QWOOLSERVICES

## ROSELEA Merino Stud - History

Roselea Merino Stud was founded in 1936 by T.A.Hacker on Bundemar and Haddon Rig bloodlines. The sheep produced were well nourished 64S quality medium wools.

Through the 1950's and 60's only Haddon Rig and Uardry sires were used. Pooginook blood was added in the early 80's.

The Roselea Poll Stud was established in 1957 on Success and Reno blood. Some Poll Boonoke and Eudora sires were added in the 1980's.

In the early 90's Peter Hacker became Roselea Studmaster. Since then Billandri and Willemenup blood has been added to the polls and more Haddon Rig and Uardry to the Merinos.

Over recent years size and body weight of the sheep has been given higher priority and a greater emphasis has been placed on softness of the wool . These measures have resulted in a lowering of the micron by nearly 2 microns over the past 23 years without the loss of fleece weight.

## Wool Marketing

Our national team of wool specialists work with our clients, providing personalised service to maximise returns for your wool growing business. We offer a variety of wool marketing solutions, including auction, forward contracts, direct to mill and specialty bale to retail programs, allowing us to tailor a wool marketing strategy that delivers the best results for each client.

## Speciality Wool Marketing Programs

For growers who share our vision of connecting along the supply chain to the consumer, we specialise in wool marketing programs that take your wool from bale to retail. As well as offering industry programs such as Authentico and SustainaWOOL, we also offer ZQ and DNA Provenance, which are exclusive to AWN in Australia.
