2022 ON-PROPERTY RAM SALE

1063 Kidman Way, Jerilderie, NSW

Thursday 22 September

AT 12.30pm, Inspections from 10.00am

AuctionsPlus Interface Available

110 RAMS

Welcome to The Yanko's On-property Ram Sale for 2022

Dear Sheep Breeders,

We welcome you to The Yanko for our 2022 On-property Ram Sale. La Niña has given us another year of above average rainfall which has led to ideal lambing conditions here at The Yanko. With such great pasture growth lamb survival has been high, marking 162% lambs from maiden twin ewes.

Our breeding objective continues to focus on uncomplicated animals showing high value fleeces of quality and quantity, with early growth and good reproductive traits. Correct conformation and structure is paramount in the selection process. The 2021 drop rams are meeting this aim, and present as an even line of sires.

We have completed our fifth year collecting genomic samples of all rams bred, which provides full pedigree, and aids in the selection of industry leading sires. The 50K genomic test gives an indication of the genetic ability of each animal and this information is qualified by the measurement of fleece, body weight and structural traits at specific age stages. These ASBV's are further described on second last page of the catalogue.

At the Elders Riverina Sheep Expo in August, we were awarded the Northern Supreme Clip of the Year for 2021/22. This achievement recognises not only the quality of the wool, but also the preparation by the Wool Classifier, David Curtin, Wingfield Shearing. With heavy fleeces from a very good season, David met the challenge of keeping the fleeces to pieces ratio tight. It backs up what we see in the paddock, sale yards and wool floor - that we are producing industry leading genetics.

Together with my parents we wish to remember the great auctioneer, Kevin Norris. He brought life to any sale and I am fortunate to have seen him in action where bids came quickly and buyers were kept on their toes. In his later years, my Grandfather Ian went on a cattle tour to New Zealand with Kevin, who so kindly looked after him and made sure he enjoyed the adventure. A glass or two of red wine was shared at the end of the day and Kevin recounted once "that old Ian would be out first in the morning getting the ice off the bus ready to go".

We look forward to catching up on sale day, and wish successful buyers the best of luck with their purchases.

Ian Cameron

ALL COVID-19 SAFETY PRACTISES WILL BE ADHERED TO ON SALE DAY AND LUNCH IS PROVIDED

Average of the 2022 The Yanko Sale Rams

56 Poll and 54 Horned Rams will be offered for sale.

Measurement Dates

- Age: Born May/June 2021
- Shorn and fleece weighed 05/04/22
- ASBV Run Analysis 07/08/22
- Rams mid side sampled on 01/08/22, tested by Riverina Wool Testers

The information should be used only as a guide. The Yanko accepts no responsibility for the accuracy.

Health Status

- Brucellosis Accredited Free Flock
- Owner Declared Footrot Free Status
- Rams vaccinated for OJD

Agent Rebate

- A 2% rebate is offered to outside agents attending the sale to introduce and assist buyers.

Explanation of terms

Measured Performance Data

Sire	Sire of the ram - see sire summary for further information.
FD	Fibre diameter - the mean fibre diameter in microns of all fibres measure
SD	Standard deviation of the fibre diameter
CV	Coefficient of variation of the fibre diameter
Comf	Comfort factor - percentage of fibres under 30 micron
GFW%	Greasy fleece weight as a percentage of the entire drop.

Australian Sheep Breeding Values (ASBVs)

Yearling ASBVs estimate the genetic difference between animals at 10-13 months age and provides an indication of the genetic potential a sheep will pass on to its progeny. Analysis date 21 August, 2022.

YFD	Yearling fibre diameter (µm) – rams with more negative YFD ASBVs produce progeny with a finer fleece.
YCFW	Yearling clean fleece weight (kg) – rams with higher YCFW ASBVs produce progeny which will cut more wool as a yearling.
PWT	Post weaning weight (kg) - rams with more positive PWT ASBVs produce progeny that grow quicker and are heavier at 7 – 10 months age.
YWT	Yearling weight (kg) - rams with more positive YWT ASBVs produce progeny that grow quicker and are heavier at 10 – 13 months age.
MP+	Merino Production + : Based on a balanced wool & meat production where surplus progeny are sold as hoggets. Large increase in fleece weight, small increase in staple strength, body weight & reproduction. Moderate reduction in fibre diameter
DP+	The Dual Purpose + : A meat focused production system where surplus progeny are sold as lambs and a portion of ewes are joined to terminal sires. Large increase in body weight & carcass traits. Moderate increase in fleece weight. Maintain FD and SS. Mod increase in reproduction.
Shading	Indicates trait leaders ranked in the top 5, 10 and 20%, of all animals in the current year drop recorded by MERINOSELECT.

When selecting rams, it is important to take these factors into consideration and combine this information with a visual assessment of the rams. Further data is available upon request.
