ARE YOUR YOUNG CATTLE PREPARED FOR DAYCARE?

Feedlots and saleyards are like daycare centres. When young cattle from different farms are mixed together, Bovine Respiratory Disease (BRD) becomes a serious issue. That's why many feedlots want cattle pre-vaccinated with Bovilis® MH+IBR – the only vaccine that protects against the two key organisms that cause BRD.

Tissue Sampling Unit (TSU)

Allflex Tissue Sampling Units provide a simple but effective means for DNA testing livestock. Collect a clean, uncontaminated sample in seconds with a single squeeze motion, TSU's are easy to use and yield excellent lab results.

TSU's can be paired with a matching NLIS and visual management tag, creating a simple link between the genetics of an animal and it's Identification.
