## WELCOME TO OUR 45TH ANNUAL AUTUMN ON PROPERTY AUCTION

*On property bull sale Monday 20th March  
2023 Auction commencing at 1pm.*

*Bull viewing from 9.30am. We welcome earlier bull viewing by appointment, please ring:*

*Frank Archer 0417 506 163*

*Ed Archer 0417 337 144*

# A proud family farming legacy celebrating seventy-five years

1948 - CELEBRATING 75 YEARS 2023

## LANDFALL 1948-1982

1948	1949	1948-1963	1959	1966	1975	1978	1979	1981	1982
Twelve foundation females purchased from Edzell, SA and Rosebank, Vic to establish the Landfall Seedstock herd. Membership with Angus Society of Australia begins.	Gerald Archer passes and Rob Archer takes on the full management of Landfall and the breeding herd.	Naranghi sires introduced to the Landfall Herd.	First Landfall animal registered with the Angus Society of Australia.	NZ sire Edwin Era 40th of Waitapu introduced.	First bull sale held with the Hughes Family at Cluden Newry. NZ sire Banner Boy 226 of Matauri introduced. Thologolong Goodwill introduced.	Te Mana Vigour introduced.	Glen Bold Tasman introduced. First on property bull sale held at Landfall.	Rob Archer nominated as president of Angus Society of Australia.	Summitcrest Powerplay M032 introduced.

It would be fair to say that in 1948 when Rob Archer and his father Gerald acquired 12 stud females, that it would have been hard for them to imagine the legacy that it would build for the future. It was in the same year on the 1st of September that the Archer Family of Landfall, became members of the Angus Society of Australia.

The foundation females were purchased from the Edzell herd in South Australia and the Rosebank herd in Victoria. Rob selected these females as they were larger framed and displayed a more feminine type than the average Angus animal at the time.

He felt that these animals had the ability to outperform the breed average. This decision proved pivotal in the future of the Landfall herd as it set a strong base of females that have performed well in commercial conditions across Australia.

Naranghi sires from the Bott Family at Yarrawonga in Victoria

Roy Wickham and Gerald Archer

were used for the first 15 years in the breeding program to further advance the performance of the females. The Bott's had a keen interest in the improvement of the carcase attributes of the beef

Rob Archer

animal having been instrumental in the development of carcase competitions in Southern Australia.

Following on from the Naranghi sires, Rob went further afield to New Zealand, introducing a sire from both the Waitapu and Matauri herds. They were then complimented using sires from Australian herds Thologolong, Te Mania and Glen Bold.

The year 1969 was the beginning of the Archer female line with the birth of Landfall Archer N47.

*Continued page 4 ▶*

Harry Williams and Rob Archer

Gerald Archer and John Crouch, CEO American Angus Association – 1995

*In the early 1980's after Gerald had established himself as a pivotal part in the direction of the Landfall herd, he embarked on importing genetics from the US.*

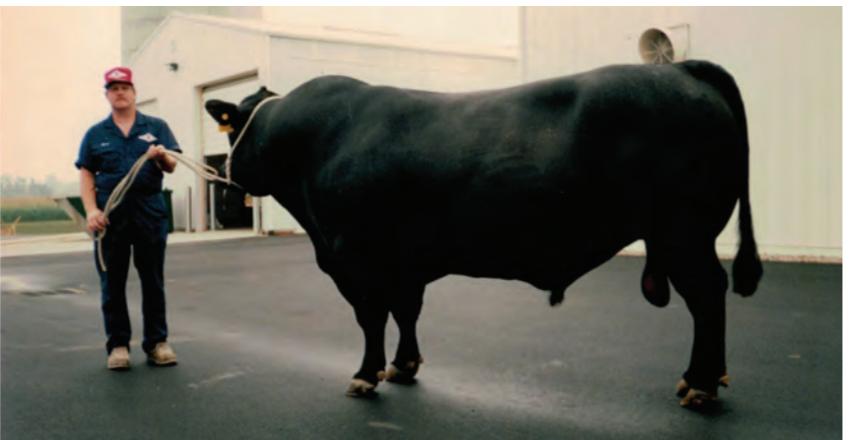

In his early twenties Gerald ventured to Victoria to further his experience in the industry where he ended up working with Harry Williams at Victoree Angus. It was during this time that Gerald met Harry's daughter Lou.

Gerald returned to Tasmania in 1976 when he and Lou were married and joined Rob full time at Landfall, the year after the first auction was held in conjunction with the Hughes Family at Cluden Newry. This was followed by the introduction of an on-property sale in 1979. Two of Landfall's most prolific and highest quality female lines in Joyle and Loretta by the way of a belated wedding present.

In the early 1980's after Gerald had established himself as a pivotal part in the direction of the Landfall herd, he embarked on importing genetics from the US along with Lou's family from Victoree.

The first of these bulls was Summitcrest Power Play, who was the first live animal imported to Australia since 1956. He was followed by another 15 live animals being imported by Landfall and Victoree from 1981 to 1995.

Artificial insemination and embryo transfer technology

Scotch Cap at Select Sires – 1988

was introduced in the early to mid-1980's as a tool to increase the rate of genetic gain by multiplying elite animals in the breeding program. This coincided with the introduction of on-farm performance recording and the submission of data to Angus Group Breedplan to assist in the

Angus Australia 50 Year membership – awarded in 1998

identification of elite animals in the herd and to further add value to the client base.

It was in 1983 that Gerald's father Rob sadly passed away leaving Gerald with the responsibility of continuing to build the quality of the Landfall herd. Landfall Elsa D101 was born in 1984, she was the foundation female of the prolific Landfall Elsa female line.

In 1988, the influential sire in Scotch Cap was introduced, a prolific sire that aided in breeding the modern Angus animal, he was used heavily in the Landfall herd.

In 1995 a batch of embryos from the Fairhart Lady line in the US were imported. The resultant progeny added considerable merit to the Landfall herd, in particular the first line of daughter's were flushed as maiden heifers generating some

quality females that present in a number of the Landfall pedigrees.

New Design 036 and a son of his, Booroomooka Theo were introduced through the late 1990's and early 2000's along with sires from the Te Mania, Dunoon and Hazeldean herds.

This period also saw Gerald and Lou's children take an active role in the business as they became young adults. In 2004 their eldest son Ed took on the management of Greenhythe situated 30kms north of Landfall which today is predominantly a

Ed & Will Archer

breeder block calving 1000 of the Landfall females.

At this time Gerald and Lou's second son Will moved into the management of Landfall and the breeding program. During his tenure he introduced sires from the Ardrossan herd in X15, W109 and A2 along with US sires SAV Net Worth and Front Runner. Te Mania Infinity was introduced in 2007 who had a significant positive influence on the Landfall herd, in particular the females he left behind.

Will continued in the role until 2012, at which time he moved into quarrying on one of the family properties.

Landfall Farm Fresh was established by the family in 2008 as an avenue to market beef and lamb produced on the family properties at both a wholesale and retail level.

#### LANDFALL 1983-2004

1983	1985	1986	1988	1995	1998	1999	2001	2003	2004
On farm performance recording begins. Rob Archer passes and Gerald takes over full management of Landfall and the breeding herd	Landfall joins Angus Group Breedplan.	Embryo transfer technology adopted.	Scotch Cap introduced. Rito sires introduced.	Embryos from Fairhart Lady female line (US) introduced.	New Design 036 introduced.	Te Mania Sheen introduced.	Dunoon Reagan and Hazeldean Renaissance introduced.	Booroomooka Theo introduced. SAV Front Runner introduced.	First on property Spring Bull sale held at Landfall. Ardrossan Connection X15 introduced.

In 2012 Gerald was recognised for his contribution to the Angus breed in Australia with the awarding of an Honorary Life Membership. This was the same year that prolific sire, Rennylea Edmund was introduced to the Landfall herd making a positive contribution to the female herd and siring the industry recognised bull in Keystone.

The year 2013 saw the management of the Landfall herd formally transfer to Ed and Gerald and Lou's third son Frank who now are partners in the Landfall business. They have been well supported with the management of the herd and the breeding decisions by their brother-in-law Tim Wheeler, who began his farming apprenticeship with Gerald in 2000.

Several sires have been introduced during their tenure, however, worth noting is VAR Discovery who sired Landfall New Ground N90 who remains Landfall's highest priced bull.

N90 himself has been very influential in the Landfall herd siring beautiful daughters and consistent sons.

Landfall New Ground N90

Ed and Frank Archer

Other sires worth recognising are Rennylea L519 and more recently Te Mania Pheasantry, both introduced for their carcass merit whilst maintaining the fundamentals of a functional Angus animal.

In 2020 Landfall registered in excess of 2000 calves on the Angus database continuing to build to over 3000 females joined in the Spring of 2022.

Whilst there have been many improvements and innovations introduced to the Landfall

breeding program over the past three generations, the core values and beliefs of breeding animals that will thrive in the commercial environments of Australia has helped to maintain Landfall's relevance and standing in the industry.

VAR Discovery

Te Mania Pheasantry

Tim Wheeler and Frank Archer

**Genetic Progress through time:**

**CHOICE OVER CHANCE**

By way of innovation, leadership, passion, experience and continual improvement, **Landfall Angus** seeks to add value in every step of the beef supply chain. From quality genetic production through to the beef consumer experience, every decision is made with the consideration of a profitable, sustainable and rewarding industry for all stakeholders.

**It's not by chance that we breed good bulls!**

# Welcome

We invite you to attend our 45th Annual Autumn on property auction and are pleased to offer you 259 performance recorded rising two-year bulls.

Feature sires in this sale are Te Mania Pheasantry, Chiltern Park Moe, Landfall New Ground, Rennylea L519 and Landfall P145. With large numbers of sons available from these sires in this offering, it is achievable for you to put together a team of bulls with a genetic package matched to your breeding objectives.

The new year has seen the beef market come back from the dizzying heights we have experienced over the past 12 to 18 months. It is a healthy reminder that we need to aim for a continual improvement in productivity and profitability rather than simply rely on a high price to achieve a margin. Seasonal conditions overall remain favourable and with the market still strong despite some softening, 2023 looks to be another good year for beef producers.

We are extremely proud to be celebrating the 75th anniversary of the Landfall seedstock herd. Through three generations of our family developing the herd, one thing remains the same, the philosophy of breeding cattle

that thrive in the commercial environments of Australia. Our breeding program and production system are based on commercial beef production systems, ensuring that Landfall genetics offer value to our client base through achieving the maximum rate of genetic gain.

The Landfall production system uses rotational grazing to maximise pasture utilisation resulting in a high stocking rate per hectare. Our average mid-winter stocking rate last year was 17.5 DSE/ha with a peak in stocking rate in February of 25 DSE/ha. This is across a widely varying quality of land from highly productive irrigated pastures to native run country. We use irrigated pastures to guarantee feed for young stock in the late Spring, Summer and Autumn with this country carrying an average of 50 DSE/ha.

One of our key objectives when increasing carrying capacity has been to not compromise individual animal performance, as animal intake needs to be considered in the stocking rate equation. Understanding what different classes of animals need at different times of the year is the key to ensuring that we meet

our target expectations on animal performance and reproductive rates. Winter is certainly the most challenging time of the year in our system as the cooler months inhibit pasture growth. The use of grown and conserved fodder is an important tool to managing our herd through the winter.

We have great confidence in what Landfall genetics can achieve in the industry, particularly in production systems aiming to maximise productivity. This is because we have the ability to accurately identify the outlier performers in our herd to multiply the high achievers and cull the under achievers. Our recipient herd is our mechanism for removing the underperformers from our female herd. These cows are receiving embryos from the elite end of our herd, rapidly accelerating the rate of genetic gain.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

Kind Regards,

**The Archer Family.**

# Sale Notes

## 1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 119 for map and travel information.

## 2. Rebates

4% rebate commission offered on all bulls to agents settling within 7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email [livestocktas@nutrien.com.au](mailto:livestocktas@nutrien.com.au) or [frank@landfall.com.au](mailto:frank@landfall.com.au)

## 3. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

## 4. Nutrition

All bulls have been fed grass with supplement silage.

## 5. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

## 6. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

## 7. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 110 of this catalogue).

## 8. Joining Sires

Lots 1-51 have been used for joining in the Landfall herd in the Spring of 2022. Please take this into account when assessing these bulls.

## 9. Semen Rights

Landfall Angus reserves the right to collect any bull sold for use in the Landfall herd. Collection will be at Landfall's expense and at the convenience of the purchaser.

## 10. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They will be available mid February at [www.landfall.com.au](http://www.landfall.com.au)

## 11. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

## 12. Inspection

All bulls will be available for inspection prior to the sale by appointment, please ring:

Frank Archer - 0417 506 163

Ed Archer - 0417 337 144

### PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress. To this end we ask you to nominate;

### CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

Images and videos of most lots will be available on our website closer to sale date.

**Thank you for your co-operation.**

### DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

**PV:** both parents have been verified by DNA.

**SV:** the sire has been verified by DNA.

**DV:** the dam has been verified by DNA.

**#:** DNA verification has not been conducted.

**E:** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

**DISCLAIMER:** Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

#### Notes

Pheasantry was purchased by Landfall along with 4 other breeders from Te Mania in 2020 with use of the bull limited to the 5 members of the syndicate. His introduction to the Landfall breeding program was to use on particular female lines to increase IMF whilst maintaining balance across the other traits and phenotypic areas. Pheasantry is a carcass quality phenomenon as his IMF currently sits at +7.7 with an EMA of +12.8 on the Angus genetic evaluation. His progeny are long bodied, structurally sound and extremely docile. Progeny reports from other herds are aligned with what we have experienced at Landfall. Pheasantry boasts a genetic package that helps us seek continual improvement in the eating quality of Landfall sired progeny.

#### Notes

Moe is a calving ease sire with a healthy birth to growth ratio and a moderate maturity pattern. His progeny are of a consistent type being appealing to the eye with good length and depth of body. The areas he excels in are structural soundness and docility. Moe is a sire that breeds good honest cattle for the commercial industry.

#### Notes

We are continually impressed by the quality of the New Ground progeny both in the Landfall herd and the wider industry. He was one of the heaviest use sires across the industry in 2022. His strengths are his consistency of breeding with length, width and depth. New Ground progeny are a pleasure to handle with very even temperament. His oldest daughters have just weaned their second calves at Landfall, they are outstanding young cows, demonstrating the depth of quality in the female side of New Ground's pedigree.

#### Notes

The top selling bull from the Landfall Autumn Sale in 2020 to Absolute Angus in Victoria. A moderate frame bull with length, depth and width. He stands on a sound set of feet and legs and moves freely. His progeny are moderately framed with terrific length of body. We expect doing ability and longevity to be a strength of the P145 daughters.

#### Notes

We are nearing the end of the direct Keystone progeny coming through the system at Landfall and what a tremendous job he has done for us and the breed. A genuine curve bending sire, Keystone is one of the highest use bulls across the industry over the last three years. A long bodied and taller bull with structural integrity and a clean front end. Docility is a strong point.

### Notes

Beast Mode progeny are easy to pick on eye as he is hard to rival on the body mass he adds. They are moderately framed with excess thickness and depth. Demonstrates exceptional early growth with an earlier maturity pattern. Foot structure is very good with good depth in the heel. A sire line that is well matched to larger framed and loner bodied females that require some shape.

## **NOTES**

## **NOTES**

## Stud stock insurance with all bulls purchased at the Landfall Angus Autumn Sale

For all bulls sold in this catalogue, specialist agricultural insurer Achmea Australia will provide **2 Star Mortality cover for three months (including accidental loss of use).**

This cover has been paid for by Landfall Angus.

At the end of the three months, if you would like to purchase additional cover, please contact our Farm Insurance Specialists:

Michelle Stevens (0437 249 682) and Mark Gaetani (0408 915 441)  
who are attending the sale.

### Our flexible options include:

- 1 Star** Mortality only (including transit)
- 2 Star** Mortality including accidental loss of use
- 3 Star** Mortality including accidental loss of use, sickness and disease.

### CONTACT US FOR A QUOTE

# Caring For Your Bulls

## More calves, more years

**Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.**

### 1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

### 2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.

- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

### 3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

### 4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

# Understanding the TransTasman Angus Cattle Evaluation (TACE)

## WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg

difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

BIRTH			
CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

OTHER			
NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.

GROWTH			
200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

STRUCTURE			
Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.

FERTILITY			
DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

SELECTION INDEXES			
\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
\$D	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the \$D supermarket trade.	Higher selection index values indicate greater profitability.
\$GN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
\$GS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

CARCASE			
CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
EMA	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

# Bull Guarantee

**At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.**

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

## **GUIDELINES**

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

### **FIRST YEAR (12 month period from date of purchase)**

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

### **SECOND YEAR (12 to 24 month period after purchase date)**

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

**Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.**

# The Obligation of the Purchaser

**The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.**

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

## FREIGHT

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

# Butchery is a Dying Art, admits butcher

Article taken directly from: <https://www.livekindly.com/butchery-dying-art/>

A little background to Landfall Farm Fresh...

Landfall Farm Fresh butcher was established in 2008 by the fifth generation Archer siblings. A family with an established reputation as one of Australia's leading Angus beef breeders and local farmers since 1876. Landfall Farm Fresh was a dream of their grandfather's and has become one of Launceston's finest butchers.

Healthy stock and sustainable farming practices have built the foundations for a butcher shop that provides consistent, quality produce.

Their animals are hand-picked from their very own farm in the Tamar Valley each week, and their gluten and preservative free smallgoods are all made by hand.

The traditional approach to butchering, the whole animal processing, and the dry-aging technique results in a unique eating experience. Experience the passion, pride, and integrity of Landfall.

We welcome you to visit us in store Tuesday to Friday at 49 Balfour Street, Launceston, and to follow us on Facebook and Instagram.

(03) 6334 5751

Butchery is a "dying art," according to a butcher in Exeter, an ancient city in England. Kevin Hollamby owns one of Exeter's last city butchers. Since 1985, Hollamby has worked in the industry and watched it decline over the years; his own store has seen staff numbers drop from nine to three.

"When our lease comes up in just over two years, I'm sorry to say it, but I can't see another butcher taking over. Times have changed," he said to Devon Live.

The newspaper highlighted that there has been a butcher at the same shop since after World War II, but now, traditional butcheries are "dying out."

In 1990, there were around 15,000 butchers' shops in the United Kingdom. This figure dropped to 6,380 in 2010 according to the Office for National Statistics, and now, there are just 5,830 across the UK.

The "rise of the supermarket," changing lifestyles, and an increase in vegetarians and vegans are behind the decline.

Emma Hollamby, Kevin's wife who also works at the butcher shop, said that more people are asking about where their meat comes from, showing a greater concern for animal welfare.

Roger Battishill, shop manager at Burrow Farm at Courtneys — where there has been a butcher's shop for around 70 years — agreed that more customers are questioning the origins of their meat and are

more aware of animal welfare and factory farming. His shop is the last surviving butchery in Cowick Street, where there were previously 17 butcher's counters.

Battishill said it is mostly younger people in their 20s and 30s asking these questions — the same generation that isn't interested in working in the butcher industry.

Battishill said that one of the industry's biggest issues is finding workers for the future. "There are a lot of people in the younger generation who don't want to get their hands dirty," he said.

It's not just the butchery trade that's struggling to fill jobs. Late last year, it was reported that 10 to 15 percent of meat processing jobs were vacant, making up 10,000 unfilled posts at major slaughterhouses across the UK. "It does not seem to be that the salary is the issue. People do not want to do this work," said Jonny Williams, senior livestock procurement officer for Scottish co-operative Farm Stock.

Moral to the story...support your local butchers who process whole animals and prevent the trade from dying!

## Our fool proof slow lamb shoulder

⌚ Prep Time: 20mins 🍲 Cooking Time: 8.5hrs ✨ Serves: 5

### Ingredients

- 1 Landfall lamb shoulder Bone-in, scotch-in, shank on
- 4 carrots
- 2 brown onions
- 8-10 garlic bulbs
- 4 sticks of celery (optional)
- 300ml of liquid stock
- 500ml of dry white wine
- Sea salt
- Olive oil
- Roast potatoes and greens to serve  
*I like to use green beans and broccolini*
- Happy Chef's red wine jus is a magic match  
*Also available from our butcher*

### Method

1. You'll do best with a large heavy based baking dish.
2. Preheat oven to 145-150 degrees.
3. Cut onions, carrots, and celery into large pieces and throw in the bottom of the baking dish with the peeled garlic bulbs.
4. Place lamb shoulder on top of vegetables.
5. Rub lamb well with olive oil and a generous layer of sea salt.
6. Pour in the stock and white wine to partially cover the vegetables.
7. Cover tightly with two layers of foil.
8. Cook for 8 hours.
9. Remove from the oven, discard the foil, and increase the oven temperature to 210 degrees. Carefully pour off some of the excess liquid – optional to keep it for a homemade gravy – leaving enough to stop the veggies burning.
10. Return the pan to the oven for 20 minutes, or until the salty fat layer has crisped.

# Alex's Ingrained Passion

Leading the Murray Valley Hunt at Murmungee, Alex and her Dad Ron

Born in 1999 in Murmungee Alex is the middle child of three and the only daughter of Ron and Nikki. An upbringing on the family property in Murmungee, North East Victoria, surrounded by lots of family and friends is a pretty idyllic upbringing for many country kids.

Growing up, weekends and school holidays were spent with cousins helping Dad do jobs (not sure if he'd always call it help) or having mud fights in the creek and barbeques in the paddock.

A passion and interest in agriculture was ingrained in Alex from a young age whether she was following her Nana around feeding poddy calves and lambs or sitting in the tractor with her Dad, there was always something to be involved in.

A big influencer in Alex's life has been her Nana, Mary Ferguson, who has always and still does have heavy involvement in the day-to-day running of the family farm – a work ethic to admire and willingness to share her skills and knowledge is something pretty special and a good benchmark to aim towards.

Alex's family farm consists of a commercial self-replacing beef herd turning off feeder steers or finished bullocks, dependent on the season. A small mob of first cross ewes which are owned and managed by Alex and brothers Sam and Nicholas is an opportunity given by her parents Ron and Nikki, an important stepping stone to getting a foot in the door of agriculture.

Growing up along with her brothers, spare time was often spent helping on the family farm. Working with cattle or sheep, fencing or endless hours at harvest contract mowing, raking, baling or wrapping hay and silage, was never seen as a chore but more a privilege to be involved in the family business.

After completing schooling at St Mary's and Marian College in

Myrtleford Alex moved to Wagga Wagga, New South Wales. Here she undertook a Bachelor of Agricultural Science at Charles Sturt University graduating in 2021.

A COVID pandemic dramatically changed the outlook of the second half of Alex's degree with it all transitioning online. Whilst this had its challenges it opened up new opportunities like being able to take on an employment opportunity at Austrex, a cattle export company and have a greater involvement in the family farm. Alex's studies and extra time working at home really cemented that farming was the career she wanted to pursue.

Outside of agriculture Alex rides horses, plays netball and enjoys spending time with friends. Alex has been a passionate horse rider from a young age attending pony

club, competing at eventing and show jumping competitions and through the winter months fox hunting with the Murray Valley hunt club. Some very generous people kindly gifted Alex a couple of very talented horses which enabled her to be quite successful at the Royal Melbourne Show taking out Champion and Reserve Champion Hunter on separate occasions. This has been one of her greatest horse-riding achievements.

In 2019 and 2020 Frank offered Alex the opportunity to come down to Tasmania for some work experience over the breeding period and during university holidays. A massive eye opener to the opportunities agriculture has to offer and the level of professionalism in which it can be done. Each time Alex left she was inspired by the way the farm was run and how welcoming the whole family were, but never considered moving to Tassie.

Well four years on from her first work experience at Landfall Alex has just finished her second year of fulltime work and whilst moving away from family was the hardest decision ever made it's definitely been the best yet.

First year of employment at Landfall was pretty chaotic trying to keep on top of fulltime work during the day and university commitments at night and on weekends, leaving not much time for anything else. Alex's second year in Tassie has allowed her to become more involved in life outside of work. Encouraged by the boys at Landfall she took up playing football for the first time for the Old Launcestonians Football Club making it to the grand final but unfortunately falling short of the premiership.

At Landfall Alex oversees the dryland side of the farm which has been an opportunity to increase grazing and cattle management knowledge and

Rhondda Doyle, Alex & Mary Ferguson

Ron, Alex, Nicholas, Nikki & Sam Ferguson

Alex with Ollie & Maggie

experience with the mentorship and guidance of Frank & Tim. Opportunities have been endless thus far at Landfall from participating in pasture principles

and cattle assessment courses, to the exposure of the walking encyclopedias that Frank, Gerald and Tim are, something she is very grateful to be a part of.

Like many other young people in agriculture Alex hopes to one day own and run a farm of her own back in the area of her family farm. Everyday working alongside the team at Landfall inspires and challenges the mind to continue to push the boundaries which will upskill Alex in her future endeavours. Alex is extremely grateful to the entire Archer family and Landfall team for being so supportive and caring and looks forward to what the future holds.

# Spring Sale 2022 Round Up

The Nutrien spotters missed this bid!

Frank with Ted & Alison Laurie, successful bidders of two top selling New Ground lots.

Tim Wheeler, Sandra & Steve Elliot from Sheron Angus and John Chilcott

A change to our auctioning process allowed the bulls to relax in the viewing pens whilst the auction was held in the main pavilion with video footage only. Feedback from our clients and industry leaders has led us to believe this selling method will continue, however, we are always open to suggestions.

It was great to welcome visitors from most States, including Western Australia registering on farm. Confidence in travel continues to increase for our clients.

Thankyou Zara, Kate & Lou and their catering team for providing sale day refreshments. The Old Launcestonian Football Club guys taking charge of the post sale BBQ sure takes the pressure off the Landfall team.

Adam Mountjoy & Ryan Carpenter

Sam Hood, Kelly, Lily, Jimmy & Lennie

Michael & Sarah Mather - Congratulations on the arrival of your daughter Poppy

Nik Preece, Nick Campion & Steve Crawford

Mick Aldridge, Mark Poulsen, Peter Aldridge & Tom Shaw

Robbie, Joe & Hedley Archer

Nutrien's Lauren Reid & Allira Grosz recording sale details

Alex, Nikki & Ron Ferguson

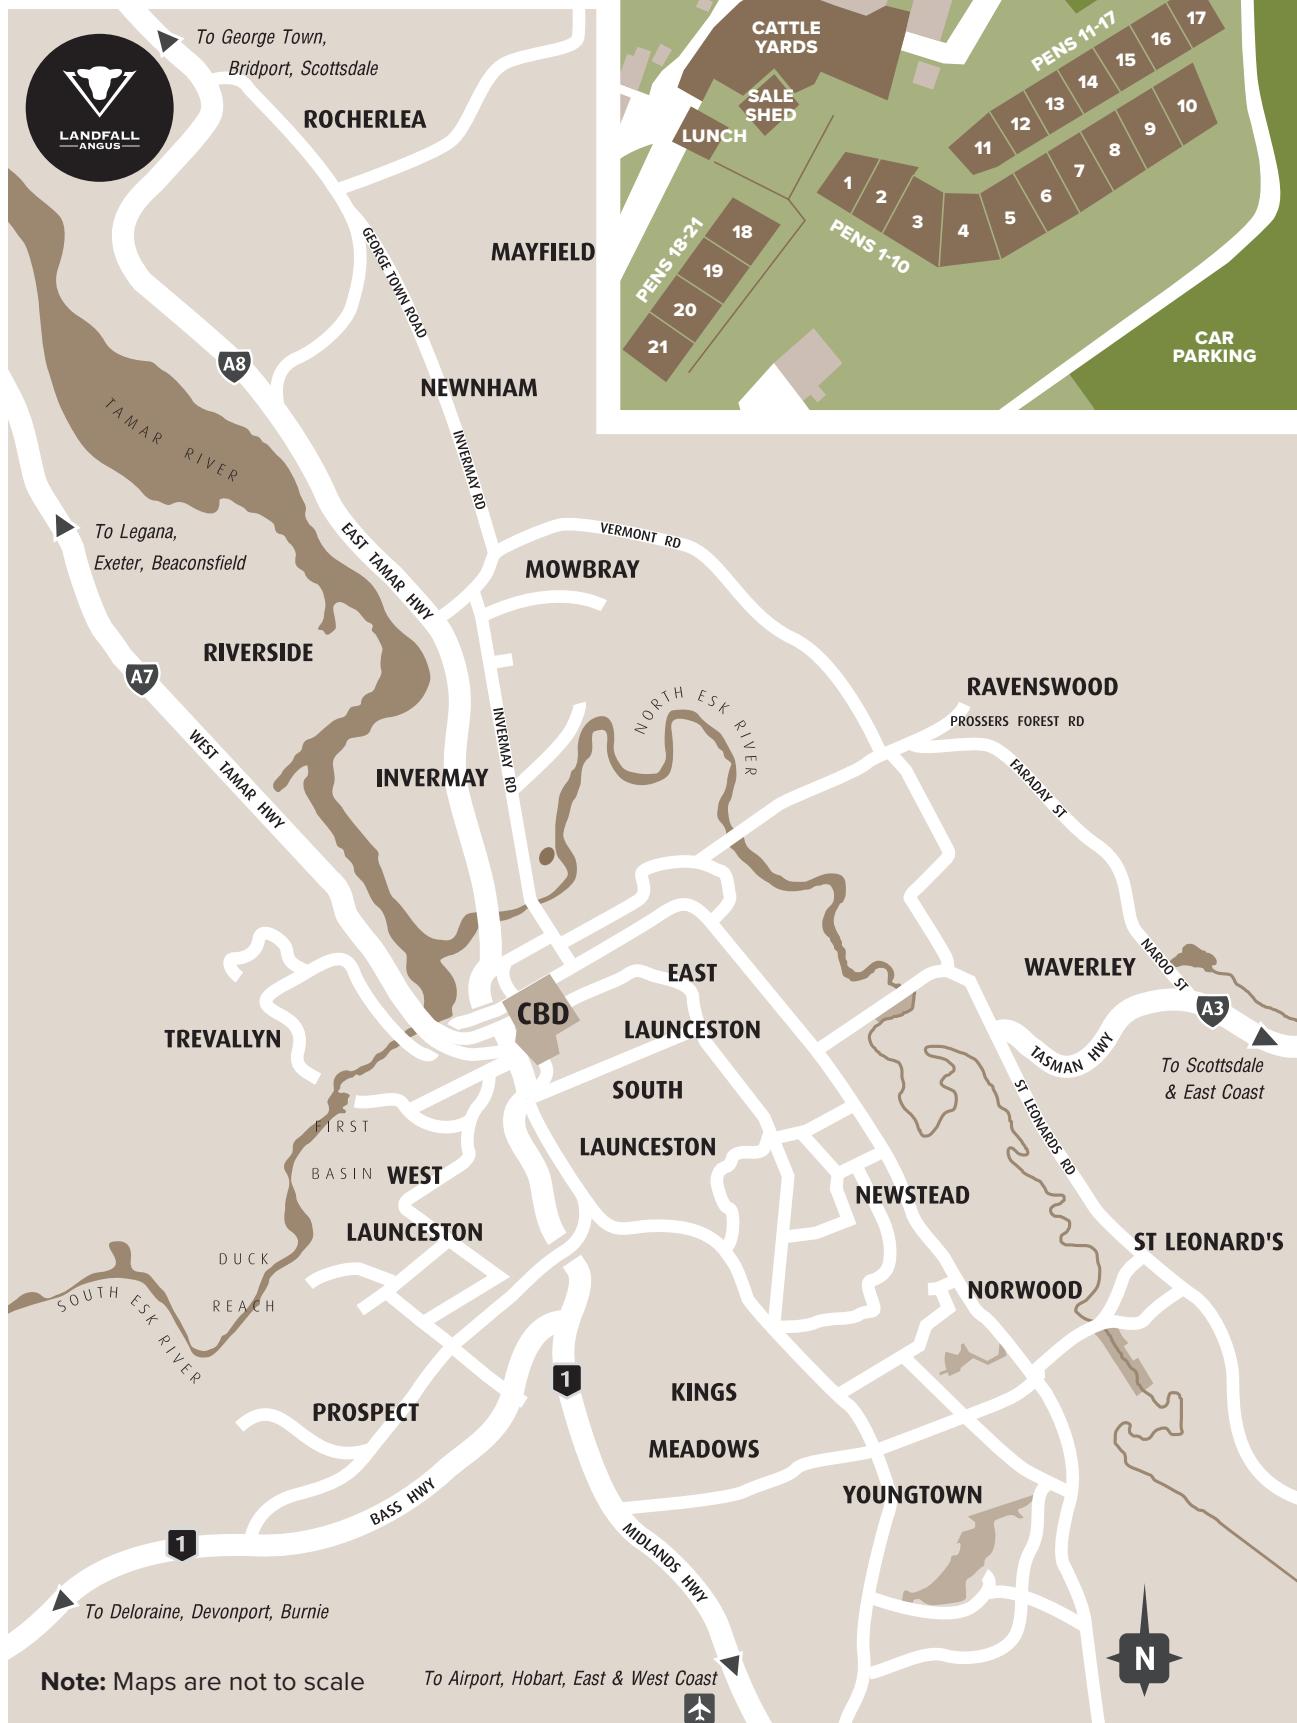

David Ball, Mark Lamprey & Brian Richardson
