**MIDLANDS**

**CATTLE BREEDERS'  
ASSOCIATION**

***35th Annual Gingin Bull Sale***  
**Thursday 9th March**

**Angus 62 bulls**

Kapari - T & L Sudlow 33 bulls

Black Tara - Kupsch family 17 bulls

Cookalabi - Topham Bros 12 bulls

**Murray Grey 12 bulls**

Mungatta - C & DJ Stickland & Sons 12 bulls

**Limousin 11 bulls**

Tara - Kupsch family 8 bulls

Woronyne - Aspen Farms 3 bulls

*Sale stock - agents terms and conditions  
as per agents notice board at sale venue*

*A 3% rebate will be paid to any  
Outside Agent who introduces new clients to the stud .*

*New clients must be nominated in writing  
to either Elders or Landmark  
48hrs prior to the sale.*

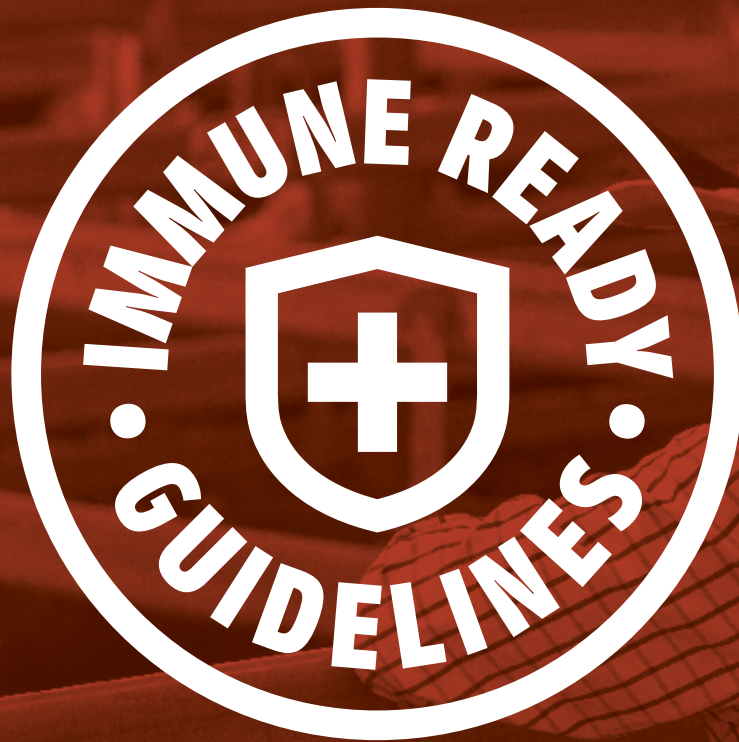

*The Agent must accompany and assist their client on the sale day*

**The Sale will be conducted according to the guidelines of the WA Health Department.**

*Front cover photo courtesy Kane Chatfield , Farm Weekly*

*Vendor photos inside this catalogue courtesy of Bob Garnet (Countryman) and Kane Chatfield (Farm weekly).*

*We would like to thank them for their efforts.*

# LOOK FOR THE SIGN BUY WITH CONFIDENCE

All bulls in this sale have been vaccinated for clostridial diseases, leptospirosis, pestivirus, vibriosis and infectious bovine rhinotracheitis (IBR). They have also been tested for pestivirus and are not persistently infected.

Other regionally important vaccines may have also been administered to enhance protection.

A National Cattle Health Declaration will be provided.

# AuctionsPlus

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: [info@auctionsplus.com.au](mailto:info@auctionsplus.com.au)

## UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

### What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

### What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

### Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

### Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

### Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

### Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDir	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate a lower score.
	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate a lower score.
	Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a lower score.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

Traits Observed: GL,200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC

Notes: We have chosen this Chisum 255 young sire to lead the sale because we love his depth of body, width across the rump and his all-rounded balanced disposition. These S55 sons rank very highly on docility, with a set of EBVs that we think will breed beautiful replacement females.

Selection Indexes

Table with columns: Dir, Dtrs, GL, BW, 200 W, 400 W, 600 W, MCW, Milk, SS, Doc. Rows: EBV, ACC, Perc. Values: Dir +9.5, Dtrs +9.3, GL -10.1, BW +2.7, 200 W +57, 400 W +97, 600 W +119, MCW +99, Milk +13, SS +0.6, Doc +13.

Table with columns: \$A, \$A-L. Values: \$A \$225, \$A-L \$385.

Traits Observed: GL,200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: The genetic combination of Powerpoint on the sire and Baldrige Bronc on the dam has combined exceptionally well on this bull and we rank him very highly. Structurally very correct, he is smooth through the shoulders, has terrific topline strength and width across the loins, which make him very hard to fault. Have a very good look at these EBVs as we believe they are exceptional. A Powerpoint son recently sold for \$170 000 over East. We retained a 2020 born Powerpoint son for stud use.

Traits Observed: GL,200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: The first of only two Paratrooper sons in our sale and it's hard not to get excited about this bloodline. We have more Paratrooper sons next year and have heavily used two of his sons, Rembrandt and Rocketman in the 2022 AI program. Like his father, S43 displays a superb carcass shape, muscling and softness. His birth EBV of 3.9 is below average and yet his 200-day EBV is in the top 6 percentile band, as is his docility EBV. We have retained all Paratrooper heifers.

Notes: This moderate-framed Paratrooper son has caught our eye from birth. Out of a stunning Chisum 6175 first calver dam, he combines the carcass shape, softness and doing ability of Paratrooper, with the extra power that the Chisum 6175 bloodlines breed. This joining of the two genetics has produced an outstanding young sire with a superb set of EBVs.

Notes: The first of the Kapari Bronc P46 sons, we are very impressed with this bloodline. We retained a Baldridge Bronc son in 2019 and he has performed extremely well over the past few years. Sons have topped the Gingin sale previously and all heifers we have retained exhibit outstanding thickness and temperament, exhibiting great doing ability, generally carrying positive fats in their EBVs. S85 is an outstanding example of this bloodline, calving ease in the top 20%, top 4% for temperament and he has one of the best birth-to-growth curves in our team.

Mid January 2023 TransTasman Angus Cattle Evaluation

Selection Indexes

Table with columns: TACE, Dir, Dtrs, GL, BW, 200 W, 400 W, 600 W, MCW, Milk, SS, Doc. Rows: EBV, ACC, Perc. Second table with columns: TACE, D t C, CWT, EMA, Rib, Rump, RBY, IMF, NFI-F, Claw, Angle, Leg. Rows: EBV, ACC, Perc.

Table with columns: \$A, \$A-L. Rows: \$188, 65; \$346, 50.

Traits Observed: 200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: Kapari Shuey is a no-nonsense type of bull, like his Eagles namesake. Long bodied, wide across the ribs with a very good set of EBVs, that includes docility in the top 15% of the breed. Very strong genetics on the maternal side coming out of one of our most reliable cows, by Equator A241, she has not missed a calf in ten years and all of her male calves have made the sale team.

Mid January 2023 TransTasman Angus Cattle Evaluation

Selection Indexes

Table with columns: TACE, Dir, Dtrs, GL, BW, 200 W, 400 W, 600 W, MCW, Milk, SS, Doc. Rows: EBV, ACC, Perc. Second table with columns: TACE, D t C, CWT, EMA, Rib, Rump, RBY, IMF, NFI-F, Claw, Angle, Leg. Rows: EBV, ACC, Perc.

Table with columns: \$A, \$A-L. Rows: \$207, 43; \$350, 47.

Traits Observed: GL,200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: These powerful Stunner sons are consistently smooth bodied, strong across the topline with a bit of extra fat in the carcass. S41 is a fine example, excelling in all carcass traits. It's very hard to get a bull that is in the top 20% for Rib and Rump, while still ranking highly, in this case, in the top 14% for Retail Beef yield.

Traits Observed: GL,200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC

Notes: The last chance to get a Nectar son, and one who is versatile enough to cover heifers and mature cows. This bull has an awesome depth of body, smooth through the shoulders, combined with very good EBV data. In addition, this bloodline is quite outstanding for feet structure. Have a good look at the phenotype of this bull, he is the full package.

Selection Indexes table with columns: \$A, \$A-L. Values: \$188, \$315, 64, 72.

Traits Observed: 200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: Thick and soft, with the typical Bronc doing ability, this proud, upstanding young sire has a tonne of volume and depth. He excels in the calving ease traits, in the top 2%, with an exceptionally low birth EBV of -0.6. He would be well suited to heifer mating if required. He, too, is also strong in the carcass traits, being positive in the Rib and Rump and has a docility ranking in the top 10%.

Table with columns: TACE, Dir, Dtrs, GL, BW, 200 W, 400 W, 600 W, MCW, Milk, SS, Doc. Rows: EBV, ACC, Perc. Second table with columns: TACE, D t C, CWT, EMA, Rib, Rump, RBY, IMF, NFI-F, Claw, Angle, Leg. Rows: EBV, ACC, Perc.

Selection Indexes table with columns: \$A, \$A-L. Values: \$171, \$325, 79, 66.

Traits Observed: 200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: These Bronc genetics are very consistent and versatile. As we have done to produce this young sire, we have regularly crossed them with the Thunderbird bloodline with some outstanding results. Like his sire, S71 has the capacity to breed with heifers or mature cows and will give a trouble-free calving period.

Selection Indexes table with columns \$A and \$A-L. Values: \$185, \$309, 67, 76.

Traits Observed: 200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: We love the phenotype of this young sire. We strategically used the Natuanui bloodline to add length to the carcass and width across the hindquarter. This well balanced, fine coated, deep, long bodied calf, is the result of this breeding. If you're looking for feed efficiency, he is ranked in the top 5% for that trait.

\$212	\$398
38	13

**Traits Observed:** 200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

**Notes:** Out of a first calving Millah Murrah Lincoln heifer and sired by Kapari Chisum Q30, we couldn't be happier with this genetic cross. He is long-bodied, with an outstanding topline and versatile enough to use over heifers and mature cows. S62 has a very strong set of figures, but is outstanding in the Calving ease and Gestation length traits, in the top 1 and 2% of the breed.

**Traits Observed:** 200WT,600WT(x2), SC,Scan(EMA,Rib,Rump,IMF),DOC, Genomics

**Notes:** Sired by Kapari Chisum Q30 out of a Black Onyx first calving heifer, S97 is very similar to the previous lot. We retained Q30 for stud use in 2021 as we have seen some very good results from the Chisum genetics. They are characterised by long bodies, strong topline, docile, with plenty of power in their growth EBVs and with an excellent constitution.

Traits Observed: BWT,400WT,600WT, Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: Black Tara Tigerland S73 isn't necessarily a shoutout to Richmond fans, but kudos to his sire HF Tiger. We have again gone back to this proven sire within our breeding program because of the depth and volume of his progeny. S73 is testament to that, combined with the great MM Brenda L97 who is building a strong female heart within Black Tara, this bull give the opportunity to access some proven long-term strength in the genetics.

Purchaser:..... \$:.....

Table with columns: TACE, Dir, Dtrs, GL, BW, 200 W, 400 W, 600 W, MCW, Milk, SS, Doc. Rows include EBV, ACC, Perc and D t C, CWT, EMA, Rib, Rump, RBY, IMF, NFI-F, Claw, Angle, Leg.

Selection Indexes

Table with columns: \$A, \$A-L. Values: \$245, \$400, 8, 12.

Traits Observed: BWT,200WT,600WT, Scan(EMA,Rib,Rump,IMF),DOC, Genomics

Notes: Lot 41 will have you rubbing your eyes as Seeing Double S91 enters the arena- ( his twin brother follows as Lot 42) This MM Klooony N310 x Black Tara P18 (another S Chisum) is a combination of two meat wagons - and is testament to the mother to have raised twin bull calves. Top 2% for 200 day and top 5% for 400 day growth - maternal instinct plus future growth!

Table with columns: TACE, Dir, Dtrs, GL, BW, 200 W, 400 W, 600 W, MCW, Milk, SS, Doc. Rows include EBV (+5.5, +8.0, -7.6, +3.1, +58, +95, +123, +105, +8, +1.1, +28), ACC (62%, 55%, 83%, 75%, 74%, 73%, 76%, 71%, 66%, 69%, 55%), Perc (27, 6, 12, 28, 17, 36, 39, 43, 98, 85, 18).

Selection Indexes

Table with columns: \$A, \$A-L. Values: \$211, \$368, 38, 32.

Traits Observed: GL,BWT,400WT, 600WT,Scan(EMA,Rib,Rump,IMF), DOC,Genomics

Notes: Lot 43, (its hip to be a) Black Tara Square S7. A moderate framed bull, reflected by his moderate mature cow size, his curve bending low birth, short gestation length, high growth data makes him another heifer suitable option if required. His sire SAV Thunderbird rewrote the book on curve bending, and still passes these attributes on still today!

**Notes:** An old favourite sire is hard to ignore. We have been using the great S Chisum 6175 for many years now - over a cow we brought from the Strathtay dispersal - who is a magic blend of maternal pedigree back to Ardrossan Equator A241. S201 is top 1% for short gestation, top 20% for growth, with plenty of fat for breeding future females! An ET calf bred in our donor herd at Yuna with the Brooks family, another one suitable for heifers if need be.

Purchaser:..... \$:.....

**IMPROVED FERTILITY**

**MORE CALVES**

**HIGHER FIRST CYCLE CONCEPTION RATES**

# MULTIMIN®

## WHEN IT MATTERS

**+19.4%**

**IMPROVED FIRST CYCLE CONCEPTION RATE**

Multimin Evolution has been shown to improve the first cycle conception rate by **UP TO 19.4%**.<sup>1-3</sup> Conception in the first cycle can lead to an additional 20 to 40 days for calves to grow.

**+12%**

**IMPROVED PREGNANCY RATES**

Pregnancy rates in breeding females treated with Multimin Evolution are up to **12% HIGHER** than untreated females, depending on the length of the breeding season and breeding method.<sup>1,2,4-6</sup>

**+22%**

**IMPROVED SPERM QUALITY**

Bulls treated with Multimin Evolution 90 days before joining had **22% HIGHER** sperm concentration and significantly more motile sperm than control animals.<sup>7-10</sup>

Notes: Tara Super Strength S32 is our first LimFlex bull to be offered by auction, and one of the first few in the WA selling arena. We have been selling these polled registered LimFlex bulls for a few years now, and they have become one of the most asked about bulls after our on farm open days. His Limousin sire Tara E16 is a proven old school sire from the Tara AI armory- boasting unflappable temperament and calving ease brilliance. He is just limo muscle hiding in a black jacket! Suitable for heifers with a super low birthweight and a super short Gestation, the uses for this bull are countless.

Notes: Thick like a Brick. Actually, he thicker than the average Brick! Tara Signal S92 has muscle oozing out of him everywhere, but still retains softness and finishing ability. The Raven Nucleus sons are again this year a consistent type that just breed beef! Top 15% growth or better across the board.

Notes: Any son of Tara K29 is a Son of a Gun, but S45 has managed to nail the title. Top 1% for all growth traits and top 15% for Gestation, this bull will just pump out beef from your British Breed girls. Stud sire presentation, but will suit mature females with this level of power.

# DISCLAIMER AND PRIVACY INFORMATION

## Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

## Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

### BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)
