ClassiMate is a Livestock Visual Assessment tool designed to assist in providing accurate and unbiased assessment of livestock. This process generates valid assessment data for the purposes, of breed development, benchmarking and sale and marketing information.

www.classimate.net

Available on the **App Store**
GET IT ON **Google play**

If you aren't
Assessing
You're only
Guessing!

Measure. Manage. Market

- ClassiMate is an App, developed for the visual assessment of livestock in the yards and records the information on your mobile device.
- ClassiMate allows the assessor to visually evaluate the quality of the ram, by a series of prompts related to the animal's structure and overall correctness. The platform then generates an overall quality score and a graph to see the strengths and weaknesses of the ram.

How does it help me, the buyer?

- The animals body is broken into individual parts such as head, neck barrel, hindquarter legs and feet and given a score. This enables the purchaser to see where the positive attributes and negative points of the individual ram.
- The data provides relevant feedback to assist you, the buyer, with your purchase decision.
- **Share Graph:** The entire visual livestock assessment is broken down in a shareable document. It includes the assessors name, assessment criteria used, data assessed, trait scores, the total score for the animal and a photograph of the animal.
