# THE FIRST POWERSHIFT SONS TO SELL AT NAMPARA

# Welcome

Welcome to our fifteenth annual bull sale. We have 105 bulls catalogued for sale on Tuesday February 14th (3:30pm SA time). We are always trying to remain consistent and true to our type - big, free moving, proud bulls who cover some ground and carry some muscle. When we introduce a new sire, he has to tick all of these boxes to maintain our commitment to weight for age, doability, bone and muscling.

This year's offering includes the first sons of Texas Powershift P632, full brother to the record-breaking Texas Powerplay and sire of our Interbreed Champion bull at Adelaide and Melbourne Royal shows in 2022, Nampara Silverado S221. In 2020 Texas Angus sold Texas Powerplay for an on-property record of \$108,000. They kept his full brother, Texas Powershift P632. We were lucky enough to secure the southern Australian rights on Powershift and we have used him heavily in our program. This bull is everything we are on about -carcase weight and 600 day weight in the top 3% of the breed, EMA in the top 10%, combined with calving ease and a low birth weight. A bull that is so flexible, sound and eye appealing. Our Interbreed Champion, Silverado is a reflection of his sire's ability to put some punch in his calves and this is seen through the draft with the Powershift bulls. We like the figures on these bulls but we like the look of the Powershift bulls even more — bulls that can walk, carry themselves with ease and will keep on going when others have stopped.

Similarly, the Nighthood bulls are also very consistent and have bred true to type. They are strong-headed bulls with muscle, shape and bone. Nampara Sky's the Limit S146, a Nighthood daughter, had a great year winning Reserve Junior Champion at Adelaide Royal and Senior Champion at the Angus Round Up amongst her many accolades. The Nighthoods are producing sound, functional cattle that suit a variety of options.

Once again, a line of heifer bulls used earlier in the year to join 500 PTIC females destined for the Naracoorte, Mortlake and Mt Gambier feature female sales in January will be included in the sale. These low birth weight, high growth bulls specifically selected for heifer joining are not a typical heifer bull option and have proved very popular.

All Nampara bulls are structurally assessed and fertility tested and are well known for their quiet temperament. By assessing structure, temperament and calving-ease and by using a limited number of sire lines over large mobs, Nampara can more accurately appraise the impact a sire is having within the herd. The joined heifer program also means that we are aiming to breed the type of heifer bulls that can be confidently used to mate heifers whilst at the same time not compromising on shape or frame.

Buyers who cannot attend the sale in person will be able to operate through AuctionsPlus. We also have independent people available to assess bulls on your behalf. We welcome any enquiries before the sale to ensure your selection of bulls suits your breeding program. All sale bulls are guaranteed into their first working season and Nampara has a JBAS 6 Status. The bulls have been vaccinated for Vibrio, Pestiguard, and a 7 in 1 needle including their follow up vaccinations.

We are very proud to present a quiet draft of bulls with sire lines that are true to their type. This allows buyers to select from a number of bulls within each sire grouping. We are also proud of the fact that our cattle are working and making a difference in the commercial world, the true driver of profit which is, and should be, why we do what we do.

If we can be of assistance to you prior to, or after the sale, please do not hesitate to contact us.

#### **Stuart and Natalie Hann**

**Inspection of Bulls** On the property from 1pm on the afternoon of the sale. Bulls will be on display on Thursday 2nd February and Friday 3rd February as part of the Victorian Beef Week at Mortlake and Casterton respectively as well as our on property open day on Monday 6th February as part of the SA Beef Week or for inspection on property any time by arrangement.

**Delivery** To be co-ordinated immediately after the sale, either to be trucked directly from the property or arrangements made with the vendor to paddock animal/s until trucking available. Bulls will be delivered free within 150km of Nampara and all bulls sold will be freight assisted.

**Fertility** The bulls are guaranteed fertile and have been tested on the 9th January 2023 by Drew Pickford of Nationwide AB. Notice of infertility in all cases of such, to be in writing and in the hands of the vendor not later than six calendar months from date of sale.

The purchase price of any bull proved to be infertile shall be refunded in full (less the salvage value) without interest expense, cost or damages in the form of a credit at a future bull sale. A vet's certificate shall be produced by the purchaser when required.

**Rebate** 3% to outside agents introducing buyers in writing to the selling agents 24 hours prior to the sale and settling within seven days. Does not apply to affiliates of selling agents.

**GST** All lots are sold exclusive of GST.

**Insurance** Nampara recommends insuring all purchases at the fall of the hammer. An Elders insurance representative will be available on sale day to help with this.

**Guarantee** In the event of a bull proving to be infertile or incapable of natural service into their first working season, the vendor will credit the purchase price, less the salvage value of the bull, provided the problem is not caused by injury or disease incurred since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain an independent veterinary confirmation of any claim. In the unlikely event that a credit is issued, it may only be claimed on one bull at a future bull sale.

**Disclaimer** Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue and the information neither the vendors, selling agents or representatives thereof assume any responsibility what so ever for the correctness, use or interpretation in the information of animals included herein

# How to Register and Bid on AuctionsPlus

- Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- Fill in buyer details and once completed go back to Dashboard.
- Select "**Sign Up**" in the top right hand corner.
- Complete buyer induction module (approx. 30 minutes).
- Fill out your name, mobile number, email address and create a password.
- AuctionsPlus will email you to let you know that your account has been approved.
- Go to your emails and confirm the account.
- Log in on sale day and connect to auction.
- Return to AuctionsPlus and log in.
- Bid using the two-step process unlock the bid button and bid at that price.
- Select "Dashboard" and then select "Request Approval to Buy".
- If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

#### **Brief Description of TransTasman Angus Cattle Evaluation**

**Calving Ease DIR (%)** Estimates of the genetic differences between animals in the ability of their calves from 2yr old heifers to calve without assistance. Positive values are desirable.

**Calving Ease DTRS (%)** Estimates of the genetic differences between animals in the ability of their 2yr old daughters to calve without assistance. Positive values are desirable.

**Gestation Length (days)** Estimation of the genetic differences between animals in the number of days from conception to the birth of a calf. A negative value is desirable.

Birth Weight (KG) Estimates of the genetic differences between animals in calf birth weight.

200-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight Estimates of the genetic difference between animals in cow weight at 5yrs of age.

Milk Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight Estimates the genetic differences among animals in hot standard carcase weight at 650 days of age.

**Eye Muscle Area (EMA) – cm2** Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcase.

Rib Fat Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300kg carcase.

Rump Fat Estimates of genetic differences among animals in fat depth at the P8 rump site on a standard 300kg carcase.

**Retail Beef Yield** Estimates of genetic differences among animals in percentage retail beef yield in a 300kg carcase with 2-3mm fat trim, adjusted to 85% chemical lean.

Intra-Muscular Fat % (IMF%) Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300kg carcase.

**Net Feed Intake** Estimates of genetic differences between animals in feed intake at a standard weight and rate of weight when in a feedlot finishing phase.

#### **Explanation of Raw Data Information**

Actual Eye Muscle Area - cm2 The actual eye muscle area recorded for Breedplan data.

Actual Intra-Muscular Fat % The actual recorded percentage of intra-muscular fat for Breedplan data.

**Scrotal Circumference** The actual scrotal circumference measurement recorded.

P8 (mm) The actual measurement of fat at the P8 site for Breedplan data.

Rib Fat (mm) The actual measurement of fat depth at the 12/13th rib site.

#### **An Explanation of the Beef Class Structural Assessment System**

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure. :

A score of 5 is ideal

A score of 4 or 6 shows a slight variation, but this includes most sound animals.

An animal scoring 4 or 6 would be acceptable in any breeding program

A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs

A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing

A score of 1 or 9 should not be catalogued and are considered immediate culls

Beef Class Structural Assessment to be conducted by Accredited Assessor:

Max Bowman (#1026) prior to sale.

Mid December 2022 TransTasman Angus Cattle Evaluation

#### Heifer's first calf

Total outcross heifer bull breeding package. You always need to start with a good one and this bull is no exception. With a number of Powershifts in the catalogue this may well be the early one to grab. Part of our 2022 show team, S27, combines all the traits of his sire – calving ease, low birth weight, muscle and length. He carries his weight with ease and stands proudly in the pen. A ripper to start!

Purchaser.....

Mid December 2022 TransTasman Angus Cattle Evaluation

This bull has been a true standout from birth. He has so much style and presence—a real cow maker. He has the attributes of his sire, the \$85,000 Nampara Liberty, and will one of the last offerings of this bull who has had such an impact on our herd. Full brother to Nampara Princess P86 whose first calf was the top-priced spring bull at our 2022 sale, we love the muscle pattern to this bull, the way he carries his weight and pulls up square every time as though he owns the place. Nampara will sell full possession and half share of semen and marketing rights.

Where do we start with Silverado. First of all take a look at the bull himself - everything we are on about. Muscle, length, frame, mobility, temperament. Then take a look at his TACE figures – 200, 400, 600 day and carcase weight all in the top 3% of the breed combined with big scrotal and EMA. Silverado was part of the Junior Interbreed Champion Pair at Adelaide Royal before heading over to Melbourne Royal to win Junior Interbreed Champion there as well. We know that winning at shows isn't everything and might even be a distraction for some but if nothing else this bull has proven that good bulls with carcase, length and shape can be pretty boys as well!! He has impressed everyone who has seen him, has an outstanding temperament and is going to produce calves with some serious thump. His dam is part of our donor program and we know she will keep producing like this!

Nampara will sell full possession and half share of semen and marketing rights.

Pretty handy figures on this bull – Lot 5. Going to really suit the top-end commercial man. We really like the style and eye appeal of this bull. He is so balanced as he struts around the pen and has that front paddock kind of look about him.

Then when you look at his figures again the Powershift impact becomes obvious – outstanding calving ease in the top 10% of the breed and a super low birth weight of +1.6. His dam is already part of our donor group and S112 shows us why. Beautifully balanced bull.

Purchaser......Price.....

Lot 6: Nampara Powershift S42

Mid December 2022 TransTasman Angus Cattle Evaluation

#### Heifer's first calf

Out of one of our favourite heifers, S42 has been a strapping calf from the start. Such a proud, well-shaped mobile bull with a huge rear end. Massive 600 day weight at +164 and carcase weight at +86 puts him in the top 10% of the breed. Big nuts with a big butt! A quiet bull, very easy to look at.

Lot 7: Nampara Capitalist S242

#### Heifer's first calf

This bull's sire was our second top-priced bull in 2020 and with the combination of calving-ease king LD Capitalist and the punch of Atahua Freedom in the pedigree, the final product is a bull who combines muscle and softness. Beautiful skin on this bull with a sogginess that suits a variety of options. A heifer's first calf nonetheless!

#### Heifer's first calf, Used over heifers

You might have seen this guy at the beach over summer – he's the one who's always the first to get his shirt off! He struts around the pen with that "look at me" kind of presence. Then take a look at his set of figures! An excellent spread of low birth and high growth with calving ease and IMF in the mix. Very similar to the previous bull but it has to be said again – long, heavy, easy doing and depth through the flank.

Nampara will sell full possession and half share of semen and marketing rights.

Mid December 2022 TransTasman Angus Cattle Evaluation

Not too many Powershifts left in the sale but here's another one so true to type – low birth weight, calving ease and rib and rump fat. A ball of muscle with some length. Very easy bull to look at.

#### A Note on Semen Testing

As with any species, fertility can be a problem. This is why Nampara semen test ALL sale bulls.

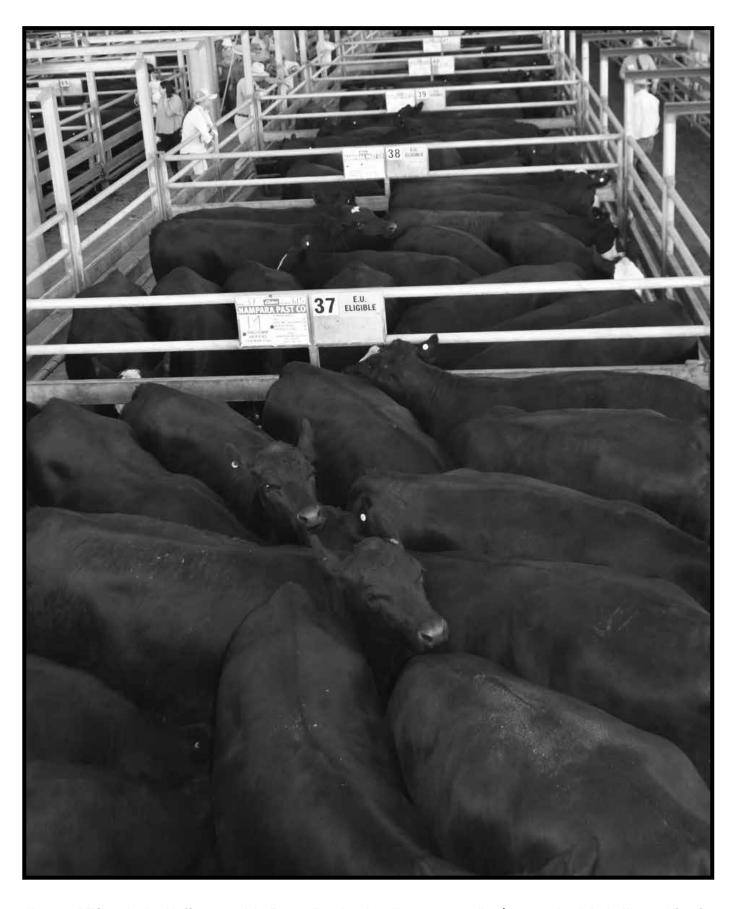

Bulls are examined by Nationwide Artificial Breeders for abnormalities including warts, penile fraenulum and erection issues, as they undergo a physical examination of external genitalia and conformation.

The crush side test involves analysis of spermatozoa for motility, concentration, morphology and semen infections. This information provides testicular and epididymal function which helps predict the potential fertility of the bull. Only bulls that pass are certified and made available for sale.

A satisfactory result gives a high chance of fertility HOWEVER, please observe your new bull in action when first in service, complete with a thrust!! Stress of an animal can also affect fertility. Look after your bull! The most conscious producer will semen test all herd bulls, every year, before joining.

For any questions contact Drew Pickford, Nationwide Artificial Breeders Pty Ltd. Ph: 0428 925 255

Nampara PTIC vendor-bred heifers topped the Feature Female sale at Naracoorte to sell to \$3540 per head. At the Western Victoria Livestock Exchange Female Sale Nampara-blood PTIC heifers topped at \$4000.

A total of 460 heifers joined to Nampara bulls averaged \$3320 in January 2023.
