

WHITE SUFFOLK RAM LAMB SALE

FRIDAY, 8TH FEBRUARY, 2019

1:00PM

100 RAM LAMBS

JOHN AND ANNA HAYES - 0429 834 239
BUTT LIVESTOCK & PROPERTY -
PHILL BUTT 0417 411 105

5TH ANNUAL RAM LAMB SALE

**FRIDAY, 8TH FEBRUARY, 2019
1:00PM.**

INSPECTIONS FROM 11:00AM. LUNCH PROVIDED.

**HELD UNDERCOVER ON PROPERTY—BULLAWORRIE
GRENFELL ROAD, YOUNG (REFER MAP ON BACK).**

**SALE OFFERING: 100 RAM LAMBS.
PHOTO'S OF FIRST 17 PENS (LOTS 1-34) ON WEBSITE.**

**VENDOR: JOHN AND ANNA HAYES
"BULLAWORRIE", YOUNG NSW .
PH: 0429 834 239**

**AGENT: BUTT LIVESTOCK AND PROPERTY
PHILL BUTT—0417 411 105**

**OUTSIDE AGENTS: 3% REBATE TO OUTSIDE AGENTS IN AT-
TENDANCE, SETTLING ON BEHALF OF CLIENTS.**

PHONE BIDDING AVAILABLE—CONTACT PHIL BUTT.

**TO BE ELIGIBLE FOR AWSA TRANSFER AS A STUD
SIRE, MINIMUM RAM PRICE OF \$2,000 (PLUS GST)**

VISIT: www.glenfinnanplg.com.au

Glenfinnan Prime Lamb Genetics have current lambplan ASVB's, are
Brucellosis Accredited, OJD Vaccinated, Footrot Free
and Independently Classed for Structural Soundness.

Welcome to Glenfinnan Prime Lamb Genetics Fifth Annual Ram Lamb Sale.

Flock History:

The flock was first established in 1978 on the Monaro by Anna's father Jock Litchfield who in conjunction with the University of NSW started crossbreeding Suffolks and Dorset's and line breeding the "whitest" progeny. Earlier breeding trials had indicated that the Suffolk breed produced fast growing, well muscled lambs, but these were penalised in the market because of their black fibres. Jock received the first three ewes released from the Hay Research Station, and for the next few years, in conjunction with a small but growing number of interested producers, received a ram in return for his three best ram lambs.

In 1984 the nucleus flock from the University of NSW was sold to PLG (Prime Lamb Genetics), a group of 35 ram breeders who ran the flock at Charles Sturt University Wagga Wagga, NSW, of which Jock was a part. This group had a breeding program that accessed the top genetics, with the aim of breeding modern, profit-making sires for commercial lamb production.

In 1996 we purchased the stud from Jock and for the past 21 years have been striving to produce rams with traits that are economically important for a successful prime lamb production.

Since the stud has been at Bullaworrie, we have sourced some of the best White Suffolk Genetics from across Australia, selecting for early maturity, growth rate, eye muscle size and carcass conformation.

Guarantee:

It is important to us that you are happy with your purchase. We guarantee that the ram lambs we sell are ready to join. It is an advantage to see the ram at the same age as the progeny that you wish to sell.

If you should encounter a problem with any ram you purchase within 12 months of the purchase date we will replace the ram with one of equal quality and value, or credit the full amount less GST against any ram you purchase from us in the future.

LAMBPLAN— understanding LAMBPLAN to make consistent genetic improvement.

Glenfinnan Prime Lamb Genetics use LAMBPLAN to provide accurate information on the genetic merit of all animals in each flock.

LAMBPLAN is Australia's genetic information system for sheep breeders and producers. In LAMBPLAN, performance and pedigree information is combined to give Australian Sheep Breeding Values—ASVB's which are simple pictures of the values of each animals' genes.

ASBV's are provided in this catalogue for 5 main traits:

Birth Weight (bwt): Describes the animals genetic value for weight at birth. A higher ASVB will mean the progeny will be genetically heavier at birth. It is important to combine an average type birth weight with ram shape (shoulders and head).

Weaning Weight (wwt): Describes the animals genetic value for growth. A higher ASVB will mean the animal is genetically faster growing in the first 100 days. A higher early growth rate will benefit those producers who sell their lambs as suckers or target the trade market.

Post Weaning Weight (pwwt) Describes the animals genetic value for growth. A higher ASVB will mean the animal is genetically faster growing over 225 days. A higher post weaning weight will benefit those producers who sell as trade or keep their lambs for longer to target the export market.

Fat (pfat): Describes the value of the animals' genes for fat depth. A negative ASVB means a genetically leaner animal. A ram joining to X bred ewes will need to be leaner than one joining to merinos or if the progeny is being marketed at 8-11 months of age.

Muscle (pemd): describes the value of the animals genes for muscling. The higher the ASVB for eye muscle means the animal has genetically more meat which means a potentially better yield.

LAMBPLAN INDEX VALUES:

In addition, the catalogue includes LAMBPLAN Index Values. These combine the ASVB's for Weight, Fat and Eye Muscle Depth in a single measure of genetic merit.

The index's used in this catalogue are:

- ◆ Carcase Plus which describes the value of the rams genetics at 6 months of age (post weaning) and is the most relevant for prime lamb production.
- ◆ The Lamb 2020 Eating Quality Index is targeted at terminal producers interested in improving the meat eating quality of their prime lambs while continuing to improve production traits in a balanced way.

The table below gives a summary of the genetic merit of this years Glenfinnan Prime Lamb Genetics sale rams compared to the average of all terminal breeds.

All Glenfinnan PLG sale rams are in the top 10% of the terminal breed for Carcase Plus, Lamb Eating Quality and muscling. They are in the top 20% for weaning and post weaning weight and the top 35% for fat. Birth weights are just under average over the terminal breed.

2018 Drop Average	bwt	wwt	pwwt	pfat	pemd	C+	LEQ
Glen PLG Sale Rams	0.32	9.8	15.3	-0.4	2.5	206.1	140.4
Terminal	0.33	8.5	13.0	-0.5	1.5	184.3	127.1

Catalogue reference:

An asterisk * before a ram's tag number indicates that it is an appendix ram - i.e. by a Dorset sire.

Photographs of the first 17 pens (Lots 1 - 34) are available on the website at :

www.glenfinnanplg.com.au

Sire reference:

Farrer 130 (Triplet): Purchased last year from Farrer White Suffolks in Tamworth, this ram ticks all the boxes. He is a long smooth shouldered ram with outstanding growth. We have joined him to ewes that have produced progeny with tremendous early growth, good muscling and style. Look out for his progeny in the sale.

Sire: Farrer 150096	bwt	wwt	pwwt	pfat	pemd	LEQ	Carcase +
Dam: Farrer 120237	0.33	13.0	19.6	-1.5	1.5	158.6	222.2

Gemini 161 (twin): Purchased from Gemini stud in Victoria, this sire has proven itself again this year with excellent progeny on the ground. Exceptional growth and eye muscle combined with great shape of carcass. He is well represented in the sale and is great for any prime lamb enterprise.

Sire: Gemini 140077	bwt	wwt	pwwt	pfat	pemd	LEQ	Carcase +
Dam: Gemini110109	0.28	10.5	17.1	-0.3	3.0	149.0	219.7

Farrer 130086 (triplet)- This ram just keeps performing—purchased From Farrar White Suffolks in Tamworth for his great carcass shape, good white Suffolk traits and outstanding lambplan figures—low birth weight, high weaning weight and eye muscle. He is a proven sire and his progeny would be a great choice as a sire over merino or maidens with his low birth weight and positive fat.

Sire: Pollambi 451	bwt	wwt	pwwt	pfat	pemd	LEQ	Carcase+
Dam: Farrer 100031	-0.06	9.6	14.9	0.4	2.8	136.1	204.5

Glenfinnan 160259 (twin): Used selectively as a ram lamb and again last year, this ram performed exceptionally well. He has terrific, well balanced figures and is a long smooth stylish ram with low birth weight for ease of lambing. He is well represented in the sale and his progeny would suit any sheep breed.

Sire: Anden 219	bwt	wwt	pwwt	pfat	pemd	LEQ	Carcase+
Dam: Glen 140066	0.20	9.3	15.4	-0.6	3.2	144.8	214.2

Glenfinnan 160032 (twin): - Sired by a proven stud ram Glen 204 this ram has proven himself for the second year. He has terrific early growth and is a very stylish type. His progeny are powerful high yielding rams— check their birth weight if joining to maidens.

Sire: Glen 204	bwt	wwt	pwwt	pfat	pemd	LEQ	Carcase +
Dam: Glen 120012	0.75	11.6	17.6	-1.4	1.7	142.9	213.4

Derrynock 234 (twin) - A Dorset ram purchased from Derrynock Stud in Victoria. This ram has extreme muscling and a great prime lamb carcass. He is a proven sire—we are always impressed with the shape of carcass of his progeny who will produce extremely high yielding lambs.

Sire: Derry140033	bwt	wwt	pwwt	pfat	pemd	LEQ	Carcase +
Dam: Derry140602	0.60	10.1	15.2	0.1	4.4	150.5	226.0

Derrynock 484 (twin) = Another Dorset ram purchased from the same stud. He has thrown rams with clean faces and points with great shape and well balanced figures. Look out for his progeny in the sale.

Sire: Derry140146	bwt	wwt	pwwt	pfat	pemd	LEQ	Carcase +
Dam: Derry120151	0.30	10.3	16.7	0.4	2.5	130.1	209.6
