JOSSLYN POLL HEREFORDS

Thank you for taking time to consider the Josslyn program. It is a pleasure for us to offer this year's bulls for sale at our second on property sale. This year was a very different season to the last few years with extreme wet weather. This year's sale bulls have done very well so far with the weather not effecting the performance or growth. 2022 has been another great year for the beef industry, with prices still extremely high in the autumn and spring sales. The team from Josslyn exhibited at local shows again this year and it was great to be back with familiar people and friendly faces. The bulls on offer should move forward and grow out extremely well after a good spring ahead. The calves on the ground this year by our two new sires Yalgoo Legend P180 and Rayleigh Quilipe Q056 are not disappointing us and we are looking forward to seeing them grow. With all this said, the sale bulls this year are looking great and I am extremely happy with how they have grown through these tough wetter times. I look forward to hearing of their progress in the future. Once again all bulls for sale have been scanned and performance records have been submitted and evaluated for breedplan.

Sale Information

Josslyn Poll Herefords is located 13 kms from Delegate on the Browns Camp Road. All bulls have been drenched and vaccinated with 7 in 1 and pestigard. Inspection of cattle is welcome and can be arranged by appointment. Josslyn Poll Herefords offers free delivery of bulls up to 200 kms. The sale this year will be a helmsman sale run live and online bidding on auctions plus Bull videos of each lot are located on auctions plus

DIRECTIONS TO JOSSLYN

Directions : From Delegate continue straight along Delegate Road towards the Victorian border 12 Kilometres out turn right onto Browns Camp Road continue down across the bridge up past the homestead to the sale yards on the left.

BREEDPLAN EXPLANATION

Breedplan is a performance evaluation programme that describes the genetic profile of bulls for a number of commercially important traits. This profile is given as an Estimated Breeding Value (EBV), expressed as a figure (+/-) relative to the breed benchmark of zero (0) for each trait. The EBVs in this catalogue are Hereford Group Breedplan EBVs and can be directly compared with Hereford Group Breedplan from other herds.

GL - Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate easier calving & increased growth after birth.

BWT - Birth Weight EBV (kg). The lower the birth weight EBV, the lighter is the birth weight potential of the progeny.

Milk - Genetic milk EBV (kg) reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.

200 WT - 200 Day Weight EBV (kg) indicates the relative weight advantage of a sire at 8-10 months of age.

400 WT - 400 Day Weight EBV (kg) indicates the relative weight advantage of a sire at yearling age.

600 WT - 600 Day Weight EBV (kg) indicates the relative weight advantage of a sire beyond yearling age.

CWT - Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA - Eye Muscle Area EBV (sq.cm) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. Bulls with positive (+) EBVs for this trait are expected to produce more muscular progeny than bulls with negative EBVs.

Rump - More positive EBVs indicate more subcutaneous fat and earlier maturity. Bulls with negative EBVs for this trait are expected to produce relatively leaner progeny than bulls with positive EBVs

RBV% - Retail Beef Yield Percentage EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield.

IMF% - Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on target markets, positive values are generally more favourable.

Genomic - As of October 2017, Hereford's Australia has begun incorporating Genomic DNA profiles into the BREEDPLAN analysis, which has seen an improved level of genetic linkage of an individual animal to the base population of the Hereford BREEDPLAN herd. This is what is referred to as Single Step.

Traits Observed: BWT,600WT,SS,FAT,EMA,IMF

Josslyn Rex R241 is a dominant bull with great shape and style I really like this bulls coat, head shape and eyes. A very safe bull to use over young heifers, he stands up well with the other bulls on offer here today. If you are looking for a low birthweight bull and do not want to lose growth this is the bull to do it.
