tablet or desktop.**

- 1 REGISTER ONLINE**  
Simply click 'Sign Up' to begin your free registration. To register as a buyer for livestock, you will need to provide us with a few more details.
- 2 COMPLETE BUYER INDUCTION**  
The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.
- 3 VIEW CATALOGUE**  
Photos, videos, pedigrees and other information will be available in the online catalogue.
- 4 ENTER AUCTION**  
Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.
- 5 AUTO BID**  
Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.
- 6 CONTACT SELLING AGENT**  
If successful, contact selling agent directly after the sale to arrange payment.
- 7 DELIVERY**  
Arrange transport of livestock at your expense.

Contact AuctionsPlus on (02) 9262 4222  
or [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

**TACE**  
TransTasman Angus Cattle Evaluation

## What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease	<b>CEDir</b>	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>CEDtrs</b>	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>GL</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	<b>BW</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	<b>200 Day</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	<b>400 Day</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	<b>600 Day</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	<b>MCW</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	<b>DtC</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	<b>SS</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	<b>CWT</b>	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	<b>EMA</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>P8 Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>RBY</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	<b>IMF</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	<b>NFI-F</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	<b>Doc</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	<b>Foot Angle</b>	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	<b>Claw Set</b>	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	<b>\$A</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	<b>\$A-L</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.  The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.  While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

**ANGUS**  
VERIFIED

# BLACK HIDDEN CATTLE ARE NOT ALWAYS ANGUS

**Angus Verified stops Angus imposters from eroding your profits and your breed**

Access genuine Angus premiums and get rewarded for your quality Angus cattle by displaying the Angus Verified endorsement in the marketplace.

Validate your use of registered Angus sires and their presence on your PIC at the time of joining to authenticate your purebred commercial Angus calves.

## Why would I join?

- Builds integrity, confidence, and trust
- Leverages a competitive advantage
- Secures market premiums
- Rewards the use of registered Angus sires
- Adds credibility to your business reputation
- All Angus Verified RFIDs are recorded in the Angus Australia database
- Identify your cattle with exclusive Angus Verified tags

## What's recorded?

<i>Angus Sire Records</i>	<i>Angus Verified Animal Records</i>
PIC Number	Mob Name
Angus Sire ID	RFID or NLIS ID
RFID or NLIS ID	Sex
	Birth Year
	Breeder PIC
	Sire ID or Sire Group
	Birth Range by Month

## Where do I sign up?

1. Become a member of Angus Australia
2. Subscribe to Angus Verified
3. Download the free Aglive App
4. Set up your account

## What does it cost?

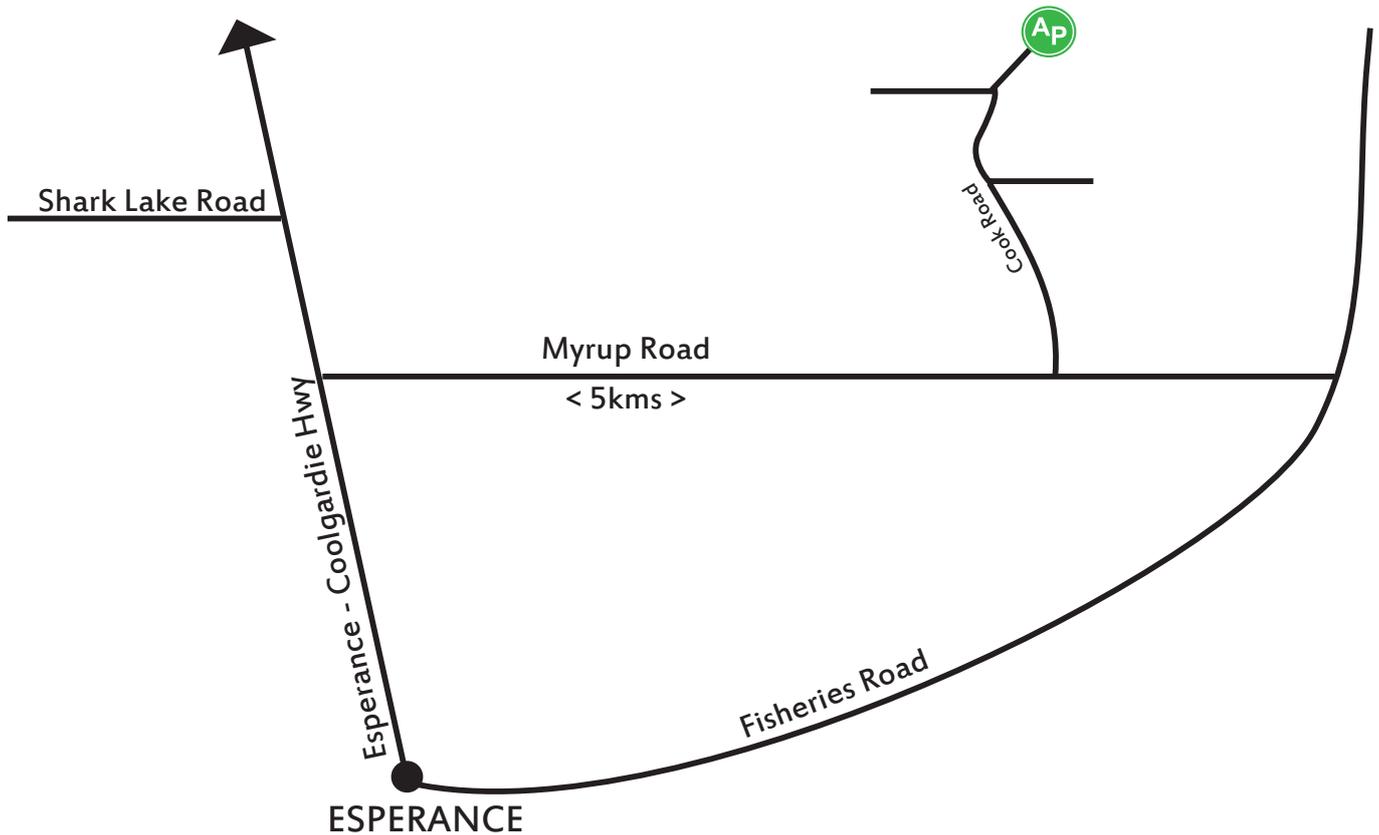

- Angus Verified Subscription - \$110/year
- Verify Animals - \$1/head
