Sale Location: 7.3 kms North West of Winchelsea on the Cressy Road. The Cressy Road (Goosney St) runs off to the north of the Princes Hwy between the Winchelsea School and Hospital. Follow the sealed road 7.3 Kms until you reach the front gate that is on the right. Follow the signs past the homestead to the sale complex. Vic roads Map 92.

PLEASE BRING THIS CATALOGUE TO THE SALE
For video & sale information visit:

www.murdeduke.com.au

Welcome to our 2023 Autumn bull sale. We are offering 109 18 month old bulls, a combination of ET (IVF and Moet) conceived, AI bred and natural matings. They are genomic and fertility tested, independently structurally assessed and are in forward condition, ready for work.

As it was for many the last three years have been a enormous, years to remember, challenging and rewarding all at the same time, fluctuating seasonal conditions, booming commodity prices but always our foot has been planted firmly on the accelerator. Our year was highlighted with a wonderful Autumn bull sale where we sold 99 bulls to a top of \$30,000 averaging \$13,808 and an even better Queensland sale where we sold 69 bulls sold to \$30,000 averaging \$17,072 and the continued success of Quarterback within the industry.

The Quarterback story just continues to gain momentum, he has been used in 92 herds across Australia and New Zealand and has close to 2000 progeny recorded with Breedplan after only his first 18 months as a semen sire.

Murdeduke Quarterback Q011 November 2021

This exceptional level of use is stemming from wonderful calf reports, the maturing of the bull phenotypically, his exceptional EBV package, great structure and wonderful calving ease. His early results from AA benchmarking program have been very pleasing confirming he passes on calving ease with short gestation and low birth weights and docility. He ranks third for docility in his cohort. His strength comes from the engine room of herd the Barunah family which features CSWK304 and CSWU25 two of our very best performed matrons.

Feedback from our Matrons sales, which saw females being sold to five states with complete clearances at both sales has been fabulous. It was hard to sell some of our most highly prized cows like Jemma H200, Jemma L123, Panda D40, Jemma E175 (dam of renowned ABS high fertility sire Murdeduke Kicking) and Barunah K304 (the grand dam of boom sire Murdeduke Quarterback Q11 and Sterita Park stud sire Murdeduke Nightrider) as they have been the backbone of our herd but we had to make room for the next generation and we are pleased to see they are making valuable contributions to the industry, excelling at their new homes.

Murdeduke's herd was founded on trusted, reliable, high performance sires like the Te Mania sires Emperor, Ada, Africa and Unlimited, Ardrossan A241 and Admiral, Rennyalea Edmund, Millah Murrah Klooney, Kenny's Creek Eclipse, Milwillah Gatsby and Coonamble bulls Elevator and Hector. Recently Emperor sired flush brothers Hussar and Kicking have continued our journey, giving us a lift in many traits. Murdeduke Kicking leads the way on the fertility front on the back of his Platinum status in ABS's High Conception Rate Program which has seen him deliver up to 15% above average conception rates.

Stud Sire Pheasantry VTMP1479 Dec 2022

In a quest to maintain our momentum we are pleased to report our stud sires Pheasantry, Phat Cat, Nic Nat and Prospect are all breeding beyond our expectations. Pheasantry is providing unparalleled super high marbling and EMA scan results with his sons expressing plenty muscle, doing ability, structural soundness and docility. Pheasantry is the breeds equal third ranked sire for IMF at 8.7 what sets him apart from those above him is his 12.2 for EMA and a total of 7 traits in the top 1% of the breed. Nic Nat will make his international debut in NZ later this year after a successful inspection during the spring.

Stud Sire Coonamble Nic Nat N439

The Stud herd is run in conjunction with extensive prime lamb and cropping enterprises. A free range piggery, which is the home to the branded pork brand Otway Pork, can also be found at Murdeduke.

Competition between the enterprises ensures that commercial drivers help determine our breeding principles.

MURDEDUKE'S BREEDING OBJECTIVES

Our breeding objectives are designed to provide genetics that deliver efficient, easy calving cows and calves that stack weight on quickly and make processors grin when they see the quality of them.

“The unseen bonus our bulls provide is an ability to improve carcass performance and fertility without sacrificing type.”

In our quest to supply superior animals we not only collect breed plan data but we have moved to **genomically testing all our calves**. Our cattle are independently structurally assessed both as yearlings and regularly as mature cows. We also ensure that nutrition is not compromised in our often challenging environment. By managing nutrition and rumen function for optimal performance year round our bulls express their potential without compromising joint and bone development which can be the case with short term sale preparations.

To unlock the potential of Murdeduke's quality assurance program we encourage producers to also adopt cutting edge animal nutrition and management techniques. Early rumen development and appropriate animal health measures ensure calves maximize their performance on farm and hit the ground running when they enter a feedlot.

Breeding Objectives Deliver at Beef 2021

Beef 2021 saw our breeding objectives deliver on the big stage. Gippsland client, Barry Hollond won three sections of the carcass competition firstly at the preliminary state level and then at Beef Australia 2021's national level including the Meat Standards Australia's national Award for the Highest Indexing Carcass.

The national MSA Index Award for the highest indexing carcass was hotly contested competition with some 3.5 million carcasses graded, with Mr Hollonds Angus steer carcass coming out on top. To top it off the steer was grass finished.

Barry also won two state classes with Murdeduke blood steers in the pasture fed pen of three dressed steers 260 to 340 kilograms and 300 to 420 kg export chiller classes. These entries placed 5th and 6th respectively nationally. Barry joins growing list of Murdeduke clients achieving success in carcass competitions around the country.

Genetics

Sires featured in the herd over the next few years include Millah Murrah Paratrooper and Quixote, Rennylea L519, Beast Mode, Varilek Geddes, 38 Special, Pine View Mogul and Baldrige Goalkeeper
Bulls used to ensure calving ease is maintained in the herd include our newly acquired stud sire Te Mania Pheasantry, Sitz Stella, Rennylea Prospect, Coonamble Nic Nat, Landfall New Ground and Chiltern Park Moe.

The most exciting news we have is the continued use of Murdeduke Quarterback and Millah Murrah Rembrandt and Rocket Man in our breeding program. Quarterback, Rembrandt and Rocket Man epitomize the modern Angus providing calving ease, growth, fertility and great carcass merit.

MURDEDUKE'S CLIENT SERVICES

Murdeduke is situated 1.5 hours South West of Melbourne just off the Princes Highway at Winchelsea. Our client base stretches from Tasmania, to the SE of South Australia to East Gippsland to as far north as Julia Creek in Queensland.

We hold an annual bull sales in March (Winchelsea) and August (Rockhampton) and have a large selection bulls for private selection in the spring. Semen for both commercial and stud purposes is freely available from our leading sires.

As part of our service we value the opportunity to visit clients on their properties as it gives us an insight into their production systems and how our cattle may be fit into them.

Barry Holland and Lachie Wilson celebrating Barry's Beef 2021 win.

PRE-SALE INSPECTION

The bulls will be penned at 11am ready for your inspection on sale day. Please allow extra time to make your selections as the bulls will not be run through a sale ring. Inspections prior to sale day can be organised by appointment. There will be an inspection day on the Thursday 23rd February from 9am, all are welcome and no appointment is needed.

METHOD OF SELLING

The bulls will not be run through the ring but rather sold with the screening of an individual photo featuring the lot being auctioned. The auction will be live streamed by **Auctions Plus** allowing for over the phone bidding. We encourage you to move freely between the auction room and the display pens during the auction, returning to the auction room to bid.

WARRANTY

The Bulls have been independently assessed for structural and reproductive soundness. As a result, we believe they are ready for work. If, during the first 18 months a bull becomes infertile or breaks down due to reasons other than injury or disease contracted after leaving Murdeduke we will :-

- Provide you with a satisfactory replacement or issue you with a sale credit for the purchase price of the bull on a pro-rata basis less any salvage value.

We strongly suggest that you observe your new bull when he is first introduced to the cows and if you have any concerns please don't hesitate to call us.

HEALTH

Murdeduke has a J-BAS score of 8. The bulls have undergone full 7 in 1, Pestiguard and Vibrio vaccination programs we do, however, recommend booster shots on an annual basis. A Virbamec broad-spectrum drench was administered in February. The bulls are HGP free and have not been fed animal by-products.

Please Note: The bulls have undergone a pre-sale examination by Chris Saunders of Precision Breeding.

The examination involved the palpation of the testicles, exteriorisation and visualisation of the penis and a visual appraisal of general well being.

Semen was also collected and tested for motility and % live. All the bulls were found to be in excellent general health and fertility. We retain the right to collect semen, at our cost, from all bulls for our own use and progeny testing purposes.

DNA TESTING

Genomic testing has been conducted on the sale team allowing us to provide you with enhanced EBV's. The bulls have also been tested for genetic disorders with their status being identified. BVDV scanning showed no PI's in the team. The catalogue carries a Sire Assured status being sire verified but not dam verified so we don't guarantee the parentage of the bulls.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA
SV : the sire has been verified by DNA
DV : the dam has been verified by DNA
: DNA verification has not been conducted
E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

HEALTH AND SAFETY

Under normal circumstances our cattle are placid and quiet however care must be taken when inspecting the cattle as crowd pressure can alter their behavior. Please don't crowd the cattle and ask for assistance if you would like a closer inspection. Visitors enter the cattle pens at their own risk. No Children are allowed in the pens.

Covid Precaution. Remember to Social Distance

SELLING AGENTS

Charles Stewart and Nutrien will conduct this year's sale. The auction will be simulcast live with bidding accepted through the Auctions Plus viewing platform.

A rebate of 2% is allowed to agents nominating and accompanying buyers to the sale. **Nominations must be made by 4pm the day prior to the sale, with settlement being made within seven days to be eligible for the rebate.**

The star of our show. Quarterback typifies the modern angus, with an excellent data set, elite maternal pedigree and real eye appeal. Used in 92 herds producing close on 2000 progeny in his first breeding season Quarterback is delivering outstanding calving ease, plenty of growth and carcass attributes that few sires can match. He was ranked third for docility in his AA progeny test cohort and has already sired sale toppers with the first of his progeny hitting the sale ring last spring.

Broken Bow did a great job for us some 10 years ago so we jumped at the opportunity to use Geddes, a stronger more powerful version of Broken Bow. Geddes hasn't disappointed delivering a run of thick, meaty, cleaned skinned calves with good structure and disposition. His outcross pedigree is a bonus.

Has done all we have hoped for. Provides excellent structure, muscle and unequalled temperament in his progeny. Suits cows that need structure, punch and quietening.

How to use:

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure:

- A score of 5 is ideal
- 4 and 6 show slight variation from ideal, but this includes most animals. Any animal scoring 4 and 6 would be acceptable in any breeding program
- 3 and 7 shows greater variation, but would be acceptable in most commercial breeding programs, however seedstock producers should be wary
- 2 and 8 are low scoring animals and should be looked at carefully before purchasing

A 1-5 scoring system is used for sheath attachment. For feet and leg assessment, animals need to be on a hard, flat and even surface where animal can move/stand naturally.

Traits:

	<i>Scoring Range</i>	<i>Description</i>
Front Feet Claw Set	1 - 9	1 - open divergent; 5 - good; 9 - extreme scissor claw
Rear Feet Claw Set	1 - 9	1 - open divergent; 5 - good; 9 - extreme scissor claw

Reference: Shape (primarily curl) and evenness of the claw set.

Front Feet Angle	1 - 9	1 - steep (stubbed toe); 5 - good; 9 - shallow heel
Rear Feet Angle	1 - 9	1 - steep (stubbed toe); 5 - good; 9 - shallow heel

Reference: Strength of pastern, depth of heel and length of foot.

Rear Legs Side View	1 - 9	1 - straight (post legged); 5 - good; 9 - sickle hocked
----------------------------	-------	---

Reference: Angle measured at the front of the hock.

Rear Leg Hind View	1 - 9	1 - bow legged; 5 - good (parallel) ; 9 - cow hocked
---------------------------	-------	--

Reference: Direction of the feet when viewed from the rear.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEPtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate a lower score.
	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate a lower score.
	Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a lower score.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au
