Welcome to the 2022 Greenup Eidsvold Station Sale Team.

The sale will be on Thursday September 15, 2022, commencing at 12 pm at the Eidsvold Saleyards.

This 2022 team offers 132 Santa Gertrudis bulls, of which 108 are Classified 'S' bulls and 109 are poll/PS, of which 28 are homozygous poll.

2022 provided us with a range of unexpected challenges, and the continued wet weather impacted our cropping program considerably and prevented a consistent feed supply for the bulls. On the flip side, the cows are carrying extra condition, the pastures are in good order, and the soil moisture profile and surface water storage is as good as we can remember. This all bodes well for the warmer days in Spring.

Due to the ongoing wet weather we are still unable to drive on the paddocks, instead the bulls were taken to the yards for photos - not ideal conditions for capturing the bulls at their best - but it gives you a guide to their phenotype.

The strong demand for Australian beef in domestic and export markets continues in 2022, and the robust demand is likely to remain for the decade ahead, providing a very positive outlook for Australian beef producers. Eastern Australia has experienced unprecedented rainfall events, restoring much of the pastures to good health and creating a body of feed that has been unmatched for many decades.

This year's sale team is an even line of industry ideal bulls, that are showing tremendous muscling, explosive growth and the easy-doing constitution we demand from our herd. Twenty per cent of the draft is by new sires, backed up with an exciting line-up by proven sires.

The team is above the breed average for most traits and both indexes, however as breed averages increase every year it is appropriate for breeders to ask, "What are the ideal parameters and traits for my herd, environment, and markets?" Ten years ago, the average EBV for 600-day growth was 14kg, in 2022 it is 23kg. It is positive to see the genetic progress being made in the breed and our herds, however we do not select solely for numbers. EBVs provide information on some measurable traits, however we are improving the functional traits of temperament, fertility, structure, and tropical adaptation, in equal measure.

Our focus on commercial relevance with tropical adaptation to suit harsher climates is evident in this draft. Our bulls are bred on forest country and raised in the ticks. Environmental constraints and selection pressure, underpin the breeding program and explains why our bulls thrive north of the Flinders, across arid rangelands of Australia, and their progeny excel in feedlots and fertile scrub. Constitutional superiority and fertility are achieved through genuine pressure on the female herd, that does not include masking and compensation by management.

Greenup Eidsvold Station bulls' feet are not trimmed.

The sale team is prepared for a long working life and not over-fed for sale day. The standards we set for preparation, fertility, and structure result in bull returns/breakdowns that are well below 0.5%, that is less than 1 bull breakdown per 200 bulls sold.

The sale will be livestreamed and interfaced with AuctionsPlus. We welcome pre-sale inspections. Full catalogues are available at www.greenup.com.au or contact us or our agents, Elders and GDL, for a hard copy.

For your peace of mind, the herds are JBAS 7, the bulls are cleared, and fully vaccinated, and free delivery is offered to major selling centres and on-property wherever feasible.

We hope to see you at the sale and wish you all the best for the season and beyond.

Rick, Alice, Ruby, James & Rory

GREENUP GUARANTEE BULLS DONE RIGHT

Our objective is to produce reliable seedstock that have predictable performance and proven fertility.

A simple philosophy "to breed profitable cattle for self-replacing commercial herds, which perform in all environments and within all major markets" remains at the heart of Greenup Eidsvold Station values.

Greenup Eidsvold Station runs in excess of 6000 head of Santa Gertrudis cattle, in the Burnett region of Queensland.

Greenup Eidsvold Station supplies hundreds of bulls annually to the Northern Australian Beef Industry to repeat clientele, over 95%.

We stand behind our bulls and all bulls are backed with the Greenup Guarantee for fertility and temperament.

Greenup Eidsvold Station bulls and their progeny are thriving across the arid rangelands of northern Australia, from the Pilbara, to the Kimberley, the Gulf, outback Northern Territory and the far western reaches of Queensland.

The feedback we get about how the bulls handle the heat, the distances to water and the work, reaffirms that the tough environment in which the 1800 stud females are run - the native pasture, the steep hills and granite Ironbark country - enables selection for superior constitution.

Our herds are WA eligible and JBAS 7

Greenup Eidsvold Station Bulls are bred and prepared for a long & productive life. Our business success hinges on our clients' outcomes and their success, measured by:

1. Calves weaned and total kg produced per mated cow per year
2. Females re-breeding annually in arid, low-protein environments
3. Less costs by using fit, fertile bulls that walk far, work hard and last.
4. Turning off cattle earlier

5. Premium prices.
6. High weight gains and feed conversions
7. Carcase and eating quality traits
8. Improving c/kg by expanding market options

The outcome is functional, fertile herds that perform well in tough country, and provide the supply chain with rapid growth & ability to finish export or domestic cattle between 12 and 24 months of age.

KEEPING IT SIMPLE

The beef industry is demanding & requires reliable bulls that perform predictably.

The Greenup Eidsvold Station breeding program is underpinned by six decades of selection and the longest running objectively performance recorded herds.

Greenup Eidsvold Station are Breedplan herds.

We measure thousands of data records each year and use this data for ground-truthing subjective appraisals and to ensure we produce seedstock that is

demonstrably improving commercially relevant traits.

Our bulls are bred on the tough Ironbark forest country of the Great Dividing Range, under demanding, low-protein conditions. This environmental pressure ensures we continue to select for easy-doing cattle with exceptionally high constitution.

So whether you are a numbers person, or just want bulls that you can trust to do a job for you in any environment; you can be assured that they've qualified for the Greenup standard.

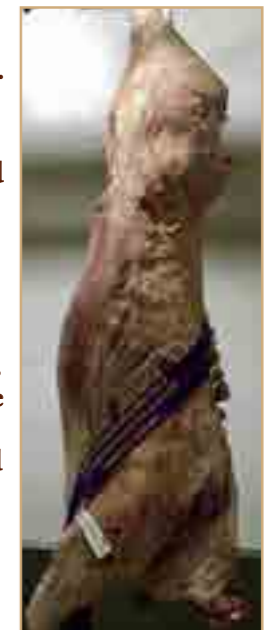

THE DIFFERENCE

Industry relevance lies at the heart of our breeding values.

We understand what's important to the bottom line and we embed those priorities into our breeding objectives to produce low cost, high-return, self-replacing herds, that serve the whole supply chain for major domestic and export markets.

The bulls are raised to work straight-away, for longer so our clients benefit.

All bulls must pass our criteria for conformation, temperament semen morphology, scrotal size, growth and muscling, while retaining softness.

We take pride in the standards we set for preparation, fertility, and structure.

These standards result in bull returns/breakdowns that are well below 0.5% over the last decade, that is less than 1 bull breakdown per 200 bulls sold.

Not everything that can be counted counts. And not everything that counts can be counted.

Albert Einstein

Balanced Breeding

Greenup Eidsvold Station is one of largest data sets of objective performance records in Australia. We pride ourselves on this legacy, and provide data on traits that are objectively measured and most importantly - repeatable. Data must serve a commercial purpose and the outcomes must be reliable and predictable. We do not provide data on traits which are not repeatable and heavily prone to inconsistencies and vast swings (Eg semen morphology), environmental noise and the consequential inaccuracies and high standard deviations (Eg +/-9 days for DTC of 50% accuracy). We advise strongly for moderation when considering all traits and for breeders to be wary of selecting for unintended correlations. For example: Days to calving is possibly selecting for shorter gestation length and by consequence, smaller and lower thrift calves - a major cause of post partum mortality in northern beef herds. A balanced, consistent breeding program will always prevail over time.

Breedplan Explained - Estimated Breeding Values (EBVs)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is therefore the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

Accuracy

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

Fertility

Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

Growth

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for

dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Carcase

Eye Muscle Area (EMA) EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat (p8) EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Intra-Muscular Fat (IMF) % is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300kg carcass. Depending on target markets, more positive EBVs indicate higher IMF%.

Retail Beef Yield represents the total meat yield (boned out) as a percentage of a 300kg carcass. More positive EBVs indicate higher percentage yield.

Selection Indices

Selection indices can and possibly should be developed for each individual enterprise, however for convenience a Breed Society Index has been compiled based on common breeding objectives and some assumptions of breeding criteria. However not all operations are the same and will NOT want to place the same emphasis on each criteria, therefore these breeder should not use the Society Indexes but instead construct their own using Breed Object.

Domestic Index

Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

Export Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding.

Breedplan figures **cannot** be compared between breeds

Only Santa Gertrudis GROUP BREEDPLAN EBVs with Accuracy (Acc) can be validly compared between herds.

Peter Russell Scholl

20 April 1974 - 24 February 2022

Peter Scholl commenced working on Belvedere in 2006 as the Farm Manager of the Eidsvold Station Bull Depot, working with Anthony and Sally Coates. As well as considerable stock work, the role required him to manage two centre pivots and the dryland farming operation.

In 2007 Rick and Alice began leasing the Eidsvold Station aggregate and herd. With that transition, Pete became part of their team, of which he was an integral part for the next fifteen years.

In 2007, Bec joined Pete at Belvedere and over the coming years, they were blessed with three wonderful children - Josie, Koby and Bennett, and became a cherished part of the Eidsvold community and our family.

Pete was passionate about getting the best outcome for us, the bulls and the farming and was 100% committed. He was a great mate and mentor to Ruby, James and Rory, always ready with a joke and a smile, and willing to help them be involved, making them feel useful, whatever age they were and however un-useful they may have been at times.

No-one gets far alone. Pete has always been by our side, and he's had our backs in tough times and the good times.

Thank-you Pete

Rick, Alice, Ruby, James and Rory

A young poll son of Noble, Solitaire S292 (P) is an extremely quiet meat machine with a strong top-line, deep body. Solitaire is a lighter bull. His EBVs rank him in the top 1% for 200 day and EMA, top 5% for 400 day growth and domestic index and top 10% for 600 days. With the ability to lay down fat and finish, this is the explosive growth without extreme mature weights that are desirable for self replacing breeder businesses.

GR N145 had two calves in two years. Solitaire is her first son.

GR K101 (P) had two calves in two years.

SALE INFORMATION

Auctions Plus

Online bidding is available only to registered users. Registration is free - visit www.auctionsplus.com.au to register. Please register at least 48 hours prior to the sale. Microsoft Silverlight is required to connect to AuctionsPlus sales; first time users are advised to visit the Downloads section of the AuctionsPlus website to ensure Silverlight is installed. Demonstration Auctions may be viewed in order for new users to become familiar with the system. Contact us or our agents to discuss how to make your AuctionsPlus bidding fast and effective.

Breeding Soundness: All bulls have passed a breeding soundness examination by veterinarian Stacey Rae, Monto Veterinary Services.

Semen morphology: All bulls have passed a semen morphology test

Health All bulls have been vaccinated with PestiGuard, 7 in 1, Vibrio, 3-day and 3-Germ blood for tick fever. Annual booster shots recommended next July.

Ticks: All Sale cattle have been pre-treated for ticks and are ready for tick-free country.

Buyers Inspections: Cattle may be inspected any time prior to the sale by arrangement with the vendor or selling agents. All sale lots will be on display at sale venues on morning of sale from 7.00 am.

Supplementary Sheets: Supplementary sheets will be on our website: www.greenup.com.au and also available at the sales with semen morphology results, scrotal sizes, raw weights, daily weight gains and scan data for eye muscle area, rib fat and rump fat.

Brands

Symbol Brands:

All Greenup cattle and Quarter Horses are branded with Wings over Nought.

Eidsvold Station cattle are branded with Half Circle J

Number Brands: Greenup Eidsvold Station bulls are branded with even numbers and heifers with odd numbers.

PRE-SALE INSPECTIONS

Prior to sale day, all bulls are depastured on oats at 'Belvedere' and can be inspected anytime.

Belvedere is situated on the Kerwee-Mt Perry Road, 10 minutes north of Eidsvold township.

To arrange inspection, contact Rick on 4164 4260 or his mobile 0427 644 260.

DIRECTIONS TO EIDSVOLD SALEYARDS

Eidsvold Saleyards are on the Southern side of town just off the Burnett Highway. Take Hollywell Road at the BP Petrol Station.

Guarantee

Our bulls are guaranteed as breeders at time of purchase, however we accept no responsibility in the following circumstances:

- Injury or disease that occurs to animal after the sale;
- Gross negligence or willful misconduct on the part of the purchaser;

In the event of an animal failing to breed, we agree that;

- The animal may be replaced with an animal of comparable value;
- Credit shall be given in the sum of the full purchase price, less salvage value;
- The vendor shall refund the money paid for the bulls.

These options shall be at the Vendors' election and the Vendor shall not be liable for any direct or indirect loss (including consequential loss) whatsoever.

Insurance: Insurance representatives will be at the sales and if requested will arrange insurance on the fall of the hammer.

Outside Agents: The vendors will pay a 3% rebate to outside agents who introduce genuine "new" buyers in writing at least 24 hours prior to the sale and is paid on previous eligible introductions. Rebate will not apply to existing Greenup Eidsvold Station clients, if unsure, please check with us beforehand. Settlement by the outside agent on the purchaser's behalf must occur within fourteen days of the sale. Commission will not apply to stud sires transferred to members of the SGBAA.

Delivery: Delivery will be given and taken on the day of the sale. Cattle waiting for trucking will be held free of charge for one week. Every care will be taken, however no responsibility will be accepted.

Risk & Responsibility: Any person attending the sale do so at their own risk and the vendor assumes no liability, legal or otherwise, for any injury, accident, loss or damage to any person or property.

Terms & Conditions of Sale: All lots will be offered under the ALPA Livestock Terms and Conditions of Sale.

Disclaimer: The vendors and agents have produced this catalogue with every effort to ensure the accuracy of the information, however will not be responsible for any errors or omissions.
