WELCOME TO THE ANNUAL BARCOO BOER GOAT SALE TO BE HELD AT THE BLACKALL SHOWGROUNDS AT 10:30am ON WEDNESDAY 21ST SEPTEMBER 2022

VENDORS INCLUDE:

BARCOO BOER GOATS

Barcoo Boer Goats is a family owned and run goat operation based at Blackall, Western Qld. First established in 2012, the business now turns off 3000 Boer – cross goats per year, with the focus being to produce high quality seedstock animals.

We purchased high quality stock from other producers who use data, to now breed animals that thrive in a rangeland environment and can increase turn - off weight and numbers through progeny performance.

Our breed focus is survivability, fertility and structural soundness that is backed with data. Using our sires in an extensive environment gives us the opportunity to select animals that have desirable traits, when put to work. We aim to provide quality seedstock and commercial Boer goats, to all other producers who want greater survivability, fertility and structural soundness.

Clay Armstrong - 0438 316 072

TERRAMAC BOER GOATS

Terramac Boer Goats was established in 2014, incorporating the Macgregors and Terraweena studs. Other genetic input has come from Dudauman Park in NSW and Karbo in SA, and Tambookie in WA. Thus, we have established a herd with long-standing, well-proven genetics.

We are seedstock breeders of terminal and maternal sires, purebred and fullblood. We breed towards above average EBVs for growth, good maternal traits and (with worms increasingly becoming an issue even outside the traditional high rainfall areas) worm resistance, as genetically assessed in Kidplan.

Importantly, with a view to supplying production sires into the western districts, this year we relocated our young sale bucks after weaning in eastern Queensland to Blackall, where they have grown out and acclimatized to life in the west. With Barcoo Boers' valuable contribution, it is our intention to do so on a regular basis.

INSURANCE:

Insurance of purchased bucks is recommended. Insurance is the responsibility of the Purchaser from the fall of the hammer and MUST be noted on the Buyer's Instruction form at the completion of the sale.

KIDPLAN:

KIDPLAN provides simple, practical information on the value of an animal's genes for production in the form of estimated breeding values (EBVs) and specialised indexes.

- **BT** – Birth type
- **RT** – Raised type
- **BWT (Birth Weight)** – Estimates the genetic difference between animals in weight at birth
- **WWT (Weaning Weight)** – Estimates the genetic difference between animals in liveweight at 100 days of age
- **PWT (Post Weaning Weight)** – Estimates the genetic difference between animals in liveweight at 225 days of age
- **YWT (Yearling Weight)** – Estimates the genetic difference between animals in liveweight at 360 days of age
- **C+ Index (Carcase Plus Index)** - Combines post-weaning weight, fat depth and eye muscle depth EBVs to predict an animal's genetic suitability for high growth and muscle depth. It selects for purely terminal characteristics
