BALAMARA LIMOUSIN & ANGUS STUD

Inaugural Bull Sale

FRIDAY 24TH MARCH 2023

12PM

Auction to be held at
Brunswick Showgrounds Selling Complex
Ridley St, Brunswick WA 6224

Inspection from 10am

Light refreshments before the sale | Please join us for lunch after the sale

20 LIMOUSIN BULLS - LOTS 1-6 & 12-25

5 ANGUS BULLS - LOTS 7-11

JBAS 8

Bulls on offer can be viewed on
AuctionsPlus. Or scan the QR codes
in the catalogue to view videos.

For your interest,
Brazen and Balamara
fabricated farm
products will be
showcased at the
venue

Welcome

Balamara Limousin & Angus Stud was established as a joint family venture between Michael and his parents John and Misha. Foundation Limousin Females were purchased approximately 16 years ago with the aim of producing docile, structurally sound, good calving ease and high growth terminal sires. Some years later, a prominent Angus Stud was purchased with the focus being on fertility, reproduction and structural confirmation to complement our existing Balamara Limousin terminal sire program. Through experience, global genetic procurement and collaborative work with some of the industry's best, we developed our enterprise to focus on the production of new generation, industry relevant sires based on the interactions between genetics and environment. In short, our overarching breeding objective is to:

'Optimize client production systems by securing genetics that will improve production performance in real working conditions'.

To achieve the Balamara Limousin & Angus Stud objective, a holistic approach has been adopted beginning from the ground up with careful consideration of soil health, provision of multi-species pastures for grazing and a holistic approach to manage animal health, welfare and production from conception to sale date. Our Family has specifically tailored our management practises to ensure that come sale day, the bulls on offer are backed by a complete health care plan and have been carefully nurtured to give them the best possible start to their reproductive career.

Our genetic selections have been driven by consumer demand with docility at the forefront. We welcome any opportunity to work alongside clients to ensure their needs are met. This includes sourcing genetics globally to deliver superior outcross pedigrees that combine performance and functionality, ultimately driving profitability.

Michael, John and Misha, in partnership with Elders and H.Francis & Co, are excited this year to invite you to our Inaugural Balamara Limousin and Angus bull sale. Please join us for light refreshments before the sale and lunch at the conclusion of the sale. We would be delighted if we can play a role in the success of your breeding objectives and ongoing production system.

Our Warmest Regards,

The Mamo Family

Your New Bull

RECOMMENDED STRATEGIES TO TRANSITION YOUR BULL TO YOUR PROPERTY'

Balamara rising 2-year old bulls have been strongly selected for docility, however, the sale process is nonetheless stressful for the bull.

We strongly recommend your consideration of the following points for a safe delivery and smooth transition to your bull/s new home:

- Balamara will provide free delivery to major centres utilizing reputable livestock transport providers. However, insurance is at the purchasers discretion.
- At point of delivery, Balamara strongly recommends a welcoming party of a few quiet cows, or steers, preferably for a few days. Please ensure hay, water and if available pellets immediately upon arrival.
- Balamara strongly recommends you do not immediately join your bull with other bulls to avoid dominant challenge behaviour.
- Balamara does not use dogs for livestock work and adopts MSA recommended handling practices. Be patient and minimize noise upon arrival.

All bulls have been vaccinated prior to the sale for:

- Vaccinated against Pestivirus (BVDV) to ensure they are protected against the effects of this infection and tested to show they are not BVDV Persistently Infected (PI) animals
- Vaccinated with 7 in 1
- Vaccinated against Vibriosis, a sexually transmitted cattle disease

WORKING YOUR NEW YOUNG BULL

All bulls were semen and morphology tested prior to sale indicating they are fertile and capable of natural service.

Balamara recommends that your newly purchased young bull should not be joined with older bulls for multiple-sire joining, to avoid potential injury. Rather, use as single-sire groups, or with other bulls of similar age. If the latter, run the junior bulls together for a few weeks before working.

TERMS AND CONDITIONS OF SALE

The conditions of sale are those as described by the Auctioneer on sale day.

INSURANCE DISCLAIMER

Insurance risk of stud animals sold at auction transfers to the purchaser at the fall of the hammer, including animals remaining on the vendor's property post sale. It is recommended that purchasers insure their animals at the completion of the sale. Stud animals are not covered by commercial livestock insurance.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

.....

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

.....
from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Suffixes

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES

LIMOUSIN SUFFIXES			
TRAIT	SUFFIX	STATUS	STATUS ARRIVED AT BY Details available for individual animals on Limousin database Animal Details page
HORN STATUS	PP	HOMOZYGOUS POLLED	DNA test confirmed homozygous polled, or Animal is homozygous polled by pedigree as both parents are confirmed homozygous polled, or Animal is confirmed homozygous polled by progeny analysis process.
	P	POLLED	DNA test confirmed heterozygous polled, or Animal is untested, information was provided by breeder.
	Ps	POLLED WITH SCURS	Identified by details provided by breeder at time of registration, or DNA test confirmed heterozygous polled and breeder information indicates animal shows scurs.
COAT COLOUR	B	BLACK	DNA test confirmed heterozygous black, or Animal is untested, information provided by breeder.
	R	RED	Identified by details provided by the breeder.
	A	APRICOT	Identified by details provided by the breeder.
F94L GENE	AA	F94L 2 COPIES	DNA test confirmed animal carries 2 copies of the F94L gene, or Animal carries 2 copies of the F94L gene as both parents carry 2 copies of the F94L gene.
	AC	F94L 1 COPIES	DNA test confirmed animal carries 1 copy of the F94L gene.
	U	F94L Status UNKNOWN	Animal is untested and parent status is unknown.

Accuracies: Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer: The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

S25 is a homozygous polled embryo son out of the renowned Flemington Courtenay and by super sire Wulfs Zane. In typical Zane form, S25 is clean fronted, sound footed and super docile. He is a full ET brother to Myers Master Court. We believe S25 would be suited to any stud or commercial programme.

S29 is a homozygous polled bull stacked full of pedigree and performance. His sire is a Myers King of Hearts son out of our most prolific donor cow Maryvale Hot Butter H201. With Hunt Credentials 37C on his dam side, S29 is an outcross homozygous polled, heterozygous black super sire supported with impressive data. With 7 traits and 2 indexes in the top 10% of the breed, S29 is a bull not to be missed.

In 2021, we were given the opportunity to purchase the pick of the Koojan Hills heifers. We struck gold when Balamara Superhero S17 was raised as the first natural born calf of Koojan Hills Q189. S17 embodies what we are striving for in our Angus programme. He is sound footed, clean fronted, displays plenty of natural thickness and is super docile. At 19 months of age he scanned 42cm scrotal circumference, fat scores at P8: 11mm and Rib: 7mm, with 110 sq. cm EMA and 6.0% IMF.
