

'On-Property' Ram Sale

Wednesday 18th January 2023

Inspection: 11:00 am

Auction: 1.00 pm

81 Selected Mount Ascot Merino Rams
45 Selected Jolly Jumbuck Poll Merino Rams

 @mtascotjollyjumbuck

- Brucellosis Free Accredited Studs
- Sept/Oct 2021 drop
- Shorn August 2022
- Fleece tests measured on the 10th December 2022
- Carcass scanning 9th August 2022 (11 months)
- Body weights taken 6th January 2023
- ASBV Merino Analysis run 7th January 2023

AUCTION CONDUCTED BY

COMMISSION FOR OUTSIDE AGENTS

4% rebate paid to agents for newly introduced clients.
 2% rebate paid to agents for existing clients.
 Must be introduced 24 hours prior to sale.

GST

All Mount Ascot & Jolly Jumbuck rams will be sold GST exclusive.
 GST of 10% will be added to the knockdown price of each ram.

NOTICE TO BUYERS

To assist you in selecting the most productive sheep, we have supplied current fleece measurements , Body Weights and Mob Indexing.

Mob indexing is an index of each ram showing individual traits, in a plus or minus form, relative to the overall average of all rams measured from their respective stud.

2023 Ram Averages			
Mount Ascot Merinos		Jolly Jumbuck Poll Merinos	
Micron	19.8	Micron	20.0
CV	15.6	CV	15.7
CF%	99.3	CF%	99.2
EMD (11 months)	27.1	EMD (11 months)	28.4
FAT (11 months)	1.9	FAT (11 months)	2.2
Body Wt (kg)	92.7	Body Wt (kg)	93.6

EXPLANATION OF TERMS

MID-SIDE SAMPLES TAKEN 10TH DECEMBER 2022

Mt Ascot measured by Australian Wool Testing Authority
Jolly Jumbuck measured by Riverina Wool Testers

MICRON

The mean fibre diameter of all the fibres measured.

CV%

The co-efficient of variation of fibre diameter. It is expressed as a percentage of standard deviation and mean fibre diameter. Figures less than 20% are desirable. The lower the better.

CF%

Comfort Factor.

0% of fibres above 30 micron = 100% Comfort Factor.

Above 95% - desirable

Above 98% - excellent

CURV

Fibre curvature is a measurement of crimp using fibre snip-pets. It is measured in units of degrees/mm.

GFW%

The percentage of the greasy fleece weight compared to the average of the entire flock.

BWT

Body weight measurements taken on the 6th January 2022

EMD

Eye Muscle Depth. The depth of the eye muscle is measured in millimeters, between the 12th & 13th long rib.

FAT

The depth of fat is measured in millimeters between the 12th & 13th long rib.

EXPLANATION OF TERMS

INDEXES

Indexes are provided in the row below a measured trait for the Mt Ascot Merino's. These show the difference for a individual trait from the average of the mob for each ram.

AUSTRALIAN SHEEP BREEDING VALUES

YWT

Yearling weight estimates the genetic difference between animals in liveweight at 360 days of age.

YFD

Yearling fibre diameter estimates the genetic difference in fibre diameter at 360 days of age.

YEMD

Yearling eye muscle depth estimates the genetic difference in EMD at the C site at 60kg liveweight.

YFAT

Yearling fat estimates the genetic difference in GR fat depth at 60kg liveweight.

DP+

The DP system focuses on genetic improvement of fleece weight and body weight. This production system is for self-replacing Merino flocks with a greater focus on lamb production. This means that there is greater emphasis on growth, carcass performance and reproduction to capitalise on the high value of lambs. Wool production is still important, but the balance is on increasing fleece weight while trying to limit change in fibre diameter and staple strength.

For more information on ASBV's and Indexes visit:
www.sheepgenetics.org.au

'ON-PROPERTY' RAM SALE—January 2023

*Please note EMD & FAT measurements are not current.
Rams were measured as lambs at 11 months of age so appear a lot smaller than normal.*
