## Welcome to our 2023 Bull Sale

Every year mother nature throws up something different doesn't it! We had a later than usual autumn break but an incredibly long and late spring that gave us many challenges but was also very rewarding. Early hay cuts ended up poor quality but we got some later cuts and certainly have been able to run our bulls on dryland lucerne longer than normal.

The bulls offered to you come from two herds that between them highly record over 400 registered calves each year. We believe the effort we put in to scouring the country and world for new genetics, extensive AI and ET programmes and detailed performance recording is not only rewarding but necessary. It is necessary to give people the confidence that when they buy our bulls all I's have been dotted and T's crossed. Not only have we put effort into our breeding and recording programmes but additionally all bulls have been genomically tested, vet checked, are semen tested and have strong vaccination histories.

Our field days are on Tuesday 7th February and we welcome all those that can attend. If that doesn't suit and you would like a pre-sale inspection please give us a call. Videos of all sale bulls will be available on both the Auctions Plus and our own websites prior to the sale. Please contact us if you have any queries.

Regards,  
Lachy and Alastair

# Buyers Information

## Inspection

All cattle will be available for inspection from 11.00am on the morning of the Sale, however inspection can be arranged before hand by appointment.

## Luncheon

Will be available on the property.

## Delivery

While every care will be taken, no responsibility can be accepted whilst awaiting delivery.

## Transfers

Please indicate on the Buyers Instruction Slip if a transfer is required.

## Health

All cattle are officially government confirmed as TB free and Brucellosis free. The properties have a J-Bas 6 status for Bovine Johnes disease. All sale cattle treated with 7 in 1 (booster due Autumn 2023). All sale cattle treated with Dectomax, January 2023. All sale bulls ear notch tested as NOT persistently infected with the BVDV virus. All bulls have been vaccinated with Pestiguard and Vibrovax.

## Semen Retention

Days and Allendale reserve the right to in the future collect semen in any bull catalogued. This would be solely for within herd use and collected at the vendor's expense and purchaser's convenience.

## Accommodation and Transport

The Auctioneers or vendors will be pleased to arrange accommodation in Adelaide or Bordertown.

## Buying Orders

The Auctioneer's Stud Stock staff are well acquainted with the herd. Buying orders will be diligently executed by officers experienced in stud beef cattle practice.

## Insurance

Can be arranged for transit and/or periods up to twelve (12) months cover.

## Rebate

A rebate of four percent (4%) will be paid to outside agents in attendance. A rebate of one percent (1%) will be paid to outside agents not in attendance but introducing client in writing prior to sale.

## COVID-19

Please be aware that we are obliged to abide by the current COVID-19 rules, regulations and restrictions on Sale day. Please take care.

## BUYER'S INSTRUCTION SLIP - see Page 72

# Breedplan Explanation

## EBV's are provided for the following traits:

<b>CE DIR</b>	Calving Ease Direct. Indicates how this animal influences the birth of its progeny. Positive EBV's indicate easier calving.
<b>CE DTRS</b>	Calving Ease Daughters. Indicates how well the animal produces daughters that have easier calving.
<b>GL</b>	Lower Gestation Length EBV's indicate easier calving and increased growth after birth.
<b>SS</b>	Scrotal size is an indicator of male fertility in regards to semen quality and quantity. SS is also positively associated with female fertility.
<b>Birth Weight</b>	The lower the birthweight EBV, the lighter is the birthweight potential of the progeny.
<b>Genetic Milk</b>	Reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.
<b>200 Day Weight</b>	Indicates the relative weight advantage of a sire at 8-10 months of age.
<b>400 Day Weight</b>	Indicates the relative weight advantage of a sire at yearling age.
<b>600 Day Weight</b>	The best single estimate of an animals genetic merit for growth beyond yearling age.
<b>MWT</b>	Mature Cow Weight is an estimate of the genetic difference in cow weight at 5 years of age.
<b>CWT</b>	Estimates the genetic difference in carcass weight and is adjusted to 650 days of age.
<b>Fat Depth</b>	Bulls with negative (-) EBV's for this trait are expected to produce relatively leaner progeny than bulls with positive (+) EBV's.
<b>EMA</b>	Bulls with positive (+) EBV's for this trait are expected to produce more muscular progeny than bulls with negative (-) EBV's.
<b>Retail Beef Yield</b>	Bulls with larger EBV's are expected to produce progeny with higher yielding carcasses.
<b>Intramuscular Fat %</b>	Positive EBV's indicate likelihood of more intramuscular fat.
<b>Accuracies</b>	The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.
<b>Selection Indexes</b>	An index ranks an animal for single production goal - profit. They take the hard work out of knowing how much emphasis to give each of the available growth, maternal, carcass and fertility EBV's when selecting parent animals. An index is a composite EBV of traits best suited to a particular production system and target market.

**Southern Self-Replacing Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing straight bred Hereford herd targeting the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 300 kg carcasses with 10 mm P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

**Northern Self-Replacing Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic market. This index is suitable for use by both straight bred Hereford herds and in crossbreeding programs where Hereford bulls are being used over a *Bos indicus* based cow herd (e.g. flatback). Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period.

**Southern Baldy Maternal Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over *Bos taurus* females (e.g. Angus). A portion of the heifers are retained for breeding and so maternal traits are of importance. The steers and surplus heifers are destined for slaughter at 20 to 22 months of age. Steers produce 300 kg carcasses with 10 mm of P8 fat depth, while heifers produce 270 kg carcasses with 12 mm of P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

**Northern Baldy Terminal Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd (e.g. flatback) using Hereford bulls over *Bos indicus*/Tropical females (e.g. Santa Gertrudis) where all progeny (male and female) are destined for slaughter. Steers and heifers are slaughtered at 20 to 22 months of age. Steers produce 340 kg carcasses with 14 mm of P8 fat depth while heifers produce 300 kg carcasses with 17 mm of P8 fat depth.

# AuctionsPlus

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

7

Fill in buyer details and once completed go back to Dashboard.

2

Select **"Sign Up"** in the top right hand corner.

8

Complete buyer induction module (approx. 30 minutes).

3

Fill out your name, mobile number, email address and create a password.

9

AuctionsPlus will email you to let you know that your account has been approved.

4

Go to your emails and confirm the account.

10

Log in on sale day and connect to auction.

5

Return to AuctionsPlus and log in.

11

Bid using the two-step process – unlock the bid button and bid at that price.

6

Select **"Dashboard"** and then select **"Request Approval to Buy"**.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Godfather N022 was used as a yearling and then sold at our sale to C & M Bateman at Furner for \$16,000. At that same sale 5 maternal brothers sold to average \$15,600. Another maternal brother topped our sale in 2022 selling for \$52,000 to Yarram Park. H31 replaces her grandmother Fancy U5 as our current most influential cow. We are continuing to use N022 by AI. He is a trait leader for gestation length, IMF and scrotal size. He is also in the top 5% of the breed for EMA. His first 11 sons sold to a top of \$40,000 to Talbalba Herefords and averaged \$21,636. He has 9 sons on offer.

King Pin Q201 is our heifer specialist. We kept him as our pick of the Godfather N022 sons as a bull who would add carcass and be a safe heifer option. His data certainly backs up that decision. He is a trait leader for Gestation length, Birth weight and scrotal size. He is also in the top 1% of the breed for calving ease and IMF and top 5% for EMA. He has 6 sons on offer and an outstanding maternal brother sells as lot 10.

Sometimes a bulls predictability is amazing. We used Q137 as a yearling and got 15 calves. To have 8 of them in the bull sale is a great achievement. We have used 3 other sons of Fancy K26 including Horizon M028 who sold to Yarram Park and is breeding particularly well. Horizon Q137 is also strong in carcass traits being in the top 1% for IMF and top 5% for EMA. He sold in our 2021 bull sale to Mahwallock East.

# Don't let pestivirus rob you blind

Pestivirus is an insidious cattle disease.  
It can take from you before you know it.

It causes significant reproductive and performance issues, and weakens immune systems – leading to other costly cattle health problems like respiratory disease. In fact it costs the industry over \$114m every year.<sup>[1]</sup>

To protect your herd from pestivirus and optimise your returns,  
it pays to be on Pestigard.

Find out how easy it is at your local rural reseller or cattle vet.
