WELCOME

Welcome to the First Annual Blackjack Angus Bull Sale to be conducted in a helmsman style sale hosted via AuctionsPlus from 2pm, finishing to a timer.

The vision of Blackjack Angus is to produce reliable, fertile, modern cattle for Gippsland’s discerning beef producers. The Blackjack Angus female line are founded on proven donors from Anvil & Ardrossan Angus bloodlines together with quality Wilcoola and Malvern Pride cows.

DNA Parent Verification is a cornerstone of Blackjack’s operation to ensure buyers are receiving the pedigrees and genomics they are paying for.

Astute phenotypical selection of both walking and AI sires over the past four years has seen our current crop of young bulls displaying great shape, docility and production traits. We are proud of our first crop of bulls and hope they serve our customers well for many years to come.

Thanks for visiting Blackjack Angus.

Stewart & Jayne Cluning

SALE INFORMATION

INSPECTION

Bulls will be available to view on our open day Saturday 28th January from 9am-5pm, or from 11am sale day. Inspection can also be arranged at any time by appointment.

OPEN DAY ATTENDANCE

Our Open Day and Sale Day will be COVID-19 Compliant. We will follow the current government regulations at the time.

PHOTO & VIDEOS

Photos and videos of the bulls will be available to view on AuctionsPlus closer to the sale.

SAFETY

Visitors enter pens at their own risk. Children are not permitted in pens. All sale bulls have been screened for temperament and are quiet to handle under normal circumstances. Unfortunately, sale day places abnormal pressure on bulls so the behaviour of even the quietest bull can be unpredictable. We please ask that while inspecting the bulls you treat them with respect and don't over crowd them.

HEALTH

- Parent verified and tested for genomics through DNA.
- Drenched with Dectomax
- 2 x Ultravac 7 in 1
- 2 x Vibrovax
- 2 x Multimin
- Passed crushside fertility examination

TRANSPORT

We will endeavour to co-ordinate delivery. If bulls are needed ASAP, please let us know at the time of purchase.

LOCATION

Blackjack Angus is located at 4244 Old Sale Road, Westbury. Turn off the Princes Highway at Moe, following the Walhalla Road (C466 signage) before turning left 1km north of the town area into Old Sale Road. Blackjack Angus is located 2km on the left. See back of catalogue.

INSURANCE

There is no vendor insurance on the bulls. We recommend you insure all new bulls against injury and death.

GUARANTEE

In the event of a bull proving to be infertile for natural service in the first year, the vendor will offer to supply a suitable replacement (if available), or credit the purchase price (less any salvage value of the bull) to be used at the next sale. This is provided the problem is not caused by injury or disease since sale day. Any claim must be accompanied by a relevant Veterinary certificate.

TAKING DELIVERY OF YOUR NEW BULL

The bulls have always been run in a large mob and have never been alone. It's a good idea to have some of your own cattle in the yards when your new bull arrives. A few steers, PTIC cows or even an old bull to keep him company while he settles in.

ANGUS AUSTRALIA DISCLAIMER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select "**Sign Up**" in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select "**Dashboard**" and then select "**Request Approval to Buy**".

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with an IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claw).	Lower EBVs indicate a lower score.
	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate a lower score.
	Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a lower score.
Selection Index	SA	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	SA-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The SA-L index is similar to the SA index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the SA aims to maintain mature cow weight, the SA-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

Comments: Steakhouse is a nuggety bull that promises to be a great heifer bull and one that will improve foot, claw and leg attributes in its offspring. Great maternal traits (calving ease, milk, MCW) in this bull's pedigree and the ability to positively influence phenotype will make Steakhouse a great contributor to any breeding herd.

Comments: Sure Fire is the complete package for the buyer looking to make a dramatic improvement to their herd in 2023. Sure Fire has positive EBV figures (15 measures are in the top 30% of the breed). His exceptional feet and leg scores together with modest birth weight make Sure Fire hard to fault for any discerning buyer.

Comments: Steinway is an impressive son of GB Fireball who will deliver EMA improvement to your herd. At every weighing he continues to lead his contemporaries with a long athletic body like that of his dam BJAQ03 (check out her EBV's). Steinway will be a great addition to any beef growing orchestra!

Comments: Scratchmarker is a versatile bull that should neatly fit into any beef herd. Scratchmarker offers smaller calves making him ideal for heifers and cows whilst offering industry average growth rates. Positive fat scores and favourable foot and leg angles also make Scratchmarker attractive for any number of beef producers.

Comments: Steel was purchased as a calf at foot when we purchased his mother as the second top priced cow at Murdeduke Female Disposal in 2021. Steel is a Temania Pheasantry son that has impressed us in terms of his growth, docility and shape. As the youngest bull at this year's sale, its safe to say he has the most potential.

Purchaser:..... **\$:**.....

ANGUS PARENTAGE ASSURANCE PROGRAM

The Angus Parentage Assurance program highlights sale or semen catalogues listed on the Angus Australia website by vendors who have invested in DNA testing for parentage verification, and who in turn, have improved the integrity of the pedigree, genetic condition and Angus BREEDPLAN EBV information that is displayed for any Angus animals or semen that they are offering for sale.

The parentage assurance program has two different categories, Angus Sire Assured and Angus Parentage Assured.

Angus Sire Assured applies to sale or semen catalogues where all lots have been DNA sire verified, whereas Angus Parentage Assured applies to sale and semen catalogues where all lots have been DNA parent verified (both sire and dam).

Angus Parentage Assurance Program

Eligibility Criteria

- Online sale or semen catalogue listed on Angus Australia website
- 100% of lots have been DNA sire verified

Eligibility Criteria

- Online sale or semen catalogue listed on Angus Australia website
- 100% of lots have been DNA parent verified (i.e. both sire and dam)

Sale and semen catalogues that qualify as either Angus Sire Assured or Angus Parentage Assured are identified on the Angus Australia website with the relevant parentage assurance program logo.

Users of the SaleSELECT and SemenSELECT tools on the Angus Australia website can also limit searches to those catalogues that qualify as either Angus Sire Assured or Angus Parentage Assured when searching for animals or semen that they may wish to purchase.
