

Supplementary Sheet – Bull Weights

The Alloura bulls are grown naturally, off grass, with minimal supplementary feeding. The bulls are genuinely bred for commercial conditions: they are athletic, healthy, structurally sound and reproductively fit for breeding. We raise our bulls for a long life of breeding rather than over-feeding them to 'show' condition at the time of sale. We'd rather that you be happy with your bull every day he's in your paddock not just the day you purchase him. We weighed the bulls on 25/07/2022 at which time they were 7 hours off feed.

Lot #	Bull ID	DOB	Weight (KG)
1	DGJR09	07/08/2020	548
2	DGJR11	07/08/2020	554
3	DGJR14	08/08/2020	552
