INAUGURAL ANNUAL SALE

WEDNESDAY 29TH MARCH 2023
AT 11.30AM

BOYANUP SALE COMPLEX

OFFERING

36 BLACK & TRADITIONAL BULLS

2 REG. BLACK COW/CALVES

6 COMM. BLACK YRL HEIFERS

COMPLIMENTARY BBQ LUNCH 12.30PM

INSPECTION FROM 9AM

SELLING AGENTS

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

7

Fill in buyer details and once completed go back to Dashboard.

2

Select “**Sign Up**” in the top right hand corner.

8

Complete buyer induction module (approx. 30 minutes).

3

Fill out your name, mobile number, email address and create a password.

9

AuctionsPlus will email you to let you know that your account has been approved.

4

Go to your emails and confirm the account.

10

Log in on sale day and connect to auction.

5

Return to AuctionsPlus and log in.

11

Bid using the two-step process – unlock the bid button and bid at that price.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

Buyers unable to attend the Bullock Hills sale will be able to bid on AuctionsPlus. Prospective bidders and purchasers must register with AuctionsPlus or contact their local agent prior to the sale.

A supplementary sheet will be provided pre sale with actual birth weight, raw scan data (taken 11/01/23), and current weight.

BULLOCK HILLS SIMMENTALS

FOUNDED 1995

All bulls are diligently performance recorded and are offered for sale under the Pfizer quality assurance program. Bulls fertility test by Nutrien Breeding Services.

Guarantee: Bulls purchased at auction are guaranteed for fertility, temperament, and structural soundness. The guarantee does not cover injury or disease incurred after delivery. Any claim must be accompanied by a relevant veterinary certificate.

We do recommend that you insure your purchase until the completion of the first mating.

National Bovine Johnes Assurance Score: Bullock Hills Simmental is a JBAS 8 property. Bulls are eligible for entry into all states.

Delivery: Assistance available if required. A rebate of 50% of the freight will be offered to interstate purchasers.

WELCOME

Welcome to the Inaugural Bullock Hills Simmental sale. Bullock Hills Pastoral is a family managed mixed farming operation in the South West agricultural region of W.A. comprising of Simmental cattle, Merino sheep and grain production. The Traditional Simmental stud was established in 1995 by Brad & Sylvia based on Hamelin Park bloodlines. The Black Simmentals were introduced in 2010 due to client demand and our personal interest in the possible future market trends.

With a steady increase in bulls offered at the WALSA Supreme Bull Sale annually and a growing number of private selections following, the decision was made to offer all suitable bulls at one date and venue. This has also opened the option to offer a small selection of open cows with calf and a line of commercial black heifers.

Brad and Sylvia share their passion for breeding with daughter Jenna and son Sam, who both have professions off farm and assist when able. Sons Lachlan and Hayden manage general farming activities, staff and are involved in all aspects of the operation. We are pleased to offer 36 bulls and 8 females in our first sale. They are all well grown, of sound phenotype, performance recorded and display strong carcass traits. Docility and poll status is also critically important in the selection process. Only two bulls display any horn with the majority homozygous polled.

Bullock Hills values the data valuation formulated through Breedplan. As of 1st April 2023, Simmental Australia will move from Australian/New Zealand EBV's (Estimated Breeding Values) recording to CGEN/IGS which is a Canadian Simmental Association called EPD's (Expected progeny differences). To assist buyers in the transition, both systems have been provided.

Traits heavily monitored at Bullock Hills are those associated with calving, growth and carcass values.

The colour coding within this catalogue highlights the top end percentile bands. The Domestic Maternal Index is used when retaining daughters for breeding, whereas the Vealer Terminal Index is useful when terminating all progeny.

Paddock performance still remains paramount in the initial selection process with all cattle having to prove their own worth in the field. This includes yearling bulls after weaning and before any potential sale preparation. Due to our location (2hrs inland from the coast) we believe our cattle are very adaptable to a wider climate variation, while maintaining softness, style and doing ability.

If unable to attend the inspection morning on Friday 10th March, all lots will have videos loaded on the Auctions Plus platform, the Australian Simmental website (Simmental.com.au), Bullock Hills website. If unable to attend on sale day, please use the Auctions Plus platform.

A sincere thankyou to all who have purchased Bullock Hills bulls in the past. Our aim is to breed honest and reliable cattle and assist other breeders in their journey of a profitable and rewarding venture.

Regards,

Brad, Sylvia & family

BULLOCK HILLS
BHS
SIMMENTAL

BREEDING

Bullock Hills utilises two calving periods. Summer calving (February) for those preferring to purchase yearling bulls. Winter calving (June/July) for those wishing to purchase rising 20-month-old bulls.

Both matings involve A.I. and are backed up for one cycle only. This allows best performing cows to be flushed multiple times and be returned into a later calving period. It also makes better use of recipis available for embryos to be implanted.

BULL PREPARATION

Yearling bulls (Summer calving), weaned 11th October. Feed assisted from 18th November.

20 mth old bulls (Winter calving), weaned 28th February. Feed assisted from 18th January.

Three weeks prior to sale ration will scale back to hay, silage and straw.

BREEDPLAN EBV'S –

HOW TO USE THEM

ESTIMATED BREEDING VALUES (EBV's)

EBV's for growth traits are shown as + or – kg.'s liveweight. The animals are ranked in comparison to a breed baseline of 0 for each trait. The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

Accuracy (%) are presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV. As a general indication, accuracy below 75% should be regarded as low.76%-85% as medium, and above 85% as high.

BIRTH WEIGHT EBV (kg)

Use the EBV to select lighter birth weights. The lower the EBV, the lighter the calves are expected at birth.

200 DAY MILK EBV (kg)

The EBV for 200-day milk should be considered in breeding replacement females to ensure reasonable milking ability in the herd.

200 DAY GROWTH EBV (kg)

An estimation of the bull's genetic merit for growth to weaning, calculated independently of the maternal milk effect. Use the EBV in selecting bulls for vealer production.

400 DAY WEIGHT EBV (kg)

This EBV gives an estimation of the yearling weight potential. Steer and feeder producers should place most emphasis on the EBV.

600 DAY WEIGHT EBV (kg)

This EBV is an estimation of the bull's genetic potential beyond yearling age.

CARCASE TRAITS

EMA – EYE MUSCLE AREA EBV (cm²)

Estimates genetic differences in eye muscle area at the 12th/13th rib of a 300kg carcass. More positive fat and earlier maturity.

RUMP- RUMP BEEF YIELD (%)

Estimates the fat depth at the P8 site.

RBV – RETAIL BEEF YIELD (%)

Represents quantity of boned out meat from a carcass. Higher EBV's indicate better yielding carcasses.

PERCENTILE BANDS

This table shows where a bull's EBV is ranked against the rest of the Simmental breed in Australia and New Zealand.

AUSTRALIAN SIMMENTAL SELECTION INDEXES

There are four different selection indexes calculated for Australian Simmental animals.

These are:

- Domestic Maternal
- Export Maternal
- Northern Terminal
- Vealer Terminal

Each selection index describes a different production/market scenario and relates to a typical commercial herd using Simmental bulls and targeting the following specifications.

DOMESTIC MATERNAL

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Southern Australia (e.g., Angus cows) targeting the domestic supermarket trade. Steers are either finished on grass or grain (e.g., 60-70 days). Steers are marketed at 430 kg live weight (240 kg HSCW and 6 mm P8 fat depth) at 14 months of age. Daughters are retained for breeding.

EXPORT MATERNAL

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Southern Australia (e.g. Angus cows) targeting the export trade. Steers are finished on grain (e.g. 120 days) and marketed at 700 kg live weight (380 kg HSCW and 8 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding.

NORTHERN TERMINAL

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Northern Australia (e.g. Brahman cows) targeting the export trade. Steers are finished on grass and marketed at 630 kg live weight (345 kg HSCW and 12 mm P* fat depth) at 28 months of age. This is a terminal sire production system therefore no daughters are retained for breeding.

VEALER TERMINAL

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Southern Australia (e.g. Angus cows) targeting the vealer trade. Vealers are weaned and sold at months of age weighting 350 kg (195 kg HSCW and 6 mm P8 fat depth). This is a terminal production system therefore heifers are not retained for breeding purposes.

All selection indexes are reported as an EBV, in units of relative earning capacity (\$) for a given production/market scenario. They reflect both the short term profit generated by a sire through the sale of his progeny, and the longer term profit generated by his daughters in a self-replacing cow herd (where applicable).
