HARRY'S WELL

2022 RAM INFORMATION

All rams in the catalogue have had the following treatments:

- ☑ Scabiguard scratched as lambs
- ☑ O.J.D vaccinated as lambs
- ☑ Full vaccination program with Glanvac 6 B12
 - (Latest treatment 17/8/2022)
- ☑ Backlined with lice treatment Extinosad
 - (5/7/2022)
- ☑ Drenched with Avomec Duel
 - (Last treatment 5/7/2022)
- ☑ Ovine Brucellosis Accredited (SA 1347)
- ☑ All rams 100% paddock reared

**South Australian Property Identification Number
(S.A. 325198)**

**Vendor declarations and Animal Health Statements
are in this booklet.**

GUARANTEE

All of our Rams come with a 12-month replacement guarantee. Should a ram die within 12 months of purchase we will endeavour to replace it with a ram of equal value and age.

HARRY' S WELL

SIRES USED FOR 2022 SALE RAMS

DAYS 17/354

Purchased at the Day's White Suffolk sale.

A huge and long ram. Very white in the muzzle.

RAMSAY PARK 18/8200

Purchased at Ramsay Park dispersal sale

A long structural correct ram with a clear white muzzle.

OMAD 16/308

Purchased at the Royal Adelaide Show

A long, well balanced ram with clean points

ILLOURA 18/0778

Purchased at the Foundation Breeders Sale

Very white ram with a clean white muzzle

BUNDARA DOWNS 18/2322

Purchased at the Foundation Breeders Sale

A long muscular ram with depth of carcase.

CATALOGUE GLOSSARY

D = DAYS RP = RAMSAY I = ILLOURA O = OMAD B = BUNDARA DOWNS

SIRES USED FOR 2022 SALE RAMS

Today's sale features sons of Day's 17/354 (left), purchased for \$12,000.

On the right is Days 14/0320: Sire of Days 17/354.

- Champion & Reserve Interbreed Champion Melbourne
- Reserve Senior Champion at Adelaide and Hamilton
- Reserve Interbreed Export Lamb Production Pair Adelaide

Below is Ramsay Park 18/8200, a ram that has produced some exceptional progeny for Harrys Well since purchase in 2019. Both rams retained in stud for future breeding were sired by 18/8200, with a large carcass and solid muscling his lambs are fast growing with good size.

- Sire of retained ram 1056 and Lot No.1 in this years sale

STUD NEWS

The team at Harry's Well (Kenton, Jody, Matt & Renae) would like to welcome you all to our 2022 Ram sale.

This year we believe we have taken more positive steps forward with the quality of the sale team on offer. With the assistance of Curly and Matt from Nutrien Ag Loxton we believe the sale team put together today is the strongest line up of rams in Harry's Well history.

With the season being relatively slow after the opening rains we were pleased with an average weight across all 150 lots of 97.1kg, measured on the 17th of August. The grams/day increase was calculated on every ram between 18/5/22 to 17/8/22 resulting in a 91-day period where the average weight gain per day was 250grams. Being late June/July drop lambs, these rams have more growing to do and will weigh heavier than listed in the catalogue on sale day.

We have chosen to retain two rams from the 2022 sale team as stud sires for our future breeding program, both were sired by Ramsay Park 18/8200 and are on display at the rear of the shed. Retained Ram 1056 (Wt - 126kg), born 15th June 2021, has outstanding structure with great feet, a triplet with his brother being Lot No.1 in this year's sale along with a retained stud ewe lamb. With careful ewe selections along with injections of great genetics from rams like Days 17/354 & OMAD 16/308 we are excited to see what these guys will do for us in 2023 and beyond!

Moving onto 2023 we have put a lot of effort toward the increasing of marbling and strong early growth. Ewe selections for 2022 joining were heavily scrutinised, along with purchasing two rams from the Adelaide Elite Sale in 2021. Both rams were sired by NEXTGEN 19/0158 from Somerset White Suffolk Stud, Victoria. NEXTGEN who at the time of recording had the highest terminal TCP index in Australia of 172.4. Both Somerset rams purchased, 20/0203 & 20/0159 are on display and have TCP indexes of 162.6 & 167.9 respectively. The increased ability for fast early muscle growth and increased marbling is exciting, thanks to 58 & 50mm of eye muscle depth (PEMD) we forecast our clients' lambs to continue improving into 2023, once again pushing the export weight limit for sucker lambs just like in 2022.

A special thanks to Curly and the team at Nutrien Ag Loxton and to all our fantastic helpers, without you the day wouldn't run as smoothly as it does.

We thank you for your attendance and hope you find some rams that will suit your needs.

MUSCLE SCANNING

Muscle scanning was performed through Rachel Chirgwin of RAC Farming on 18/05/2022.

Ultrasound scanning enables ram buyers to accurately select rams based on how well muscled and how fat that animal is without harming the animal.

It is also a valuable tool in breeding programs to promote genetic gain in carcase traits, especially when it is incorporated into Estimated Breeding Values (EBVs).

EYE MUSCLE DEPTH (PEMD)

This is the depth of the eye muscle, measured at the C site (*45mm from the centre of the spine*).

Research from MLA and the Sheep CRC indicate that selecting a ram with a more positive eye muscle depth can:

- Produce lambs with greater muscling and the potential for higher yielding carcasses.
- Produce progeny with a higher proportion of their carcase weight in the more valuable loin and hind quarter area of the carcase.
- Research based on the eating quality of meat indicates that lambs with greater EMD are less prone to stress and dark cutting.

FAT DEPTH (PFAT)

This is the measurement of fat depth at the C Depth.

- A deeper measurement indicates a fatter carcase.
