THE OFFERING

39 Registered Purebred Bulls + 5 Commercial Bulls

37 PTIC Registered Purebred Speckle Park Heifers

Approx. 40 PTIC Commercial Speckle Park Heifers

32 Elite Embryos, offered in 8 packages

DISCLAIMER: The descriptions of the animals in this catalogue, including their pedigree and other genetic information, has not been verified by the Vendors or the Selling Agents. Whilst all care is applied in producing this catalogue, industry experience suggests that up to 4-5% of DNA parent verification tests may have errors. Consequently, the Vendors and the Selling Agents and their representative(s) do not assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.

THE FOURTH JAD SPECKLE PARK BULL + FEMALE SALE

PATTERNED FOR PROFIT.

We wrote in this introduction 12 months ago about the hugely positive period we were experiencing then in the Australian beef industry. Who would have thought that 12 months on, our beef industry has gone to a whole new level, and some! Agriculture is the new mining, an exciting career prospect for young people, and a great industry to invest in.

While high livestock and beef prices are terrific for producers - especially on the back of years of drought - these same high prices to the consumer highlight the imperative for Australia to consistently produce higher quality beef. Global markets for premium-quality beef have not been anywhere near as affected by the Covid-19 pandemic as the commodity end, giving insight into where our future focus needs to be as an industry. Renowned international analyst, Simon Quilty, Global Agritrends, calls it the 'flight to quality', which he believes sums up the direction the beef industry will take over the next 5 to 10 years.

The consumer can choose chicken or pork, where the eating experience is predictable. Or they can pay more for Australian beef. But for them to justify that additional expense for a meat protein, the beef eating experience needs to be amazing. Speckle Park beef delivers that amazing eating experience - it's juicy, it's tender, and so flavoursome. We believe the Speckle Park breed is inherently well-positioned to meet future market demands, however it must be enhanced and even fast-tracked through data and measurement. We know other breeds around us have embraced data wholeheartedly. Our breed must do the same. At JAD,

Our family welcomes you to the 4th JAD Speckle Park Bull + Female Sale. Thank you very much for showing an interest in our program - we are grateful for your support, and look forward to getting to know you and your breeding program further.

performance recording has been highly valued from the start, and it is great to see some - but too few - other studs in our breed also now embracing the role of science to meet consumer demands.

JAD Speckle Park is one of very few studs that carry a five-star Breedplan Completeness of Performance rating. Although we put a lot of emphasis on Breedplan and data, our core fundamental benchmarks are with the utmost importance placed on scrotal, temperament, feet and legs, and udder quality. We are about **breeding for longevity** - encompassing fertility - to ensure commercial relevance for us and our clients.

We would like to acknowledge the tremendous influence of the McKenzie family of Maungahina Stud, New Zealand, on our herd. Their sires heavily feature in this catalogue, and they stand out. Thank you! We would like to thank our families, friends, and service providers for their immeasurable support - especially

Justin's parents, Tony and Kate. We would also like to thank our team member, Stewart McKenzie (pictured), who started working with us two weeks before our 2021 sale and has been an absolute joy to have around.

With thanks,

Justin, Amy, Jack and Mitchell Dickens.

Program:

- ▶ Inspections: From 9am
- ▶ Sale: 1pm
- ▶ Complimentary morning tea, lunch and post-sale refreshments will be available
- ▶ Join us after the sale for a social get-together in the JAD Sale Complex!

Selling Agents and Auctioneer:

The sale will be conducted as a video auction by Bowyer and Livermore, with Brian Leslie, Dairy Livestock Services (DLS), as Guest Auctioneer. All animals will be available for pre-sale inspection on the day of the sale.

Bowyer and Livermore: (02) 6331 5166
 Nick Fogarty: (0409) 070 225
 Todd Clements: (0429) 070 225
 Justin Guy: (0421) 467 520

Brian Leslie: (0418) 365 934

All lots will be sold under the Australian Livestock & Property Agents Association Ltd Standard Stud Stock Auction Terms and Conditions of Sale. If unfamiliar with these terms, please contact Bowyer and Livermore. Please check with the Selling Agents to obtain a buyer's number and registration slip, if you are considering bidding in the sale. Successful purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the sale's conclusion.

Unable to Attend the Sale?

Bid online via AuctionsPlus.

The sale will be interfaced as a sequential auction on AuctionsPlus, with live video and audio streamed for online bidders and viewers. There will also be individual videos of each live lot (excluding pregnant recipients) posted to the AuctionsPlus catalogue in the weeks leading up to the sale. If you have not used AuctionsPlus before, head online and visit www.auctionsplus.com.au. Go to the 'Help' pages under the 'Tools' tab for a demonstration auction. Please also register as an AuctionsPlus user at least 24 hours prior to the sale

in order to bid. Note that transport arrangements must be organised on sale day.

AuctionsPlus

www.auctionsplus.com.au

P: (02) 9262 4222

info@auctionsplus.com.au

Phone Bidding: If you would prefer to place your bids over the phone, please contact one of the Bowyer and Livermore agents at least 24 hours prior to the sale to make arrangements.

Outside Agents:

A rebate of 2% is offered to outside agents who introduce buyers to the selling agent in writing at least 24 hours prior to the sale, and settle accounts on the purchaser's behalf within 7 days of the sale.

Supplementary Information:

A Supplementary Handbook will be available on sale day, including current scan data, weights, pregnancy status, Q-Select testing results, and further information on the PTIC commercial heifer lots.

Insurance:

Purchasers are strongly encouraged to immediately insure their new acquisition(s). Bulls are a valuable and vulnerable piece of farm equipment.

GST:

All animals are sold exclusive of Goods and Services Tax (GST). Ie: If a bull is sold for \$5000, you will be charged \$5500.

Mobile Reception:

Mobile phone reception will be stabilised at the sale venue through external boosters. For phone bidding, please contact a Bowyer and Livermore agent.

Feeding and Management:

Our 2020-drop of cattle were weaned at approximately five months old, and haven't looked back. They received weaner pellets as part of the weaning process and were grown out on pasture. They have never been pushed on high starch grain rations, with growth rates of 0.9-1.4kg/day their entire

lives. The cattle are now in peak health, with rumens in great balance to handle whatever pasture conditions they encounter at their new home. The cattle have been handled with dogs, UTVs, motorcycles, and on foot. None of the cattle have ever had their feet trimmed in any way. We will NEVER hoof trim our cattle to mask faults. Never ever.

Herd Health:

Some animals in the catalogue have minor pinkeye scarring, not deemed detrimental to their functionality. Individual details to be included in the Supplementary Handbook. We strongly recommend annual animal health booster shots.

BULLS:

- ▶ All DNA tested to verify they are not persistently infected (PI test) with Pestivirus
- ▶ All vaccinated for tick fever on 29/7/2021
- ▶ Pestigard booster to be administered prior to sale day
- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Double vaccinated with Vibrovax (last treatment 11/2/22)
- ▶ Cydectin Long-Acting drench on 9/12/21

PUREBRED FEMALES:

- ▶ DNA tested to verify they are not persistently infected (PI test) with Pestivirus
- ▶ All vaccinated for tick fever on 29/7/2021
- ▶ Pestigard booster to be administered prior to sale day
- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Cydectin Long-Acting drench on 23/4/21

COMMERCIAL HEIFERS:

- ▶ Pestigard booster to be administered prior to sale day
- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Cydectin Long-Acting drench on 15/9/21

Under the Johnes Beef Assurance Score (J-BAS) system, JAD Speckle Park carries a J-BAS 6.

The JAD Guarantee:

Every bull is guaranteed to be a breeder at the time of sale and is guaranteed fertile for 6 months from sale day. If a bull should prove infertile or unable to serve cows naturally, the vendor will either:

- 1) Provide a satisfactory replacement, or
- 2) Provide a cash refund equal to the purchase value of the bull less salvage value. No credits provided.

It is the purchaser's responsibility to provide a certificate from a registered veterinarian before the 6 months is up to verify infertility, and that it was not the result of an illness, injury, or misadventure. The guarantee covers the purchase value of the bull, without interest, costs and damages. We recommend that all purchasers discuss injury insurance of their purchases at the sale with the on-site representatives or their agent. This guarantee is in addition to the normal terms and conditions governing auction sales. All females will be confirmed pregnant by professional technician,

Damien Sotter, Beef Genetics, Bathurst. A pregnancy certificate will be supplied to all purchasers of females at the sale. A pregnancy confirmation does not guarantee that a healthy, live calf will be born. In the event that a purebred female aborts her calf or fails to birth a live, healthy calf, JAD Speckle Park will provide two straws of semen from the JAD LN Tank, free of charge and for within-herd use only. It is the purchaser's responsibility to collect/transport this semen.

Freight:

All sale cattle must be transported from "Greenvale", Yeoval, by sundown Sunday. Formal possession, risk and expenses pass to the buyer at the fall of the hammer. JAD Speckle Park and/or agents, Bowyer & Livermore, can arrange transport. Several livestock carriers will be present on sale day.

We have arranged the following runs:

- ▶ **Northern run:** Falls Livestock Transport. Contact Lockie Falls at (0429) 826 342
- ▶ **Southern run:** Hanging Rock Livestock Transport. Contact Paul Hourn at (0476) 172 194
- ▶ **Southern run:** Macdeb Livestock Transport. Contact Mac Jones at (0408) 572 507.

Frozen Genetics:

- ▶ All embryos are stored at Holbrook Breeders Australia. Insurance and freight ex. Holbrook is the responsibility of the purchaser
- ▶ Embryos are sold with a 50% pregnancy guarantee, providing conditions are met that are outlined in the JAD Speckle Park Embryo Sales Terms & Conditions. These can be found at: <https://jadspecklepark.com.au/embryos/>
- ▶ See page 92 for full terms regarding the sale of embryos.

Semen Rights:

JAD Speckle Park reserves the right to collect up to 200 straws of semen from any bull in the sale, for within herd use only. Any semen collection will be at our cost and the purchaser's convenience.

Embryo Collection Disclaimer

Please be advised that we have flushed once and confirmed pregnancies from the following females. The resultant calves will be fully owned by JAD Speckle Park. These females have a Speckle Park International (SPI) ET Donor Dam Permit already in place.

- ▶ LOT 47 - JAD L260 Miss Sage R102 (JAD R102)
- ▶ LOT 48 - JAD L11 Miss Sage R93 (JAD R93)
- ▶ LOT 49 - JAD N264 Amy R69 (JAD R69)

BREEDPLAN:

We are proud of our commitment to the collection and reporting of performance data for BREEDPLAN. By submitting raw data to the system, we are ultimately improving the accuracy of resultant EBVs to deliver real

"We have been using the Q-select testing for eight years and have seen vast improvements in our weight gains, not only in calves still on their mothers but even more so as they start to develop on feed. The four parts to the Q-select test all have their benefits. By focussing on using Leptin TT sires, we have lifted our weaning weights over the past six years and we are seeing an increase on the number of TT progeny each year. It's definitely a worthwhile tool to assist in herd improvement."

Justin Johner, Johner Stock Farm, Canada.

value to our clients to assist in their decision-making. JAD Speckle Park has a five-star Completeness of Performance rating. Speckle Park GROUP BREEDPLAN EBVs reported in this catalogue come from the February 2022 run. See further information about BREEDPLAN EBVs and a Percentiles Table on pages 14-16.

Veterinarian's Physical Examination of Bulls/Females:

Bulls:

All bulls offered have passed a comprehensive semen evaluation which included morphology, carried out by Dr Stuart Geard and Jodie Mohr of Holbrook Breeders Australia, or Dr Hennie Strydom of Wellington Veterinary Hospital. A letter confirming this will be supplied to all purchasers.

This assessment certifies the bulls are fit for natural service, however does not guarantee their semen will freeze for artificial breeding. Additionally, no bulls have been health tested for export qualification purposes. All bulls are sold without guarantee that they will meet all health testing requirements for export.

Females:

The reproductive tract of all purebred females has been checked by Dr Stuart Geard, Holbrook Breeders. JAD Speckle Park is committed to only ever sell purebred females that have passed this physical examination. A letter confirming this examination will be supplied to all purchasers.

Raw Data:

Fat and muscle scanning, and scrotal circumferences were measured on November 18, 2021, by Roger Evans, Bovine Scanning Services Pty Ltd, Tamworth, when the animals were

13-15 months old. This data was submitted to Breedplan for the registered animals, and is published in this catalogue for unregistered bulls.

DNA Testing:

ALL bulls and purebred females have been fully DNA tested at Neogen Australasia, with results published alongside each lot description:

100K SNP Profile for every bull and purebred female	
	Parent Verification (PV) for every bull and purebred female in the sale
Coat Colour	RGF – homozygous dominant black RGC – dominant black/recessive red
Poll/Horn Testing	PcPc – homozygous polled HPc – carries one copy of the horn gene
Myostatin	NC – non-carrier of the nt821 myostatin gene C – carrier of one copy of the nt821 myostatin gene
Leptin	Represented as TT, CT or CC. Read the following pages regarding Q-Select Testing for more information about Leptin.

Q-Select Testing:

JAD Speckle Park was the first Australasian Speckle Park stud to undertake DNA testing specifically for economically-important beef production traits, including leptin. We have sent tail hair samples from our 2020-drop purebred calves to Quantum Genetix in Saskatchewan, Canada, for Q-Select testing. We decided to carry out the testing within our stud - initially in 2017 - after speaking with various Canadian Speckle Park breeders about the impact that selections based on this testing had on their commercial herds. See Q-Select information charts on pages 7 and 8. Q-Select testing results will be published in the Supplementary Handbook.

Complimentary Sale Day Selection Service

We have arranged to have two renowned beef industry identities, Dick Whale and Alastair Rayner, present on sale day to assist people with their selections. Please feel free to utilise this complimentary service.

- **Dick Whale:** Independent Breeding and Marketing Services (IBMS). P: (0427) 697 968, rgwhale@bigpond.com
- **Alastair Rayner:** RaynerAg. P: (0427) 102 317, alastair@raynerag.com.au. www.raynerag.com.au

Registration Transfers with Speckle Park International (SPI):

All purebred lots are fully registered with the breed society, Speckle Park International (SPI). JAD Speckle Park will take care of ownership transfers on behalf of the purchaser with SPI Registration Transfer Forms to be submitted to SPI within three weeks after the sale.

Visitor Safety:

All of the sale animals have been screened for temperament and are quiet to handle under normal circumstances. However, there are inherent risks with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN/PRAMS MUST NOT ENTER THE PENS.

People entering the yards are at risk of injury. Be especially alert to bulls fighting. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal. Do not crowd the bulls or loiter inside the pens.

When You Get Your New Bull Home

On arrival at their new home it is important a suitable mob of animals (eg: pregnant cows, steers) is yarded to greet the bull and minimise the stress on the bull. The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period.

You should check the bulls regularly to see they are working, especially in the first three weeks of joining when the majority of problems occur. Watch for any signs of injury, infection (any high temperature can compromise bull semen quality) or possible serving dysfunction. Early detection of any problems can minimise the impact of the quality of service your bull provides, and conception rates.

GENOTYPE PERFORMANCE TRAITS

KNOW WHAT YOU'RE GETTING, BEFORE YOU GET IT

- Increase productive life of cow by **2 YEARS**
- Improve meat tenderness by **10%**
- Increase weaning weight by **27 lbs**
- Increase carcass growth by **10 lbs**

LEPTIN
GENOTYPE IDENTIFICATION

A LEPTIN TT genotype animal has an increased rate of fat accumulation as compared to a LEPTIN CC animal.
OTHER BENEFITS INCLUDE:

- increased weaning weight
- increased cow productive life
- increased milk production
- increased 12th rib backfat
- impacts marbling and yield grade

PMCH
GENOTYPE IDENTIFICATION

A PMCH AA genotype animal has increased fat deposition compared to a PMCH TT animal
OTHER BENEFITS INCLUDE:

- increased tenderness
- increased marbling fat
- increased 12th rib backfat

CRH
GENOTYPE IDENTIFICATION

A CRH GG genotype animal has increased weight compared to a CRH CC animal.
OTHER BENEFITS INCLUDE:

- increased hot carcass weight
- increased rib eye area

IGF2
GENOTYPE IDENTIFICATION

A IGF2 CC genotype animal has increased lean growth compared to a IGF2 TT animal.
OTHER BENEFITS INCLUDE:

- larger rib eye

Page 7 | JAD SPECKLE PARK SALE 2022

Interpretation of Q-Select Genotypes

Leptin genotype	■ ■ ■ CC ■ ■ ■ CT ■ ■ ■ TT	➔	Increasing genetic potential related to fat accumulation, milk production, cow longevity, weaning weight, carcass composition.
PMCH genotype	■ ■ ■ TT ■ ■ ■ AT ■ ■ ■ AA	➔	Increasing genetic potential related to fat deposition, tenderness, marbling, backfat.
IGF2 genotype	■ ■ ■ TT ■ ■ ■ CT ■ ■ ■ CC	➔	Increasing genetic potential related to lean growth, rib eye area.
CRH genotype	■ ■ ■ CC ■ ■ ■ CG ■ ■ ■ GG	➔	Increasing genetic potential related to stress response, hot carcass weight, rib eye area, docility.

COLOUR PATTERN GUIDE

It is important to understand how Speckle Park colour patterns work in order to achieve your breeding goals. While some breeders are mostly interested in producing speckled cattle, others want to inject the notorious hybrid vigour of Speckle Park, while retaining predominantly black herds. For example, when a solid black Speckle Park bull is joined with 100% purebred Angus cows, the resulting calves will be solid black. Another example is when Angus cows are joined to a white Speckle Park bull, the resulting calves will be predominately speckled.

Speckle Park cattle have four distinct colour patterns; speckled, leopard, white pointed and solid black. The speckle and leopard colour pattern are genetically the same except for varying degrees of spotting. Some Speckle Park cattle can produce red colour patterns if both parents carry the recessive red gene.

*Please remember when dealing with nature individual results will vary.
The guide is just that – a guide – and Mother Nature has the final say.*

SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcasses meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting' is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level. Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcasses and a higher incidence of dark cutting. Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament.

Further, research has demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency. Selection for increased muscle content in a standard weight carcass can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcass, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +1.7 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of +0.1 mm, relative to carcass weight.

RIB FAT THICKNESS & FAT DISTRIBUTION

Rib fat thickness is the measured depth of subcutaneous fat over the quartered rib site between the 5th and 13th ribs. A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance. In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcasses to have adequate fat coverage over all major primals, with an area of inadequate fat distribution not being greater than 10cm x 10cm over each individual primal. Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcass, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +1.3 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.5 mm, relative to carcass weight.

TAKE HOME MESSAGES

Whilst many of the factors that affect the eating quality of a carcass and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal. Selection of animals with acceptable temperament, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcass fatness and higher Carcass Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd. To further discuss breeding for MSA programs, please contact staff at Southern Beef Technology Services (SBTS) and Tropical Beef Technology Services (TBTS). More information about Meat Standards Australia is also available from the MLA website.

SPECKLE PARK

AUCTIONEER

INDEPEDENDENT
BEEF CONSULTANT

BRIAN LESLIE

Brian Leslie
Auctioneer

Dairy Livestock Services (DLS), VIC

Brian Leslie is one of the most renowned and highly regarded dairy auctioneers in the world, and he has been the Guest Auctioneer at all JAD Speckle Park sales to date. We saw Brian sell at the 2017 Melbourne Royal Show Speckle Park Feature Sale and were thoroughly impressed by his ability to recall pedigree information, sell with clarity and fairness, and the overall atmosphere he created.

Brian has been auctioneering for the past 40+ years, specialising in dairy cattle. He has sold ALL of the record-priced dairy cattle of each breed, including the highest priced dairy animal ever in Australia at \$251,000 at International Dairy Week (IDW) in 2018. He has sold in each state of Australia and New Zealand for several decades. Although mainly dairy, Brian has sold at the famous Lawson, Te Mania and Weeran Angus sales for 30+ years.

He is a partner with family in Leslie Farms (Pooley Bridge Holsteins) at Arcadia near Shepparton, VIC, that have won Premier Breeder/ Exhibitor of IDW no less than 13 times, along with over 30 Champions including Grand Champion Cow three times. Brian's cattle have won many Grand Champions at Melbourne Royal and he has sold animals to several countries, including the national record producer of Japan.

DICK WHALE

Dick Whale
Independent Beef Consultant

Independent Breeding and Marketing Services (IBMS), Wangaratta, VIC

Dick Whale from Independent Marketing and Breeding Services (IBMS) is JAD Speckle Park's ongoing independent beef consultant, assessing our animals for structure and temperament. He uses a combination of the Genetic Type Summary (GTS) and Beef Class Structural Assessment System to score each phenotype trait.

All sale animals catalogued were considered acceptable for soundness, muscling, doing ability, tempermanet, and more. These scores can be found with each lot description in this catalogue. JAD Speckle Park places a very high degree of importance on structural soundness and temperament. Dick will be present on sale day to assist clients with their selections. Dick can be contacted directly prior to sale day at (0427) 697 968.

See pages 12 and 13 for description of the assessment system.

THE JAD ADVANTAGE

We are a commercial and customer-focused Speckle Park breeding operation which aims to deliver seedstock that will improve the long-term efficiency and profitability of the beef industry, and consistently “plate up” a unique and memorable beef eating experience for the end consumer.

We feel strongly that the Speckle Park breed in Australia will benefit from bulls and females that have been bred under our strict standards, and they are backed by our 6-month “JAD Guarantee” – we are in this journey together.

When you buy a JAD Speckle Park, you can be assured that they have been heavily measured and scrutinised. Our stud carries a five-star BREEDPLAN Completeness of Performance rating, acknowledging the effort we make

to measurement and maintaining contemporary group completeness right through to 15-17 months old, in an effort to achieve more accurate EBVs. We aim for a balanced set of objectively measured traits, and work to gradually optimise growth and carcass traits – not in quantum leaps.

We put in the hard work to give our clients the confidence to back us and our cattle.

We are passionate about our cattle and hold a strong female-focussed vision for what we want our herd to look like. Our cattle must be structurally sound, medium-framed, deep-barrelled, thick, and soft with good temperaments, longevity, and a low maintenance requirement. The result is progeny that will calve easily, grow, finish quickly, and grade highly.

We look forward to working in partnership with you.

A GLOBAL INFLUENCE

We travel to Canada and New Zealand (when we can!) to get to know the different breeders and their breeding programs, to see genetic lines in the flesh, and to select our “picks” to infuse into our herd through extensive ET and AI programs.

INDEPENDENTLY ASSESSED

All bulls are semen tested, reproductive organs are examined in all bulls and purebred females, and all purebreds are independently assessed for structural soundness and temperament.

DATA RECORDED

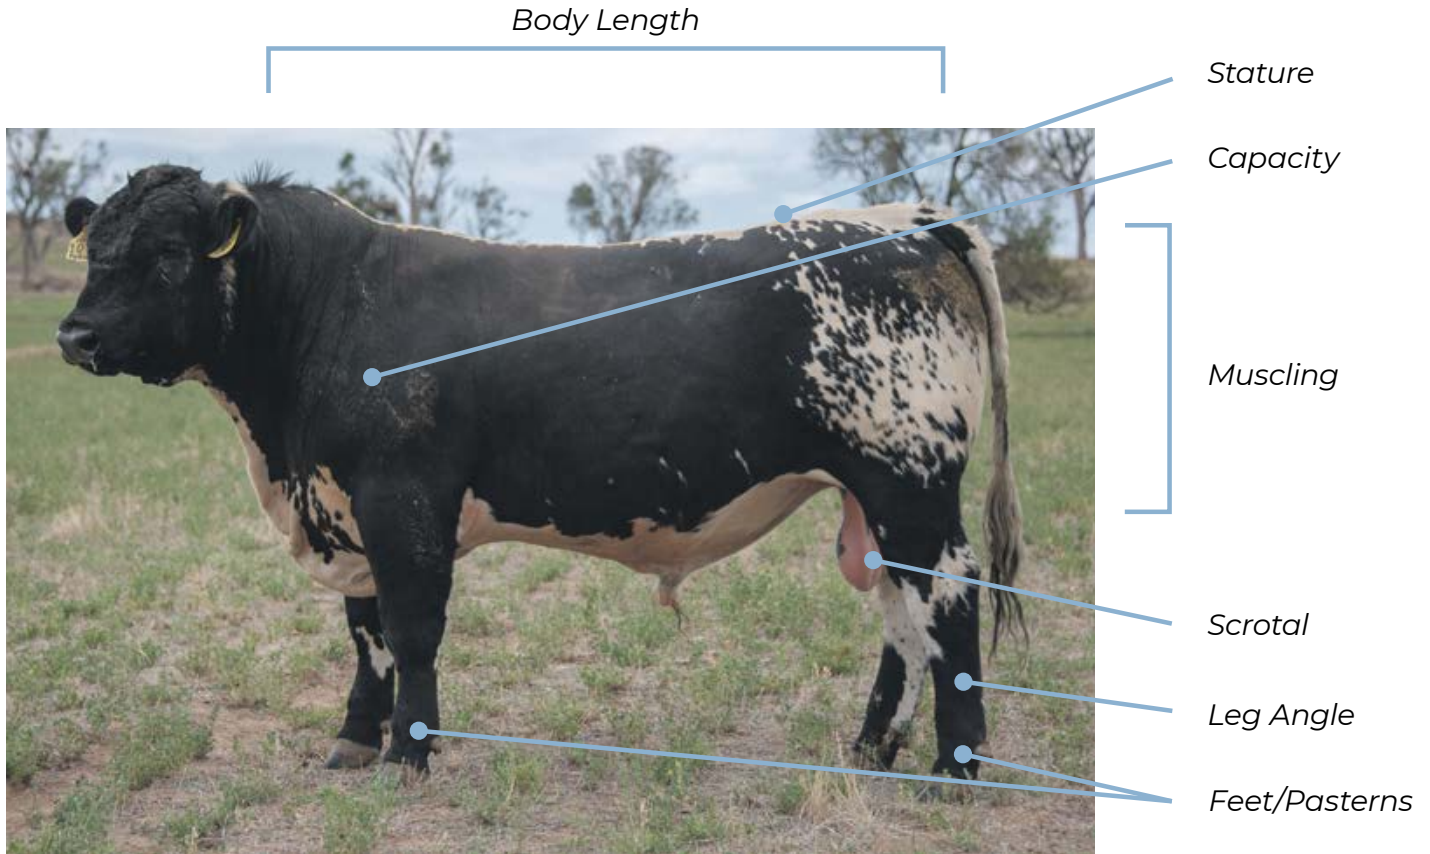

JAD carries a five-star BREEDPLAN Completeness of Performance rating. Our extra effort is to improve the accuracy of resultant EBVs and deliver real value to our clients to assist them in their decision-making.

TEAMWORK + CUSTOMER SERVICE

We are both just as passionate about Speckle Park cattle as each other, and we are committed to helping our clients achieve their goals in a long-lasting partnership.

Guide

Structural Soundness Traits

Feet	Evaluation of the shape and evenness of the front and rear feet, with 5 being ideal. Scores greater than 5 exhibit some scissor claw in feet. Scores less than 5 are open clawed.
Pastern Angle	Evaluation of strength of pastern, depth of heel and length of foot, with five ideal. Scores greater than 5 tend towards having shallow heel, less than 5 towards being stubbed toe.
Leg Angle	Evaluation of the angle measured at the front of the hock. Scores greater than five indicate towards sickle hocked, less than 5 indicate the animals towards being straight (post-legged).

Descriptive Traits

Stature	Evaluation of bulls for maturity pattern and frame size. A stature score of 25 is average. This score may be influenced by age of dam, nutrition etc. Scores greater than 25 indicate larger frame, later maturing cattle.
Capacity	Evaluation combines depth of rib, spring of rib and width of chest floor. Scores greater than 25 indicate a bull with larger capacity.
Body Length	Evaluation of body length from point of shoulder to pin bone. Scores greater than 25 indicate longer body length.
Muscle Score	Is the muscularity of the bull devoid of subcutaneous fat. Higher scores indicate animals with higher yield attributes. Scores 25 = C muscle 30 = C+ 35 = B40 = B 45 = B+
Doability	The ability of a bull to deposit fat in fat depots, relative to their peers under a common management regime.

STATURE

Evaluation of an animals frame size, based on visual assessment of the animals hip height.

Score	0	5	10	15	20	25	30	35	40	45	50
Frame score equiv.				3	4	5	6	7	8		

CAPACITY

Evaluation of an animal by visual assessment combining depth of fore rib along with spring of rib and width of chest floor as well as depth of flank.

Score	0	5	10	15	20	25	30	35	40	45	50
-------	---	---	----	----	----	----	----	----	----	----	----

The greater the score, the greater an animals capacity.

BODY LENGTH

Evaluation by visual assessment of an animals length from withers to pins.

Score	0	5	10	15	20	25	30	35	40	45	50
-------	---	---	----	----	----	----	----	----	----	----	----

The greater the score, the greater the body length.

FRONT FEET

	Scoring Range	Description
Front Feet Claw Set	1 - 9	1 - open divergent; 5 - good; 9 - extreme scissor claw
Rear Feet Claw Set	1 - 9	1 - open divergent; 5 - good; 9 - extreme scissor claw

Reference: Shape (primarily curl) and evenness of the claw set.

BACK FEET

Reference: Angle measured at the front of the hock.

LEG ANGLE

Front Feet Angle	1 - 9	1 - steep (stubbed toe); 5 - good; 9 - shallow heel
Rear Feet Angle	1 - 9	1 - steep (stubbed toe); 5 - good; 9 - shallow heel

Reference: Strength of pastern, depth of heel and length of foot.

PASTERN ANGLE

MUSCLING

Evaluation by visual assessment of an animals combined width of rump and hindquarter, with secondary consideration given to forearm muscling.

Score	0	5	10	15	20	25	30	35	40	45	50
Equivalent Muscle			D	D+	C-	C	C+	B-	B	B+	

SHEATH

Evaluating the tightness of the sheath of the bull.

Score	1	2	3	4	5

Structural problems and temperament in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and overall industry productivity.

Dick Whale assesses our sale cattle at least twice in their life before sale day. Having our cattle independently assessed assists us to make unbiased decisions around culling for structure and temperament. Dick will be available on sale day to assist potential purchasers in their selection decisions, connecting individual breeding objectives with the most suitable catalogued animal(s) for that job. Please introduce yourself to Dick and utilise this complimentary service that we hope will assist you on sale day.

Dick's Pick – Dick's top 3 bulls and 3 purebred heifers, based on his independent assessment, have been identified in this sale catalogue. Keep an eye out for this icon to see Dick's Picks!

BREAKING DOWN BREEDPLAN

Estimated Breeding Values (EBVs) published in this catalogue are from the February 2022 GROUP BREEDPLAN run. Below is a description for each EBV and how to apply the information practically:

EBV FOR BIRTH WEIGHT (BWT)

Birth weight is a major factor in calving difficulty. Use EBVs to select against birth weight if dystocia is a problem. The lower the EBV the lighter the calves are expected to be.

EBVS FOR 200-DAY GROWTH AND MILK

Vealer producers should place emphasis on the 200-day growth and milk genes. If the bull is to be used as a terminal sire, growth is most important. If a bull is to be used to breed replacement heifers, and superior milking and mothering ability is required, then consider the milk genes with the EBV for milk (kg). The estimate in kg milk is not the yield of milk of the dam, but the growth of the calf due to more milk and better mothering of the dam. At JAD Speckle Park, we submit two 200-day weights for improved accuracy of this EBV.

EBV FOR 400-DAY WEIGHT

400-day weight EBVs are a measure of the animal's ability to grow to 400-days-of age (can be measured from 301-500 days). It should be used by producers who wish to turn off yearling cattle. At JAD Speckle Park, we submit two 400-day weights for improved accuracy of this EBV.

EBV FOR 600-DAY WEIGHT

600-day EBVs are computed for growth to 600-days-of-age (can be measured at 501-900 days). It is the best prediction

of an animal's ability to grow onto maturity, hence it is important for the heavy steer producer.

CARCASE TRAITS

These traits are calculated from live scan data and are adjusted to a standard steer carcase weight of 300kg.

FAT DEPTH EBV (RIB AND RUMP)

Measured in millimetres at either 12/13 rib or P8 sites. As these EBVs increase, the progeny can be expected to fatten more easily but carcase yield may decline.

RETAIL BEEF YIELD (RBY%)

The percentage of retail cuts compared to total carcase weight. Related to EMA and Fat Depth and Weight EBVs.

INTRA MUSCULAR FAT (IMF%)

The percentage of fat to muscle in the eye muscle. Used as a more precise measure than Marbling Score.

EYE MUSCLE AREA (EMA)

EBVs are relative to the breed average EBV each trait. A larger EMA EBV (sq.cm.) means more muscling and generally higher carcase yield relative to carcase weight.

SUMMARY

Remember the profit rule in buying bulls on their EBVs. Use the EBVs closest to your production system. Buy the bulls with the best EBVs your budget can stretch to, after you have taken structural soundness into consideration. It is important to relate each bull's EBVs to the current breed average.

SPECKLE PARK GROUP BREEDPLAN

Speckle Park GROUP BREEDPLAN uses all the information on the individual from within the herd plus all performance information from relatives in other GROUP BREEDPLAN herds. The EBVs in all herds relate to a common base. This increases the accuracy of the data, as well as allowing comparison of the genetic merit of the animals from different herds (across herd) within the group.

Each reported trait shows an EBV and its Accuracy level.

The EBV (Estimated Breeding Value) provides the best current estimate of the bull's true genetic merit for that trait, relative to the overall base for the Speckle Park breed. It indicates how his progeny should perform relative to those of other bulls in the breed.

The Accuracy indicates how well an EBV predicts the true genetic worth of an animal. The Accuracy of an EBV will be

higher for traits with a higher heritability and will increase as more performance information on an animal and its relatives becomes available. The Accuracy of an EBV is reported as a percentage. EBVs with high accuracy will change less than EBVs of low Accuracy when more performance records are analysed.

The following guide may be useful for interpreting Accuracy:

- ▶ **Less than 50% Accuracy** - the EBVs are preliminary. EBVs in this range will have been calculated based on very little information. These EBVs could change substantially as more direct performance information becomes available on the animal
- ▶ **50-74% Accuracy** - the EBVs are of medium Accuracy. EBVs in this range will usually have been calculated based on the animal's own performance and some limited pedigree information
- ▶ **75-90% Accuracy** - the EBVs are of medium-high Accuracy. EBVs in this range will usually have been calculated based on the animal's own performance coupled with the performance for a small number of the animal's progeny.
- ▶ **More than 90% Accuracy** - the EBVs are a high Accuracy estimate of the animal's true breeding value. It is unlikely that EBVs will change considerably with addition of more progeny data.

Strong futures begin with healthy minds.

We're here to sell livestock. To feed passions, make memories, and create futures. Let's take a moment to acknowledge that none of that is possible without strong mental health.

Depression. Suicide. Pain. Loss. Bewilderment. Hopelessness.

Poor mental health affects more of us in the grandstands today than we can imagine. Its impact on society is monumental and it is claiming some of society's best. It took my Mum when I was 17 and has impacted me hugely. The Black Dog Institute is a fantastic initiative that is dedicated to understanding, preventing and treating mental illness. I have selected my favourite bull in this sale catalogue – chosen for no particular reason other than him being my favourite – and we will donate 10% of the auction sale price of this bull to the Black Dog Institute. Please, don't suffer in silence.

This year's selection is **Lot 4: JAD Ritualistic R83 (JAD R83).**

Getting to the Sale

Sale Location:
"Greenvale"
911 Loombah Road
YEOVAL NSW

Visit jadspecklepark.com.au/contact to download a map and directions. Or, type "JAD Speckle Park" as your destination in Google Maps.

Transport

The sale location is approximately 70-75 minutes drive from the Dubbo, Parkes or Orange airports. Due to the uncertainty around flights during this COVID-19 pandemic, we recommend you carry out your own research into current flight arrangements to these destinations.

Accommodation

There are a number of Motels, Hotels and Caravan Parks in Wellington, Molong, and Yeoval. Please book in advance to ensure you secure your accommodation, and feel free to reach out to Amy at (0427) 464 333 or jad@jadspecklepark.com.au for assistance. Alternatively, you are welcome to bring your caravan/campervan/tent and camp at our property for the night after our sale.

Goonoo Homestead

3258 Renshaw McGirr Way, Yeoval
Phone: (02) 6846 3549
www.goonoohomestead.com.au

► Mention "JAD Speckle Park Sale" when booking for a special discount

Royal Hotel Yeoval

13 Obley Road, Yeoval
Phone: (02) 6846 4003

Bridge Motel, Wellington

AuctionsPlus

How to Register and Bid on AuctionsPlus

1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2 Select “**Sign Up**” in the top right hand corner.

3 Fill out your name, mobile number, email address and create a password.

4 Go to your emails and confirm the account.

5 Return to AuctionsPlus and log in.

6 Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7 Fill in buyer details and once completed go back to Dashboard.

8 Complete buyer induction module (approx. 30 minutes).

9 AuctionsPlus will email you to let you know that your account has been approved.

10 Log in on sale day and connect to auction.

11 Bid using the two-step process – unlock the bid button and bid at that price.

12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

MAU L260

Maungahina Legacy

Sire of Lots: 3, 4, 6, 7, 11, 14, 15, 20, 21, 22, 45, 46, 47, 54, 55, 70.

We believe Legacy to be one of the most influential modern sires in the breed. Semen sold for a world record \$5150/straw at Maungahina in 2020. His progeny are simply exceptional. Stand-outs!

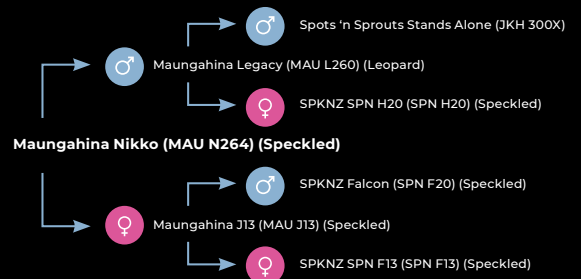

MAU N264

Maungahina Nikko

Sire of Lots: 5, 17, 49, 62, 63, 81, 83, 86.

We co-purchased Nikko in 2019, with his first progeny catalogued this year. We have gone on to use him extensively, as you will see in coming years. Nikko is one of the best-moving Speckle Park bulls we have seen.

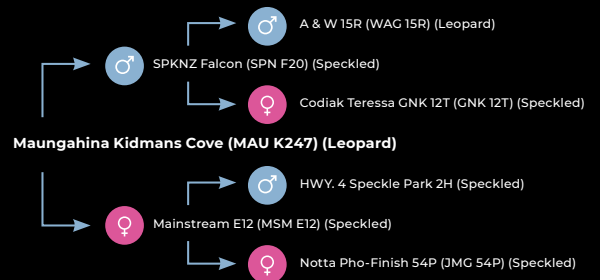

MAU K247

Maungahina Kidmans Cove

Sire of Lots: 37, 51, 73.

Kidmans Cove is structurally impeccable and breeds great feet/legs, testicle and docility on to his progeny. Cove has the highest IMF EBV of any AI Sire in the SPI Register.

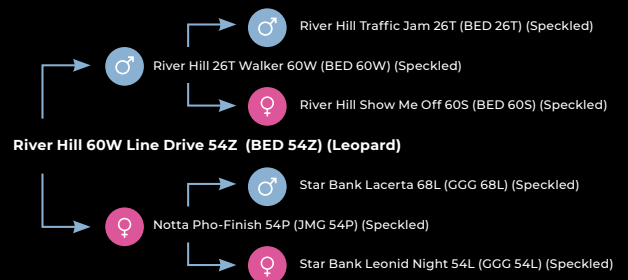

BED 54Z

River Hill 60W Line Drive 54Z

Sire of Lot: 18, 19.

Line Drive had the biggest impact on our 2017-drop, siring the top-priced bull and female at our 2019 sale. He is a high growth, high carcase EBV sire. His calves are born easily and grow like weeds, quiet, and sound.

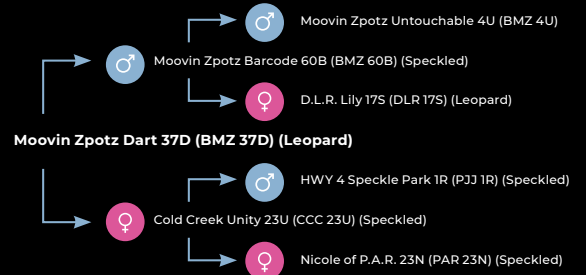

BMZ 37D

Moovin Zpotz Dart 37D

Sire of Lots: 24, 32, 33, 34, 52, 56, 60, 61, 66.

We saw Dart during our 2018 trip to Canada, admiring his depth, softness, and early maturity pattern. He offers an outcross pedigree to Australia, and his sons are suitable over heifers.

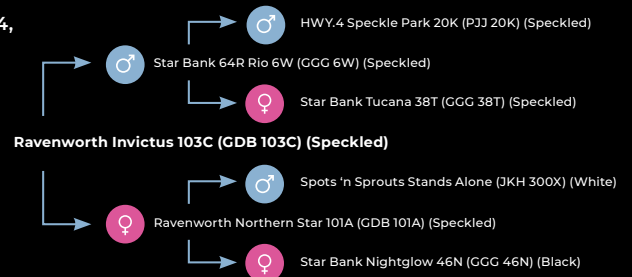

GDB 103C

Ravenworth Invictus 103C

Sire of Lot: 12, 13, 30, 40, 44, 64, 72, 74, 75.

We have seen Invictus twice now and have been impressed with his progeny here. He is a low birthweight sire, and his progeny are all class - early maturing with depth of body and great angularity.

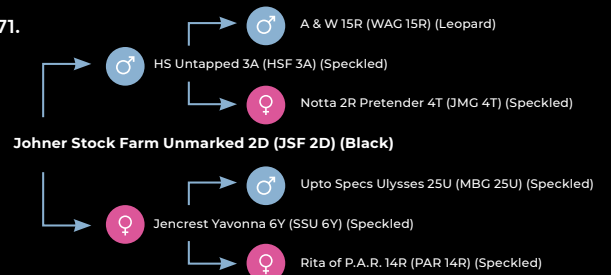

JSF 2D

JSF Unmarked 2D

Sire of Lots: 23, 57, 58, 59, 69, 71.

JSF 2D has produced two of the three "Dick's Pick" females in this catalogue. He is also the sire of our exciting new sire, JAD Quistacat Q48. Unmarked's progeny are docile, with depth of heart and accelerated early growth.

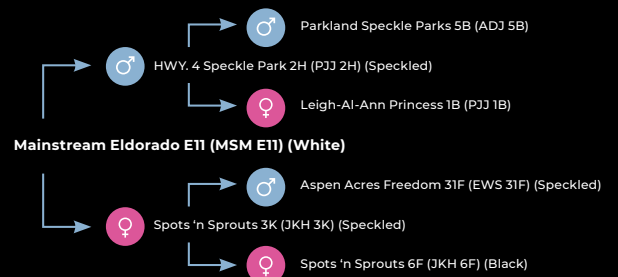

MSM E11

Mainstream Eldorado E11

Sire of Lots: 2, 8, 9, 25, 36,

A highly-renowned New Zealand sire, Eldorado, has sired one of the most successful ET matings from our 2020-drop. He breeds great females, and the crop of bulls in our sale, out of a Stands Alone female, are some of the very best.

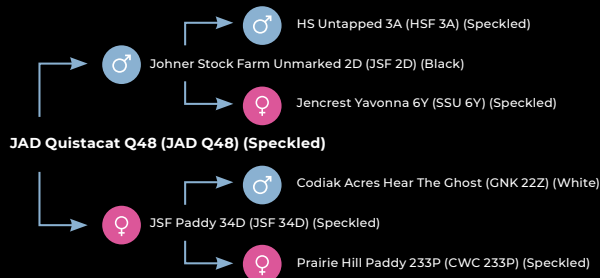

JAD Q48

Pictured in his working clothes.

JAD Quistacat Q48

This exciting young sire has so much to offer the breed. He is so free-moving, has great feet, and is a well-muscled, easy-doing bull. He has the highest Scrotal Size EBV of any 2019-drop in the SPI Herdbook.

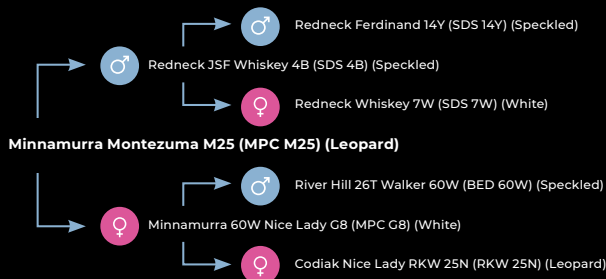

MPC M25

Minnamurra Montezuma M25

Montezuma has become a household name in Speckle Park, combining calving ease and lower birthweights with plenty of growth, scrotal, muscle and fats. Extra length and softness in his progeny.

MAU M271

Maungahina Maximus

A sire much like Montezuma in type, Maungahina Maximus couples short gestation and low birthweight with extra length and fats. We are excited to be using this sire in our program.

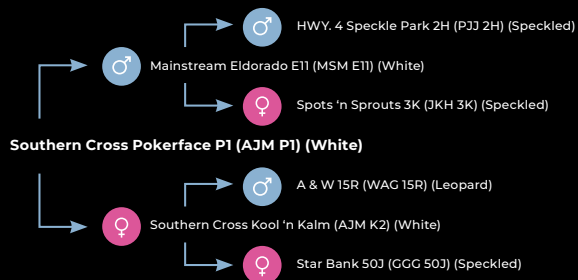

AJM P1

Southern Cross Pokerface P1

We purchased Pokerface as the top-priced bull of the 2020 Southern Success Speckle Park Sale. This sire stands on exceptional feet, has a docile disposition, and is a very fertile worker. He is impressing us more and more.

Sire: Gin Gin Manitoba.

Raindance R8 is a sound-structured and well-balanced bull to lead off our 2022 sale catalogue. He offers versatility in uses, and is one of only three Gin Gin Manitoba sons in the catalogue.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
27	39	31	6	5	6	6	39	31	5

Raindance R8 is one of two Autumn 2020-drop bulls in the catalogue. He is a larger-framed bull with fluent movement, and a little added bone.

His sire, Gin Gin Manitoba, came to JAD from Western Australia in late-2017, and is one of the best-footed Speckle Park bulls we have laid eyes on.

Like his sire, Raindance R8 is very sound-footed with good scrotal. Being white, myostatin free, homo polled and homo black, this bull will colour-mark his progeny and can be used widely in any program.

JAD Raindance R8 (JAD R8) (White)

Risque Business R106 is bred from a very successful flush, with four bulls catalogued in the sale and the only heifer retained. This bull is one of Justin's favourites - one that's hard to let go. Even as we write this, he is still bucking and squealing about it!

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
25	40	29	6	5	5	6	41	33	5

We sold his dam, JAD 300X Miss Jennie P10, at our 2020 JAD sale. We said at the time that we sell some of our best, and the proof is in this catalogue. We flushed some of the females offered in that sale as heifers, prior to sale, and they have gone on to produce some of the best cattle in this sale catalogue. As a direct daughter of the great Spots 'n Sprouts Stands Alone, it is little surprise that JAD P10 has coupled up so well with renowned New Zealand sire, Mainstream Eldorado. Risque Business R106 is structurally very sound - as one of seven bulls in this catalogue to earn a seven out of eight by independent structural assessor, Dick Whale.

The first of 10 sons of New Zealand sire, Maungahina Legacy, Rare Cat R109, is something a little bit special. Structurally impeccable, with presence that has sire written all over him. One of three "Dick's Picks" on structure.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
24	42	28	6	5	6	6	42	34	5

Rare Cat R109 by name, and in reality - he is bred from a rather rare cow family to Australia, with his granddam, JSF Liza 43Z, earning praise from esteemed members of the Speckle Park fraternity upon inspection of the Johner Stock Farm herd in Canada. Just check out the data package on this bull - combined with excellent docility. Rare Cat R109 offers a fantastic package - softness with exceptional performance. He is very difficult to pull apart - he has all the length and bone, tonnes of muscle, with moderate birthweight and short gestation. His full ET-bred sister will be offered as lot 54.

One of the best-moving bulls in the entire draft, Ritualistic R83 oozes longevity, and is a bull that is sure to cover a lot of females with ease. This bull is another one for studs to take note of - he has a lot to offer the breed.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
22	42	28	6	5	6	6	43	33	5

Another outstanding son of Maungahina Legacy - hardly a surprise considering Legacy's record as a sire. Legacy holds the world record for both semen and embryos, with his semen selling for \$5150/straw in 2020, and Legacy-sired embryos to \$6500 each in 2021. His dam, JAD 52B Midnight Lady P23, is all class - soft, great feet and legs, super quiet, and a beautiful udder. JAD P23 and her full sister, JAD 52B Midnight Lady P27, have quickly asserted themselves as hugely influential donor dams in our herd. Ritualistic R83 scored an impressive seven out of eight for structure by Dick Whale - he is another bull that is difficult to pull apart.

Purchaser: _____ Price: \$ _____

Sire: Maungahina Nikko.

Dam: Waratah Amy P130.

Rollz Royce R23 is the first progeny of Maungahina Nikko to be offered for sale in Australia, and what a cracker to start with! A favourite from birth, he is in the top 1% of the breed for Scrotal Size. He is also a trait leader for growth and muscle.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
29	39	32	6	6	5	6	39	33	4

Rollz Royce R23 has the equal-second highest Scrotal Size EBV of all 2020-drop animals in the SPI Herdbook, together with our lot 11 bull. We purchased Maungahina Nikko (MAU N264) in a partnership in 2019, and he is breeding very well here at JAD - like his sire, Maungahina Legacy. Rollz Royce R23 is a larger-framed bull, very smooth through the shoulder, docile, and he is one of the longest-bodied bulls in the catalogue. We purchased his dam, Waratah Amy P130 as a heifer, along with her full sister, Waratah Amy P127, who also has a son catalogued. Rollz Royce R23 has a full ET-bred brother at lot 17, and full sisters at lots 49, 62 and 63.

For the data enthusiasts reading this catalogue, this bull ranks at the very top for performance, fertility, and carcase/muscle EBVs. A Spots 'n Sprouts Stands Alone grandson, this bull will impress on sale day.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
27	42	31	6	5	6	6	42	32	4

Renaissance R39 is another Maungahina Legacy son, this time out of one of our favourite 2017-drop donors in JAD 3A Yasemin N44. This was a great joining, with two outstanding females being retained.

Renaissance R39 is a larger-framed bull with tremendous capacity - if you're looking for performance in your herd, this bull is right at the top of the draft. He is very quiet, and a very fluent-moving bull. His dam, JAD N44, is breeding really well to a number of different sires, and we look forward to many more progeny out of this dam in the coming years.

River Phoenix R37 is a larger-framed, smoother-muscled Maungahina Legacy son, with very fluent movement. He is a bull that will cover a lot of ground.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
28	38	31	6	6	6	6	38	33	4

The dam of this bull, JAD 3A Spots a Roarin P53, was flushed to Maungahina Legacy prior to being sold at our 2020 sale, with three full sisters to River Phoenix R37 retained in the JAD herd. His maternal granddam, Ponderosa Spots A Roarin 19Y, features in the pedigrees of a number of top females in our herd. She also has a significant number of direct progeny and granddaughters working in the Johner Stock Farm (JSF) herd in Canada. The mating of JAD P53 with Maungahina Legacy has consistently bred larger-framed, well-structured progeny.

Rain Dancer R101 is the second of four ET-bred brothers from this mating, and all are excellent for structure, super quiet, and free-moving. Their dam, JAD 300X Miss Jennie P10, was one of Justin's favourites from our 2018 drop.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	41	27	6	5	6	6	41	32	5

Rain Dancer R101 offers versatility in his application. He and his three full brothers in the catalogue are bred in the purple, being by the widely-acclaimed New Zealand sire, Mainstream Eldorado, and out of an excellent JAD-bred daughter of the great Spots 'n Sprouts Stands Alone.

Rain Dancer R101 has full brothers at lots 2, 9, and 25, and we have retained the only female of this very successful ET flush. Rain Dancer R101 has an excellent set of carcass EBVs, in the top 25% for all of these traits. He is one of the more balanced bulls in the draft.

JAD Rain Dancer R101 (JAD R101) (White)

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Risque R86, like his full brothers at lots 2, 8, and 25, offers the ultimate in versatility of uses: he is white, myostatin free, homo polled, homo black, and below breed average for the Birthweight EBV.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
22	39	26	6	5	5	6	40	32	5

Risque R86 is a son of highly-successful New Zealand sire, Mainstream Eldorado (MSM E11), who is breeding true-to-type, with constitution, muscle and thickness. Eldorado had an IMF of 6.5%, and is passing this trait onto his progeny.

Risque R86 is the more moderate of the four JAD P10/ Eldorado brothers, yet maintains top 30% for 400-day growth. We would comment that his recipient dam did a poor job on him as a calf.

This bull really excites us! By our resident sire, Minnamurra Montezuma M25, and out of one of our favourite donor dams, we have had some trouble working out whether to even offer him for sale, or keep him for use in the JAD stud.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	42	27	6	5	6	6	42	33	5

Raptego R88 is a heifer's first calf, out of JAD 3A Miss Sage P24 (JAD P24), who is the dam of our sensational ET-bred star heifer lots 45, 46, and 47. They are impeccably-structured, and so too is Raptego R88. Dick Whale scored him a seven out of eight for structure, and selected him as one of his three favourite bulls in the catalogue. If we didn't have so many Montezuma progeny coming through, we'd have retained this bull for sure! It's a combination that is bred to work. Raptego R88 is such a soft, easy-doing bull, with a smooth skin type.

Check out the spread of trait-leading EBVs on this eye-catching bull! Rainstorm R40 is an AI-bred son of our JAD 11A Wilma N26, who has taken to first-round AI in all three years of her breeding life to date. Now that's fertility on show!

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
22	39	26	7	6	6	6	40	32	5

Rainstorm R40 is a full brother to the lot 10 bull at our 2021 sale, JAD Questify Q29. It was such a successful joining, to Maungahina Legacy, that we went that same way with JAD N26 again to produce her 2020-drop calf.

Rainstorm R40 has a very similar maturity pattern to the lot 14 bull. He is a short gestation, early-maturing, and high-yielding bull. He goes back to Johner Stock Farm Trade Secret, who is known in the breed as a low birthweight (-0.9, top 5%), calving ease specialist.

Risk Taker R63 is a bombproof quiet son of our co-owned New Zealand sire, Maungahina Nikko. He is a bull from a hugely successful flush - check out his lot 5 brother, three full sisters, and embryos of this mating offered as lot 86.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	40	27	7	6	6	6	40	34	4

Risk Taker R63 is the second and final Maungahina Nikko son in the 2022 JAD Sale. We purchased Nikko in a syndicate in 2019, and now with two drops of Nikko progeny on the ground, we have only been spurred on to use him more heavily going forward.

Risk Taker R63 is a slick-coated, soft, easy-doing bull. He is a smooth-musled bull, and sits in the top 1% of the breed for Scrotal Size.

JAD Risk Taker R63 (JAD R63) (Speckled)

The first of two full ET brothers, from the heart of the River Hill Farm herd in Canada. Rawtekk R99's dam is a full sister to well-known Canadian sire, River Hill 26T Walker 60W.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	40	27	6	5	6	6	41	35	4

Rawtekk R99 is another of seven bulls in the catalogue to score a seven out of eight for structure, by Dick Whale. He is a high-yielding, moderate, thick, soft-doing bull, with a very sound temperament. He features in the top 30% of the breed for 400-day and 600-day growth.

Rawtekk R99 is sired by River Hill 60W Line Drive 54Z, who produced the top-priced bull at our inaugural JAD sale in 2019, JAD Napoleon N31.

Rawtekk R99's full ET-bred brother is offered next, at lot 19.

Ristretto R31 is the first progeny in the catalogue by well-known black Canadian sire, Johner Stock Farm Unmarked 2D. Ristretto R31 is a true carcass bull, featuring in the top 10% of the breed for Eye Muscle Area (EMA), Rib Fat and Rump Fat.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
20	42	24	7	6	6	6	42	33	4

Ristretto R31 is a very quiet, early-maturing bull with plenty of muscle while maintaining softness. His dam, JAD 61Y Zahrah N19, is one of the best-uddered females of our 2017-drop.

Ristretto R31's full ET sisters, at lots 57 and 59, have both earned positive praise by Dick Whale for their structure, with both named as two of Dick's three favourites from the purebred female offering. There is a third female of this same mating on offer at lot 58.

Rock Star R134 is one of the youngest bulls in the catalogue and is a low birthweight option with a top 15% Retail Beef Yield (RBY) EBV. He is the first bull in the catalogue that is sired by new Canadian sire, Moovin Zpotz Dart 37D.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
22	40	26	7	6	7	7	41	32	4

Rock Star R134's pedigree will present to many as distinct outcross genetics. When we inspected Dart on our 2018 trip to Canada, we appreciated him for his outstanding feet and legs. He is bred from a dam that has been praised as one of the best-structured Speckle Park cows seen. Dart has the older-style, powerful Speckle Park head and front end. Rock Star R134's dam, Yasemin of Uneeda 260Y, is a power cow while maintaining femininity with a beautiful udder. Her first calf at Johner Stock Farm (JSF) in Canada was Double S JSF Rawhide 260D, who is now owned exclusively by Minnamurra Speckle Parks.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Reinging R110 is a very, very good bull. He moves like a cat, with extra length, a beautiful hooded kind eye, and great depth of heel. Yet another consistently sound ET sibling from our JAD P10/Eldorado flush.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	41	27	6	5	6	6	41	33	5

With an Eye Muscle Area (EMA) EBV of +2.5, Reigning R110 has the second-highest EBV in the breed for 2020-drops, for this all-important carcass trait. This bull has loads of meat where it's worth the most.

When you see a pedigree that features both HWY. 4 Speckle Park 2H and Spots 'n Sprouts Stands Alone only two generations back, it is not difficult to see why this flush has worked as well as it has. Reigning R110's full brothers in the sale are at lots 2, 8, and 9.

Rapt in Black R89 is an all-Canadian ET-bred bull, by Star Bank Lacerta 68L and from Pura Vida Yorbalinda 25Y. He has full brothers as lots 27 and 28.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
27	39	31	7	5	6	6	38	31	5

Rapt in Black R89 is the softer of the three brothers, while still featuring in the top 10% of the breed for Retail Beef Yield (RBY) and to 15% Eye Muscle Area (EMA). He is a bull that would particularly suit crossbreeding over Bos Indicus-style cows - he will add a lot of thickness to his progeny. All this while maintaining a short gestation and top 5% Birthweight EBV. His dam, Pura Vida Yorbalinda 25Y has been a popular donor in the River Hill program. She has produced and has been the granddam of many high sellers and high producing females and bulls. A moderate female with an excellent udder and foot structure.

Here is an all-Canadian embryo calf, with her dam residing at Red Maple Speckle Park in Ontario, Canada. The paternal granddam of this bull is the dam of Minnamurra Speckle Parks' highly-acclaimed sire, Redneck JSF Whiskey 4B.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
26	41	30	6	5	4	5	41	32	5

Rivalry R132 is bred from an impressive larger-framed power cow, in Jencrest Young Lady 3Y. This donor dam is one we have had our eye on for some years. We purchased the embryos that produced this bull, having inspected the sire, JSF Wall Street 36E, on multiple trips to Canada. Wall Street is all bull - thick, deep, soft. He has a beautiful disposition and has been used successfully over heifers. He was named Junior Champion Bull at Canadian Western Agribition in 2018, among other showing highlights. Rivalry R132 is another larger-framed calving ease bull, featuring in the top 25% of the breed for Rib, Rump and IMF.

TRAITS ANALYSED: BWT, 400WT(x2), SS, FAT, EMA, IMF

Reckless R125 is a larger-framed, deep-sided son of Canadian sire, Ravenworth Invictus 103C. He is out of one of our favourite 2017-drop donor dams, JAD 61Y Ultra N63.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
27	40	32	7	6	6	6	38	32	4

Reckless R125 is in the top 25% of the breed for birthweight, with very good maternal attributes on both sides of his pedigree. Reckless R125 is a leptin TT (see explanation on pages 7 and 8). Leptin TTs have an overall increased rate of fat accumulation compared to leptin CCs. For leptin TTs, this mainly results in increased weaning weight, increased cow productive life due to increased body score, increased milk production, increased 12th rib backfat, and impacts on yield grade and marbling.

You have to note this bull's younger age to appreciate his growth. He hasn't filled out yet! Rondalla R136 is a large-framed son of our resident sire, Minnamurra Montezuma M25.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
28	39	33	6	5	6	6	39	30	4

Rondalla R136 is a very interesting heifer's first calf. He is bred from one of two 2018-drop females that we purchased as our pick heifers from Waratah Speckle Park. Rondalla R136 is a big, free-striding, good-footed, extremely long young bull - if you want to add frame to your cattle and colour-mark the progeny, then this bull is worth a look.

Rondalla R136 is a myostatin-carrying leptin TT - an interesting combo, especially when combined with top 10% Rib and Rump Fat EBVs.

This is a bull that would be ideal for the dairy industry - short gestation, low birthweight, white, genetically “clean”, huge scrotal, and positive fats. Oh, and he’s also a leptin TT, and exceptionally quiet. Three full sisters feature later in the sale.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	40	26	6	5	5	6	40	32	3.5

Reenactment R29 is the result of another very successful flush of one of our 2020 JAD Sale heifers, with JAD 52B Flora P3 being one of Justin’s favourites of that year’s sale, selling to Toebelle Speckle Park. Reenactment R29 is sired by a relatively new Canadian sire to Australia, Moovin Zpotz Dart 37D. When we inspected Dart on our 2018 trip to Canada, we appreciated him for his outstanding feet and legs. He is bred from a dam that has been praised as one of the best-structured Speckle Park cows seen. Dart has the older-style, powerful Speckle Park head and front end.

Redemption R14 is a genuine calving ease bull, with great maternal attributes. His sire's full sister, JAD 54Z Belinda N54, and his dam, JAD 61Y Ultra N63, are two of the best-uddered females from our 2017 drop.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	40	26	7	6	6	6	41	34	4

Redemption R14 is by the top-priced bull of our inaugural sale in 2019, JAD Napoleon N31. We have been so pleased with Napoleon N31's progeny that we approached his owners last Autumn to buy him back. Back under our ownership, Napoleon N31 was sent to Total Livestock Genetics (TLG) in Victoria where we collected 1000 units of very good quality sexed female semen from him. Napoleon N31 is an exceptionally fertile bull, and this son, out of one of our top donors, will be no different. Redemption R14 is loaded with maternal pedigree.

Rivet R133 is ET-bred from Jackungah Speckle Park's matriarch, Koda K01, who has been the Nelson family stud's most influential cow. Rivet R133 is in the top 25% of the breed for both Rib and Rump.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	40	26	7	6	6	6	40	33	4

Rivet R133 is sired by Mainstream Eldorado, who needs no introduction to most in the breed. Eldorado has bred very well for us. A Koda K01/Eldorado mating produced the Reserve Junior Champion Bull at the 2018 Sydney Royal Show for Jackungah Speckle Park, with this bull later being purchased by Minnamurra Speckle Parks. A Koda K01 daughter, with heifer calf at side, sold for \$40,000 at the Inaugural Blueprint Opportunity Speckle Park Sale in May 2021. Another Koda K01 daughter topped the heifers at the same multi-vendor sale at \$38,000, after being named Junior Champion Heifer at the 2021 Sydney Royal Show.

Rigidity R119 is a well-muscled son of New Zealand sire, Maungahina Kidmans Cove - the only Cove son in this year's catalogue. His dam bred the equal top-priced female of the 2020 JAD Sale.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	40	26	7	6	7	6	40	33	3.5

Rigidity R119 is in the top 1% of the breed for IMF (+1.3), measuring 6.7% for IMF at just 13 months old. On that same day, he measured 12mm P8 Fat, 8mm Rib Fat, 86 sq cm Eye Muscle Area (EMA), and had a scrotal circumference of 37cm. We have used Rigidity R119's sire, Maungahina Kidmans Cove, extensively at JAD. Cove sired the \$34,000 equal top-priced bull of the 2021 JAD Sale, JAD Quaintly Q66. Cove is known for producing docile cattle with high fats, and is a sire that has had a hugely positive influence on our herd, the breed, and will be used into the future here at JAD.

TRAITS ANALYSED: BWT, 200WT

Silverado S1 is the final purebred bull to be offered at the 2022 JAD Speckle Park Bull + Female Sale, and he is rising 14 months old. He is a well-made son of Gin Gin Manitoba, out of a big-milking Codiak Putnam 61Y daughter.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability	Sheath
23	40	26	6	5	6	6	40	33	5

Silverado S1 should meet the attention of Queensland buyers who like to buy their southern bulls at a young age and take them north to acclimatise before heading out to work. He is ideal for use over heifers, and being white, myostatin free, homo polled and homo black, he will colour-mark all progeny and offers versatility. He produced a scrotal measurement of 32.5cm with a morphology of 91% when tested by Holbrook Breeders at right on 12 months of age. The recommended minimum scrotal circumference for yearlings is 30cm. Silverado S1 may be younger but should not be overlooked as the final purebred bull for JAD 2022!

Price: \$

We are excited to continue the development of our Commercial JAD Speckle Park Family. The proof is on display!

This family is being developed alongside our registered purebred family, and will offer commercial producers an option for their breeding program to select unregistered commercial Speckle Park bulls that are performance-recorded, DNA tested, structurally assessed, and backed by the JAD Guarantee.

This family's core foundation breeders have been meticulously selected from over 400 F1 Speckle Park/Te Mania Angus females, and we benchmark this herd directly alongside our registered cattle as they progress towards full-blood (but unregistrable) status. This line has been performance recorded under the "JSP" Herd ID through International Genetic Solutions' (IGS) multi-breed register, operated by the American Simmental Association. Our data will be published in the Supplementary Handbook prior to sale day.

Ours is the first Speckle Park data to be entered into the IGS system, so in these early years, the data is relevant for **within-herd comparison only**. As you would be able to appreciate, the newness of Speckle Park in the IGS multi-breed system means we will need to get a few more year-drops in the system before we can start to expect reliable data for across-herd comparison. We have submitted data to the IGS system for all year drops born since 2014 - stud and commercial animals.

DNA profiles will be supplied to IGS for each animal to assist in strengthening the quality of the data output. Our commercial family will be an exciting family for commercial beef producers to follow!

In BREEDPLAN, it is not possible to compare across breeds. We feel the IGS system provides an exciting opportunity for us to see how our animals stack up against other established, well-known breeds. We look forward to following the progress. Please note that these unregistered commercial bulls have been managed in the same contemporary group as their purebred registered counterparts earlier in this catalogue.

Note:

50:50 = 50% Speckle Park, 50% Angus (also known as: F1

75:25 = 75% Speckle Park, 25% Angus (AKA: F2)

87:12 = 87.5% Speckle Park, 12.5% Angus (AKA: F3)

The ins and outs of IGS

International Genetic Solutions (IGS) is the world's largest multi-breed beef cattle evaluation system. It combines more than 16 million animal records with over 400,000 new animals added annually.

One of the IGS traits measured, which we will introduce with enough data in the system, is Stayability (STAY). This Expected Progeny Difference (EPD) expresses the percentage of daughters remaining in the cowherd at six years old. We believe one of the biggest cost in any beef business is waste from lack of cow longevity.

Learn more about International Genetic Solutions (IGS) here: www.internationalgeneticsolutions.com

*“Quality is never an accident; it is always the result of intelligent effort”
- John Ruskin*

Mitchell helping to tag JAD R78 in September 2020.

-  Unique Genetics
-  Breed-Leading Sires
-  Unlimited Potential

When we started JAD Speckle Park, we wanted to start with the very best Speckle Park genetics we could source. We opted for what is ultimately the expensive route to achieve that goal, and have transferred well over 1500 embryos since 2016 through extensive embryo transfer (ET) programs. The result has been the development of a quality and well-measured foundation JAD cow herd to produce top quality commercially-focussed Speckle Park like those in the following pages. We present a selection of mainly ET-bred 2020-drop registered purebred heifers, from around the world and from right here at JAD.

They represent a broad selection of genetics from different matings. Some of the cow families you will find in the following pages are completely new to Australia, and this presents as a fantastic opportunity for you to source new outcross genetics for your stud. We have visited Canada and New Zealand and have built strong relationships with highly-respected breeders with whom we share a vision for the breed’s future. We are offering the first daughters of

our co-owned New Zealand sire, Maungahina Nikko (MAU N264), who is a son of highly-acclaimed sire, Maungahina Legacy (MAU L260). There are six Legacy daughters in these pages, and we know they will impress. We thank the McKenzie family of Maungahina Stud, NZ, for the opportunity to incorporate their outstanding sires into our herd. Some of the heifers in the following pages represent the top 10% of all heifers born from our 2020-drop – we are offering some of our very best.

These heifers are being offered pregnancy-tested-in-calf (PTIC). Each heifer has been complementary-mated through meticulous individual sire selections. We hope you enjoy learning about this special group of females.

24	38	27	7	6	6	6	38	36

JAD 103C Eileen R42 is herself AI-bred, out of a larger-framed white cow with a big hip, and super quiet temperament. Eileen R42 is a leptin TT (see explanation on pages 7 and 8). Leptin TTs have an overall increased rate of fat accumulation compared to leptin CCs. For leptin TTs, this mainly results in increased weaning weight, increased cow productive life due to increased body score, increased milk production, increased 12th rib backfat, and impacts on yield grade and marbling. This heifer is well-balanced, has great depth of heart and is a great female to kick off our 2022 purebred heifer offering.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), FAT, EMA, IMF

Yes, we may just have lost the plot! Not only is this female in the top 1% of the breed for several EBV traits, but Dick Whale also scored her an almighty eight out of eight for structure. You couldn't paint her any prettier! This is the first time we have offered a female "8 Grader" for sale.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
25	39	29	6	5	6	6	39	38

If you value consistent excellence, then the joining that produced this female is it. There were six heifers and no bulls born from this flush of JAD P24 to New Zealand super sire, Maungahina Legacy. Three of them were deemed "8 Graders" by Dick Whale. The next three females in this catalogue are all full sisters, and they're all special. Maungahina Legacy needs no introduction, and Miss Sage R51's dam is one of our very best. Her natural born bull calf from the 2020-drop is the lot 10 bull - himself a "7 Grader". When both sides of the pedigree are as strong as this one, it is little wonder the stars have aligned. Miss Sage R51 is one not to miss!

Purchaser: _____ Price: \$ _____

Sire: Maungahina Legacy.

JAD Miss Sage R105 is a beautiful heifer that oozes femininity. She is PTIC by AI to JAD Quistacat Q48, in what is a joining that we believe will really work well. This white heifer is myostatin free, homo polled and homo black, offering added versatility in future joinings.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
23	37	26	7	7	6	6	37	39

A full ET-bred sister to lots 45 and 47, Miss Sage R105 is a trait leader for growth, top 1% of the breed for Scrotal (through linkages), and top 5% of the breed for Eye Muscle Area (EMA) and Retail Beef Yield (RBY).

Miss Sage R105's maternal granddam is one of the best donor dams we have introduced to the JAD herd. JSF Miss Sage 19B has a big volume, loads of milk, and a great udder. We really liked this female when we saw her at Johner Stock Farm (JSF) in Canada in 2016. Aside from using JSF 19B directly in our herd here, we also own a 19B daughter in Canada, JSF Miss Sage 62F.

Purchaser:

Do you see all those “Top 1%” Rank Highlights above? This is the third and final heifer on offer from this incredibly successful JAD P24/Maungahina Legacy mating, and she’s a cracker. We cannot speak highly enough about the depth of this pedigree.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
28	37	31	6	5	5	6	37	37

Miss Sage R102 is the third of six Maungahina Legacy daughters to be offered in our 2022 JAD Sale. Legacy genetics are in short supply, and highly soughtafter - we only have six straws of his semen left ourselves! The market has responded to this exclusivity accordingly, paying a world record \$5150/straw for Legacy semen at the 2020 Maungahina sale, in New Zealand, and a world record \$6500/embryo for Legacy-sired embryos at Maungahina last year. Miss Sage R102 is a well-made female with a bright future.

Note: We have flushed Miss Sage R102 once, with four embryos transferred fresh.

Well here is an opportunity that many have been waiting for! Maungahina Nikko has caught the eye of many discerning cattlemen since we purchased him in a syndicate in 2019. Now you can add Nikko to your herd.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
24	39	27	7	7	6	7	39	34

Maungahina Nikko is by Maungahina Legacy and out of Maungahina J13, who is the daughter of another well-known sire from New Zealand, SPKNZ Falcon. Nikko sure is bred in the purple! We purchased Amy R69's dam, Waratah Amy P130, in 2019, and she has developed into a hard-working, hard-milking cow who produces big, heavy weaners. Amy R69 has full siblings in the sale as lots 5, 17, 62, 63, and embryos of this mating are offered later in catalogue as lot 86. There will be **no** Maungahina Nikko semen offered for sale by any of the syndicate members in 2022. **Note: We have flushed Amy R69 once, with seven embryos transferred fresh.**

Here is the first heifer in this year's sale that is the product of an imported Canadian embryo, in this case from River Hill Farm. If you are seeking a super docile female, Yorbalinda R77 is for you - she was always that weaner that would lick the front of our UTV. Very inquisitive!

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
26	37	30	6	5	6	6	37	38

Yorbalinda R77 is a direct daughter of one of the breed's most renowned older sires in 2009 Agribition Grand Champion Speckle Park Bull, River Hill Traffic Jam 26T.

Her dam, Pura Vida Yorbalinda 25Y, has been a popular donor in the River Hill program. She has produced and has been the granddam of many high sellers and high producing females and bulls. A moderate female with an excellent udder and foot structure.

Yorbalinda R77 has a full sister catalogued as lot 77.

Tori R3 is one of two older heifers in the draft, being a touch over two years old on sale day. She is confirmed pregnant to JAD Quistacat Q48, and set to calve in just 4.5 months time. Tori R3 is one of two heifers in the sale by the great Maungahina Kidmans Cove.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
27	37	30	7	7	6	6	38	37

Tori R3 is bred out of a Codiak Putnam GNK 61Y daughter, contributing to her top 5% EBV for Milk. Tori R3 is in the top 1% of the breed for Intra Muscular Fat (IMF), and can thank her sire for that, with Maungahina Kidmans Cove featuring the highest IMF EBV in the entire Speckle Park breed (+2.2).

JAD Quistacat Q48 is an ideal joining sire for this heifer. He is in the top 1% of the breed for Scrotal Size, has an unbelievable foot quality, and has one of the best hind leg sets - he oozes longevity.

Unique R2 is the second of two older heifers in the draft, being a touch over two years old on sale day. She is confirmed pregnant to JAD Quistacat Q48, and set to calve in just 4.5 months time. Unique R2 is out of the dam of the top-priced heifer at the 2021 JAD Sale.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
22	37	25	7	7	5	6	35	45

Unique R2 features something new in her pedigree, and something much more entrenched in Speckle Park dialogue. Her maternal granddam, Codiak Unique GNK 8R, is highly-regarded as one of the best donor dams from Canada. She features in many of the breed's big-name pedigrees.

Unique R2 is by a relatively new and outcross sire to Australia, in Moovin Zpotz Dart 37D. Dart has proven himself to be a low birthweight sire option, suitable for use over heifers.

Here is an all-Canadian embryo calf, with her dam residing at Elgin and Joan Craig's Red Maple Speckle Park in Ontario, Canada. The paternal granddam of this heifer is the dam of Minnamurra Speckle Parks' highly-acclaimed sire, Redneck JSF Whiskey 4B.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
27	38	31	7	5	4	4	37	38

Young Lady R108 is bred from an impressive larger-framed power cow, in Jencrest Young Lady 3Y. This donor dam is one we have had our eye on for some years. We purchased the embryos that produced this heifer, having inspected the sire, JSF Wall Street 36E, on multiple trips to Canada. Wall Street is all bull - thick, deep, soft. He has a beautiful disposition and has been used successfully over heifers. He was named Junior Champion Bull at Canadian Western Agribition in 2018, among other showing highlights.

Flora R67 is a moderate-framed, long-bodied, easy-keeping female with a real matron's head - like her dam. If fertility travels in families, she's got it in spades. Her AI pregnancy to Maungahina Maximus will complement her very well.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
22	37	27	7	6	6	6	37	40

Flora R67 is in the top 10-15% of the breed for all growth traits, top 5% for Scrotal Size (through linkages), top 25% for Carcase Weight, top 20% for Eye Muscle Area (EMA), and top 5% for Retail Beef Yield (RBY).

Midnight Lady R16 is the result of a flush of one of our best 2018-drop females. Indeed, the Midnight Lady family, out of Johner Stock Farm in Canada, has been one of the most successful in our herd. The dam of this heifer catches everyone's eye in the paddock.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
23	37	26	7	6	5	6	37	39

Midnight Lady R16 has full brothers in the catalogue as lots 33 and 34. She is a rare daughter of new Canadian sire to Australia, Moovin Zpotz Dart 37D, who has proven himself to be a low birthweight sire option. We have retained a full sister in our herd.

If you want to breed females with plenty of milk, here is a heifer worthy of attention. We produced four full sisters to the dam of this heifer in 2017, with one, JAD N23, having embryos by Maungahina Nikko in the sale as lot 83. Zahrah R17 is herself in the top 5% of the breed for milk.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
26	38	30	6	5	6	6	38	39

Zahrah R17 has a fantastic pedigree, and is PTIC by AI to an exciting larger-framed low birthweight sire out of New Zealand, Maungahina Maximus. Zahrah R17 caught the eye of Dick Whale as one of his three favourite purebred heifers in the catalogue. Like her granddam, Jencrest Yavonna 6Y, this heifer carries exceptional spring of rib, and overall volume - she is bound to be a very productive matron. Zahrah R17 is in the top 5% of the breed for Eye Muscle Area (EMA), and top 15% for Rib and Rump Fat EBVs. A heifer loaded with maternal pedigree!

Purchaser:

You're not seeing double, here is a full sister to the lot 57 heifer, and also PTIC by AI to New Zealand sire, Maungahina Maximus. She is the second of four JAD N19/ Unmarked sisters in the sale.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
23	37	26	7	6	6	6	37	41

Zahrah R24 is an exceptionally easy-keeping female, as indicated by her top 1% EBVs for Rib and Rump Fat, and top 10% for Intra Muscular Fat (IMF).

A lower birthweight heifer, with tremendous volume and an early maturity growth pattern. These JAD N19/ Unmarked heifers (at lots 57, 58, 59 and 71) epitomise what originally attracted us to the Speckle Park breed.

Zahrah R24 features a stacked pedigree full of big names in the breed, resulting in consistent herd-building progeny.

Another show-stopper of the JAD N19/Unmarked combination, backed by an impeccable structure, temperament, and trait-leading maternal EBVs. Zahrah R27 is truly one of the best heifers in the draft.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
25	39	29	6	5	6	6	39	42

Zahrah R27 caught the attention of Dick Whale for her structural integrity, marked as one of Dick's three favourite purebred heifers in the catalogue.

Another female of this mating that is a trait leader for milk and fats - consistent across all four sisters. Like the two sisters before her, Zahrah R27 has scanned pregnant by AI to New Zealand sire, Maungahina Maximus. All four sisters took to the AI, demonstrating the fertility of this mating. Their dam, JAD 61Y Zahrah N19, has been a very good flush cow for us, with some exciting progeny coming through next year.

Flora R32 has a pedigree of maternal strength. David Johner of Johner Stock Farm in Canada has commented about how well their Dart heifers are milking, giving us even greater confidence in the future of females like this one.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
22	37	26	7	6	4	4	36	43

Flora R32 is bred from the equal top-priced heifer of the 2020 JAD Sale. She has two sisters (lots 61 and 66) and a brother (lot 32) in the the sale, demonstrating the consistency of this flush. This family of cattle are short for gestation, low birthweight, and maternally focussed.

Flora R32 has been confirmed pregnant by AI to our new and exciting home-bred sire, JAD Quistacat Q48. Quistacat's first calves were born at JAD in Spring 2021 and they are really impressing us with their calving ease, conformation, eye appeal, and spring of rib.

Flora R12 is a trait leader for Rib and Rump EBVs. She is also short gestation and low birthweight, like her full sisters at lots 60 and 66. Flora R12 is a leptin TT, and presents with a relatively unique pedigree to Australia.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
25	37	28	7	6	5	6	37	38

Flora R12 is sired by new Canadian sire, Moovin Zpotz Dart 37D. When we inspected Dart on our 2018 trip to Canada, we appreciated him for his outstanding feet and legs. He is bred from a dam that has been praised as one of the best-structured Speckle Park cows seen. Dart has the older-style, powerful Speckle Park head and front end.

Take a look at the udder conformation on this young heifer. Like her sisters, she is bound to make an excellent breeding female.

One of Justin's favourites! Amy R55 is sired by exclusive new New Zealand sire, Maungahina Nikko. Nikko shares his dam, Maungahina J13, with our NZ\$35,000 sire purchase, Maungahina Promise. Both natural calves, demonstrating her prepotent sire-breeding ability.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
21	38	25	7	7	6	6	38	41

We purchased Amy R55's dam, Waratah Amy P130, in 2019, and she has developed into a hard-working, hard-milking cow who produces big, heavy weaners. Amy R55 has full siblings in the catalogue as lots 5, 17, 49 and 63, and embryos of this mating are offered later in catalogue as lot 86. There will be **no** Maungahina Nikko semen offered for sale by any of the syndicate members in 2022. Amy R55 is a moderate-framed, feminine female, with tremendous spring of rib, and an exceptionally docile disposition. She is in the top 1% of the breed (through linkages) for the all-important Scrotal Sire EBV. Pregnant to JAD Quistacat Q48.

Here we go again! Another outstanding heifer from the Waratah Amy P130/Maungahina Nikko mating. Amy R50 is another in the top 1% of the breed (through linkages) for Scrotal Size EBV, and also in the top 30% for birthweight. Pregnant by AI to Minnamurra Montezuma M25.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
22	38	25	6	6	6	6	38	42

Amy R50 is cut from the same cloth as her full sister in the previous lot. She is a very easy-keeping heifer, with plenty of yield. Her AI mating to Minnamurra Montezuma M25 will add a tad more frame and performance into the progeny. Excellent temperament is guaranteed from this mating - Waratah Amy P130's progeny are consistently very quiet, to a number of bulls, and sires don't come much quieter than Monty.

Amy R50 has full siblings in the catalogue as lots 5, 17, 49 and 62, and embryos of this mating are offered later in catalogue as lot 86.

We are only offering this heifer for sale as we are retaining and equally-impressive full sister to her. This female is set to impress upon inspection despite her colour. She is a larger-framed female - larger than her Breedplan data would indicate.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
23	37	27	7	7	6	6	37	40

Lightning Lady R114 is bred from the heart of the Canada's well-respected Ravenworth Cattle herd. We were privileged to be offered first access to embryos direct from the Ravenworth stud, with the first of the resultant calves offered at our 2021 sale - the first of which was the \$34,000 equal top-priced bull of the sale, JAD Qualified Q95.

Lightning Lady R114 is the only daughter in the sale out of the exceptional Ravenworth Lightning Lady 120C, with her full sister retained at JAD.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), FAT, EMA, IMF

The last of three JAD P3/Dart heifers in the catalogue, and another leptin TT. The Flora family has been hugely influential in the JAD cow herd to date. Flora R47 is possibly the heifer of this mating that most resembles her maternal granddam.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
24	36	28	6	5	6	6	38	36

Flora R47 is sired by new Canadian sire, Moovin Zpotz Dart 37D. When we inspected Dart on our 2018 trip to Canada, we appreciated him for his outstanding feet and legs. He is bred from a dam that has been praised as one of the best-structured Speckle Park cows seen. Dart has the older-style, powerful Speckle Park head and front end.

Flora R47 is in the top 1% of the breed for the Birthweight EBV, born at just 29kg liveweight. She has grown into a very productive heifer despite her birthweight.

Purchaser:

Here is an all-Canadian embryo calf, with her dam residing at Red Maple Speckle Park in Ontario, Canada. The paternal granddam of this bull is the dam of Minnamurra Speckle Parks' highly-acclaimed sire, Redneck JSF Whiskey 4B.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
26	36	29	7	7	6	6	35	43

Young Lady R113 is bred from an impressive larger-framed power cow, in Jencrest Young Lady 3Y. This donor dam is one we have had our eye on for some years. We purchased the embryos that produced this heifer, having inspected the sire, JSF Wall Street 36E, on multiple trips to Canada. Wall Street is all bull - thick, deep, soft. He has a beautiful disposition and has been used successfully over heifers. He was named Junior Champion Bull at Canadian Western Agribition in 2018, among other showing highlights. Young Lady R113 is a very productive female, cut from the same cloth as her dam.

We remember tagging Flora R100 at birth like it was yesterday - our very first purebred to click over the magic 100! This female has an excellent set of EBVs for growth, scrotal (through linkages), and those all-important carcase traits. A fancy Legacy daughter here as lot 70.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
22	40	27	7	6	4	4	40	39

Flora R100 presents as your very last opportunity in the catalogue to secure JAD-bred progeny of the great Maungahina Legacy. Legacy genetics are in short supply, and highly sought after - we only have six straws of his semen left ourselves! The market has responded to this exclusivity accordingly, bidding to a world record \$5150/straw for Legacy semen at the 2020 Maungahina sale, in New Zealand, and a world record \$6500/embryo for Legacy-sired embryos at Maungahina last year. Flora R100 is bred from a really successful cow family here. She is super docile and refined yet features good head strength and a wide muzzle. A full sister to lot 55.

Ultra R131 is the first of three full ET-bred sisters to be offered, with all three oozing femininity. This heifer has been confirmed pregnant to our exciting new sire, JAD Quistacat Q48.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
21	37	25	7	6	6	6	37	36

Ultra R131 is by Canadian sire, Ravenworth Invictus 103C, who has featured in all four JAD sale catalogues to date either as a sire or joining sire. Invictus breeds super feminine daughters with excellent udder attachment, and Ultra R131 is bred to be no exception.

Ultra R131 is an early-maturing, striking female, and with Codiak Putnam GNK 61Y in her pedigree together with Invictus, she really is bred to be a super dam. Her dam, JAD 61Y Ultra N63, is one of the best-structured, donor dams from our 2017-drop. She has added length, while maintaining femininity.

One of two daughters by New Zealand sire, Maungahina Kidmans Cove, in the catalogue, with the other at lot 51. Yasemin R97 features in the top 20% of the breed for Birthweight, top 30% for Milk, top 5% for Rib and Rump Fats, and she is in the top 1% of the breed for IMF.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
27	37	30	7	6	5	4	38	35

Yasemin R97 is bred out of the equal top-priced heifer of our 2020 JAD Sale, where JAD 25U Yasemin R58 sold for \$20,000 to repeat clients, Chesterfield Speckle Park. She has gone on to be a great female for the Victorian stud.

Yasemin R97 is a very, very quiet female whose photo in this catalogue really doesn't do her justice. She has some great names right across her pedigree. Yet another low birthweight female with trait-leading EBVs for milk and fats.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), FAT, EMA, IMF

Here is a fancy female that will turn heads on sale day. Ultra R123 is one of three full sisters in the catalogue, with the others at lots 72 and 75. She also has a maternal sister lotted as lot 67. Ultra R123 is a little more moderate than the first of these sisters in the catalogue.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
23	37	26	7	6	6	6	39	38

Ultra R123 features in the top 15% of the breed for Birthweight. If you are after an easy-keeping, smooth-made, feminine heifer to start off a cow family in your herd, then give Ultra R123 some consideration. She is a Leptin TT (see explanation on pages 7 and 8). Leptin TTs have an overall increased rate of fat accumulation compared to leptin CCs. For leptin TTs, this mainly results in increased weaning weight, increased cow productive life due to increased body score, increased milk production, increased 12th rib backfat, and impacts on yield grade and marbling. Ultra R123 oozes softness and class.

Purchaser:

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), FAT, EMA, IMF

A full sister to lots 72 and 74, here is your final opportunity in the catalogue to secure a daughter out of our popular donor dam, JAD 61Y Ultra N63. Another Leptin TT, and cut from the same cloth as her two ET-bred sisters. Note the younger age of these heifers.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
23	37	27	7	6	4	4	37	31

Ultra R118 is confirmed pregnant by AI to our resident sire, Minnamurra Montezuma M25. The dam of Ultra R118, JAD 61Y Ultra N63, has a cracking Spring 2021-drop heifer calf on her by Montezuma, so we expect this joining will also yield something special.

Minnamurra Montezuma M25 is something of a curvebender for growth in the Speckle Park breed - and with high accuracy EBVs of 80%-plus. He is in the top 30% of the breed for Birthweight and then backs up with a top 25% 400-day weight EBV, and top 15% for 600-day weight.

Spots A Roarin R116 is a sleeper in the pack - a heifer's first calf out of a female who we expect to contribute heavily in next year's JAD Sale catalogue. This heifer is slightly younger than her contemporaries, compromised early due to the flushing of her dam during lactation.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
22	34	28	7	6	6	6	35	36

Here is your final opportunity to secure a daughter by exciting New Zealand sire, Maungahina Nikko. Nikko is one of the best-moving bulls in the Speckle Park bulls that we have seen, together with this heifer's joining sire, JAD Quistacat Q48.

The females in our herd that descend from the Spots A Roarin cow family are consistently good-footed, have sound temperaments, are feminine-fronted, with impeccable udder attachment and teat shape. Spots A Roarin R116's dam ticks all of these boxes.

JAD N264 Spots A Roarin R116 (JAD R116) (Leopard)

Born at just 20kg, Yorbalinda R85 was always so tiny among her peers, but she has grown into a heifer that fits into her contemporary group with ease. She is the product of an imported Canadian embryo, sourced from River Hill Farm.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
25	36	28	7	7	4	4	37	36

Yorbalinda R85 is a direct daughter of one of the breed's most renowned older sires in 2009 Agribition Grand Champion Speckle Park Bull, River Hill Traffic Jam 26T.

Her dam, Pura Vida Yorbalinda 25Y, has been a popular donor in the River Hill program. She has produced and has been the granddam of many high sellers and high producing females and bulls. A moderate female with an excellent udder and foot structure.

Yorbalinda R85 has a full sister catalogued as lot 50.

Yorbalinda R84 is bred out of the same dam as the previous lot, but is this time sired by a different foundation sire in the breed, Star Bank Lacerta 68L. Her full brothers feature as lots 26, 27 and 28.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
27	35	31	7	6	5	6	35	37

Yorbalinda R84 is a long-bodied, upstanding heifer, and very quiet. She features in the top 15% of the breed for Birthweight and milk, and top 10% for Eye Muscle Area (EMA).

Her dam, Pura Vida Yorbalinda 25Y, has been a popular donor in the River Hill program. She has produced and has been the granddam of many high sellers and high producing females and bulls. A moderate female with an excellent udder and foot structure.

Here is an all-Canadian embryo calf, with her dam residing at Red Maple Speckle Park in Ontario, Canada. The paternal granddam of this bull is the dam of Minnamurra Speckle Parks' highly-acclaimed sire, Redneck JSF Whiskey 4B.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Leg Angle	Pastern Angle	Muscle	Doing Ability
23	37	26	6	5	6	6	37	38

Young Lady R117 is bred from an impressive larger-framed power cow, in Jencrest Young Lady 3Y. This donor dam is one we have had our eye on for some years. We purchased the embryos that produced this heifer, having inspected the sire, JSF Wall Street 36E, on multiple trips to Canada. Wall Street is all bull - thick, deep, soft. He has a beautiful disposition and has been used successfully over heifers. He was named Junior Champion Bull at Canadian Western Agribition in 2018, among other showing highlights. Young Lady R117 is a lovely feminine heifer, and has been confirmed pregnant by AI to JAD Quistacat Q48.

Purchaser:

Price: \$

tomorrow's POTENTIAL today

We have decided to share twice as many packages of JAD embryos than at our previous sales, with eight A-Grade embryo packages on offer and four (4) embryos per package. Included are some of the exciting purebred Speckle Park genetics we have been recently developing at JAD.

COMMERCIAL SPECKLE PARK HEIFERS

Approximately 40 quality Speckle Park-cross heifers are largely AI'd to sexed female semen from JAD Napoleon N31 (JAD N31), who was the \$24,000 top-priced bull at the inaugural JAD Speckle Park Bull + Female Sale in 2019. Heifers PTIC by AI will produce 90%-plus female progeny.

These heifers were AI'd in late-November, and backed up by white Speckle Park bulls, specially selected for use over heifers.

We will formally lot these heifers - in lots of 5 and 10 head - in the weeks leading up to sale day, with full lot details to be published in the Supplementary Handbook.

See the sale supplementary handbook for individual lot details.

AI Sire: JAD Napoleon N31.

Blue Spark Revolution.

Minnamurra Rocky R30.

Thank you very much for supporting our sale. *Buyers Fair*

PROGRESS IS NOT INEVITABLE. IT'S UP TO US TO CREATE IT.

Breeding for longevity, since day one.

NATURE.

- ✓ We focus on breeding Speckle Park that are fit for environment
- ✓ Thrive regardless of season
- ✓ Low stress stockhandling
- ✓ Unique and exclusive genetic families from around the world.

NURTURE.

- ✓ Foundations for longevity and fertility are laid from birth, with consistent growth rates to sale. Bred right, then fed right
- ✓ Large contemporary groups managed under commercial conditions
- ✓ We nurture relationships with clients to achieve their goals in a long-lasting partnership.

NUMBERS.

- ✓ We carry a 5-star Breedplan Completeness of Performance rating
- ✓ We measure up to 13 traits per animal
- ✓ Larger numbers = data integrity
- ✓ More data, means more predictability.
