THE OFFERING

42 Registered Purebred Bulls + 12 Commercial Bulls

22 PTIC Registered Purebred Speckle Park Heifers

125 PTIC Commercial Speckle Park Heifers

6 Elite Semen Packages

DISCLAIMER: The descriptions of the animals in this catalogue, including their pedigree and other genetic information, has not been verified by the Vendors or the Selling Agents. Whilst all care is applied in producing this catalogue, industry experience suggests that up to 4-5% of DNA parent verification tests may have errors. Consequently, the Vendors and the Selling Agents and their representative(s) do not assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.

THE FIFTH JAD SPECKLE PARK BULL + FEMALE SALE

PATTERNED FOR PROFIT.

Our family welcomes you to the 5th JAD Speckle Park Bull + Female Sale. Thank you very much for showing an interest in our program – we are grateful for your support, and look forward to getting to know you and your breeding program further.

As we approach our fifth JAD Sale, we would like to begin by sincerely thanking everyone who has supported our program to date - everyone who has purchased or been an underbidder at one of our sales or throughout the year, everyone who has attended a sale, visited us throughout the year, engaged with us over the phone or online, welcomed us into their homes... thank you VERY much.

As we ponder where JAD and the Speckle Park breed will be in another five years from now, we are confident that our breeding decisions so far have put us in good stead to prepare our stud for the future. Our stud is hugely diverse in genetics, giving us a solid foundation from which to breed new sires and use them within. We have embraced independent assessment of our animals, inching forward each year as measured not just by the percentage of animals that 'make the grade', but more importantly the percentage that sit right at the top of the tree. In this catalogue, 11 bulls scored a seven out of eight for structure, as determined by well-renowned independent beef consultant, Dick Whale. At our first sale, we were stoked because we had but one bull reach that elusive high grade.

As we steam towards our fifth JAD Sale, we are launching two new initiatives to assist clients:

1) Free delivery. We will deliver your purchases from our 2023 Sale, using the ever-reliable services of Macdeb Livestock Transport. See page 5 for details

2) Rebates for clients. Have you purchased live animals from at least one of the four JAD sales held to date? If

so, you are eligible to receive a 5% rebate off your 2023 JAD Sale purchases via our new client rebate initiative. See page 4 for details.

JAD Speckle Park is one of very few studs that carry a five-star Breedplan Completeness of Performance rating. Although we put a lot of emphasis on Breedplan and data, our core fundamental benchmarks are with the utmost importance placed on temperament, feet and legs, scrotal, and udder quality. We are about **breeding for longevity** - encompassing fertility - to ensure commercial relevance for us and our clients. All bulls and purebred heifers in the sale have scored either a 1 or 2 for docility, and we are proud of this offering.

We would like to acknowledge the tremendous influence of the McKenzie family of Maungahina Stud, New Zealand, on our herd. Their sires heavily feature in this catalogue, and they stand out. Thank you!

We would like to thank our families, friends, and service providers for their immeasurable support - especially Justin's parents, Tony and Kate. We would also like to thank our team members, Stewart McKenzie and Sam Kerr, for their contribution.

With thanks,

Justin, Amy, Jack and Mitchell Dickens.

Program:

- ▶ Inspections: From 9am
- ▶ Sale: 1pm
- ▶ Complimentary morning tea, lunch and post-sale refreshments will be available
- ▶ Join us after the sale for a social get-together in the JAD Sale Complex!

Selling Agents and Auctioneer:

The sale will be conducted as a video auction by Bowyer and Livermore, with Brian Leslie, Dairy Livestock Services (DLS), as Guest Auctioneer. All animals will be available for pre-sale inspection on the day of the sale.

Bowyer and Livermore: (02) 6331 5166
 Nick Fogarty: (0409) 070 225
 Todd Clements: (0429) 070 225
 Justin Guy: (0421) 467 520

Brian Leslie: (0418) 365 934

All lots will be sold under the Australian Livestock & Property

Agents Association Ltd Standard Stud Stock Auction Terms and Conditions of Sale. If unfamiliar with these terms, please contact Bowyer and Livermore. Please check with the Selling Agents to obtain a buyer's number and registration slip, if you are considering bidding in the sale. Successful purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the sale's conclusion.

Outside Agents:

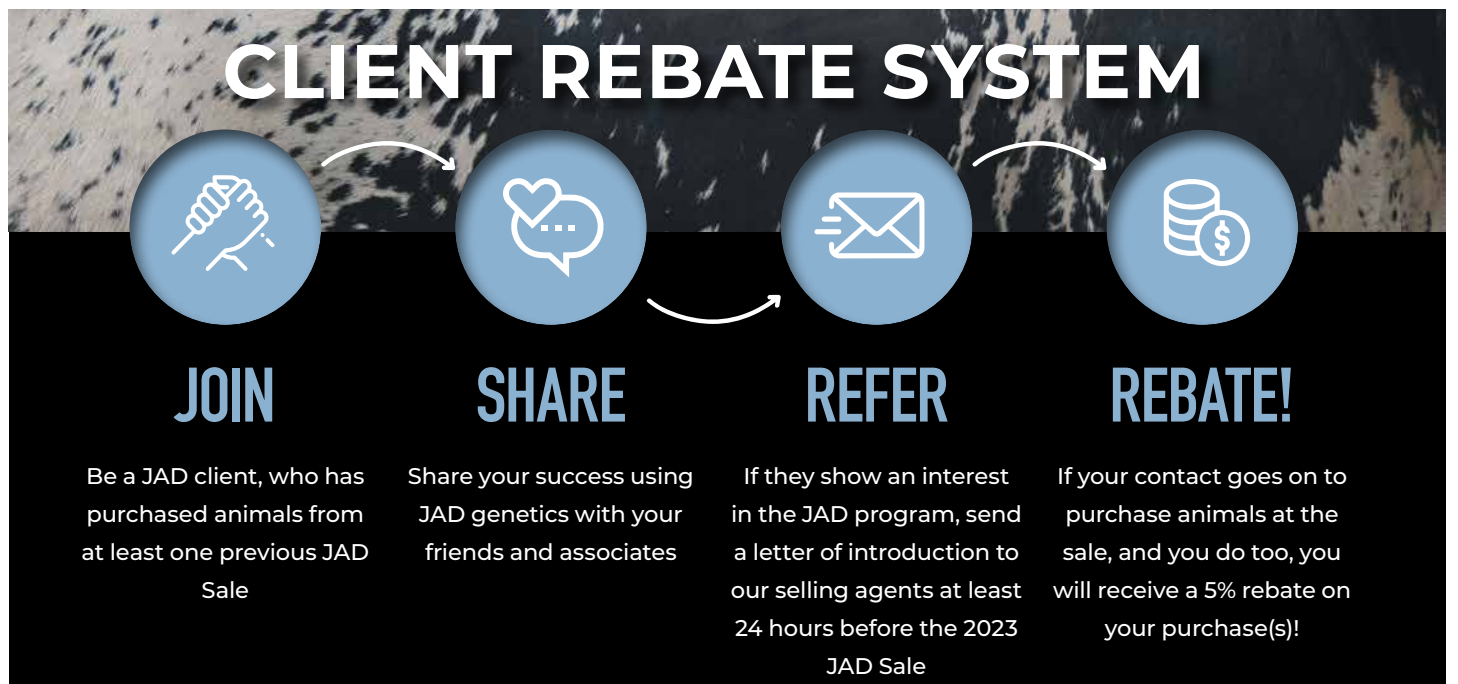

A rebate of 2% is offered to outside agents who introduce buyers to the selling agent in writing at least 24 hours prior to the sale, and settle accounts on the purchaser's behalf within 7 days of the sale.

Client Rebates:

A rebate of 5% is offered to clients who have purchased at a previous JAD Sale, who introduce buyers to the selling agent in writing at least 24 hours prior to the sale, and settle accounts on the purchaser's behalf within 7 days of the sale. See graphic below for details.

Supplementary Information:

A Supplementary Handbook will be available on sale day, including current scan data, weights, pregnancy status, and further information on the PTIC commercial heifer lots.

Insurance:

Purchasers are strongly encouraged to immediately insure their new acquisition(s). Bulls are a valuable and vulnerable piece of farm equipment.

Unable to Attend the Sale?

Bid online via AuctionsPlus.

The sale will be interfaced as a sequential auction on AuctionsPlus, with live video and audio streamed for online bidders

and viewers. There will also be individual videos of each live lot posted to the AuctionsPlus catalogue in the weeks leading up to the sale. Please also register as an AuctionsPlus user at least 24 hours prior to the sale in order to bid. Note that transport arrangements must be organised on sale day. See page 18 for more details.

Phone Bidding: If you would prefer to place your bids over the phone, please contact one of the Bowyer and Livermore agents at least 24 hours prior to the sale to make arrangements.

GST:

All animals are sold exclusive of Goods and Services Tax (GST). I.e. If a bull is sold for \$5000, you will be charged \$5500.

Mobile Reception:

Mobile phone reception will be stabilised at the sale venue through external boosters. For phone bidding, please contact a Bowyer and Livermore agent.

Feeding and Management:

Our 2021-drop of cattle were weaned at approximately 5-7 months old. They received weaner pellets as part of the weaning process and were grown out on pasture, and only supplemented when pasture quality was waning. We aim to have our bulls grow out at between 0.8-1.3kg/day their entire lives. The cattle are now in peak health, with rumens in great balance to handle whatever pasture conditions they encounter at their new home. The cattle have been handled with dogs, UTVs, motorcycles, and on foot. None of the cattle have ever had their feet trimmed in any way. We will NEVER hoof trim our cattle to mask faults. Never ever.

Herd Health:

Some animals in the catalogue have minor pinkeye scarring, not deemed detrimental to their functionality. We strongly recommend annual animal health booster shots.

BULLS:

- ▶ All DNA tested to verify they are not persistently infected (PI test) with Pestivirus
- ▶ All vaccinated for tick fever on 30/6/2022
- ▶ Pestigard booster to be administered prior to sale day

- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Double vaccinated with Vibrovax (last treatment 21/2/23)
- ▶ Drench to be administered prior to sale day.

PUREBRED FEMALES:

- ▶ DNA tested to verify they are not persistently infected (PI test) with Pestivirus
- ▶ All vaccinated for tick fever on 30/6/2022
- ▶ Pestigard booster to be administered prior to sale day
- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Drench to be administered prior to sale day.

COMMERCIAL HEIFERS:

- ▶ Pestigard booster on 23/11/2023
- ▶ 7-in-1 booster on 23/11/2023
- ▶ Drenched with Eprinex on 23/11/2023.

Under the Johnes Beef Assurance Score (J-BAS) system, JAD Speckle Park carries a J-BAS 6.

The JAD Guarantee:

Every bull is guaranteed to be a breeder at the time of sale and is guaranteed fertile for 6 months from sale day. If a bull should prove infertile or unable to serve cows naturally, the vendor will either:

- 1) Provide a satisfactory replacement, or
- 2) Provide a cash refund equal to the purchase value of the bull less salvage value. No credits provided.

It is the purchaser's responsibility to provide a certificate from a registered veterinarian before the 6 months is up to verify infertility, and that it was not the result of an illness, injury, or misadventure. The guarantee covers the purchase value of the bull, without interest, costs and damages. We recommend that all purchasers discuss injury insurance of their purchases at the sale with the on-site representatives or their agent. This guarantee is in addition to the normal terms and conditions governing auction sales. All females will be confirmed pregnant by Dr Hennie Strydom, Wellington Veterinary Hospital. A pregnancy certificate will be supplied to all purchasers of females at the sale. A pregnancy confirmation does not guarantee that a healthy, live calf will be born. In the event that a purebred female aborts her calf or fails to birth a live, healthy calf, JAD Speckle Park will provide two straws of semen from the JAD LN Tank, free of charge and for within-herd use only. It is the purchaser's responsibility to collect/transport this semen.

Free Freight:

Formal possession, risk and expenses pass to the buyer at the fall of the hammer. JAD Speckle Park will arrange and cover the cost of delivery of your purchase(s), with Macdeb Livestock Transport to carry out this free delivery, between 24 hours and one week of the sale's completion.

- ▶ **Macdeb Livestock Transport.** Contact Mac Jones at (0408) 572 507.

“We have been using the Q-select testing for nine years and have seen vast improvements in our weight gains, not only in calves still on their mothers but even more so as they start to develop on feed. The four parts to the Q-select test all have their benefits. By focussing on using Leptin TT sires, we have lifted our weaning weights over the past seven years and we are seeing an increase on the number of TT progeny each year. It’s definitely a worthwhile tool to assist in herd improvement.”

Justin Johner, Johner Stock Farm, Canada.

Frozen Genetics:

- ▶ All semen is stored at Holbrook Breeders Australia, and is qualified for domestic use only. Insurance and freight ex. Holbrook is the responsibility of the purchaser
- ▶ There will be no embryos offered in the 2023 JAD Sale.

Semen Rights:

JAD Speckle Park reserves the right to collect up to 200 straws of semen from any bull in the sale, for within herd use only. Any semen collection will be at our cost and the purchaser’s convenience.

Embryo Collection Disclaimer

No heifers in this catalogue have been flushed prior to sale.

Breedplan:

We are proud of our commitment to the collection and reporting of performance data for BREEDPLAN. By submitting raw data to the system, we are ultimately improving the accuracy of resultant EBVs to deliver real value to our clients to assist in their decision-making. JAD Speckle Park has a five-star Breedplan Completeness of Performance rating. Speckle Park GROUP BREEDPLAN EBVs reported in this catalogue come from the February 2023 run. See further information about BREEDPLAN EBVs and a Percentiles Table on pages 14-16.

Veterinarian’s Physical Examination of Bulls/Females:

Bulls:

All bulls offered have passed a crushside semen evaluation, carried out by Dr Stuart Geard and Jodie Mohr of Holbrook Breeders Australia, or Dr Hennie Strydom of Wellington Veterinary Hospital. This assessment certifies the bulls are fit for natural service, however does not guarantee their semen will freeze for artificial breeding. Additionally, no bulls have

been health tested for export qualification purposes. All bulls are sold without guarantee that they will meet all health testing requirements for export.

Females:

The reproductive tract of all purebred females has been checked by Dr Stuart Geard, Holbrook Breeders. JAD Speckle Park is committed to only ever sell purebred females that have passed this physical examination. A letter confirming this examination will be supplied to all purchasers.

Raw Data:

Fat and muscle scanning, and scrotal circumferences were measured on November 17, 2022, by Roger Evans, Bovine Scanning Services Pty Ltd, Tamworth, when the animals were 13-16 months old. This data was submitted to Breedplan for the registered animals, and is published in this catalogue for the commercial bulls (pages 64-76).

DNA Testing:

All bulls and purebred females have been fully DNA tested at Neogen Australasia, with results published:

100K SNP Profile for every bull and purebred female	
	Parent Verification (PV) for every bull and purebred female in the sale
Coat Colour	RGF – homozygous dominant black RGC – dominant black/recessive red
Poll/Horn Testing	PcPc – homozygous polled HPc – carries one copy of the horn gene
Myostatin	NC – non-carrier of the nt821 myostatin gene C – carrier of one copy of the nt821 myostatin gene
Leptin	Represented as TT, CT or CC. Read the following page for more information about Leptin.

Leptin Testing:

JAD Speckle Park was the first Australasian Speckle Park stud to undertake DNA testing specifically for economically-important beef production traits, including leptin. All purebred lots have their Leptin test results published.

Leptin TT is the preferred genotype - TT cattle will show improved carcass traits over CC cattle, with CT cattle being somewhere in the middle. Cattle inherit one copy of the gene from their dam, and one copy from their sire. This means that if you have a TT bull, the calves can only be either CT or TT, as he only passes down one T allele.

Leptin is a mammalian hormone with the primary function of decreasing appetite - it is known as the 'appetite gene'. Leptin TTs have an overall increased rate of fat accumulation compared to leptin CC. For Leptin TTs, this mainly results in:

- ▶ Increased weaning weight
- ▶ Increased cow productive life due to increased body condition
- ▶ Increased milk production
- ▶ Increased 12th rib backfat
- ▶ Impacts yield grade and marbling

Complimentary Sale Day Selection Service

We have arranged to have two renowned beef industry identities, Dick Whale and Alastair Rayner, present on sale day to assist people with their selections. Please feel free to utilise this complimentary service.

- ▶ **Dick Whale:** Independent Breeding and Marketing Services (IBMS). P: (0427) 697 968, rgwhale@bigpond.com
- ▶ **Alastair Rayner:** RaynerAg. P: (0427) 102 317, alastair@raynerag.com.au. www.raynerag.com.au

Registration Transfers with Speckle Park International (SPI):

JAD Speckle Park will take care of and pay for ownership transfers of registered lots on behalf of the purchaser. SPI Registration Transfer Forms will be submitted to SPI within one month's completion of the sale.

Visitor Safety:

All of the sale animals have been screened for temperament and are quiet to handle under normal circumstances. However, there are inherent risks with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN/PRAMS MUST NOT ENTER THE PENS.

People entering the yards are at risk of injury. Be especially alert to bulls fighting. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Do not crowd the bulls or loiter inside the pens.

When You Get Your New Animal(s) Home

On arrival at their new home it is important a suitable mob of animals (eg: pregnant cows, steers) is yarded to greet the new animal(s), to minimise stress on them. The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the first three weeks of joining when the majority of problems occur. Watch for any signs of injury, infection (any high temperature can compromise bull semen quality) or possible serving dysfunction. Early detection of any problems can minimise the impact of the quality of service your bull provides, and conception rates.

SALE INFORMATION

COLOUR PATTERN GUIDE

It is important to understand how Speckle Park colour patterns work in order to achieve your breeding goals. While some breeders are mostly interested in producing speckled cattle, others want to inject the notorious hybrid vigour of Speckle Park, while retaining predominantly black herds. For example, when a solid black Speckle Park bull is joined with 100% purebred Angus cows, the resulting calves will be solid black. Another example is when Angus cows are joined to a white Speckle Park bull, the resulting calves will be predominately speckled.

Speckle Park cattle have four distinct colour patterns; speckled, leopard, white pointed and solid black. The speckle and leopard colour pattern are genetically the same except for varying degrees of spotting. Some Speckle Park cattle can produce red colour patterns if both parents carry the recessive red gene.

Please remember when dealing with nature individual results will vary.

The guide is just that – a guide – and Mother Nature has the final say.

SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcasses meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting' is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level. Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcasses and a higher incidence of dark cutting. Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament.

Further, research has demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency. Selection for increased muscle content in a standard weight carcass can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcass, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +1.7 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of +0.1 mm, relative to carcass weight.

RIB FAT THICKNESS & FAT DISTRIBUTION

Rib fat thickness is the measured depth of subcutaneous fat over the quartered rib site between the 5th and 13th ribs. A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance. In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcasses to have adequate fat coverage over all major primals, with an area of inadequate fat distribution not being greater than 10cm x 10cm over each individual primal. Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcass, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +1.3 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.5 mm, relative to carcass weight.

TAKE HOME MESSAGES

Whilst many of the factors that affect the eating quality of a carcass and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal. Selection of animals with acceptable temperament, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcass fatness and higher Carcass Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd. To further discuss breeding for MSA programs, please contact staff at Southern Beef Technology Services (SBTS) and Tropical Beef Technology Services (TBTS). More information about Meat Standards Australia is also available from the MLA website.

SPECKLE PARK

AUCTIONEER

INDEPENDENT
BEEF CONSULTANT

BRIAN LESLIE

Brian Leslie
Auctioneer

Dairy Livestock Services (DLS), VIC

Brian Leslie is one of the most renowned and highly regarded dairy auctioneers in the world, and he has been the Guest Auctioneer at all JAD Speckle Park sales to date. We saw Brian sell at the 2017 Melbourne Royal Show Speckle Park Feature Sale and were thoroughly impressed by his ability to recall pedigree information, sell with clarity and fairness, and the overall atmosphere he created.

Brian has been auctioneering for the past 40+ years, specialising in dairy cattle. He has sold ALL of the record-priced dairy cattle of each breed, including the highest priced dairy animal ever in Australia at \$251,000 at International Dairy Week (IDW) in 2018. He has sold in each state of Australia and New Zealand for several decades. Although mainly dairy, Brian has sold at the famous Lawson, Te Mania and Weeran Angus sales for 30+ years.

He is a partner with family in Leslie Farms (Pooley Bridge Holsteins) at Arcadia near Shepparton, VIC, that have won Premier Breeder/ Exhibitor of IDW no less than 13 times, along with over 30 Champions including Grand Champion Cow three times. Brian's cattle have won many Grand Champions at Melbourne Royal and he has sold animals to several countries, including the national record producer of Japan.

DICK WHALE

Dick Whale
Independent Beef Consultant

Independent Breeding and Marketing Services (IBMS), Wangaratta, VIC

Dick Whale from Independent Marketing and Breeding Services (IBMS) is JAD Speckle Park's ongoing independent beef consultant, assessing our animals for structure and temperament. He uses a combination of the Genetic Type Summary (GTS) and Beef Class Structural Assessment System to score each phenotype trait.

All sale animals catalogued were considered acceptable for soundness, muscling, doing ability, docility and more. These scores can be found with each lot description in this catalogue. JAD Speckle Park places a very high degree of importance on structural soundness and temperament. Dick will be present on sale day to assist clients with their selections. Dick can be contacted directly prior to sale day at (0427) 697 968.

See pages 12 and 13 for description of the assessment system.

THE JAD ADVANTAGE

We are a commercial and customer-focused Speckle Park breeding operation which aims to deliver seedstock that will improve the long-term efficiency and profitability of the beef industry, and consistently “plate up” a unique and memorable beef eating experience for the end consumer.

We feel strongly that the Speckle Park breed in Australia will benefit from bulls and females that have been bred under our strict standards, and they are backed by our 6-month “JAD Guarantee” – we are in this journey together.

When you buy a JAD Speckle Park, you can be assured that they have been heavily measured and scrutinised. Our stud carries a five-star BREEDPLAN Completeness of Performance rating, acknowledging the effort we make

to measurement and maintaining contemporary group completeness right through to 15-17 months old, in an effort to achieve more accurate EBVs. We aim for a balanced set of objectively measured traits, and work to gradually optimise growth and carcass traits – not in quantum leaps.

We put in the hard work to give our clients the confidence to back us and our cattle.

We are passionate about our cattle and hold a strong female-focussed vision for what we want our herd to look like. Our cattle must be structurally sound, medium-framed, deep-barrelled, thick, and soft with good temperaments, longevity, and a low maintenance requirement. The result is progeny that will calve easily, grow, finish quickly, and grade highly.

We look forward to working in partnership with you.

A GLOBAL INFLUENCE

We travel to Canada and New Zealand regularly to get to know the different breeders and their breeding programs, to see genetic lines in the flesh, and to select our “picks” to infuse into our herd through extensive ET and AI programs.

INDEPENDENTLY ASSESSED

All bulls are semen tested, reproductive organs are examined in all bulls and purebred females, and all purebreds are independently assessed for structural soundness and temperament.

DATA RECORDED

JAD carries a five-star BREEDPLAN Completeness of Performance rating. Our extra effort is to improve the accuracy of resultant EBVs and deliver real value to our clients to assist them in their decision-making.

TEAMWORK + CUSTOMER SERVICE

We are both just as passionate about Speckle Park cattle as each other, and we are committed to helping our clients achieve their goals in a long-lasting partnership.

Guide

Structural Soundness Traits

Feet	Evaluation of the shape and evenness of the front and rear feet, with 5 being ideal. Scores greater than 5 exhibit some scissor claw in feet. Scores less than 5 are open clawed.
Pastern Angle	Evaluation of strength of pastern, depth of heel and length of foot, with five ideal. Scores greater than 5 tend towards having shallow heel, less than 5 towards being stubbed toe.
Side View	Evaluation of the angle measured at the front of the hock. Scores greater than five indicate towards sickle hocked, less than 5 indicate the animals towards being straight (post-legged).

Descriptive Traits

Stature	Evaluation of bulls for maturity pattern and frame size. A stature score of 25 is average. This score may be influenced by age of dam, nutrition etc. Scores greater than 25 indicate larger frame, later maturing cattle.
Capacity	Evaluation combines depth of rib, spring of rib and width of chest floor. Scores greater than 25 indicate a bull with larger capacity.
Body Length	Evaluation of body length from point of shoulder to pin bone. Scores greater than 25 indicate longer body length.
Muscle Score	Is the muscularity of the bull devoid of subcutaneous fat. Higher scores indicate animals with higher yield attributes. Scores 25 = C muscle 30 = C+ 35 = B40 = B 45 = B+
Doability	The ability of a bull to deposit fat in fat depots, relative to their peers under a common management regime.

STRUCTURAL ASSESSMENTS

STATURE

Evaluation of an animals frame size, based on visual assessment of the animals hip height.

Score	0	5	10	15	20	25	30	35	40	45	50
Frame score equiv.				3	4	5	6	7	8		

CAPACITY

Evaluation of an animal by visual assessment combining depth of fore rib along with spring of rib and width of chest floor as well as depth of flank.

Score	0	5	10	15	20	25	30	35	40	45	50
-------	---	---	----	----	----	----	----	----	----	----	----

The greater the score, the greater an animals capacity.

BODY LENGTH

Evaluation by visual assessment of an animals length from withers to pins.

Score	0	5	10	15	20	25	30	35	40	45	50
-------	---	---	----	----	----	----	----	----	----	----	----

The greater the score, the greater the body length.

FRONT FEET

	Scoring Range	Description
Front Feet Claw Set	1 - 9	1 - open divergent; 5 - good; 9 - extreme scissor claw
Rear Feet Claw Set	1 - 9	1 - open divergent; 5 - good; 9 - extreme scissor claw

Reference: Shape (primarily curl) and evenness of the claw set.

BACK FEET

Rear Legs Side View 1 - 9 1 - straight (post legged); 5 - good; 9 - sickle hocked

Reference: Angle measured at the front of the hock.

SIDE VIEW

	Scoring Range	Description
Front Feet Angle	1 - 9	1 - steep (stubbed toe); 5 - good; 9 - shallow heel
Rear Feet Angle	1 - 9	1 - steep (stubbed toe); 5 - good; 9 - shallow heel

Reference: Strength of pastern, depth of heel and length of foot.

PASTERN ANGLE

MUSCLING

Evaluation by visual assessment of an animals combined width of rump and hindquarter, with secondary consideration given to forearm muscling.

Score	0	5	10	15	20	25	30	35	40	45	50
Equivalent Muscle			D	D+	C-	C	C+	B-	B	B+	

SHEATH

Evaluating the tightness of the sheath of the bull.

Score	1	2	3	4	5
-------	---	---	---	---	---

Pendulous & loose

Good & tight

DOCILITY

Score	1	2	3	4	5
	Very Quiet	Quiet	Slightly Edgy	Running Away and Rather Not Be In Your Presence	Mad, Will Charge

Structural problems and temperament in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and overall industry productivity.

Dick Whale assesses our sale cattle at least twice in their life before sale day. Having our cattle independently assessed assists us to make unbiased decisions around culling for structure and temperament. Dick will be available on sale day to assist potential purchasers in their selection decisions, connecting individual breeding objectives with the most suitable catalogued animal(s) for that job. Please introduce yourself to Dick and utilise this complimentary service that we hope will assist you on sale day.

DICK'S PICK

Dick's Pick – Dick's top 3 bulls and 3 purebred heifers, based on his independent assessment, have been identified in this sale catalogue. Keep an eye out for this icon to see Dick's Picks!

BREAKING DOWN BREEDPLAN

Estimated Breeding Values (EBVs) published in this catalogue are from the February 2023 GROUP BREEDPLAN run. Below is a description for each EBV and how to apply the information practically:

EBV FOR BIRTH WEIGHT (BWT)

Birth weight is a major factor in calving difficulty. Use EBVs to select against birth weight if dystocia is a problem. The lower the EBV the lighter the calves are expected to be.

EBVS FOR 200-DAY GROWTH AND MILK

Vealer producers should place emphasis on the 200-day growth and milk genes. If the bull is to be used as a terminal sire, growth is most important. If a bull is to be used to breed replacement heifers, and superior milking and mothering ability is required, then consider the milk genes with the EBV for milk (kg). The estimate in kg milk is not the yield of milk of the dam, but the growth of the calf due to more milk and better mothering of the dam. At JAD Speckle Park, we submit two 200-day weights for improved accuracy of this EBV.

EBV FOR 400-DAY WEIGHT

400-day weight EBVs are a measure of the animal's ability to grow to 400-days-of-age (can be measured from 301-500 days). It should be used by producers who wish to turn off yearling cattle. At JAD Speckle Park, we submit two 400-day weights for improved accuracy of this EBV.

EBV FOR 600-DAY WEIGHT

600-day EBVs are computed for growth to 600-days-of-age (can be measured at 501-900 days). It is the best prediction

of an animal's ability to grow onto maturity, hence it is important for the heavy steer producer.

CARCASE TRAITS

These traits are calculated from live scan data and are adjusted to a standard steer carcase weight of 300kg.

FAT DEPTH EBV (RIB AND RUMP)

Measured in millimetres at either 12/13 rib or P8 sites. As these EBVs increase, the progeny can be expected to fatten more easily but carcase yield may decline.

RETAIL BEEF YIELD (RBY%)

The percentage of retail cuts compared to total carcase weight. Related to EMA and Fat Depth and Weight EBVs.

INTRA MUSCULAR FAT (IMF%)

The percentage of fat to muscle in the eye muscle. Used as a more precise measure than Marbling Score.

EYE MUSCLE AREA (EMA)

EBVs are relative to the breed average EBV each trait. A larger EMA EBV (sq.cm.) means more muscling and generally higher carcase yield relative to carcase weight.

SUMMARY

Remember the profit rule in buying bulls on their EBVs. Use the EBVs closest to your production system. Buy the bulls with the best EBVs your budget can stretch to, after you have taken structural soundness into consideration. It is important to relate each bull's EBVs to the current breed average.

SPECKLE PARK GROUP BREEDPLAN

Speckle Park GROUP BREEDPLAN uses all the information on the individual from within the herd plus all performance information from relatives in other GROUP BREEDPLAN herds. The EBVs in all herds relate to a common base. This increases the accuracy of the data, as well as allowing comparison of the genetic merit of the animals from different herds (across herd) within the group.

Each reported trait shows an EBV and its Accuracy level.

The EBV (Estimated Breeding Value) provides the best current estimate of the bull's true genetic merit for that trait, relative to the overall base for the Speckle Park breed. It indicates how his progeny should perform relative to those of other bulls in the breed.

The Accuracy indicates how well an EBV predicts the true genetic worth of an animal. The Accuracy of an EBV will be

higher for traits with a higher heritability and will increase as more performance information on an animal and its relatives becomes available. The Accuracy of an EBV is reported as a percentage. EBVs with high accuracy will change less than EBVs of low Accuracy when more performance records are analysed.

The following guide may be useful for interpreting Accuracy:

- ▶ **Less than 50% Accuracy** - the EBVs are preliminary. EBVs in this range will have been calculated based on very little information. These EBVs could change substantially as more direct performance information becomes available on the animal
- ▶ **50-74% Accuracy** - the EBVs are of medium Accuracy. EBVs in this range will usually have been calculated based on the animal's own performance and some limited pedigree information
- ▶ **75-90% Accuracy** - the EBVs are of medium-high Accuracy. EBVs in this range will usually have been calculated based on the animal's own performance coupled with the performance for a small number of the animal's progeny.
- ▶ **More than 90% Accuracy** - the EBVs are a high Accuracy estimate of the animal's true breeding value. It is unlikely that EBVs will change considerably with addition of more progeny data.

Strong futures begin with healthy minds.

We're here to sell livestock. To feed passions, make memories, and create futures. Let's take a moment to acknowledge that none of that is possible without strong mental health.

Depression. Suicide. Pain. Loss. Bewilderment. Hopelessness.

Poor mental health affects more of us in the grandstands today than we can imagine. Its impact on society is monumental and it is claiming some of society's best. It took my Mum when I was 17 and has impacted me hugely. The Black Dog Institute is a fantastic initiative that is dedicated to understanding, preventing and treating mental illness. I have selected my favourite bull in this sale catalogue – chosen for no particular reason other than him being my favourite – and we will donate 10% of the auction sale price of this bull to the Black Dog Institute. Please, don't suffer in silence.

This year's selection is **Lot 2: JAD Solomon S31 (JAD S31)**.

Amy ⊗

Getting to the Sale

Sale Location:
"Greenvale"
911 Loombah Road
YEOVAL NSW

Visit jadspecklepark.com.au/contact to download a map and directions. Or, type "JAD Speckle Park" as your destination in Google Maps.

Transport

The sale location is approximately 70-75 minutes drive from the Dubbo, Parkes or Orange airports. Due to the uncertainty around flights during this COVID-19 pandemic, we recommend you carry out your own research into current flight arrangements to these destinations.

Accommodation

There are a number of Motels, Hotels and Caravan Parks in Wellington, Molong, and Yeoval. Please book in advance to ensure you secure your accommodation, and feel free to reach out to Amy at (0427) 464 333 or jad@jadspecklepark.com.au for assistance. Alternatively, you are welcome to bring your caravan/campervan/tent and camp at our property for the night after our sale.

Goonoo Homestead

3258 Renshaw McGirr Way, Yeoval
Phone: (02) 6846 3549
www.goonoohomestead.com.au

Bridge Motel, Wellington

5 Lee Street, Wellington
Phone: (02) 6845 2555

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select “**Sign Up**” in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select “**Dashboard**” and then select “**Request Approval to Buy**”.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

MAU P194

Maungahina Promise

Sire of Lots: 14, 18, 20, 28, 34, 39, 40, 41, 45, 46, 56, 57, 60, 62, 69

We purchased Promise for a then-New Zealand record NZ\$35,000 in 2020. His progeny are super docile, with a little extra bone and length of body. He is by a full brother to Premier 101Y Logic L11.

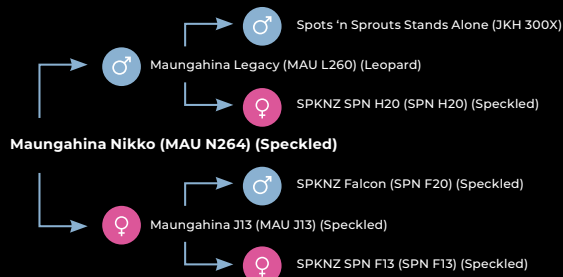

MAU N264

Maungahina Nikko

Sire of Lots: 2, 3, 9, 11, 23

We co-purchased Nikko in 2019, and he is breeding exceptionally well. We have gone on to use him extensively, as you will see in coming years. Nikko is one of the best-moving Speckle Park bulls we have seen.

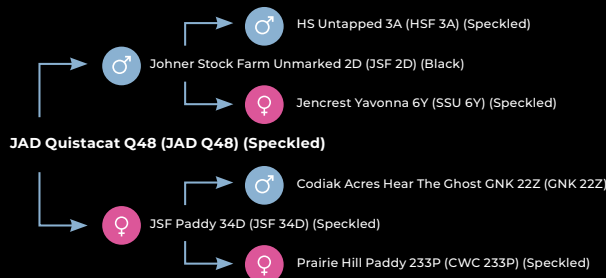

JAD Q48

JAD Quistacat Q48

Sire of Lots: 31, 35, 42

We believe Quistacat is the best bull we have bred to date, and he is the most fluent-moving Speckle Park bull we have seen. Excellent structure, top 1% of the breed for scrotal size.

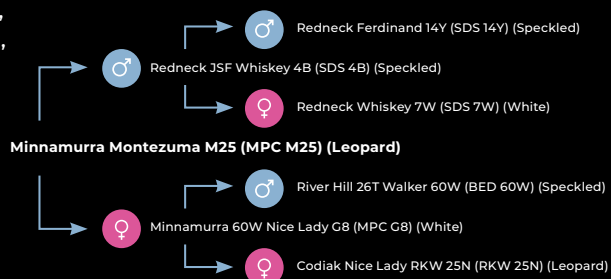

MPC M25

Minnamurra Montezuma M25

Sire of Lot: 4, 5, 8, 10, 15, 16, 26, 29, 30, 32, 43, 44, 47-54, 61, 63, 70, 71, 73, 74, 76

Montezuma has become a household name in Speckle Park, combining calving ease, short gestation and lower birthweights with plenty of growth, muscle and top 5% fats. Extra length and softness.

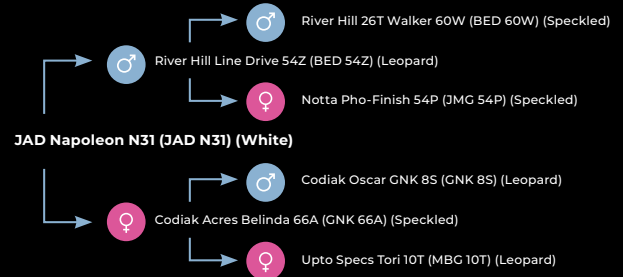

JAD N31

JAD Napoleon N31

Sire of Lots: 19 + joining sire

Napoleon was the \$24,000 top-priced bull of the inaugural JAD Sale in 2019, and we purchased him back in May 2021. A well-proven heifer bull, his sexed female and conventional semen has been popular.

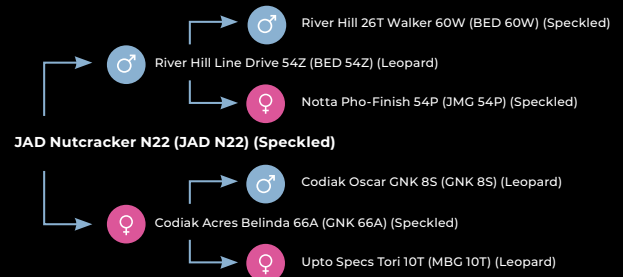

JAD N22

JAD Nutcracker N22

Sire of Lot: 17, 33

A full brother to JAD Napoleon N31, Nutcracker N22 was also sold at our 2019 sale and then we purchased him back in 2022. A very sound sire, with an ideal maturity pattern + softness.

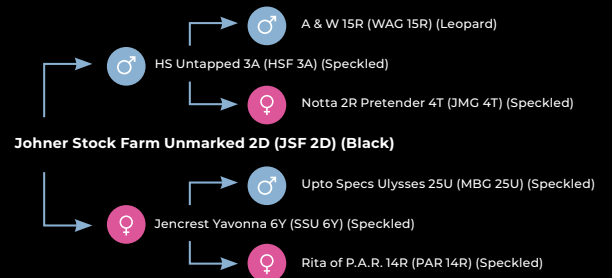

JSF 2D

JSF Unmarked 2D

Sire of Lots: 7, 21, 65, 66

Unmarked's progeny are moderate framed, soft, easy-keeping cattle, with tremendous spring of rib. He produces high yielding carcass cattle with positive fats. He is the sire of our resident sire, JAD Quistacat Q48.

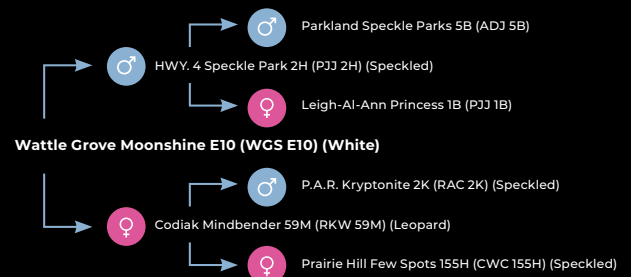

WGS E10

Wattle Grove Moonshine E10

Sire of Lots: 1, 6, 13, 55, 58

A well-renowned 2009-drop sire, who is a paternal brother to Mainstream Eldorado E11 - both are sired by the great "Baker Bull". Moonshine produces soft, easy-keeping cattle with good temperaments, and plenty of scrotal.

Pardon the poor image quality!

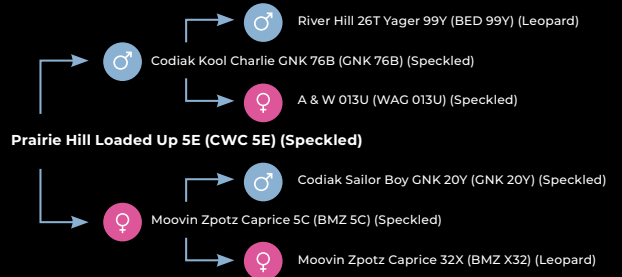

CWC 5E

Prairie Hill Loaded Up 5E

Sire of Lots: 38, 67, 68

This catalogue contains the first Loaded Up progeny to be offered for sale in Australia. He topped the 2018 Source Sale in Canada, and produces plenty of muscle and length in his progeny.

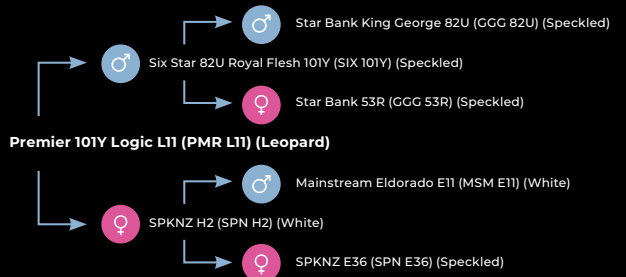

PMR L11

Premier 101Y Logic L11

Sire of Lot: 59

Logic contributed significantly to our 2019-drop, so with runs on the board at JAD, we selected him to use in a flush to Jackungah Speckle Park's prized donor, Jackungah Koda K01. Logic is a breed leader for growth + carcass.

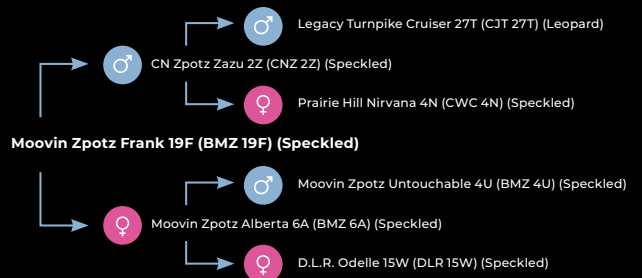

BMZ 19F

Moovin Zpotz Frank 19F

Sire of Lots: 24, 36, 64, 72

A new pedigree for many, Frank is a larger-framed bull, with huge scrotal. He hails from the no-fuss, commercially-focused Canadian herd of Merl and Lynda Zweifel. Good headed, smooth shouldered.

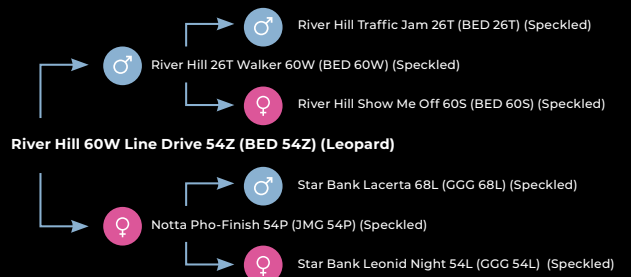

BED 54Z

River Hill 60W Line Drive 54Z

Sire of Lots: 12, 25

We have produced 28 Line Drive progeny across all seven year drops born at JAD to date. A sire that is fast becoming one of the breed's legends, producing very sound, docile, growthy carcass cattle.

Granddam: Codiak Unique GNK 8R.

Dam: JAD 58Y Unique N4.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Leading off our 2023 sale catalogue, Sniper S22 is one of the top carcass bulls in the sale. A pedigree that is stacked with breed legends, going back to the old "Baker Bull" on the sire's side.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
22	40	26	7	6	6	6	40	33	5

Sniper S22 is a larger-framed white bull who offers versatility for his new owner. He is by 2009-drop sire, Wattle Grove Moonshine E10, whose semen is in short supply and high demand - his semen fetched \$1000/straw at the 2020 Waratah Speckle Park Genetic Vault Sale, setting a new record for an Australian-born Speckle Park sire. Why? THAT pedigree, and how well he's been breeding. We paired Moonshine with one of our best, Unique N4, who bred the \$40,000 high-selling heifer at our 2021 sale, JAD L260 Unique Q33 (purchased by Toebelle Speckle Park). Sniper S22 is certainly bred in the purple and is an exciting bull to start the 2023 JAD Sale.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Solomon S31 is one of those bulls that makes you wonder whether you should be selling him at all! He's got true sire potential written all over him - structurally outstanding, top 10% scrotal, and a reliable pedigree - from one end to the other.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
24	40	27	6	6	6	6	40	33	4

Solomon S31's dam, Midnight Lady P23, is a never miss cow - her Maungahina Legacy son, Ritualistic R83, sold to WA for \$45,000 at last year's JAD Sale.

We absolutely love how Solomon S31's sire, Maungahina Nikko, is breeding for us - producing very little waste in his progeny. Nikko's progeny are very fluent-moving bulls, with loads of middle to them, and in our observation, they are softer carcass cattle than those produced by his sire, Maungahina Legacy. Look out for Solomon S31's outstanding black ET-bred brother, to be offered at lot 11.

Purchaser: _____ Price: \$ _____

Grandsire: Maungahina Legacy.

Sherrif S25 has been a stand-out from birth. He is a very easy-keeping, deep-sided bull who catches the eye of all who see him. He is in the top 5% of the breed for all growth traits and carcass too.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
25	41	29	6	6	6	7	41	36	4

Sherrif S25's dam, JAD 61Y Fancy Free N66, is one of our top donor cows. She is a powerful, large-framed cow with impeccable udder and feet. JAD N66 produced the \$34,000 equal top-priced bull at our 2021 Sale, JAD Quaintly Q66, who we have recently begun using in our stud simply because of the predictability of the cow family.

Sherrif S25 is the result of such a great cross - his full sister, JAD S13, is arguably the best heifer of her drop. We have more full siblings born in 2022, and they look equally as impressive.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Skipper S11 is a sight to be seen - he's as long as a freight train, wide-topped, and an upstanding, free-moving bull. He is in the top 1% of the breed for scrotal size, and a trait leader for gestation length + birthweight. Leptin TT, and puppy dog quiet, too!

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	42	27	6	6	6	7	43	32	4

Skipper S11 is without doubt one of the top bulls in the draft, with true sire potential. He is very similar to his sire, Minnamurra Montezuma M25, in many ways, with the addition of the very proven Waratah E27 cowline on the bottom side of his pedigree.

Skipper S11's dam, Waratah Amy P130, is quickly creating a fantastic cow family here for us, together with her full sister, Waratah Amy P127. Both cows are very good natured, functional females, which are breeding above themselves in performance. With his pedigree and phenotype, Skipper S11 is another difficult one to let go.

Here's one for the data enthusiasts! Rarely do you see a bull in Speckle Park who is a trait leader so broadly across the spectrum as this bull is. Another Leptin TT, Sizzler S50 has fantastic structure, and a real sire's outlook.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
26	38	29	6	6	6	6	39	34	4

Sizzler S50 is a two-year-old heifer's first calf, and has developed to now sit high in his contemporary group. This bull offers versatility with very short gestation length, moderate birth, accelerated growth, with excellent carcass data too.

We get excited to run our eyes over a pedigree like this bull's. We sold his granddam, Amy's Girl N5, at our inaugural sale in 2019 to Elevation Speckle Park, and it has been enjoyable to watch her go on and breed so well for them.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Spitfire S20 is quite a character among his group! He combines sheer muscle and carcass with an abundance of loose, supple skin - carried down from his maternal grandsire, Moozin Zpotz Falcon 3X.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
25	42	29	6	6	6	6	43	31	4

Spitfire S20 is one of the heaviest bulls in his contemporary group, and was a big sappy calf all the way along. He is the first of many in the catalogue out of one of our top donor dams, JAD 3X Niome N56. This cow has an impeccable udder, is super docile, and has really never missed a beat for us. There will be progeny from her in the catalogue by four different sires. Semen from Spitfire S20's sire, Wattle Grove Moonshine E10, is in short supply and high demand - Moonshine semen fetched \$1000/straw at the 2020 Waratah Speckle Park Genetic Vault Sale, setting a new record for an Australian-born Speckle Park sire.

Sterling S5 is a heavy hitter among his group, with added length of body and muscle expression. He is sired by the well-known Canadian sire, JSF Unmarked 2D, who is also the sire of our resident sire, JAD Quistacat Q48.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	41	27	6	6	6	7	42	33	5

Sterling S5 is the ideal carcass sire, combining top 25% EMA with top 5% Rib and Rump fats, and top 15% IMF. He will produce progeny with good early growth and ideal measurements at slaughter.

Sterling S5's dam, JAD 61Y Zahrah N19, has produced many sale highlights for us in previous years, with full ET sisters to Sterling S5 highlighting the female section of our 2022 JAD Sale. Zahrah N19 goes back to the highly-regarded sire, Codiak Putnam GNK 61Y, who is known for producing good milking females.

Here is the natural 2021-drop calf of our top donor, JAD 3X Niome N56, and what a job she has done on him! Sir Jack S53 will mature into a large-framed bull, with a great spread of data across the board.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
27	40	30	6	5	5	6	40	32	5

Sir Jack S53 will appeal to commercial producers seeking to lift performance and carcass traits in their herd, while maintaining good fertility traits. We purchased Sire Jack S53's sire, Minnamurra Montezuma M25, from the well-respected Minnamurra stud, in 2018, and he is still working in our herd at 6.5 years old. "Monty" is out of the same dam as former Australian record priced sire, Minnamurra Leander L81. Montezuma has been widely used commercially, with results encouraging many commercial producers to continue their journey with the Speckle Park breed. He also has 234 registered progeny to date, in the Speckle Park International herdbook.

Spritely S37 is stacked with plenty of performance and will mature into a large-framed bull. He is in the top 10-15% of the breed for 200-day, 400-day, and 600-day weights, with plenty of scrotal, carcass, EMA and retail beef yield.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
26	39	30	6	6	6	6	42	32	5

Spritely S37 would be an excellent option for Angus breeders wishing to take advantage of the hybrid vigour and carcass attributes of the Speckle Park breed, while maintaining a black coat colour.

Spritely S37's dam, JAD 52B Midnight Lady P27, is an eye-catching, larger-framed cow with tremendous length of body. His dam is a full sister to our Midnight Lady P23 cow, introduced at lot 2. There is a full ET brother at lot 23 and a maternal brother at lot 25.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Sunday Silence S27 is sure to be the talk of the town! He has been one of Justin's favourites for some time. Slightly more moderate than his lot 2 brother but so well balanced, and oozes softness.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	42	26	6	6	6	6	42	34	5

Sunday Silence S27 scored a 7 out of 8 for structure, by Dick Whale. He is such a well-balanced bull, always pulling up square when we see him in the paddock, with his head up over his spine. This bull has a place both as a terminal or maternal bull. Sunday Silence's dam, Midnight Lady P23, is a never miss cow - her Maungahina Legacy son, Ritualistic R83, sold to WA for \$45,000 at last year's JAD Sale, and he too scored a 7/8 for structure. We absolutely love how Sunday Silence's S27's sire, Maungahina Nikko, is breeding for us - producing very little waste in his progeny.

Six Pack S95 will add some grunt to your herd! A pedigree full of power, as demonstrated through this bull's breed-leading EBVs. We have viewed his maternal granddam in Canada, and she is a very impressive cow!

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
24	42	30	5	5	6	6	42	32	5

Six Pack S95 is the first animal in the catalogue by renowned Canadian sire, River Hill 60W Line Drive 54Z. We have produced 28 Line Drive progeny across all seven year drops born at JAD to date. Line Drive is a sire that is fast becoming one of the breed's legends, producing very sound, docile, growthy carcass cattle.

Six Pack S95 will mature into a larger-framed bull, with plenty of carcass, and would be suitable for use over cows only. He is super docile and with excellent feet on both sides of his pedigree, he has longevity written all over him.

The first son of Maungahina Promise to be offered by JAD - and what a way to start. Secretariat S79 is ultra-docile, with an outstanding muscle pattern that catches the eye of all who have seen him.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	41	26	6	7	5	6	41	31	4

Secretariat S79 was part of a prolific flush, with three full ET brothers and one very exciting full ET sister to follow in the catalogue. We purchased Secretariat S79's sire, Maungahina Promise, in 2020 for a then-New Zealand record NZ\$35,000. He is quickly building a reputation at JAD for producing great carcass cattle, with so much top and softness. They are all VERY docile with attractive sirey outlooks. Promise's dam, Maungahina J13, is also the dam of our co-owned sire, Maungahina Nikko. Secretariat S79 is a Leptin TT (see explanation on page 7). Leptin TTs have an increased rate of fat accumulation compared to leptin CCs.

Saintly S54 is an eye-catching bull with an excellent suite of EBVs. The outstanding Minnamurra Montezuma M25 sons keep on coming, and in cases such as with this bull, their best is yet to come.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
24	40	27	6	7	6	6	40	34	4

Saintly S54 is a trait leader across several EBVs, as shown in his Percentiles Graph below (February 2023 Group Breedplan). With the likes of Redneck JSF Whiskey 4B and River Hill 60W Line Drive 54Z in his pedigree, Saintly S54 has a bright future ahead of him.

Sergeant S10 is a powerful bull, loaded with muscle to add grunt to your calf crop. He is sired by JAD Nutcracker N22, who we sold at our inaugural sale in 2019, and purchased back last year.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	40	26	6	6	5	5	40	32	4

Sergeant S10 would be an excellent option for Angus breeders wishing to take advantage of the hybrid vigour and carcass attributes of the Speckle Park breed, while maintaining a black coat colour.

Sergeant S10 is out of an HS Untapped 3A daughter who is breeding very well for us, with several daughters retained in our herd.

Sergeant S10 has a full brother at lot 33.

We get a lot of enjoyment seeing a bull like this, with JAD-bred animals on both sides of the pedigree, and going on to score a seven out of eight for structure. His full sister (but ET-bred) scored a perfect 8/8, and has been retained.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	43	27	6	6	6	6	42	33	5

Swiftsilver S49 is a two-year-old heifer's first calf. His dam, JAD L260 Unique Q41, is a full ET sister to the \$40,000 top-priced heifer at our 2021 JAD Sale, JAD L260 Unique Q33, who was purchased by Toebele Speckle Park.

Swiftsilver S49 has excellent feet and legs, and complements his outstanding structure with top 35% or better EBVs in no less than 10 of the reported 14 Breedplan traits. He peaks where it counts, with a top 5% ranking for 400-day weight. His progeny will grow fast through to slaughter, with great carcass merit.

Sherlock S115 is an all-Canadian import, courtesy of the Johner Stock Farm herd. We purchased his dam, JSF Miss Sage 62F, in 2019, and this catalogue contains her first progeny born at JAD - this bull and two ET-bred sisters at lots 65 and 66.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
21	42	25	6	6	5	6	42	32	4

Sherlock S115 is a moderate-framed, easy-keeping bull, who features in the top 10% of the breed for EMA, as well as being a trait leader for fertility, growth and other carcass traits.

Sherlock S115's dam has produced an interesting bull calf for us in Canada, registered as JAD JSF Yellowstone 10K. This rising 12-month-old bull calf has caught the attention of fellow stud breeders in Canada, and we look forward to watching how he grows out. His maternal siblings here among our 2021-drops have certainly caught our attention too.

Oh, the joys of artificial breeding using genetics from around the globe! It's not all smooth-sailing, with so many links in the chain, and Soldier On S96 is a culprit of human error. He's as purebred as any papered Speckle Park, but sells unregistered.

Soldier On S96 - and his ET-bred sibling at lot 37 - were caught up in a handling error at a semen collection centre in Canada, and ultimately we have been unable to DNA sire-verify him to the sire we believed we had flushed his dam to. It's not a perfect world, mistakes happen, and we'll just 'soldier on'. But in the meantime we have a purebred Speckle Park bull here, who has DNA dam-verified to our Canadian donor, Ravenworth Prairie Lily 123G. We purchased this female in 2020, chasing her proven cow line. Soldier On S96 is a framey bull with good length of body, offering the commercial producer all the benefits of Speckle Park.

Sampras S134 had the highest Scrotal Size EBV of all 2021-drops in the February 2023 Breedplan run. He is the first progeny of Canadian sire, Moovin Zpotz Frank 19F, to be offered for sale in Australasia.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
24	41	28	7	6	6	6	41	30	5

If you are one to chase something a little different on pedigree, then Sampras S134 may be for you. His sire, Frank 19F is a larger-framed bull, with huge scrotal. He hails from the no-fuss, commercially-focussed Canadian herd of Merl and Lynda Zweifel. His progeny are good headed, smooth shouldered, with added frame. Frank proved a suitable joining to our Codiak Acres Niome GNK 5X daughter, JAD N56, who is herself on the smaller side. Sampras S134 would make a suitable maternal sire, being from one of the best-uddered stud cows in our herd and himself being so strong for scrotal size. He has a full ET brother (lot 36) and sister (lot 72) to follow.

JAD Sampras S134 (JAD S134) (Leopard)

Sinatra S139 is another trusty son of River Hill 60W Line Drive 54Z - sound-footed, quiet, with plenty of performance. Add length, courtesy of his dam, and we've got ourselves something worth crooning about.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	39	27	6	6	6	6	40	32	4

We have produced 28 Line Drive progeny across all seven year drops born at JAD to date. He is a sire that is fast becoming one of the breed's legends, producing very sound, docile, growthy carcase cattle.

Sinatra S139 is in the top 5-15% of the breed across eight traits, including growth and carcase. He comes from a very sound cow family that is working well at JAD, stemming from the Ponderosa Spots A Roarin 19Y cow, who is Sinatra S139's maternal great granddam.

Serenade S140 is in the top 35% of the breed for 10 out of a possible 14 traits. Justin thinks very highly of this bull! He goes back to Codiak Unique GNK 8R on the dam side, through Codiak Amanda GNK 42Y.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	42	27	6	6	6	6	43	37	4

Serenade S140 is a super impressive carcass bull, with tonnes of muscle expression, while retaining oodles of softness - he is in the top 5% of the breed for rib and rump fats, and top 10% for IMF. He is a Leptin TT too - see page 7 for more information.

Serenade S140's dam, JAD 54Z Amanda N53, is proving to be a great breeding female, with several progeny retained and more to follow in the coming years. Montezuma M25 has been a very complementary joining sire for this female, on both data and phenotype. Serenade S140 has two full sisters as lots 70 and 71.

Dick Whale scored this bull an impressive 7 out of 8 for structure. Combined with his all-star pedigree, Shamrock S114 is a young sire in the making! He is in the top 15% of the breed for birthweight.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Back Angle	Muscle	Doing Ability	Sheath
22	42	26	6	6	6	6	43	33	5

Shamrock S114 is stacked with maternal strength. He is sired by the great Spots 'n Sprouts Stands Alone, out of our best-milking daughter of the renowned Codiak Acres Niome GNK 5X.

If you are looking to tidy up the maternal traits in your herd, this bull is bred to deliver. He is one of the better young bulls in this year's draft - solid across the board. We have retained all three of his ET-bred full sisters.

TRAITS ANALYSED: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Skyline S144 is a real carcase bull, with loads of muscle in a moderate, easy-keeping package. While being in the top 5% of the breed for EMA, he has retained softness of carcase, being in the top 10-15% for all fats.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
22	44	26	6	6	5	6	44	33	5

Skyline S144 is one of 27 lots in the sale sired by one of our resident sires, Minnamurra Montezuma M25, who is now 6.5 years old and still going strong. 'Monty' has been used extensively throughout the commercial industry, with people seeking him out for his unique ability to breed short gestation, low birthweight progeny that have above breed average growth and carcase traits - a rare gem in the Speckle Park breed. He now has 234 registered progeny in the Speckle Park International herdbook, with no doubt more to come.

Another great heifer bull - and one that Justin has considered keeping. Seamus S78 is out of our outstanding 2017-drop Putnam daughter, JAD 61Y Ultra N63, who is a strong-headed, larger-framed cow with impeccable udder quality.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	43	27	6	6	6	6	43	36	5

Seamus S78 is a very soft-doing bull with ample muscle, smooth through the shoulder, and reliability of pedigree. We have retained his two full sisters, to further grow this excellent cow family in our herd. Seamus S78 is a very versatile bull who can be used across multiple applications.

Seamus S78's dam, Ultra N63, has been an excellent breeding cow for us. Her first calf, as a two-year-old, was an excellent son of Mainstream Eldorado who was the lot 11 bull at our 2021 sale - purchased by Godolphin Pty Ltd. She has bred many other "keepers" since.

Snickers S51 is an AI-bred son of Maungahina Promise, out of a Codiak Calvin GNK 58Y daughter. Like all Promise progeny, he is a wide-topped, high-yielding bull.

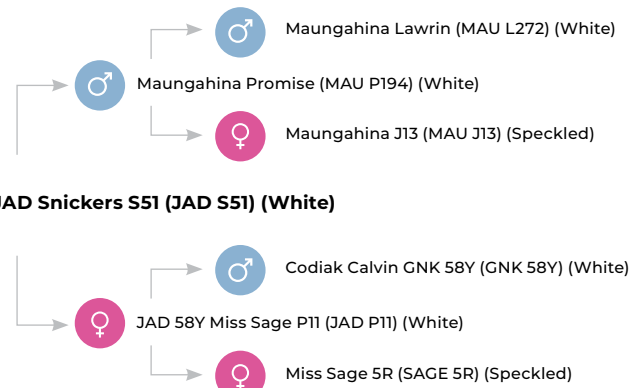

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
22	43	27	6	6	5	5	44	33	5

Snickers S51 is a Leptin TT. Leptin TTs have an overall increased rate of fat accumulation compared to leptin CC. For Leptin TTs, this mainly results in:

- ▶ Increased weaning weight
- ▶ Increased cow productive life due to increased body condition
- ▶ Increased milk production
- ▶ Increased 12th rib backfat
- ▶ Impacts yield grade and marbling.

See page 7 for more information.

Snickers S51's EBVs place him in the top 30-35% of the breed for four carcase traits.

Supreme S55 is out of JAD L11 Nice Lady Q75, who resulted from an embryo purchased out of the Premier Cattle Co herd in New Zealand. Her sire, Premier 101Y Logic L11, needs no introduction - he has been used extensively throughout the Speckle Park world. Logic is a full brother to Maungahina Promise's sire, Maungahina Lawrin.

Supreme S55 will continue to grow - we are yet to see the best of him. He is a high growth bull with great carcass data.

JAD Supreme S55 (JAD S55) (Speckled)

The second and final JAD N56/Frank bull to be offered in the sale, Sinbad S136 is developing into a really good bull. He is in the top 1% of the breed for scrotal size, and top 10% for retail beef yield.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	42	27	6	6	6	6	43	34	5

If you are one to chase something a little different on pedigree, then Sinbad S136 may be for you. His sire, Frank 19F is a larger-framed bull, with huge scrotal. He hails from the no-fuss, commercially-focussed Canadian herd of Merl and Lynda Zweifel. His progeny are good headed, smooth shouldered, with added frame. Frank proved a suitable joining to our Codiak Acres Niome GNK 5X daughter, JAD N56, who is herself on the smaller side. Sinbad S136 would make a suitable maternal sire, being from one of the best-uddered stud cows in our herd and himself being so strong for scrotal size. He has a full ET sister to follow at lot 72.

Like his lot 22 brother, Stranger Things S89 is being offered as an unregistered purebred. He is a smooth-made, eye-appealing white bull whose dam heralds from the Berting family's Ravenworth Speckle Park herd in Canada.

Stranger Things S89 is out of our Canadian donor, Ravenworth Prairie Lily 123G. We purchased this female in 2020, chasing her proven cow line. We are really impressed with Prairie Lily 123G's Spring 2022-drop progeny coming through, by Maungahina Promise.

Stranger Things S89 was born out of a recip at 36kg, and his siblings were also at the lower end of the birthweight spectrum. This bull offers the commercial producer all the benefits of Speckle Park.

JAD Stranger Things S89 (JAD S89) (White) - UNREGISTERED PUREBRED

Shadowfax S141 is the first son of Prairie Hill Loaded Up 5E to be offered for sale in Australasia, and the only son to be offered in this sale. His dam is a full sister to renowned Canadian sire, Ravenworth Invictus 103C.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
22	41	26	6	6	6	6	44	30	3

Shadowfax S141 is the result of a flush we purchased out of his dam in 2020. Ravenworth Northern Star 120E has an outstanding body type and excellent structure throughout. She has a picture-perfect udder and does a top job on her calves. Shadowfax S141's sire, Loaded Up, topped the 2018 Source Sale in Canada, and produces plenty of muscle and length in his progeny. Shadowfax S141 is in the top 5% of the breed for scrotal size, and is also a trait leader for all fats. He offers quite a different pedigree than a lot of people would be familiar with. He has two full sisters to be offered later in the catalogue, as lots 67 and 68.

Skyhook S68 is the second JAD P34/Promise bull of four to be offered in the sale. This bull could be described as a keg on legs! Moderate, thick and super soft - a great vealer bull.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
23	42	26	6	6	6	6	43	34	5

Skyhook S68 was part of a prolific flush, with four full ET brothers catalogued, and one very exciting full ET sister to follow in the catalogue as lot 62. We purchased Skyhook S68's sire, Maungahina Promise, in 2020 for a then-New Zealand record NZ\$35,000. He is quickly building a reputation at JAD for producing great carcasse cattle, with so much top and softness. They are all VERY docile with attractive sirey outlooks.

Promise's dam, Maungahina J13, is also the dam of our co-owned sire, Maungahina Nikko. Skyhook S68 is a Leptin TT (see explanation on page 7).

Purchaser:	Price: \$

The youngest bull in the purebred offering, at just 15 months old, Stampede S147 is an excellent heifer bull prospect to finish off our 2023 purebred bull offering.

Structural Scores									
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability	Sheath
22	40	25	6	5	5	6	40	35	4

Stampede S147 is another great example of what JAD Quistacat Q48 is breeding. We have retained all Quistacat daughters born in 2021. They show so much promise! Stampede S147 is a smooth-made, stylish bull, with his father's sirey outlook, and fluent movement. This bull carries his sire's strength in scrotal EBV, and added to this, Stampede S147 is in the top 15% of the breed for birthweight, and top 10% for EMA.

Stampede S147 may be younger but should not be overlooked as the final purebred bull for JAD 2023!

Purchaser: _____ Price: \$ _____

We are excited to continue the development of our Commercial JAD Speckle Park Family. The proof is on display!

This family is being developed alongside our registered purebred family, and will offer commercial producers an option for their breeding program to select unregistered commercial Speckle Park bulls that are performance-recorded, DNA tested, structurally assessed, and backed by the JAD Guarantee.

This family's core foundation breeders were meticulously selected from over 400 F1 Speckle Park/Te Mania Angus females, and we have benchmarked this herd directly alongside our registered cattle as they progress towards full-blood (but unregistrable) status. This line has been performance recorded under the "JSP" Herd ID through International Genetic Solutions' (IGS) multi-breed register, operated by the American Simmental Association. Our data will be published in the Supplementary Handbook prior to sale day.

Ours is the first Speckle Park data to be entered into the IGS system, so in these early years, the data is relevant for **within-herd comparison only**. As you would be able to appreciate, the newness of Speckle Park in the IGS multi-breed system means we will need to get a few more year-drops in the system before we can start to expect reliable data for across-herd comparison. We have submitted data to the IGS system for all year drops born since 2014 - stud and commercial animals.

DNA profiles will be supplied to IGS for each animal to assist in strengthening the quality of the data output. Our commercial family will be an exciting family for commercial beef producers to follow!

In BREEDPLAN, it is not possible to compare across breeds. We feel the IGS system provides an exciting opportunity for us to see how our animals stack up against other established, well-known breeds. We look forward to following the progress. Please note that these unregistered commercial bulls have been managed in the same contemporary group as their purebred registered counterparts earlier in this catalogue.

Note:

50:50 = 50% Speckle Park, 50% Angus (also known as: F1

75:25 = 75% Speckle Park, 25% Angus (AKA: F2)

87:12 = 87.5% Speckle Park, 12.5% Angus (AKA: F3)

The ins and outs of IGS

International Genetic Solutions (IGS) is the world's largest multi-breed beef cattle evaluation system. It combines more than 16 million animal records with over 400,000 new animals added annually.

One of the IGS traits measured, which we will introduce with enough data in the system, is Stayability (STAY). This Expected Progeny Difference (EPD) expresses the percentage of daughters remaining in the cowherd at six years old. We believe one of the biggest cost in any beef business is waste from lack of cow longevity.

Learn more about International Genetic Solutions (IGS) here: www.internationalgeneticsolutions.com

Another great beef bull! JAD S306 is by Maungahina Promise, out of a Codiak Putnam GNK 61Y daughter, JAD N590, who is a consistent breeding female in our herd.

JAD N590, bred an outstanding black bull in our 2021 Sale, JAD Q310, by Maungahina Kidmans Cove. That bull was purchased for \$14,000 by Mespine Pty Ltd. Justin and his father, Tony, were pleased to see Q310 on their QLD tour late last year. Great to see he is doing a top job!

This bull is one of Justin's favourites in the catalogue. JAD S192 has so much power and top! He's bred out of one of our best producing HBR-registered Angus donor dams, who we lost tragically last year. ASHP128's progeny are at the top of our Angus stud program.

JAD S192 has impressed anyone who has viewed him in the flesh - rarely do you see a bull with this amount of muscle still scan an IMF of 6%, with P8 and rib scans of just 9 and 7 respectively.

JAD S192 (50:50) (Speckled)

This bull is bred for marbling, being by Minnamurra Montezuma M25 and out of a Maungahina Kidmans Cove daughter. Montezuma is in the top 5% of the breed for IMF, while Kidmans Cove is Top Value - as high as it gets in our breed at +2.4 (February 2023 run).

This bull's granddam, JAD L585, catches the eye of everyone who views our herd, with her tremendous capacity, head strength, and udder quality. L585 has three daughters by Kidmans Cove working in our herd, and all are cut from the same cloth.

One of Justin's favourites! JAD S217 will be just 15 months old on sale day. He weighed in at 523kg on February 21, at 14 months old.

JAD S217 is a son of our tanky 2014-drop cow, JAD K61, who has exceptional foot quality, and raises a top calf year after year.

A soft, well-muscled young bull that will complement any cross-breeding operation.

Purchaser: _____ Price: \$ _____

*“Quality is never an accident; it is always the result of intelligent effort”
- John Ruskin*

- ◆ Unique Genetics
- ◆ Breed-Leading Sires
- ◆ Unlimited Potential

When we started JAD Speckle Park, we wanted to start with the very best Speckle Park genetics we could source. For us, “the best” had nothing to do with how good a “dolloped up” female looked in a photo. We wanted genetic diversity with a focus on longevity. We wanted to build a large scale base from which we could measure, refine, and identify trait leaders. We opted for what is ultimately the expensive route to achieve that goal, and have transferred 2046 embryos since 2016, through extensive embryo transfer (ET) programs. The result has been the development of a quality and well-measured foundation JAD cow herd to produce top quality, commercially-focussed Speckle Park - like those in this catalogue. We present a selection of mainly ET-bred 2021-drop registered purebred heifers, from around the world and from right here at JAD.

They represent a broad selection of genetics from different matings. Some of the cow families you will find in the following pages are completely new to Australia, and this presents as a fantastic opportunity for you to source new outcross genetics for your stud. We have visited Canada

Mitchell rarely misses tagging newborn calves. It's been great handwriting practice, and we're pleased to report that his writing has improved since our 2021 calving! Image: 6/11/2021

and New Zealand and have built strong relationships with highly-respected breeders with whom we share a vision for the breed's future. We are offering the first daughters of our then-New Zealand record priced sire, Maungahine Promise, and also the first Prairie Hill Loaded Up 5E daughters to be offered in Australasia.

These heifers are being offered pregnancy-tested-in-calf (PTIC). Each heifer has been complementary-mated to proven sires. Five of the heifers are PTIC by AI to sexed female semen from JAD Napoleon N31, giving the purchaser a 90%+ chance of a heifer calf. We hope you enjoy learning about this special group of females. Please peruse our 2023 offering, and we welcome your enquiry.

Niome S4 is a chip off the old block - just take a look at the similarity to her dam, JAD 3X Niome N56, and her granddam, Codiak Acres Niome GNK 5X, as demonstrated by the images of all three on this page.

Niome S4's dam, JAD N56, is one of the best-uddered females in our herd, and always does a cracking job on her calf. We cannot speak highly enough about this heifer's pedigree.

Jackungah Koda K01 is well-known in Speckle Park circles, with a flush out of this popular donor selling at auction for \$15,000 in 2021. We flushed Koda K01 to Premier 101Y Logic L11 in 2020, with one of those embryos producing the heifer being offered to you here today.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
25	33	28	7	6	6	6	33	37

JAD L11 Koda S104 is a stylish, upstanding heifer who sits in the top 5-10% of the breed for all growth traits, top 15% for carcase weight, top 25% for IMF and top 30% for EMA. Her sire, Logic L11, is one of the breed's highest growth sires. After previously using Logic in our program, we thought he would be a good match for Koda K01. The Koda K01 cow has produced several sale toppers. A Koda K01 daughter, with heifer calf at side, sold for \$40,000 at the Inaugural Blueprint Opportunity Speckle Park Sale in 2021, while another heifer daughter at the same sale sold for \$38,000. We have retained two full sisters to Koda S104.

Here we have an AI-bred Maungahina Promise daughter who is out of a full ET sister to JAD Napoleon N31 - who topped the inaugural JAD Sale in 2019 at \$24,000 - and JAD Nutcracker N22. Belinda S26 features a "tried and true" pedigree.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
25	38	28	7	6	6	7	35	39

Belinda S26 is a pretty heifer who stacks up on paper too. She features in the top 10% of the breed for all growth traits, top 20% for scrotal size, top 25% for carcass weight, and top 30-35% for rib and rump.

Her dam's first calf, JAD Quintessential Q10, was retained as a sire and produced some really well-made calves before his untimely departure due to injury.

We cannot speak highly enough about Belinda S26's pedigree - this heifer is well worth your attention.

You saw Spots A Roarin S91's four flush brothers offered earlier in the catalogue (lots 14, 39, 40 and 41), and now it is time for the lady of this mating to be in the limelight. This heifer features in the top 10% of the breed for fats.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
25	33	27	6	5	6	6	33	38

We purchased Spots A Roarin S91's sire, Maungahina Promise, in 2020 for a then-New Zealand record NZ\$35,000. He is quickly building a reputation at JAD for producing great carcass cattle, with so much top and softness. They are all VERY docile with attractive outlooks. This heifer is built on an excellent, proven pedigree, with her granddam, Ponderosa Spots A Roarin 19Y, also being the dam of JSF Midnight Lady 2C - a Canadian donor who has featured in several pedigrees across this catalogue.

TRAITS ANALYSED: BWT, 200WT, 400WT(x2), FAT, EMA, IMF

It is so rewarding when a well-oiled plan comes together. We always figured the mating of our donor, JAD 3A Yasemin N44, to Minnamurra Montezuma M25 would be a winner. Ta-da! Yasemin S82 and her full brother (lot 29) were both among Dick Whale's 'picks' of the catalogue.

Yasemin S82 sits in the top 5% of the breed for all fats, top 10% for birthweight, top 15% for gestation length, and top 15% for EMA. She is confirmed pregnant to our resident sire, JAD Quistacat Q48, who will add growth and scrotal to the pedigree of her resultant calf, due in September.

Yasemin S82 goes back to the very stylish Canadian dam, Yasemin of Uneeda 260Y (pictured), on the dam side. We have produced seven 260Y daughters here to date, with one, JAD 25U Yasemin P58, selling for the equal top price of \$20,000 at the 2020 JAD Sale.

Another heifer confirmed pregnant to **SEXED FEMALE** semen from JAD Napoleon N31, Miss Sage S121 is an all-Canadian import - the first female to be offered from our donor, JSF Miss Sage 62F. She just so happens to have also been selected as one of Dick Whale's 'picks' of the sale.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
22	37	25	6	6	5	6	39	41

We are excited to be offering this female, and her full ET sister to follow at lot 66. We purchased their dam, Miss Sage 62F, from Johner Stock Farm in Canada in 2019, and this catalogue contains some of her first progeny born at JAD, with another female being retained in our herd. Miss Sage 62F has produced an interesting bull calf for us in Canada, registered as JAD JSF Yellowstone 10K. This rising 12-month-old bull calf has caught the attention of fellow stud breeders in Canada, and we look forward to watching how he grows out. Miss Sage S121 is a very quiet, moderate-framed heifer with plenty of thickness, courtesy of her sire, JSF Unmarked 2D.

Northern Star S106 is the first daughter of Prairie Hill Loaded Up 5E to be offered for sale in Australasia, and one of just two to be offered in this sale. Her dam is a full sister to renowned Canadian sire, Ravenworth Invictus 103C.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
21	34	25	6	6	6	6	37	36

Northern Star S106 is the result of a flush we purchased out of her dam in 2020. Ravenworth Northern Star 120E has an outstanding body type and excellent structure throughout. She has a picture-perfect udder and does a top job on her calves. Northern Star S106's sire, Loaded Up, topped the 2018 Source Sale in Canada, and produces plenty of muscle and length in his progeny. This heifer has been confirmed pregnant by AI to JAD Quistacat Q48, ready for an early-September calf. Northern Star S106 has a full brother offered as lot 38, and a full sister as lot 68. We have also retained a full sister in our herd.

This low birthweight, Leptin TT heifer features another new pedigree for many in Australia. Her dam is a full sister to renowned Canadian sire, Ravenworth Invictus 103C, who sired the \$34,000 equal top-priced bull of the 2021 JAD Sale. She features top 5-10% fats.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
20	35	24	6	6	6	5	38	36

Northern Star S103 is the result of a flush we purchased out of her dam in 2020. Ravenworth Northern Star 120E has an outstanding body type and excellent structure throughout. She has a picture-perfect udder and does a top job on her calves. Northern Star S103's sire, Loaded Up, topped the 2018 Source Sale in Canada, and produces plenty of muscle and length in his progeny. This heifer is the final Loaded Up daughter to be offered in the sale. She has been confirmed pregnant to JAD Quistacat Q48. Northern Star S103 has a full brother offered as lot 38, and a full sister as lot 67.

Amanda S73 is a ball of style. The mating of Minnamurra Montezuma M25 over our powerful Line Drive donor, JAD 54Z Amanda N53, has resulted in two outstanding females on offer, here and at lot 71. They are long-bodied, with beautiful outlooks.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
25	38	29	6	6	6	6	38	32

Amanda S73 has been confirmed pregnant to sexed female semen from our 2019 high seller, JAD Napoleon N31. This offers the purchaser a great opportunity to develop a cow family from this proven maternal line. With matrons in her pedigree of the likes of Codiak Nice Lady RKW 25N, Notta Pho-Finish 54P, Redneck Whiskey 7W, and Codiak Unique GNK 8R (via Codiak Amanda GNK 42Y), this heifer has a very bright future, as does her resulting progeny, bringing in another prolific breeder, Upto Specs Tori 10T, and a double cross of 54P. We have retained a full sister.

The last of the Moovin Zpotz Frank 19F daughters to be offered in the sale, and out of our proven donor dam, JAD 3X Niome N56. This fancy heifer is a one that attracts the attention of many who have viewed our offering.

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
25	36	29	6	6	5	6	37	37

If you are one to chase something a little different on pedigree, then Niome S137 may be for you. Her sire, Frank 19F is a larger-framed bull, with huge scrotal. Niome S137 sits in the top 1% of the breed for scrotal size, thanks to her sire. Frank hails from the no-fuss, commercially-focussed Canadian herd of Merl and Lynda Zweifel. His progeny are good headed, smooth shouldered, with added frame. Frank proved a suitable joining to our Codiak Acres Niome GNK 5X daughter, JAD N56, who is herself on the smaller side. JAD N56 is one of the best-uddered stud cows in our herd.

Yasemin S120 is the only solid black female in the sale, and a truly stylish one at that! She is JAD-bred on both sides of the pedigree, being by JAD Nutcracker N22 - the only bull in our inaugural sale in 2019 that Dick Whale scored a seven out of eight. How far we've come, with 11 this year!

Structural Scores								
Stature	Capacity	Body Length	Front Feet	Back Feet	Front Angle	Rear Angle	Muscle	Doing Ability
22	34	25	6	6	6	6	36	39

Yasemin S120 is a fleshy, moderate-framed female, carrying the maternal traits that are steep in her pedigree. With females in her pedigree like Codiak Belinda 66A, Yasemin of Uneeda 260Y, and Notta Pho-Finish 54P, it is little wonder that Yasmein S120 shows so much promise.

Yasemin S120 is confirmed pregnant to our resident sire, JAD Quistacat Q48, who will add growth to this pedigree, and an extra dimension generally. We believe Quistacat to be the best bull we have bred to date, out of 250+ bulls, and he is stamping his progeny well.

COMMERCIAL SPECKLE PARK HEIFERS

We are pleased to offer 125 quality Speckle Park-cross heifers, with 11 of the 14 lots AI'd to sexed female semen from JAD Napoleon N31 (JAD N31), who was the \$24,000 top-priced bull at the inaugural JAD Speckle Park Bull + Female Sale in 2019. Heifers PTIC by AI to sexed female semen will produce 90%-plus female progeny. Napoleon has been used extensively, over many hundreds of heifers, and is well-proven as a suitable heifer bull. The AI'd heifers were AI'd in three programs, between October and

December, and backed up by low birthweight Speckle Park bulls, specially selected for use over heifers. We will formally lot these heifers - in lots of 5, 10 and 15 head - in the weeks leading up to sale day, with full lot details to be published in the Supplementary Handbook, including tag numbers, body weights, sire information, and due dates.

See the sale supplementary handbook for individual lot details.
