

AuctionsPlus Friday 16th September

40x40Hd Angus cows and Calves.

These cows have their first calf at foot and calves are the progeny of an AI program using bulls Kennys Creek Witworth Z101 and Kennys Creek Mentor K2. These are a good line of cows doing an excellent job on sappy calves at foot. Calves were born from July 5 to 15 and all cows calved unassisted. Cows were purchased as weaners and were retained as breeders, they are now surplus to requirements for our breeding herd. With an early tight calving they will rejoin in the spring easily. They will be offered in 2 groups of 20x20.

55Hd PTIC Angus Heifers.

Joined to Kennys Creek Angus Bulls, K232, K243, K252, K255. These are all low Birthweight bulls. Heifers all joined within 1 cycle and will calve [from March 25th to April 15th 2017](#).

48Hd Hereford Heifers

PTIC To Kennys Creek Angus Bulls. 40Hd Are PTIC To AI Bull NDI J33. To Calve [13th March 2017](#). Remaining 8 hd are Ptic to bulls K232, K243, K252, K255 To calve [25th march to 15th April 2017](#). The majority of these Hereford heifers were purchased as calves from T A Fields, Wyvern station and come from a line of big frame cows based on genetics from Wirruna Herefords.
