

# KAROONDA

— HEREFORD STUD —

Annual Sale

Tuesday 21<sup>st</sup> March 2023

**Lot 7 - Karoonda Zappy (PP) at 13 months**

**BULLS AVAILABLE FOR INSPECTION BEFORE THE SALE**

*Give us a call and come for a visit, we are more than happy to show you around the bulls and the females that stand behind them!*

**All bulls genomically tested & sire verified.**

**Lead stockhorse and seasoned cowboy.**

**Karoonda Herefords invite you to Gelantipy for  
our annual Bull Sale**

**21<sup>st</sup> MARCH 2023**

Inspection Commencing 9:30am

Sale Commencing 1:00pm

*Lunch and refreshments provided, a small donation to the Bush  
Nursing Centre appreciated.*

Vendors:

**Karoonda Herefords**

**Pic # - 3EGNK003**

Tim Woodham - 0436 015 115

### **Directions:**

Karoonda Park is located in Gelantipy 40 minutes north of Buchan on the Gelantipy Road.

### **Inspection**

Viewing of cattle can be arranged at any time by appointment and from 9:30am on the morning of the sale.

### **Herd Health**

All Karoonda bulls were checked by Dr D. Harms, Main Street Vet Clinic, Bairnsdale on the 2nd February 2023 and come with veterinary certificates for breeding soundness.

### **Vaccination**

- Sale bulls vaccinated with Piliguard in November 2022 and as calves
- 7 in 1 vaccinations, minimum of 3 vaccinations
- Tested PI negative and vaccinated with Pestiguard - 2 shot program, we recommend an annual booster to ensure coverage.

### **Carcase Data**

***Karoonda's bulls will be weighed and scanned by Geoff Moncrieff prior to the sale and figures will be available on a supplementary sheet.***

### **Delivery**

Bulls purchased are held free of charge until time of transport and we offer transport free of charge to surrounding areas. We will endeavour to have bulls delivered promptly after the sale and appreciate your understanding as we organise loads to various regions.

### **Rebate**

2% Rebate to outside Agents introducing buyers in writing or by phone at least 12 hours prior to the sale or who attend the sale and buy on the behalf of their client. No verbal instructions, please fill out buyers slips.

### **Accommodation**

Accommodation and meals are available at Karoonda Park please contact Lauren on (03) 5155 0250 or Judi on (03) 5155 0220. People are welcome to stay on the night before and the night after our sale.

## **Catalogue**

We endeavour to make sure that all information provided in the catalogue is accurate and relevant, but no responsibility is accepted for any errors which may have occurred

## **Guarantee**

Karoonda guarantees the fertility of all sale bulls for a period of one year from the date of sale. If Karoonda receives notification of infertility (not caused by injury) and a relevant certificate from a veterinarian an arrangement can be made to replace the bull. Purchasers will receive a credit equal to the purchase price minus the salvage value.

## **Conditions of Sale**

Terms and conditions will apply as displayed at buyer registration on sale day. Insurance whether it be total cover or transit insurance is recommended. While we will do our best ensure all purchases arrive in top condition, at the fall of the hammer the animal purchased is the buyers responsibility.

***Karoonda recommends insuring your purchases.***

## **Disclaimer Notice**

People entering the property for any purpose whatsoever, including attendance of cattle auctions, do so at their own risk. We are not liable to you for personal injury or death suffered by you and/or for the theft, loss of or damage to any personal property caused or contributed to by our or their negligence, deliberate act or unlawful conduct. "We", "Us" or "Our" refer to the owners, their employees, contractors, agents and each of them.

**Bull Delivery Express**

## **BREEDPLAN INFORMATION**

*Breedplan is a performance evaluation programme that describes the genetic merit of bulls for a number of commercially important traits. This genetic merit is given as an Estimated Breeding Value (EBV) for each trait. The EBVs in this catalogue are Hereford Group Breedplan EBVs and can be directly compared with Hereford Group Breedplan EBVs from other herds. When comparing bulls, the EBV of each bull can be compared against the breed benchmark of zero (0), or against the current breed average EBV which are shown at the end of this entry.*

**Birth Weight EBV** (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth. This is particularly important when selecting sires for use over heifers.

**200-Day Growth EBV** (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Milk EBV** (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

**Days to Calving** EBVs are estimates of genetic differences between animals in time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. The Days to Calving EBV promotes those cows that calve earlier in the season compared to those that calve later, while penalising those cows that do not calve. Lower, or more negative, Days to Calving EBVs are generally more favourable.

**Scrotal Size EBV** (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

**Eye Muscle Area EBV** (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

**Rib Fat and Rump Fat EBVs** (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield EBV** (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses. Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

**Selection Indexes – Selection Indexes indicate the possible extra dollars earned per cow joined in self replacing herds targeting a particular market.**

Southern Self-Replacing Index – Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing straight bred Hereford herd targeting the domestic market. Daughters are retained for breeding.

Southern Baldy Terminal Index – Estimates the genetic difference between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over Bos taurus (eg. Angus) females where all progeny are slaughtered.

### **Hereford Breed Averages - EBV's for Australian 2021 Born Calves**

CE	GL	Bwt	200	400	600	Milk	SS	DC	Cwt	EMA	Rib	Rump	RBY	IMF

**INDEX VALUES** S S-R +\$138 N S-R +\$125 SB +\$141 NB +\$104

#### **Accuracy**

A trait EBV will only be published if the accuracy of the specific trait is greater than 20%. Each trait for an animal can then be compared to the breed average, to see how the individual animal compares with the rest of the breed. Accuracy below 50% tend to be based on little information & will have a greater chance of variation as more data becomes available.

<b>HORN STATUS</b>	
H	Horned Animal - All horned cattle are dehorned at birth
H#	Horned Animal with poll genetics in the first six generations
PP	Homozygous Polled Animal - Carries two poll genes all offspring will be polled
HP	Heterzygous Poll - Carries Horned and Poll Gene, horn status of offspring will depend on cows horn status
S	Poll animal with Scurs - Small unattached horn.
