- TIGHTER
LAMBING
PATTERN

FOR INCREASED FERTILITY, CONCEPTION & PRODUCTIVITY

Joining is a high demand period for ewes. Australian research¹ has found that ewes treated with Multimin around a month before joining showed improved conception rates compared to untreated animals.

- 3 in 1 trace mineral injection
- Rapid absorption and accurate dosing
- For strategic trace mineral top up
- World class scientific research

Treatment	Fertility per 100 ewes
Multimin	~125
No Multimin	~115

Multimin provided ewes with a significant improvement in fertility¹

ALFOXTON MERINO & POLL MERINO STUDS
FLOCK 4294 & 1333

A warm welcome is extended to all clients and visitors to our 33rd annual Ram Sale. The year past has been challenging with another record rainfall received, it has been positive to see the white wool on our flock, resisting the wet weather. We shored twice in 2022, the March 16.6 micron line sold for 2140c/kg, our 17.5 micron line sold for 1750c/kg. While the October wool market was easier we still managed an average of \$2600 per bale over the two clips. 350 lambs were sold in 2022 with an average price of \$196.61. It is easy to see why a dual purpose merino flock is highly profitable.

We offered and sold 2 rams at the Armidale housed sale last year. Our poll ram won Grand Champion Poll and sold for equal second top price of \$14,000 to Kurrajong Park stud, Delungra. Our horn ram won Champion fine medium ram and sold for \$6,000 to Loch River stud, Darby's falls. Our 32nd Annual ram sale saw a record \$8000 paid for Lot 3 a 99.5kg big carcass son of Alf18-358 his micron was 16.1, he had a YCFW 24, Ywt 9.7 and MP+ index 164. Our non mulsed rams sold to four different states of Australia for a \$2,300 average. Alfoxton offered and sold 6 rams at the Australian Sheep and Wool Show, Bendigo, all four poll rams were sired by Alf18-358. Our lead ram Alf20-152PP sold to the Rollinson family, Goolgumbula for \$18,000. The Ford family purchased the top priced horn ram for \$6,500. Our six rams averaged \$7,166.

Our 2021 drop Greasy Fleece weight average, shorn twice March & August was 5.6kgs.

Alfoxton sire 150430 performed well in the New England Merino Lifetime Productivity Project at the CSIRO Chiswick farm. His F1 ewe progeny led the cohort in weight gain from weaning to yearling, GFW and CFW from yearling to adult, EMD and fat. In 2021 these ewes achieved a foetus rate of 150% and a weaning rate of 135%. These results put the ewes 13% above the next best sire in both metrics. It is pleasing to see that these ewes are combining good reproduction rates and carcass traits with good wool production.

Rebate

A 5% rebate is offered to licensed agents who are attending and introducing buyers.
