# Forward

It is an honor to write the forward for this year's Circle 8 Bulls 30 Year Anniversary Sale.

The year 2022 is significant as 50 years ago on April 25 my Angus Seedstock journey started when my family purchased registered Angus cattle. This journey has led me around the world viewing and sourcing Angus genetics from Scotland and Canada in the 70's and to New Zealand and USA in the 80's. Whilst always owning seedstock I have had the privilege to consult to many other herds and genetics companies. The most recent consultancy being with ABS Australia as Beef Product Manager, a position which I retired from this June.

Along the journey I served on the Angus Federal Council in the 90's. The and the two main committees I served on were the National Show and Sale as chair and the revitalization of the Angus Youth Program. My role with Angus was generously capped when given Honorary Life membership this year.

I always say the cattle business, particularly seedstock is all about People, Programs and Product (the cattle). Whilst loving cattle for me it is the joy of meeting the people, many I call friends. My parents always instilled into me the importance of educating and nurturing the youth of the day. My greatest joy is mentoring to the youth and watching the youth succeed.

It was March of 1993 I received a phone call from a young man, Jeremy Cooper. He explained that he had started an Angus Stud when buying some females at the Millah Murrah sale in September of '92. He described the females he bought and how he wished to breed Angus. I could tell from this first call Jeremy had a fire in his belly and a mission, vision and goal to design the best Angus cattle for the times. Jeremy and I would talk probably two to three times a week for the next 6 months. I recall conversations with Jeremy's Grand Dad and the wisdom with beef cattle and the success with a herd of Red Polls; of Jeremy's trip to Canada a couple of years before and seeing the great Angus sire Early Sunset Emulous 60E; and also, of his then girlfriend and now very supportive wife and partner Carmen. In September we arranged to meet at the Melbourne Show at the Angus judging ring, and I can still visualize Jeremy strutting across the Melbourne Show Arena.

Jeremy's parents Greg and Pamela have always been supportive. As part of Jeremy's 21st birthday present they paid for him to travel with Graham Collins and I to attend the NZ 1994 Angus Ward tour out of Christchurch. Following the Ward tour, we spent another week touring many iconic NZ Angus herds of the day. We saw many sires including Hingaia 469; we still remember the walk and scramble up the hill to see 469, and me out of breath. The trip revealed other sides of Jeremy. We found Jeremy had a passion for ironing, using starch and getting the creases in one's jeans just right, his ability to iron shirts for \$2 was amazing and we all certainly looked our best for the farm visits! Two tour games we played were guessing the song name and artist from the radio, this activity was serious and we had to stop at a record store in Auckland to resolve a dispute. I lost this bet! The other was judging Angus from the US Angus Journals with Collins always claiming he won.

Over the next few years Jeremy developed his cattle herd using the best genetics he could find in Australia and overseas. Success came with Supreme Angus Bull at the National Canberra Royal, champions and reserves at the Angus National and top priced bulls. 1996 was the year Jeremy became Angus Youth Chair and won the Angus Youth Michigan State Scholarship. At Michigan Jeremy attended meat science lectures and joined the livestock

judging team. This life changing event was made richer as Jeremy met, learned and was mentored by Dr Harlan Ritchie and Dr Dave Hawkins at Michigan State. For me, these two gentlemen are two of the greatest judges, orators and cattle minds of the last 50 years.

Jeremy now at 25 had a full toolbox to develop his Angus herd. He had knowledge, people contacts, prize winning cattle, supportive family and success. Over the next decade Jeremy developed his Angus herd and developed a partnership herd of Black Simmental, started an annual sale and hosted several beef education days using speakers from Australia and USA. Show and Sale success continued. Further trips to the USA and NZ to visit cattle herds and acquire genetics. The most significant sire Jeremy sourced was the still famed Papa Equator. Circle 8 has the most registered calves by Equator in the Australian Angus Register. Then unfortunately a couple of expansive financial decisions caused Jeremy and his family some heartaches which resulted in dispersing the Simmental interests, downsizing the land area with relocation and downsizing the Angus herd. Certainly, a time for reflection and goal setting plus a test of resilience of character. Jeremy's wider family certainly were supportive and offered employment and farming opportunities. Over a number of years of long days and hard work Jeremy with Carmen revitalized the Circle 8 Brand.

That setback some 15 years ago allowed Jeremy to refocus his cattle breeding. His belief in his ability coupled with his Christian faith remained. His care for his family and education of his children were paramount as well. With the refocus Jeremy added further goals, to be disciplined in all activities; to DNA Parent Verify every animal and go back as many generations as possible. Another to do even further in depth of study of pedigrees, EBVS and enhancement with genomics. Back in the 90's Jeremy had sourced genetics from the McKay's Wilson Downs herd. The cow family was the Rosebud family and it is no coincidence that the original Rosebud cow was a daughter of 60E, the bull Jeremy noted on his first Canadian trip as a teenager.

In the recent decade Jeremy set an even more precise breeding goal. That is to produce the best Angus carcass merit cattle without sacrificing phenotype, structure or temperament and have integrity of pedigree. Jeremy observed the performance, solid maternal lines of his Rosebud line and set the program in to design and create the cattle to fulfill the vision. Select Rosebuds were embryo transferred using the very best globally available balanced carcass sires. The result is amazing. Cattle that fit the vision and goal. Cattle near 10 generations deep from the original imported Rosebud. The more recent of Circle 8 prefixed Rosebuds are all parent verified back 6 generations.

Circle 8 program is disciplined, the product is reliable and strictly recorded, with cattleman phenotype, structure and docility. Over the years I have seen and heard of outstanding customer service. Integrity and customer satisfaction are absolute.

In celebration of 30 years of breeding Circle 8 is offering the complete line of the S year heifers. This is a most exciting line of young females, that process phenotype and outstanding carcass EBVS. Without question in my mind it is the very best opportunity for any breeder to gain the most exciting genetic packages on offer anywhere. Backed with a program of integrity. Buy with confidence. All the best.

**Bill Cornell**

July 2022

# Sale Information

## HEALTH

- ✓ All sale animals have been proven with DNA NOT to be (PI) persistently infected with PESTI-VIRUS.
- ✓ All sale animals have been vaccinated with 7in1, PESTI-GUARD at one month, two months, six months and twelve months of age and received a DECTOMAX pour on at the same.
- ✓ All sale animals have received a vitamin ADE and B12 at two, six and twelve months of age.
- ✓ All sale animals have received a SELOVINLA at six and twelve months of age.
- ✓ All sale bulls have received a primary and secondary VIBROVAX vaccination before the sale.

## DNA BE SURE OF WHAT YOUR BUYING!

All sale animals have been Parent Verified (PV) for up to six generations.

### WHAT DOES THIS MEAN?

Buying Angus cattle with multiple generations of PV means you are buying cattle with 100% assurance that the pedigrees are true and correct.

Buying Angus cattle that EBV'S that are generated using a combination of genomics ANGUS GS and raw data harvested on farm, gives you the most accurate EBV'S available in the market place.

## PRE SALE EVALUATION

It is our goal to set the industry standard for pre sale evaluation, which delivers to our customers the ability to buy with confidence, understanding that all bulls have passed multiple health and structural milestones in order to be included in this sale draft.

### Circle 8 Bull Testing Brief:

The pre-sale accreditation employed at Circle 8 is staged and multi-platform involving:

- ✓ Physical reproductive examination (testicular palpation and measurement, penile inspection, temperament and structural soundness assessment).
- ✓ Testing for presence of Pestivirus carrier status (PI) – all bulls are confirmed free.
- ✓ Vaccinated with Vibrovax and 7-in-1 core vaccines.
- ✓ Crush-side semen motility assessment (minimum requirement 30% progressively motile).
- ✓ Independent laboratory assessment of sperm morphology (minimum requirement 70% normal).

This process is comprehensive and robust in its nature, and fully transparent giving the consumer a full suite of resources to assess hazard risk when sourcing their bulls.

Potential buyers should take confidence from the fact that a great deal of effort has gone into this high standard of bull assessment to ensure they have no recognized pre-existing issues, and are of sound fertility status before they are offered for sale.

Dr. Shane P. Thomson. BVetBio. BVSc. MAnSc.  
for Holbrook Veterinary Centre.

## SEMEN RIGHTS

All bulls sell with 80% semen marketing rights attached.

In doing this we leave the great majority of any potential semen revenue in the buyer's hands.

However, by keeping a 20% share, it gives us, as the breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties.

By keeping the vendor involved, the 80/20 semen ownership split is designed to give the purchaser the greatest opportunity for semen sales on the top sires in the sale.

Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale.

Under all circumstances, the vendors retain the right to collect 500 straws from any bull in the sale for use in the Circle 8 herd ONLY.

## EBV'S

Yearling sale cattle will have 400 day weights and scan data harvested and recorded prior to the sale. At time of cataloguing the yearling cattle EBV'S are based off genomics and a birth weight.

All sale cattle have ANGUS GS 75KHD (Neogen) powered EBV'S.

## BE SURE TO CHECK CURRENT DATA.

## STRUCTURAL DATA

Autumn born sale bulls have been independently structurally assessed on three occasions.

Dr Shane Thomson, HVC on the 23/05/2022 and the 7/07/2022. Liam Cardile, LRC Livestock, structurally assessed the bulls as well as collecting scan carcass data on the 9/06/2022.

## HEIFER (AI)

Autumn born heifers had the opportunity to conceive to (AI) to Millah Murrah Paratrooper P15 on the 11/05/2022 or the 2/06/2022.

## PREGNANCY TESTING AND FETAL SCANNING

The autumn born heifers were pregnancy tested and sexed on the 1/08/2022 by Dr Shane Thomson.

## TRANSPORT

Dick Smith Transport (DST) will handle the safe delivery of all sale cattle. Bulls are delivered free nationwide. Steve Smith can be contacted on 0428 636 236

## INSURANCE

A Nutrien insurance agent will be on site sale day. At the fall of the hammer the cattle are your responsibility, all care will be taken during the time between sale and delivery, please insure your animals.

## REBATE

Industry standard rebate is available to outside agents. Rebate will be paid directly by L T COOPER CATTLE TRUST, and therefore L T COOPER CATTLE TRUST, must be invoiced directly. Please contact Jeremy Cooper on 0427 549 261 to discuss.

## SALE CREDIT

There is no credit in this sale.

## Reference Sire and Dam

### CIRCLE 8 ROSEBUD P113 pv & EDMUND E11 pv

Sire and dam combination for **MALE** lots 1 and 2 and 16 through to 24. **FEMALE** lot 72.

At over 90% accuracy on all production traits based off 5098 progeny, E11 is a no brainer when the goal is to add calving ease, lower mature cow weight, add some fat and IMF%. Phenotypically E11 reminds me a lot of Early Sunset Emulous 60E, the great cow maker!

This joining has achieved its outcome and then some. Balanced data, beautiful soft silky skin and hair, well above breed average marbling, wrapped up in big mobile and muscular bulls that have real multi-generational genomically validated data. If your serious about breeding cattle, HOOK IN HERE.

At Circle 8 our goal is to breed type, structural integrity, with balanced data. S614 is a genuine B- muscle score with a +3.9 IMF%, antagonistic traits! Great skin and hair, excellent length of body, very wide based, mobile and free moving. S614's data set suggests that he does just about everything right, S614 is a true allrounder out of a very productive dam. We will be using this bull going forward, we have collected 125 units of semen thus far.

Purchaser: ..... \$: .....

## Reference Sire and Dam

### ROSEBUD M130 / EDMUND E11 / GB FIREBALL

Sire and dam combination for; **MALE** lots 3-5-42-43-44-45-46 **FEMALE** lots 125-126-127-128-129.

Fertility is 4X more profitable than any other trait! At +4.0 M130 is in the top 3%. With calving ease of +4.5, a birth weight of +3.0 and a mature cow weight below +100 at +98. M130 has balanced data from left to right, making her an easy choice for the donor pen.

The EDMUND E11 joining has worked very well. Lot 3 is an absolute stand out balanced data on all traits and +3.6 SS and +3.5 IMF%, fertility and eating quality and he is a good looking rooster.

The GBFB joining has worked well, Lot 5 is +4.8 SS top 1% with 50cm raw measurement.

M130 produced the \$44 and \$40K full ET brothers in our 2021 sale, the full sisters are on the point of calving and look outstanding!

## Reference Sire and Dam

### CIRCLE ROSEBUD L110 and GB FIREBALL

Sire and dam combination for; **MALE** lots 6 through 15. **FEMALE** lots 75-76-77-104-105-106-107-108-109-110-111 and 112.

We couldn't be happier with our GBFB progeny. The bulls are mobile and robust in their type and kind, with high libido. The females are feminine clean fronted with big middles. As a collective this joining excels in production traits of growth, fertility and marbling, and the cattle are sexy to look at! If your breeding objective are to produce high quality feeder cattle without sacrificing high quality replacement females this joining is of serious consideration.

Key lots, **MALE**; 6-7-9-10, lot 9 is Carmen's pick of the bulls! **FEMALE**; 75, could be the pick of the autumn females?

## Reference Sire and Dam

### CIRCLE 8 ROSEBUD N117pv & MM PARATROOPER P15

Sire and dam combination for; **MALE**; lots 25 through 29. **FEMALE**; lots 83 and 84.

WOW, what can I say here? P15 needs no introduction, a breeder of sons, a bull that we will reflect on and continue to use for years to come. N117 hit the ground running with her first natural calf topping our first sale at \$55K to MACCA's Angus. N117's progeny just get it done! Like her they are soft easy doing cattle with thickness, great skins and soft silky hair and are true to breed Angus types, (**very rare for cattle that are this high for carcass data**), our plan must be working!

N117 breaks the mould, she is phenotypically sexy, fine up front, big and roomy in the middle, wide at the base with a great udder, BUT she's +4.8 IMF%, top 1%, antagonistic! This breeding cannot come more highly recommended.

Date of Birth: 15/08/2021

**Traits Observed: BWT, Genomics**

At Circle 8 our goal is to breed type, structural integrity, with balanced data. We have a keen eye for traits of economic and production significance. Enter BBB21S654. S654 has a data set with 8 traits in the top 10% and 2 in the top 5%. S654 has excellent skin and hair, head carriage, body length, big nuts, muscle expression and presence!

I don't need to say much more than, I have waited a long time for a bull like this, a bull that looks sexy and reads even better, our plan must be working! We will be using this bull heavily going forward.

**Traits Observed: BWT, 200WT, 400WT, SC, Scan(EMA, Rib, Rump, IMF), Genomics**

THE NEXT 6 BULLS ARE WOW!

Commercial cattlemen looking for moderate thick made, soft skinned bulls, that can add top 4% IMF% and top 5% EMA, powerful growth, thickness and weight, without compromising mature cow weight and keeping birth weight in control! We highly recommend Lot 31 through to 36.

**Traits Observed: BWT, 200WT, 400WT, SC, Scan(EMA, Rib, Rump, IMF), Genomics**

Rosebud P100, featured in the inside front cover, won the hearts of everyone during her show career. Her GBFB progeny will do the same. Just a good solid pen of commercial, no fuss bulls. Great skins, good head, hooded eyes, wrinkly soft skin, all the good old stuff your granddad spoke about, but backed up and validated with science and a disciplined approach to breeding bulls.

## Reference Sire and Dam

### CIRCLE 8 ROSEBUD M130 pv & BALDRIDGE COMMAND 036. Pv

Sire and dam combination for; **MALE**; lots 37 through 41. **FEMALE**; lots 86-87-117-118 and 119.

¾ brothers and sisters to the \$44 and \$40K MM Paratrooper sons in the 2021 sale. If calving ease, shape and breed average IMF% is on your radar, this joining will suit. Sire of M130 KM Broken Bow 002, has cemented his reputation as a maternal powerhouse. The bulls from this joining are long and thick with exceptional balance, their full sisters are going to be maternal superstars. M130 is doing a fantastic job for us, M130 has an excellent balanced and well rounded set of data. This joining should be highly sort after.

## Reference Sire and Dam

Image taken on the 21/07/2022 48 hours post calving.

### MILLAH MURRAH PARATROOPER AND CIRCLE 8 ROSEBUD P111

Sire and dam combination for; **MALE**; lots 47-48 and 49. **FEMALE**; lots 85 and 99 through 103.

P111 is just one of those cows admired by everyone that sees her. Phenotypically outstanding, wedge shaped, big roomy deep middle, with an outstanding udder. Calved at 21 months to her first (AI) a single straw of Baldridge Command 036, a heifer calf R501. R501 is now in the donor pen as well after calving at 21 months. Fertility 4X more profitable than any other trait! P111 has nice carcass data with positive fats and a +4.3 IMF%. Our HPCA PROCEED cows just breed and breed and breed on. Add Millah Murrah Paratrooper P15 to the mix, who's balanced data set compliments calving ease and adds scrotal, as well as adding natural thickness and that Millah Murrah softness and do ability, this combination is outstanding on so many levels.

## Reference Sire and Dam

### ROSEBUD L122 pv & HCPA PROCEED pv .

Sire and dam combination for; **MALE**; lots 51-52 and 53. **FEMALE**; lots 82 and 95 through 99.

The joining that made N117.

L122 is a long, wide based Edmund E11 daughter that breed progeny with shape and substance. Of all the high marbling bulls available HPCA PROCEED breeds the most natural shape and depth of body into his progeny. They have good skins, soft silky hair and structural integrity. When you genetically power the pedigree, they generally go up for marbling. We love our HPCA PROCEED females and are using them strategically going forward to make a cow herd that is deep in its maternal focus but has the ability to add value in the eating quality space, which is driven by marbling! This mating is part of our building block strategy.

## Reference Sire and Dam

Image taken on the 21/07/2022 48 hours post calving.

### CIRCLE 8 ROSEBUD P111 pv & EXAR MONUMENTAL 605B pv

Sire and dam combination for; **MALE**; lots 54-55 and 56. **FEMALE**; lots 90 and 91.

This joining has delivered cattle with exceptional skin and hair and shape. Lot 54 at +3.7 IMF% with that carcass shape is a rare commodity. Lot 56 with top 3% EMA and a +5.5 IMF% and Lot 55 with top 10% growth, EMA and IMF% position these bulls to make some real impact in commercial cow herds.

## Reference Sire and Dam

### ROSEBUD 8080 M102 pv & GB FIREBALL 672 pv

Thomas showed M102 to be named National All Breeds Champion heifer as a yearling. Visually M102 is impressive, a true maternal powerhouse. M102 excels in calving ease and moderate growth. The joining of GB Fireball was again a planned mating to build up from a foundation of structural integrity and shape adding strategic carcass to get to our end point. The progeny are everything we planned them to be, good allrounders that will provide a solid base for females and good solid commercial bulls.

# 30th Anniversary FEMALE SALE

## CIRCLE8 ROSEBUD N117 PV

Mother of the 2021 \$55,000.00 high selling bull BBR509 to Macca's Angus, her first natural calf!

- Selling eight full sisters as LOTS 82, 95, 96, 97, 98, 130, 131 and 132.
- Selling five ½ sisters as LOTS 79, 80, 114, 115 and 116.
- Selling two daughters by Millah Murrah Paratrooper P15 as LOTS 83 and 84.

This female offering is both a celebration of our 30 year anniversary and a way to give back to the Angus breed, the breed that has given me so much.

At Circle 8 bulls, we focus on structure, type, balanced data and customer service.

We understand that fertility is four times more profitable than any other trait. We understand that phenotype drives profit in the bull pen and eating quality drives profit through the whole supply chain.

Building a cow herd that fulfils all these industry measures is a process, a process of challenges and compromise as you drive to the end goal.

The females represented in this "complete" S drop offering are all at different stages of that process.

We have applied the same discipline to cataloguing this draft, as if we would be retaining them. We selected the standouts based on a combination of type and data from each (ET) group. If keeping them, we would have then applied selection milestones for pregnancy, calving ability, and udder quality before they enter the breeding herd or the donor pen. These females sell at the front end of the catalogue, the full sisters sell as lots 95 through 151 in numerical order, in their respective flush groups.

The "complete" offering of our S drop females presents a unique opportunity to all Angus breeders, new or longstanding to take advantage of 30 years of a disciplined approach to producing industry relevant Angus females, all of whom have NEOGEN ANGUS GS, 75KHD powered EBV's and full parent verified pedigrees, delivering the highest standard available in the industry.

We have elected not to make notes on the "complete" S drop, as we believe that the images, videos and the data tell you everything you need to know.

We will however mention what we believe are a few "must have" females. Females that it really hurts us to part with, and

if we could only keep four females, these would be them, and with reproduction technology, you could kill the pig, inside three years!

LOT 75 - we talk about the process of building a cow herd. S589 is one step away from our end goal. Five generations parent verified, with an incredible data set and phenotypically outstanding. WOW.

LOT82 - A full sister to BBBN117. With an IMF% of +5.7,nearly three times greater than breed average, with her type and kind, skin and hair, S669 offers so many opportunities to a bull breeder, she is five generations parent verified, bullet proof.

LOT83 and 84 - N117 just gets it done! These two Millah Murrah Paratrooper P15 sisters are the cat's meow! Good data sets, show ring sexy, six generations parent verified. What can't you do with these females?

LOT 85 - P111 is another one of those HPCA PROCEED cows that we place an enormous amount of faith in, anything out of P111 is good! But if we had to keep one it would be S666, just look at the type and kind with a +3.7 IMF%,WOW. Her sire, Millah Murrah Paratrooper P15 will be talked about in glowing terms for generations to come.

We hope you enjoy the females in the following pages. These females represent a thirty-year journey, they are industry relevant and offered as a "complete" drop.

The offering of the "complete female S drop", our discipline towards genomics, parent verification, data harvest and reporting, the 56 autumn drop females having been AI'd to Millah Murrah Paratrooper P15 and carrying sexed pregnancies, as a collective represent an opportunity presented nowhere else in Australia in this calendar year.

Best regards
