Extra's Pride was a son of the great AI bull from the very early days Extra. This Extra son was one of our first fullblood bulls we bred by embryo transfer from a fullblood heifer we purchased.

We used Extra's Pride for many years with great success. He put his stamp on our early days of breeding Fleckvieh Simmentals.

Apollo 2 was the second homozygous poll bull we retained for our own breeding program. He was a medium framed early maturing bull whose progeny were very well muscled easy doing cattle which had the ability to finish early as well as grow on to heavier weights without just going to fat. Apollo 2 progeny put us on the map with steer showing with these progeny doing well from lightweight right through to heavyweight. As well as the ability to finish well, they also had very good marbling.

Bulls by Apollo 2 were in demand by commercial cattlemen.

Wondenia Jeremy is a son of the great bull Lonsdale Farm Bernard and out of the even greater cow Terangaville Wilhelmina.

Jeremy was a moderate framed bull which we used very successfully in the 90's to keep us away from the extremes of the big tall cattle of that time. Our aim has always been to avoid the extremes in our breeding program and it is something we believe we have achieved through our 50 years.
