9<sup>th</sup> February 2023

Certificate No. 001 -2023

### Re: Ennerdale Proprietors Pty Ltd - 2023 Sale Bulls

On Friday, 2nd December, 2022, I visually examined the conformation, mouths, eyes and gait of 40 Poll Hereford bulls being offered for sale on Wednesday 15<sup>th</sup> February, 2023 by **Ennerdale Proprietors** at the Dundonnell property, "Ennerdale".

At the same time, I examined the external genitalia of these 40 bulls, both visually and/or by manual palpation. The scrotal circumference of each bull was also measured and recorded. All bulls measured in excess of the minimum scrotal circumference as recommended for the breed. Testicular consistency was considered to be normal in all 40 bulls.

Lot No	Tattoo No	SC (cms)	Lot No	Tattoo No	SC (cms)
1	ENNS207	39	21	ENNS275	37
2	ENNS268	43.5	22	ENNS277	34
3	ENNS263	41	23	ENNS284	35
4	ENNS233	41	24	ENNS257	39

19	ENNS274	36	39	ENNS316	37
20	ENNS227	35	40	ENNS337	35

From the examination performed, I consider each bull to be free from any significant physical defect at the time of examination, with the results being consistent with good fertility. As a result, I consider each bull to be a good candidate for insurance.

A sample of tissue has also been collected from each bull offered for sale in the form of an ear notch. These samples were submitted for BVDV antigen capture ELISA testing. All 40 bulls were found to be negative for this test. This means that **NO bulls in this sale are persistently infected with BVDV ie All bulls in this report are non PI animals.**
