AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select "Sign Up" in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select "Dashboard" and then select "Request Approval to Buy".
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

We would like to welcome you to our 5th on property ram sale and thank you for your ongoing support.

We have had another busy year with the stud and have certainly enjoyed life getting back to normal following the pandemic. Shows were back on this year and we have continued our involvement with the Gilgandra High School's Livestock Show Team. The students helped to prepare and exhibit our show team both at a number of local shows and the NSW State Sheep Show in Dubbo. Their excellent help enabled us to take a larger team to the shows attended and we have been so proud of their commitment and enthusiasm throughout the show season.

We have continued to seek out new genetics for our flock with two ram purchases made from the Bindaree and Tenalba Border Leicester Studs. We have also been lucky enough to purchase a number of ewes from the Tenalba stud as part of their dispersal and look forward to seeing how these new genetics influence our flock.

Following on from the positive feedback received last year we have decided to continue to interface our sale with AuctionsPlus moving forward. Videos of all lots will be available to view on the AuctionsPlus website in the lead up to the sale or alternatively inspections of rams on property can be arranged at a time that suits you.

Following on from a tradition started at 'Johnos Border Leicesters', this year we will also begin to donate the proceeds of Lot 1 to a charity. This year we have chosen these funds to be donated to the Royal Flying Doctors Service. Although we hope to never require their services we take much comfort knowing their lifesaving help is available should we need it.

Our flock is performance recorded through Lambplan with a focus on selecting for animals with excellent reproduction (WR), maternal (MWWT), carcass (PFAT, PEMD) and growth traits (WWT, PWWT). The ASBV information displayed in our catalogue has been calculated in the 15th of August Lambplan analysis. All efforts have been made to ensure we provide accurate data both in the analysis and this catalogue.

You will notice in the catalogue the old Number of Lambs Weaned (NLW) trait has been replaced with the new Weaning Rate (WR) trait. Further information on the this change and its impact on the BLX index can be found on the following page. You may also notice a note under a couple of rams that have a new physical ID tag, when lotting we replaced a few NLIS tags that had broken to ensure the boys have the correct tag to leave the property. Their Sheep Genetics ID is however their original tag number as shown under ID.

The Border Leicester Cross Index shown in our catalogue has been developed to suit a production system using BL sires crossed to merino dams producing 1X progeny. It has a strong emphasis on fertility, maternal and early growth traits whilst capping adult ewe weight.

We have maintained our health status of OB Accredited Free and OJD rating of MN2- Vaccinated for added peace of mind.

Inspections will open at 11am with the Auction to commence at 1pm. Please also join us for lunch from 12pm and a beer after the sale. Delivery on rams purchased can be arranged, please speak with us after the sale if required.

Our future sale ram numbers will be driven by your demand so please get in touch with any feedback or enquiries on 0407 537 836 or cherie@cooindaborders.com.

George & Cherie Pagan

Updates to the BLX Index

Number of Lambs Weaned (NLW) has been replaced by an improved ASBV called Weaning Rate (WR). This new ASBV has been included in the BLX index.

Sheep Genetics has released a new trait that measures reproductive performance called Weaning Rate (WR). WR combines the traits of Conception (CON), Litter Size (LS) and Ewe Rearing Ability (ERA) into a single ASBV for selection. From 2022 onwards WR has replaced the previous trait of Number of Lambs Weaned (NLW) and has been included in the BLX index.

As a result of the introduction and inclusion of WR in the BLX index there have been changes in the percentiles for the analysis. You may notice that the 50th percentile for the analysis has changed compared to last year.

This ram sale season it will be important to use the percentile band table to re-benchmark what the percentiles are to assist with ram purchasing decisions.

To access the current percentile bands table please use the QR code below of the left. For further information on Weaning Rate please use the QR code on the right and refer to page 4 of the Sheep Genetics 2022 Analysis Enhancement Documentation.

Access the current First-
Cross Sire Percentile Band
Table

For more information on
Weaning Rate

Cooinda Health Status & Treatment Information

- Accredited Brucellosis Free (Accreditation No. 76987)
- OJD Market Assurance Program MN2V (Accreditation no. NS76986)
- All rams approved Gudair vaccinates
- Vaccinated with 6in1+B12 and Eryvac at Marking & Weaning
- Last 6in1+B12 vaccination in June 2022
- Shorn and treated with Extinosad on 14/6/2022
- WEC completed mid August with a zero count

In the interest of the longevity of your purchase we would recommend bringing any purchased rams into line with your current health and worm control programs. If you look after them, they will look after ewe!

All sale rams have been grazing a mixed pasture. If you plan on feeding grain we recommend increasing their ration as per grain feeding guidelines.

All rams vet inspected on Thursday 8th September by Dr Nadine Allan, Gilgandra Veterinary Clinic.

- ASBV's in **BOLD** indicate traits in the top 20% for the breed
 - Rams with a \$ next to the BLX index indicate a \$uperborder
 - Figures in the white row below ASBV's show accuracy of breeding values provided (%)
-
- BT/RT = Birth Type/Rear Type
 - 1 = Single
 - 2 = Twin
 - 3 = Triplet
 - BWT = Birth Weight (kg)
 - WWT = Weaning Weight (kg) at 100 days
 - PWT = Post Weaning Wt (kg) at 200 days
 - AWT = Adult Weight (kg)
 - MWWT = Maternal Weaning Weight (kg)
 - PEMD = PW Eye Muscle Depth (mm)
 - PFAT = Post Weaning Fat (mm)
 - WR = Weaning Rate
 - BLX = Border Cross Index (\$)

SuperBorders is the brand name for Border Leicester Rams that are of high genetic merit for a first cross production system. The official SuperBorder yellow ear tags allow SuperBorder rams to be easily identified.

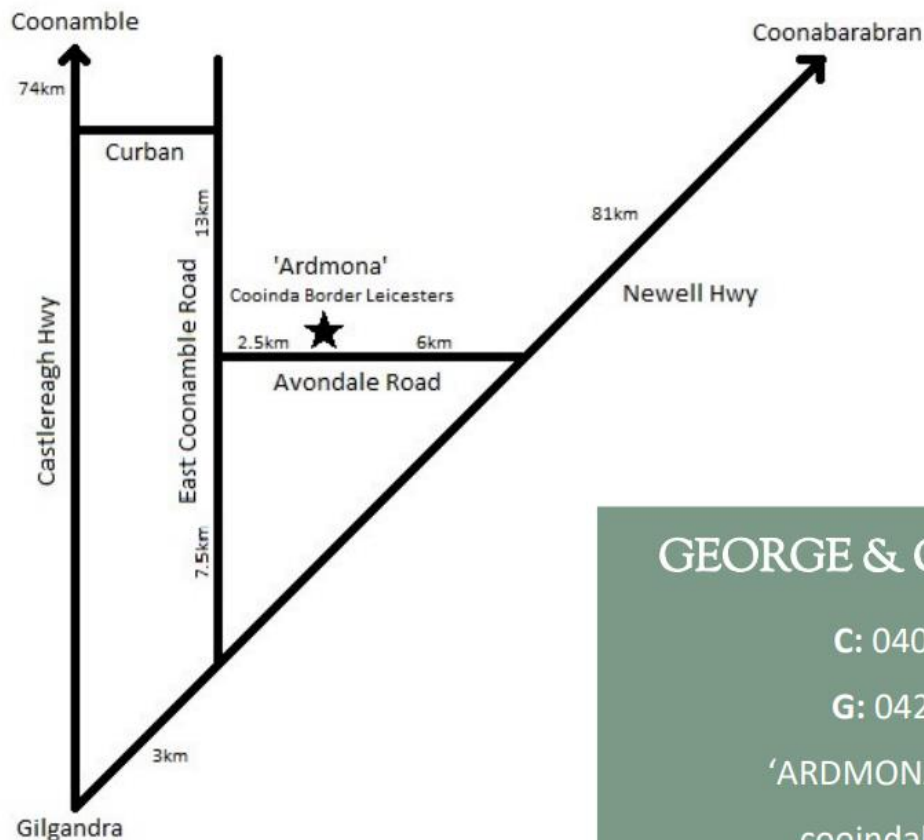

To qualify as a SuperBorder a Border Leicester ram must be above the 50th percentile for the breed based on the BLX index (Border Leicester Cross Index). The 50th percentile index value is calculated based on the 15th of August LAMBPLAN run each year. It is used to determine SuperBorder rams for that selling season. The BLX Index has been developed for production systems using Border Leicester sires crossed to Merino dams to produce first cross progeny. BLX balances maintaining mature size with significant improvements in early growth and reproduction. A higher BLX index targets animals that are more profitable in this production system.

Not all rams sold by SuperBorder members are necessarily SuperBorder quality, but are bred by committed, registered breeders striving for genetic gain. SuperBorder rams must be structurally sound and of good breed type.

The SuperBorders group is made up of a number of studs across 5 states who work together in meeting market requirements for objectively measured maternal genetics in the Australian Lamb Industry. SuperBorders members are industry leaders with longstanding involvement in research, trials and industry resource flocks.

First cross lambs sired by 100% SuperBorder rams may be sold as 'Bred from SuperBorders'. Special yellow pen cards and SuperBorders ear tags are available to identify these animals when sold in physical sales. Virtual yellow sale cards are also available for SuperBorders progeny sold on online sale platforms. Please speak with us if you would like either of these marketing materials.
