

DEVANAH ANGUS SUPPLEMENTARY SHEET

Three bulls were collected with no further call.

Lot 7 Devanah Saturn NJS21S15 (200 straws with 100 being for Angus Sire Progeny Testing) Lot 9 Devanah Stryker NJS21S18 (160 straws).

Lot 10 Devanah Stirling NJS21S36 (300 straws)

NB we also used these 3 plus Lot 3 NJS21S35 over 20 odd cows. This has affected their weight compared to others as you would expect however they are catching up fast.

SALE BULL HEALTH

All have been vaccinated and boosted 8 in 1, Piliguard, Pestiguard, Lepto Shield, VibrioVax, Bovilis, and backlined Baymec.

All tested negative for Pesti Virus

Ian Moreland of Studcare Genetics checked did fertility check and all good. Usual guarantee applies.

INTEGRITY OF DATA

Parent Verification is important to us. 13 of these bulls are Parent Verified, 3 are sire verified and 2 slipped through and missed testing however, both naturally conceived in secure paddocks so we are confident.

Recessive conditions. We are confident either through testing or inheritance that no bulls carry known recessive conditions.

Roger Evans scanned and cast his eye over off these bulls. Unfortunately, due to excessively muddy conditions he was unable, as he usually does, to assess feet.

WEIGHT ON 25TH SEPTEMBER, 2022

LOT 1	NJS21S28	572 kg
LOT 2	NJS21S32	614 kg
LOT 3	NJS21S35	672 kg worked
LOT 4	NJS21S43	646 kg
LOT 5	NJS21S60	662 kg
LOT 6	NJS21S64	582 kg
LOT 7	NJS21S15	636 kg worked
LOT 8	NJS21S5	705 kg
LOT 9	NJS21S18	622 kg worked
LOT 10	NJS21S36	598 kg worked
