

MOORUNGA ANGUS

On Property Bull Sale
Friday 26th August 22 - 1pm

80 Old Moorooduc Rd, Dromana, VIC.

Reference Sires

Millah Murrah Paratrooper P15

Sire of Lots 1 & 3

Paratrooper set a new high in 2020 being purchased for \$160,000.

His sons have gone on to beat that record, topping at \$280,000 and averaging \$46,990 at the Millah Murrah 2021 Bull Sale.

This exceptional sire combines easy calving, performance, milk & scrotal in a moderate, powerful package.

Sydgen Enhance

Sire of Lots 2, 4 & 9

Enhance has been the number one sire of progeny registered by the American Angus Association in both 2020 and 2021 and has had over 2700 progeny analysed in Australia.

He's an impressive sire that is backed up by high accuracy EBV's. He combines easy calving with performance and docility. Top 1% for Net Feed Efficiency and Top 3% for Docility.

Banquet Nunn N89

**Sire of Lots 6, 10, 14, 15,
17, 18 & 21**

Nunn was purchased from the 2019 Banquet Autumn sale as a Stud Sire for Moorunga.

He is a large framed sire exhibiting exceptional length, huge capacity and a great temperament.

He's breeding true to type with his daughters raising their first calves at Moorunga and performing well.

Nunn's sons averaged over \$19,000 at the 2022 Banquet Sale.

Sale Information

Pre Sale Inspections

Our Open Day will be held on Saturday 6th August from 10am to 4pm.

For those unable to attend, inspections are welcome by appointment.

All bulls will be on display from 10am on Sale Day.

Auction will start at 1pm in conjunction with Auctions Plus (Online bidding platform)

Auctions Plus

For those wishing to bid via Auctions Plus, please register at www.auctionsplus.com.au prior to sale day.

Health

All bulls have been tested Negative for Pestivirus. (All animals on Moorunga are tested)

Bulls have been vaccinated with Pestigard (Pestivirus), 7in1(5in1 plus Leptospirosis),

Vibrovax (Vibriosis) and drenched with Ivomec Plus prior to sale.

Moorunga is a J-Bas 6 property. All bulls will be semen tested prior to sale.

Moorunga Angus Guarantee

All sale bulls have been DNA tested and Parent Verified.

To the best of our knowledge the bulls on offer are in sound working order at the time of sale. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the 12 months following sale, Moorunga Angus will either:

a: Replace the bull (if a suitable bull is available)

b: Issue a refund (equal to the purchase price less any salvage value of the bull)

c: Issue a credit (equal to the purchase price less any salvage value of the bull) for use at Moorunga within a 12 month time frame.

Note: In some cases a veterinary certificate may be required. Normal care and good husbandry practices must be observed as a replacement/credit is not available if the bull is injured or dies. The guarantee covers the purchase price, without interest, costs or damages.

Outside Agent Rebate

A 3% rebate will be paid to outside agents, introducing a buyer and settling within 7 days.

Catering

Complementary morning tea and lunch will be available on Sale day.

Bull Delivery

No bulls will be available to be picked up on sale day.

Please Note: Bulls will need to be off Moorunga prior to 2nd September otherwise deliveries will be held up until the stockyard renovations are completed.

Insurance

We highly recommend insuring your bull for 12 months from fall of the hammer to cover injury, transit cover & death. All due care will be taken with bulls while being held for delivery but we take no responsibility for injuries incurred during this time.

Safety

All our bull are quiet under normal conditions but care must be taken on sale day as crowd pressure may change their behaviour. They have all been run in a group environment so are not used to being alone.

All visitors enter the bull display area at their own risk . Children are not permitted in the bull display yards. Please let us know if you would like someone to accompany you through the pens.

Recessive Genetic Conditions

All animals in this sale are free of AM, NH, CA & DD by parentage or testing.

Welcome

Welcome to Moorunga's Inaugural On Property Bull Sale!

We are proud to present these 25 young sires created by some of Australia's best known AI sires and our Banquet walking herd sires. They are bred from some great dams, sourced from around Australia and grown on a property known for some of the best pastures on the Peninsula.

There is plenty of variation in mature size and muscle pattern to suit most production systems.

The majority of the bulls are ready to go to work but some of the younger bulls would suit an operation wanting to use a bull in a few months time.

A supplementary sheet will be provided on sale day with weights, scans and any withdrawals. This is also be available on Auctions plus and www.moorunga.com

About Us

John & Sue Matthies have been breeding cattle for nearly 50 years.

John established Looragoo Murray Grey Stud at Clyde, South East of Melbourne in 1974 and for the next decade bred cattle that achieved Champion and Grand Champion status at Melbourne, Adelaide & Sydney Royal Shows as well as the then prestigious Murray Grey National Show & Sale at Wodonga achieving the top average price for bulls for four consecutive years.

Following the stud's dispersal in the mid 1980's, John & Sue continued their farming at Buffalo in South Gippsland and a 3000 acre property, Clifton at Anakie near Geelong.

They were fortunate in 2013 to purchase a 700 acre property, Moorunga at Dromana on the Mornington Peninsula which had been owned by the Brockhoff family for 79 years.

In 2018 they established Moorunga Angus Stud, purchases have been made at the Anvil, Ireland & Stoney Point Dispersal Sales.

In early 2021 they recruited Glenn & Susie Trout as Stud Managers and have since made the judicious purchases of females from Texas, Little Meadows and Banquet Studs.

We are proud of the bulls we are offering at our Inaugural Bull Sale and believe the genetics on offer are the equal of any available in Australia at the current time.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

: DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Attention Buyer Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Comments: Super Fund was a calf at foot when purchased from the Texas Angus Female Sale. He's moderate framed, sound and balanced. Out of an Undine cow, one of Texas's best & most reliable cow families. Texas bulls averaged \$20,967 at their 2021 Bull Sale. Undine N53 is super fertile, giving us 24 A grade eggs in a recent flush.

BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF. LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY AND SUCCESS WITHIN YOUR BREEDING HERD.

PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.
