The McCallum families welcome you to our 12th annual combined White Suffolk and Suffolk ram sale.

Our families have been breeding Suffolk sheep since 1954 with the Gum View prefix being the third oldest Suffolk stud in Australia. We commenced breeding White Suffolk sheep in 1989 with a focus of breeding sheep with the well-known hardy characteristics of the Suffolk breed.

The Willochra Studs were founded in 2010 from the Gum View White Suffolk and Suffolk flocks when the KC McCallum & Co partnership was dissolved.

Both Studs continue to invest in new stud sires with suitable genetics to produce progeny to satisfy all market requirements with an ongoing focus on high growth rates and enough cover to finish on either pasture or in a feedlot situation.

This year our rams reflect the current season and we are confident that the 84 White Suffolk and 48 Suffolk rams on offer will meet your requirements.

We thank you for attending our sale today and wish you well with your purchases

Yours sincerely,

*Jeff & David McCallum & Families*

#### ASBV Explanation

**BWT** – Rams with lower ASBV's for birth rates produce lambs with lower birth weight.

**PWWT** – Rams with more positive ASBV's for Post Weaning Weight produce lambs that grow quicker and reach target weights in a shorter time.

**PWFAT** – Rams with a more negative ASBV for post weaning fat will produce lambs that are leaner at the same weight.

**PWEMD** – Rams with a more positive ASBV for post weaning eye muscle depth produce lambs that have more muscle, independent of weight and a higher lean meat yield.

**EQ** — EQ is a combination of traits that target improvement of terminal sire performance in prime lamb production systems.

**\*Please Note\*** - Birth Type is listed next to tag number
